Operator error. That's why you get a wrench and spacing guage even when
you only buy one barrel.

> Gotta watch that. And they are 'clunky' to reload fast. Although I was almost as fast
> as with my S&W 66.

They are clunky because of the cylinder latch at the front. The
placement of the cylinder latch is a factor in the superior accuracy,
and if you have sufficient accuracy, the reload isn't all that much of a
problem, is it? ;)

>
> Pointing it to an old power supply in the tower.. Not that old though..
> would moving the radio away from the equipment help?

Maybe and maybe not. Probably not, unless it is a big move.

With well designed radios and outside antennas you shouldn't hear the computers.

For instance, My HF rig is setting directly under a 19 inch monitor and directly over the computer (which has the cabinet removed.)
Directly to the left of the HF rig is another computer (bout 3 to 4 inches from the rig) and the monitor for that rig is adjacent to the one over the rig.

There is a third computer and monitor about two feet to my left. That computer also has the cabinet off.

All three are networked and the router sits adjacent to the computer that is just to the left of my HF rig. The ISDN router sits under the network router.

My Antenna tuner is to the right of the HF rig and the coax cables run together with the various lines from the computers. My VHF/UHF rig is adjacent and to the right of the antenna tunner and the spare HF rig is above the VHF/UHF rig and just to the right of the 19 inch monitor.

Oh...The henry 2K4 is immediately to the right of the UHF/VHF rig.

An HT setting on the desk will hear the computers.
The VHF/UHF rig which is connected to an outside antenna does not.
Running a full KW does not bother the computers.

I have taken no special precautions in either keeping the RF out of the computers, or the RF inside the computers from getting out (covers off the

two)

What I have found is that the modem I had prior to going with the ISDN connection was a really bad radiator where the HT was concerned and could be heard as much as 20 feet away. It was still not heard by any of the base station equipment.

Currently the station is not grounded except through the AC line.

That is due to a back hoe catching my ground system and pulling the whole thing out through the basement wall. At least they didn't get the rig, but they sure made a mess of the one part of the basement wall and cracked it almost to the foundation in one spot.

Unfortunately I could buy one whale of a *nice* station for what it's going to cost to repair that basement wall next spring.

Roger (K8RI)

Why do Democrats strive ceaselessly to outlaw ownership of guns? To save
lives? If this is so, then why do they also ceaselessly ascribe to abortion
as a means of birth control? To save lives?
I smell a RAT, a hypocrytical RAT, at that!
Thank the heavens above that Alexi Gorebachov lost.

Source record: 96485

It's interesting how the left screams gun control, more laws, more legislation. One should note that the existing laws didn't stop the guy. I wonder what the outcome would have been if two or three of the seven, or even of the other employees, had been packin their own protection. Hmmmm, might not have been seven. Maybe two or three, but I'm sure some leftists will say it could have been twelve or fifteen.
One thing is for sure, we, being honest citizens, need not worry about each others weapons, only the criminals.

8. A Georgia Radio Rescue

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-01 07:26:41 UTC
From: Anonymous <anonymous@anonymous.anonymous>
Message-ID: <3a5030ea_2@anonymous>
Source record: 96486

01-01-01 A Date That Will Live In Infamy
A Georgia Amateur Radio operator ran afoul of the FCC when his tin carport roof collapsed, pinning his already disabled Ford Thunderbird in the rubble. In his efforts to save the radio inside the car, the semi-sober owner desperately clawed his way through the corrugated metal and rotted timbers that had engulfed the vehicle. In what became a comedy of errors, the Amateur, due to the now-keyed mic in the car was clearly heard as he swore and used the most foul language possible. Many in the immediate area also heard his wife plaintively yelling, "Get that M----- F---ing radio out of the car! It's MY radio! I paid for it! " The man was heard to respond, "You shut the F--- up! Can't you see I'm getting my only good pair of Levi's cut up by all this metal?"
The Ham's wife, never at a loss for colorful language retorted, "You get my f---ing radio NOW!"
The wife was then heard saying that she was going to call 911 and get the Fire Department to bring out the jaws of life to remove the entrapped radio. This later became unnecessary, as the Georgia Ham, at great risk to life and limb, was able to retrieve the radio thus saving an already rocky marriage and assuaging an equally rocky wife.
This otherwise heroic rescue was tainted by tape recordings made by area Amateurs that were consequently forwarded to Riley Hollingsworth. It seems that the local Hams were aware that this man is on notice for using foul language in the past and could lose his license for any future violations. The man's wife, a Novice, is not expected to be charged for transmitting on frequencies for which she is not licensed.

As an interested observer of your discussions on gun control. I would like to point out that in Australia we do have gun control, it appears to work. We have nothing like the murder rate that your society has. Armed hold ups are rare enough to make the national news, as are murders. Drive buy shooting are simply unheard of . I have no problem with walking down any street any in any city at any time. To "pack" any sort of gun is clearly unthinkable. The biggest threat to life here is snakes, (a shovel suffices) and drunk drivers (2 dead in this state, Victoria, over the last week and a half). Perhaps you guys should look at how the rest of the world lives, you might learn something.

It wasn't operator error. Ie, not the cylinder gap. I had
it back to DWA (actually drove out there) and one of the
workers took a look at it and said "yep!"

They went all through the gun, but the problem they said
was the cylinder spacing tube where it sits against the crane.
It was too short. (That's evidently something that has to
be 'hand fitted', one of the reasons you can't change
cylinders as a consumer on the things, otherwise I would
have bought both 22 and 22Mag cylinders....)

They said they couldn't finish the gun that day, so they
shipped it back to me, and when it came back it had the
"gold" trigger they used to change something like $150
for as a 'rework option'. WOW is it nice! And it never
misfired again.

By the way, right before they went 'out', I was talking to
one of the guys there about a mod to allow both 22LR
and 22Mag from the same frame. DWA was one of the
few that used different barrels, but with them being so
easy to change...

My idea was a 357 cylinder on the 22 handgun with
'inserts' for either 22LR or 22Mag. They didn't like
the idea that someone might actually drop in a 38,
so they were kicking around the idea of taking a 32
cylinder and boring it to about 35, and using a DEEP
rim cut for the inserts. The cylinder had to come
totally off to change it (to pull the extractor out of
the way), but it should have worked.

By the way, my 722-V8 is just so sweet... I never
would have thought shooting a 22 revolver could be
so much fun!

Perhaps you should too. It's not a gun thing, as much as
it's a cultural thing.

Look at Japan? Fairly violent for a culture with almost no
guns at all. And England has virtually no handguns. Of
course, there you cannot be assured that you are legally
defending yourself if you are attacked by an intruder in
your own home.

But just to blow your argument out of the water with
simplicity, look at the Swiss. Virtually 100% firearms in
homes. Fully automatic firearms are readily available
with simple paperwork.

Or the Check and Slovakian situations. When the east
block fell, the former Checkoslovakia (and I KNOW I
mangled that spelling) issued formal calls to it's citizens
to rush to get guns. Just in case the Soviets changed
their minds and decided to come back. They even
divided their country peacefully.

Almost as valid as your argument would be to tell us
to move to the southern hemisphere or put an ozone
hole over the US.

It would appear that your gun control advocates are also in control of
your media. Same as in America. We have no enforcement of existing gun
laws as enforcement might reduce gun crimes. The Clinton administration
wishes gun crime to get so out of control that there be a popular outcry
to ban all guns. Once guns are banned, the media, like in your
Australia, will not report on gun crimes so as to reinforce the myth of
utopian gun control.

Meanwhile the rest of the world looks to the USA for everything else.

That statement is just Bullshit!

Check your facts, and keep your crazy gun laws to yourselves! The murder rate here in Australia is nothing like yours. Here, we would not think of carrying a gun - no need to, thank heavens - or our gun laws. I hope the views expressed are not typical of Americans. It enough to make one feel unsafe, even from here - new experience in VK land!

Peace and good will through out the year!

Not according to the ICPO ("Interpol"), which tracks such things. Your news media (being on the side of the gun ban) isn't going to tell you that it had been an utter flop, but luckily we are not reliant on Aussie media.

Happy New Year!

I hope this message finds you well.

First of all, Bro. Stair is still here! Some of you clowns thought he'd leave the air after 2000, if Christ did not come, guess what? Stair is alive and ready to get MORE SW time!

Now that we have a republican president, we will begin the clean-up of this nation. GW has made some good cabinet choices. Let's hope they do a good job. We need to support the Christian Collition, and National Allaince, and help then in anyway to support anything that will honor Christ.

I also support KV4FZ, and KT4TR and the rest of the Better Amatuer Radio Federation. I intend to spearhead an effort to revive the B.A.R.F and Stumpjumpers, and they will be more powerful than you can imagine. Go ahead, call me names, make your stupid threats, they don't bother me in the least. Any coward can make threats from a keyboard and mouse.

All you wannabe's pay attention. You get on here and make rude comments about WWFV, Brother Stair, WWCR, etc. But no actions? Why dont you all put your money together, and build your own station? Then you can air your homosexaul education shows and other filth that you support.

Have a good day!

Japan's crime rates are significantly lower, in fact lower than ours. If they are violent as you say perhaps it is the lack of firearms that accounts for their lower homicide rates.

> And England has virtually no handguns. Of

Like the English we also do not allow hand guns. We don't shoot intruders, we call the police who send them to court, where they get a fair trial. It works and it is a good system.

I don't know about the Swiss or the Slav situation perhaps your could provide me with your sources of info so can discover for myself. The homicide and crime rates can be checked out at http//:www.ABS.gov.au You might also try reading Aus. newspapers. As well you will see we don't live in a "gun Culture". You might be interested to know that when tight gun laws were proposed for Australia I was opposed to them to be honest I thought they were over the top. However the results speak for themselves. I personally value the freedom to go where I want, do what I want with out fear, or wondering whether the next person is "packing a gun" or not. Drive bys and armed hold ups are for the most part are

things you see on TV - American TV. I hope it remains that way.

And you were afforded the opportunity to cast your personal vote for or against it, right? It didn't happen suddenly by government edict, with no prior notice given, just a sudden mandate, right? I thought not. So much for a free and open society where citizens have input into what happens to them. Evidentlt your constitution gives your government all the righs and you all the obligations.

>it appears to work.

Well it is being made to *appear* to work, insofar as your media are in bed with the element which is committed to making it look like its working.

> We have nothing like the murder rate that your society has. Armed hold ups
> are rare enough to make the national news, as are murders.

Same here, with the exceptions of the "routine" gang and drug thug conflicts which will never be under control, given that the participants will never be interested in obehying laws, whatever they are. They will have guns and use them, whatever laws are passed. By far violent crime is related to theelement of society that will never conform to any law, but will -does- prey on those who do conform, and thus are usually unprotected. Those who depend on the police to protect them, all the time. Not many homes have a police presence when an intruder forces his way in. I supose you don't have any such activities there? More likely you like the idea of not needing personal p[rotection so much you don't like to consider what is actually out there.

Drive buy
> shooting are simply unheard of.

As they are where I and most Americans live. Unfortunately there are inner city areas in almost all cities where the population isn't so fortunate. Getting all the guns out of the hands of the criminals won't happen by passikng a law, that should be obvious to anyone with a brain. Unfortunately it is not. We already have far more gun restriction laws than would ever be needed to handle any crime problem related to guns. It is unfortunate that far too often authorities car not able or are unwilling to follow through on enforcement of many of those laws which would help very much. So the gunbanners want more laws that won;t be

enforced. The end result being that only the lawabiding willbe affected,and not just by the existance of laws restricting them from possessing the means of defending themselves. They will also be at the mercy of the criminals who never did and never will pay any attention to what is or is not legal. Classic case of punishing the innocent in a vain effort to control the guilty. Also a classic case if lame brained, pie in the sky thinking.

>I have no problem with walking down any
> street any in any city at any time.

That would be because you never do it in certain areas. I have no problem with walking doewn any city street I want anytime I want either, and I do. just have sense enough to what areas to avoid.

> To "pack" any sort of gun is clearly
> unthinkable. The biggest threat to life here is snakes, (a shovel suffices)

Maybe the crooks are too busy watching where they walk, too.
We used to have a shotgun/pistol here that was called a Snake Charmer, a .410 suage single shot that was deadly on snakes. Never heard of any person being shot with one, but some 'official' somewhere up ther decided they qualify as a 'sawed off shotgun', even though they were manufactured that way, and banned them. Now we have to pack shovels for snakes, just like you. Or a full length shotgun. Most people don't bother.

> and drunk drivers (2 dead in this state, Victoria, over the last week and a
> half).

Well I don'te think banning guns will halp that problem, banning juice might be a better choice. Your Giv'ment can hand that one down suddenly one day, too. Be on guard, it's probably coming.
I'm curious: Far more drunks kill people with cars both here and there, than ordinary citizens who own guns. So why don't you advocate just banning drunks instead of private ownership of weapons for personal defense? That too complex a problem for you?

>Perhaps you guys should look at how the rest of the world lives, you
> might learn something

Believe me, we have. We did. And we didn't like all that much of what we learned. If our government just decided to suddenly hand down a ban on private ownership of guns as your did, they'd have far more on their hands than just a simple law enforcement problem. They'd be facing ouster.

CTCSS = Continous Tone Coded Squelch System

PL = Private Line (This is a Motorola trademark)

Both systems are the same, a system of sub-audible tones that open the
squelch on the target receiver.

To operate without this system, simply turn it off. To operate with
the system then the Transmitter and the Receiver must be set to the
same tone frequency.

Source record: 96505

PL is a sub audiable tone (digital or analog) that is transmitted/received to open up the squelch (receiver) on a selected group of radios.On a shared repeater system,there may be 5 users sharing the same frequency.Each users radio would have a different PL/CTCSS tone.That way one user will not hear the other users communications.That is why on some radios there ia a monitor button.On a shared system,you are supposed to check to see if anyone is using the repeater(by pressing the monitor button)before you transmit,so that you will not interfere with their communications.If you have a radio that does not have PL,and you are listening to a frequency on a shared (community) repeater,you will hear everything that is transmited on that repeater.Another good thing about PL is,you can sometimes activate the PL when you are receiving noise that opens the radios squelch(intermod,paging tones,ect)and still receive your communications w/o the annoying noise.

I hope that helps.

Dave

Well,

It simply won't work here. The fact is, guns have been in "our" society so long, so many people have them that banning them just won't work. The part that stymies the gon control freaks is that "rahthuh" sticky business about the Right to Bear Arms. It is that very right that protects our rights as citizens and prevents the US Constitution from being abrogated. It prevents the leftists, socialists, and communists (yes, they ARE here) from gaining control. The reason guns are a Right in the USA is the fear of an oppressive government. Many republics have been overthrown thru out history partly due to the citizens' inability to prevent it or protect themselves therefrom.

Many bad things have happened through the passing of laws that sound "good". After all, the anti-constitutionalists are smart enough to know that a sudden move to socialism, or worse, would cause an uprising and bring out those horrid guns that the citizens have a right to have. So, the way to achieve their goals is via "creeping" socialism. Pass laws for the public "good", laws that "appear" to be good ideas (seat belt laws, and gun control) which the public will accept as "good".

Not being an American, your view is one of an outsider, i.e., you don't have understanding of the American "mind" and our approach to government and its effects on the public. We *fear* oppressive government and don't want that to happen here. For me, I would rather die in a hail of gunfire than to give up the way of life that I know here--and I would not trade my guns for your snakes!

Which brings up another area of interest to me. I have watched National Geographic, Discovery, and Crocodile Hunter and have been fascinated by the range of dangerous snakes in Australia, as well as that funnel web spider (shudder). I would almost rather encounter a Taipan as a spider! I HATE spiders. I also think that Croc Hunter is off his rocker to muck about (is that the right word?) with those snakes. I mean, grabbing a tiger snake by the tail, or wading around in ponds where he can't see what's lurkin'. Comin' over here messin' with rattlesnakes. (UGH!). Methinks we'll read about Steve Irwin in the obits one day. We don't have as dangerous a snake as you do, but let me tell ya, you don't want to be disturbin' no Eastern Diamondback. They DO pack a mean bite, and one hits ya, you know you've been hit! And I AIN'T, repeat, AIN'T gonna do battle with a 6 foot rattler with a shovel! LOL! I prefer to be about 12 feet away with a 30 ought 6!! We, luckily, don't run into many rattlers in populated areas. We more likely will encounter our version of the copperhead, venomous, but not extremely toxic. Unlike

a rattler, which will warn you (usually) with that distinctive buzzing sound, the copperhead will strike without warning. Because they blend in so well with their surroundings, one is likely to get on one before he sees the snake. Again, I'd rather be packing heat instead of banging on him with a shovel. The harmless ones like the Blue Racer, garter, water snakes, I leave alone. A blue racer, or commonly called black snake, is actually good to have around, and I won't kill them. Don't mess with 'em, either: they are irritable and, while not venomous, pack a nasty bite--like your carpet snake.

Best to ya in Australia, and I wish I could visit there some day.

Who the hell you calling a clown, you look just like BOZO with out make-up.

>thought he'd leave the air after 2000, if Christ did not come, guess
>what? Stair is alive and ready to get MORE SW time!

Only because of a few idiots like you!

>Now that we have a republican president, we will begin the clean-up
>of this nation.

Why do you think this nation is so dirty? Why don't you clean it up yourself instead of relying on somebody else. GW is going to follow the agenda that pleases the money of texas, which is oil and chemical companies, not a bunch of fanatical nuts like you.

>GW has made some good cabinet choices. Let's hope they do a good
>job. We need to support the Christian Collition, and National
>Allaince, and help then in anyway to support anything that will
>honor Christ.

How, by calling people niggers and jews as you have done so many times on this NG?

> I also support KV4FZ, and KT4TR and the rest of the Better Amatuer
>Radio Federation.

The word is amateur, and KV4FZ is no longer a valid call sign. HO HO

>I intend to spearhead an effort to revive the B.A.R.F and
>Stumpjumpers,

The only thing you could spearhead is a large pizza.

>and they will be more powerful than you can imagine Go ahead, call
>me names, make your stupid threats, they don't bother me in the
>least. Any coward can make threats from a keyboard and mouse.
>All you wannabe's pay attention.

Wannabe's? Your the wannabe, you wanna be on HF but are too lazy to get off of your fat ass and study to upgrade your license or pass the A+ certification.

>You get on here and make rude comments

Just as you do.

>about WWFV, Brother Stair, WWCR, etc. But no actions? Why dont you
>all put your money together, and build your own station?

We already have our own stations on HF.

>Then you can air your homosexaul education shows and other filth that
>you support. ^ learn how to spell moron.

I didn't know there was such a thing as a "homosexual education show", you seem to know all about it, is that were you learned you "special" skill.

Dwight,

I hope you aren't gonna tell me it was an M151! If so, you ARE lucky! It was the short wheelbase that got a lot of people in trouble with the M38 and CJ5. The'd come around on you before you could stop it. I used to HATE to back those little cargo trailers because they were short-coupled, as well.

Oh, I got hung up one time with a '47 Willys Jeep. As a teenager, I used to work part time for a storekeeper in the local community. I stocked shelves and delivered groceries to shut-ins. The Jeep belonged to the storekeeper, and he was known to "imbibe" at times, and eventually lost his driver's license. So, I did a lot of his driving, etc. and got to use the little Jeep myself. I thought it was SO kewl and FUN. One day, my Dad told me to clean up the back yard and get rid of the brush and sticks in the garden area. I went around to the store and got Elisha's Jeep. I began to gather up the trash, grass, etc. and haul it out to the back of the lot. Behind the garden, the area was overgrown with "broom" straw. I gathered up several loads and backed the Jeep thru this brush to the edge of the woods, making several trips without incident--just a 16 y/o kid enjoying the work because I got to drive the little Willys. On one of these "excursions" I backed slowly down thru the brush when WHAM! Suddenly I was looking up at the sky at a very steep angle! I thought I was actually going over backwards! I got out to find that I had backed off in a DEEP ditch. Horrified, heart pounding, I thought, boy, you've REALLY done it now! Examining the Jeep, I was relieved to see that I hadn't hurt the truck, but I was hung up on the frame with the real wheels just barely touching. I tried 4 low, but the wheels just spun. Not wanting Dad or Elisha to know that I had run the Jeep in the ditch, I frantically searched for a way to get it out before I was discovered. I found some boards and a jack and raised the Jeep enough to get the boards under the rear wheels hoping to lift it enough to get the frame off the edge of the ditch and pro-vide enough traction for all the wheels to grip. But when I tried to move forward, the boards just kicked out from under the wheels, and I was STILL stuck. I repeated the process--same result. By then I was getting really anxious. After the third attempt to get unstuck, I got really aggravated. After placing the boards back under the wheels and more under the front wheels, I went and made some "tent" stakes and drove them down behind the boards front and rear to prevent them from kicking out again. At first, the wheels spun on the boards, but I decided to make one last mighty effort. I raced the little 4 cyl, let out the clutch, and with a mighty "roar" and cloud of dust and smoke, the little Jeep "jumped" out of the ditch. I was extremely relieved that I got out and wasn't caught. Well, not quite. Dad heard the commo-

tion, and came out to see what his son was doing making all that noise! So, I had to explain that I got stuck in a ditch and had just got out. Instead of yelling at me, he said, "Well, son, why didn't you call me? I'd have helped you get it out!" Not as bad as I had thought. But, you know kids--afraid ole Dad's gonna "kill" ya if he finds out.

I drove that old '47 Willys for 3 years for the store guy. He decided to sell it during my Senior year, and I begged and pleaded Dad to help me buy it. He didn't believe 17 year olds had any need for a car (this was in the mid '60s). I tried everything in the book. I told him the Jeep was much safer for me since it didn't do much over 60 and he wouldn't have to worry about me wanting a 396 Chevy. The insurance would be cheaper. I could do more errands, etc, etc, etc. Nope. The Jeep got sold, and Elisha bought an Oldsmobile. I later tried the same thing on a '53 Chevy for $300. Six cyl, easy on gas, etc, etc, etc. Nope.

But I never lost my love for Jeeps because of those high school years delivering groceries and driving Elisha around town. The feeling is getting stronger again, and I have a brochure from the Jeep dealer now! Who knows? Might be my next vehicle purchase. Do old men regress? LOL!

Yes,

It does sound neat. But I think the objections are valid. The cost is prohibitive--I think I heard 7 million just to Get it there)--due to the logistics of maintenance. Unless you are willing to let it operate temporarily, you have to commit to repeated trips to replace batteries and do routine maintenance. Then there is the control system that would be needed to keep it running here on earth. What happens if it hangs up? You can't just hop in the car and run up the mountain to turn it off. What if it refuses to respond to commands? What kind of interference would it cause--at least until the batteries died? It WOULD be nice, even as a temporary experiment, but I believe the logistics and costs wouldn't justify it.

Gordon,

The real question is:

Does a 10 lb package on the moon make more sense than a 1000 lb package in orbit if both cost the same in terms of dollars and in terms of the size of payload you have to launch to get it there ?

Bob

Hello,

I received my General class license in 1993. The last time I used any of it was in 1998 I believe, when I worked some HF CW/SSB while home on leave. I was wondering what sorts of changes have occurred in the past few years. Is there somewhere I could go to find a quick summary? I don't need major details, just wondering if there are any significant new regulations, changes to licensing structure/priveleges, etc. Thanks. I'm looking to maybe getting back into it a little on the side here, maybe get my Advanced/Extra finally.

Hello,

I've been thinking about getting back into amateur radio after a hiatus of a few years. I used to do a lot of HF SSB and CW (enjoyed CW more, personally), but now I'm in an apartment, so not much room for antennas. Also, I'm more of a technical person. No offense to any of the wonderful folks I've chatted with over the years, but in a lot of ways I enjoy the technical aspects more than the conversation.

I've got a BS in Computer Science and recently received my MS in Computer Engineering. I enjoy (used to anyway, haven't done it in a while!) building things, although of course if it can be solved in software rather than hardware I'm much happier :-). Anyway, I'm looking for avenues to explore. I'm very short on ham equipment right now (plenty of computers however), and not inclined to spend lots of money on fancy off-the-shelf gear.

What sorts of topics are "cutting edge" in amateur radio these days yet still accessible to knowledgeable hobbyists with limited budget? I'm an accomplished computer programmer, microprocessors don't scare me, digital strikes me as the way to go, yada-yada-yada, so... what should I do? :-)

Incidentally, I'm in the Columbus, MS area, stationed at Columbus AFB. I suppose that should influence my interests too... it wouldn't do me much good to start experimenting with 1.25 meter spread spectrum techniques (just an example, haha) if there were nobody around here also doing it!

Sorry for rambling, I tend to do that. Thanks for any input.

Message-ID: <871yunt1vk.fsf@fulcrum.mignet.yi.org>
Source record: 96518

I've been thinking about something I saw, using a direct conversion receiver where I and Q channel baseband signals are created (by mixing two "copies" of the input signal with two LO signals 90 deg out of phase with each other, etc), then these two signals are fed to a DSP that does everything else. So in theory you could demodulate basically any (narrowband) signal by just changing the program in the DSP, right? I've been considering the feasibility of making a computer controlled DDS/PLL VFO in the 6 or 2 meter band, and then having a DC receiver with an IQ channel digital backend for single-signal reception of whatever modulation types I can write a program for. Heck, I have a pretty speedy (550MHz) computer, I bet initial tests could be done using the stereo line input on my sound card as the DSP input and my computer as the DSP! Sound possible? (Not that I'll listen if you say No :-)

You get far more radio communication per kilogram out of a repeater in LEO
or near GSO, because the Moon is so much farther away and any particular
point on its surface has two-week outages in solar power. The engineering
problems are also significantly greater: the lunar surface is possibly
the most hostile environment in all of near-Earth space, because of those
long cold nights, and even with nuclear heat sources, the lifetime of
solar-powered surface electronics packages is much less than what we
expect of satellites. Finally, the transportation costs are much higher,
and rides there are scarce at any price.

Pure and simple, it's a lousy place to put a radio repeater for use by
Earth-surface hams. Which is what radio-amateur satellites are all about.

Yes we can all see the propaganda coming out of Australia saying that gun control is good. Like the 44 percent increase in a certain segment of crime in Australia. Yep, its all merry in the land Down Under if you wear the politically correct Rose Colored Glasses. Lets see, didnt Australia have a gun ban in 1992. Not much later than that around perhaps 1996 wasn't there a mass killing spree in Australia where some wacko shot up a bunch of people. That was with Gun Control in AU. I guess that also explains why many people in Australia said screw the gun ban and decided to keep their guns and bury them. That is why all the crappy ones were turned in because people kept the good guns and equipment for later use. Its a good way to fight off a tyrannical government. Of course, the ones who support gun control are the cowards and lemmings who lack the fortitude and expect the police to save them. The police won't save you because they will show up at the last possible moment when the blood is running from your wounds all over the floor. And when they take your dead body to the mortuary. Plus gun control and the morons dont realize that criminals will always carry guns or alternative methods of killing. You can kill with a numerous methods. For example. knives, ballbats, bricks, etc. Its a big fallacy and gun control is supported by tyrants.

That statement is just Bullshit!
Check your facts, and keep your crazy gun laws to yourselves! The murder rate here in Australia is nothing like yours. Here, we would not think of carrying a gun - no need to, thank heavens - or our gun laws. I hope the views expressed are not typical of Americans. It enough to make one feel unsafe, even from here - new experience in VK land!
Peace and good will through out the year!

It wouldn't be hard to kick the Aussies asses especially with countries such as China not far from their shores. Kind of like Indonesia with its 200 million people. Heck, they could pretty much overrun Australia now. Oh, that is what they are doing with Australias multiculturalism and liberal tripe

Just ask yourself why Algore lost 30 contiguous states that have
120-million-plus people.
The reality is that the "vocal minority" you speak of is the antigun nuts
who have nothing but Washington offices, beaucoup foundation-grant cash, a
fistful of staffers, letterheads, and largely-overlapping boards of directors.

We will have more come to a small-town gun show here in North Carolina 40
miles away - based on last year - than HCI's state affiliate claims to have
members. And almost all of HCI's state affiliate's members are ghettoized to
just two college towns!
Scandals of
antigun politicians - that even the NRA won't print!

If that was the case, all that Clinton would have to do is suddenly resign
around the 18th of January, which puts his buddy Gore in charge for about 48
hours, then the pardon is issued, Bush or no.

Of course. Use a duplex sound card so the computer can get
audio in and out simultaneously, and go for it.

It's actually quite easy.

15 regular household light bulbs' worth.
FCC Part 97, Subpart A, Section 97.313 (b)

This started as an discussion about the US government's (in)ability to regulate freedoms, that the Bill of Rights guarantees certain basic rights that can't be infringed or abridged by government. Amateur radio is a hobby that is strictly defined, limited, licensed, and regulated by the FCC.

It's a great hobby, I have many 'ham' friends, and there isn't anything wrong with it. I'd like to see more people participate.

What's wrong is attempting to make people believe you 'run a TV station'; to suggest or infer that the First Amendment prevents the government from controlling amateur radio operation. They do.
To say otherwise is just plain dishonest.

Amateur radio is a "grant" of license, not a First Amendment right.
At the start of WWII all amateur operators were shut down. I've read that some amateurs' equipment was confiscated, though can't confirm it. But the fact is that the license is a "grant" that the FCC can change (basically on a whim) if "such action will promote the public interest, convenience, and necessity..."

>> >> >"Jim Patrick" wrote:

>on what frequencies it will operate. I decide what the programming content
>shall be. I decide when, where and how it shall be operated. You, sir, can
>blow it out your ass. I have stuffed your silly argument so far up your
>rear, that you can taste it.

Frequencies ("channels" to regular people) are limited by the FCC.
Content - what's permitted, prohibited, and mandatory. Up to FCC.
Power, roughly equating to area of broadcast. Limited by FCC.
When, where, and how are all subject to FCC regulations.

Subpart A -- General Provisions
Section 97.5 Station license grant required.
Section 97.9 Operator license grant.
Section 97.13 Restrictions on station location.
Section 97.27 FCC modification of station license grant.
Subpart B -- Station Operation Standards
Section 97.101 General standards.
Section 97.103 Station licensee responsibilities.
Section 97.105 Control operator duties.
Section 97.109 Station control.
Section 97.111 Authorized transmissions.
Section 97.113 Prohibited transmissions.
Section 97.119 Station identification.
Section 97.121 Restricted operation.
Subpart D -- Technical Standards
Section 97.301 Authorized frequency bands.
Section 97.303 Frequency sharing requirements.
Section 97.305 Authorized emission types.
Section 97.307 Emission standards.
Section 97.313 Transmitter power standards.

The license system changed in 2000.

Basically, the code test is now 5 wpm for all HF privilages, Advanced is
no more for new licenses. You still have the privilages as a General you
had in '98.

Take the new written and you will be an extra.

Take a look and search around www.arrl.org for the latest.

If you've been overseas, welcome back to CONUS.

Yes, and what is the maximum limit on a CB?

Hell, you couldn't even light a C-7 Christmas bulb with that.

Hell, we have commercial radio stations that aren't licensed for the power I
am authorized to use.

Anyway, your argument is still irrational, and is only a vain attempt to
divert attention away from the failings of your other arguments.

PS, you haven't answered the question, are you sucking up to the government
when you get a license to operate a car under the legally posted speed
limit?

I call on you big fat wheezing bastards to turn in your tickets. You are a discrace to all Ham Operators. You sonofabitches will not allow the ARES nets to operate with out a bunch of QRM from your jamming. What the fuck is wrong with you bag of shits? The boys down there are trying to pass traffic where there is no phone and power. Over 500,000 thousand without power and you chicken shit sonofabitches want to JAM. I monitored two old EXTRAS whine and complain because the FCC had declared a radio emergency on 7.285 and 3.873. The grass bellyed cocksuckers could not clear the band so these folks could pass emergency traffic. You bastards need to turn in your tickets. Riley needs to get this shit straight. If you pot bellyed pricks want to jam each other then have at it. But you start in on the emergency traffic then you have crossed the line. What have you old cocksuckers done for your community besides keep the local oxygen supply company in business? Stop this foolishness and get involved in public service or at least let those who give a shit provide the service.

This was a discussion about the US government's (in)ability to
regulate freedoms, that the Bill of Rights guarantees certain basic
rights that can't be infringed or abridged by government.

Ham radio is strictly defined, limited, licensed, and regulated by the
FCC, as is all radio broadcast. Your license is a "grant" that the
FCC can change (basically on a whim) if "such action will promote the
public interest, convenience, and necessity..."

>PS, you haven't answered the question, are you sucking up to the government
>when you get a license to operate a car under the legally posted speed
>limit?

Just a weasel to your 'I gotta TV station' deception that got crapped.
Freedom of the press? Certainly not unlimited, in spite of your
attempt to slip one over on t.p.g. Despite the First Amendment's
".....Congress shall make no law...." the FCCs jurisdiction shows
that freedoms can be, and are, 'limited' in some cases.

So what about the Second Amendment? It says "....shall not be
infringed..." implying even the states are restrained. But the
position that the main clause of the 2nd Amend't is "unlimited" begs
to the question about definitions of:
"the people"
"keep and bear"
"arms"

True, their views are only accepted because they speak for a small minority
of left wing agitators who get a large amount of money from Groups such the
Ford Foundation and other foundations. That is why they have any power at
all because they are a paid pressure group leeching off of others. Most of
these groups hang around the big cities and colleges because they can swap
the trendy airheads public opinion. And trust me on this, I am a part time
college senior and can tell you that many of our young people in the
colleges are trendy airhead who will go along with what is popular and not
what is right or moral.

Nahh .. no problem here. You can send a donation to the qrz address, but no need for get well cards. Actually I found the conflict between the "netters" and "jammers" quite amusing.

My how time flies. It's been a year or 2 since Mr. Hollingsworth brought law and order to 3950. Ok so there's the odd "jammer" these days, but it's just not the same.

Just where in the constitution do you find a grant of power to the
fedgov to regulate the air waves? Hint: The fact that radio wasn't
known then isn't relevant. Also, no constitutional amendment was
written to give the power to fedgov, and commercial and private radio
was unregulated for thirty or more years before the fedgov stepped in.
Do you know why they did that?

> Section 97.303 Frequency sharing requirements.
> Section 97.305 Authorized emission types.
> Section 97.307 Emission standards.
> Section 97.313 Transmitter power standards.

All are unconstitutional regulations, fedgov has no power granted that
overrides the First Amendment.

someone gave me a motorola "pacer" hand held UHF transeiver, and some
of the channels show "ctcss"
what does that mean? it operates same as other (non-ctcss) channels.
also, a button is labeled "PL" and can be adjusted from 0 to 30. Any
idea what that is about?
thanks in advance
adrian

Bingo.

"Plans" abound. Actually doing something is quite a different matter. To my knowledge, nobody has been back to the moon since Apollo 17 left in 1972 - because there was no reason good enough to justify the enormous expense and risk.

You get much more bang for the buck and the booster from low earth orbit or geosynchronous orbit. Compute the path loss and earth station requirements for, say, a 1 watt 2 meter beacon on the moon vs. geosynchronous orbit and it becomes clear why birds like AO-40 get built and "Project Moonray" stays a trivia question.

Heck, the Elser-Mathes Cup is still up for grabs.

The only advantage of a lunar repeater is bragging rights.

The neatest idea I've read in this area is to go for near-geosynchronous orbit - that is, an orbital period of about 23 hours 56 minutes. This results in a satellite that appears to be stationary against the stars. Point your antenna at, say, Betelgeuse and work the satellite. Using that orbit means no conflicts with the commercial geosynchronous birds.

>Did I miss something?
>
You can probably explain it better than I can, Laura. The "repeater on the moon" idea has popped up several times in the past 30 years, but the disadvantages are still the same.

And in addition to that, both the uplink and downlink power would have to be 100 times stronger to combat the 20 dB extra path loss. In addition, the moon repeater would work only half of the time, unless it is nuclear powered.

Two satellites in lunar orbit would be much better, since batteries could supply power during new moon, thus 100 % usability would be possible.

However, the only advantage I can think of using the lunar surface or the lunar orbit is that it would be easy to aim your antenna visually:-).

Hi OM,
TaiWan broadcast station(CBS) use 7.090MHz for political
drumbeating.
In mainland China, I copy it 59+40dB. It is more harder to
copy DX
stations after that.
Please write the email to fucking CBS, to protect our
frequency.

For the detail infomation please visit:

Although factually correct, the address the other guys gave you is the
complicated one; try:

http://www.ten-ten.org

It's an easy-to-remember redirect that takes you to the actual site
indicated by the complicated URL.

You still don't get it, don't you?

Pointing to places where more information can be found *is* leading the
newcomer. It is only the newcomer who does not have an urge to read that
information or has no persistence in following the pointers who has a
problem.

Being a newcomer is no excuse for being lazy.

> Do you know why they did that?
```

Because after those thirty years, the airwaves were becoming so
cluttered with various stations, the freqs were getting almost unusable.
Commercial interests, as well as private citizens, began to complain to
Congress to DO something. The result was the Communications Act of 1934
and the creation of FCC--which replaced another regulatory agency. In
that act, the scope, and authority of FCC was spelled out (see other
posts).

Nope. Most of us recognize that there has to be some regulation and
organization to prevent chaos.

> > When, where, and how are all subject to FCC regulations.

Exactly. And you are arbitrarily "selecting" frequencies on which to
operate a "commercial" TV station, it won't be long before you'll get a
visit. If you are running an Amateur TV, slo scan, etc, of COURSE you
can select different frequencies. But it is STILL governed by the
federal gov't.

So what would you rather have--a well-regulated, organized allocation of spectrum, or a hodge podge of squeals and heterodynes? That's what you'd have if the gov'mint--or SOMEBODY--had no authority.

Make sure and use REGEDIT to make sure you're not infected. I ran
one the first time I got it and nothing happened. W2K seems to be
immune. I checked REGEDIT and searched through it for the virus.

You can only get "infected" if you open the attachment. Also in case no one else has noticed, the message always comes from the same sender, hahaha@sexyfun.net. You can use the Block Senders feature to eliminate all emails from that sender.

When I first got that email, Hotmail didn't know it was a virus.
I downloaded it and tried it. Nothing happened. I deleted it.
No entries in my registry for it. W2K would have asked for my
CD to replace the changed file before continuing. YMMV.

I also don't use Outlook so there's no address book.

Ok, then please tell me, returning to the primary discussion.

Exactly how the government can regulate, infringe or abridge my right to keep and bear any arm I chose?

126. DX-398 hum problem -help needed

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-03 01:30:10 UTC
From: johpet@aol.com
Message-ID: <20010102203010.23905.00000495@ng-mj1.aol.com>
Source record: 96555

On my new DX-398, I get an irritating hum especially on the 60 and 49 meter bands, which sounds like a 60 cycle hum. This happens on the entire 2nd floor of my house, and increases in loudness as I put the reciever close to the hall light switch. Hum is noticable behind the stations that I am recieving, and as their modulation goes down the hum gets louder. This happens on AC, DC , internal or external antenna confgurations.
Sounds like it may be a ground problem in the house AC, but is the radio failing to shield this?
How can I test to see if the radio is defective?
Any insight or sugestions ?
MIke

Hey great creative thinking, but your've overlooked a few issues. DDS (Direct Digital Synthesis) when talking I (Inphase) and Q (Quadrature) is about digital modulation. So don't expect to be using listening to SSB or FM. But then there is no reason why you can't transmit digital modulation on 2m or 70cm. You could even setup digital modulation repeaters. But of course you would have to consider what type of digital modulation to use QAM, PSK or FSK and the number of bits per constellation. So now lets just say that you setted on QPSK.

For DDS to work the DSP you're going to use needs to be capable of operating at over twice the maximum frequency received. So for 2m that's 148MHz. So the DSP needs to operate at over 300MHz. So can your 550MHz PC emulate a DSP operating at around 350MHz when FFT is used abundantly as multiplication?

The ADC is now the biggest criteria. It needs to be able to digitise the RF signal at 148MHz.
Yes, that is what DDS is all about - digitising an RF signal. So thanks to the sampling theorem we are sampling at 300MHz.
Question: can your sound card digitise your RF signals I and Q channels? Your sound card probabarly has an antialiasing filter at around 19.6kHz, a LPF!

But don't get down about this, you can put your ADCs and DSPs onto a PC slot card and do matlab realtime FFTs using your PC. Now your PC doesn't need to operate at 550MHz, and by down loading the fast conversion code onto the DSP, your 100MHz PCI bus will be able to handle the rest. Such R&D development kits are available.

Alternatively, I would recommend to forget about DDS and demodulate you RF signals so the I and Q signals (or the single FM or SSB signals which are now audio) are now below 20kHz. Now your sound card can adequately handle them.
This means looking at 9600baud transmission or less. This is now as possible as the many who have written code to used their sound cards as two channel 18kHz oscilliscopes.

David McKenzie.

I am looking for a audio combiner for mobile use. I have several 2 ways radios and scanners in my auto and would like to combine the 8 ohm, speaker level audio output sources into a single speaker jack.

Its a mixing application, but what combiner or mixer can handle 8ohms 1-8 watts of input power to combine into a single output source, Run on 12volts, Amplify output to 4-8 watts and be reasonable RF imune?. Once set the mixer should not need to be touched so I dont need a device with any easy to change/set knobs. Anyone know of a mixer/combiner that will work?
Many thanks.

Gary

I've spent six hours calling CQ on 40 meters (CW) with only one
QSO under my belt. I'm running a whopping 4 watts with an
antenna at a height of less than 30 feet. Is this pretty much the norm
for someone in my less-than-ideal situation ? Doesn't seem like the
best use of my time. :)

Right...for future reference it's a VBI (Very Bad Idea) to download and launch attachments you get by email. It also sounds like you don't have any anti virus software which would be a VGI (Very Good Idea) to get. Whichever email program you're using you should be able to tailor it to your individual preferences.

HAMFEST/COMPUTERFEST CALENDAR 2001 - ILLINOIS |
last updated January 2, 2001 |

o Please report additions or changes to Bob Parnass, AJ9S, office phone: (630)979-5414, electronic mail: parnass@bell-labs.com. Thanks to Dennis Dale, Rick D. Wilson, John Wass KA9QJX, Tom Harker, and ARRL for providing some of the information.

JANUARY 2001

Jan 7 (Sun): Wheaton, IL - Giant Computer Show & Sale (see | below). DuPage County Fairgrounds, County Farm Rd. & Man- | chester Rd. 9:30 AM - 3 PM. Adults $6, children $2. |

Jan 14 (Sun): Tinley Park, IL - Giant Computer Show & Sale | (see below). Tinley Park Convention Center, 185th St. & | Harlem Ave. 9:30 AM - 3 PM. Adults $6, children $2. |

Jan 28 (Sun): Cicero, IL - WCRA Mid-winter hamfest 2001. Hawthorn Park on S. Laramie Avenue, Cicero, Illinois Note change of venue 2 blocks south of 2000 hamfest! The new location, Hawthorn Race Park, is much nicer than the Odeum. Cleaner, brighter, better food. Tickets $5.00 in advance with 4 stubs. Parking is free. Advance tickets from Kurt F. Rubin, kb9rto@arrl.net and John E. Wiley, K9FID, johnwiley@lucent.com

FEBRUARY 2001 |

Feb 4 (Sun): Wheaton, IL - Giant Computer Show & Sale (see | below). DuPage County Fairgrounds, County Farm Rd. & Man- | chester Rd. 9:30 AM - 3 PM. Adults $6, children $2. |

Feb 11 (Sun): Tinley Park, IL - Giant Computer Show & Sale | (see below). Tinley Park Convention Center, 185th St. & | Harlem Ave. 9:30 AM - 3 PM. Adults $6, children $2. |

Feb 18 (Sun): Tinley Park, IL - Giant Computer Show & Sale | (see below). Tinley Park Convention Center, 185th St. & | Harlem Ave. 9:30 AM - 3 PM. Adults $6, children $2. |

MARCH 2001 |

Mar 4 (Sun): Wheaton, IL - Giant Computer Show & Sale (see | below). DuPage County Fairgrounds, County Farm Rd. & Man- |

chester Rd. 9:30 AM - 3 PM. Adults $6, children $2. |

Mar 11 (Sun): Tinley Park, IL - Giant Computer Show & Sale |
(see below). Tinley Park Convention Center, 185th St. & |
Harlem Ave. 9:30 AM - 3 PM. Adults $6, children $2. |

APRIL 2001 |

Apr 1 (Sun): Wheaton, IL - Giant Computer Show & Sale (see |
below). DuPage County Fairgrounds, County Farm Rd. & Man- |
chester Rd. 9:30 AM - 3 PM. Adults $6, children $2. |

COMPUTER SHOW NOTES

Computer Central computer shows are held at the College of DuPage, Main Arena of the Physical Education Building Park Blvd & College Road, Glen Ellyn, Il. 847-940-7547. $5 admission with card, normal admission $6.00. Opens 9:30 am - 3:00 pm. See http://www.computercentralshows.com web site.

Giant Computer shows are held by Micro Media, Inc. Shows |
are usually held at the Tinley Park Civic Center, 185th St. |
& Harlem Ave., Tinley Park, IL or at the DuPage County Fair-
grounds, County Farm & Manchester Rds., Wheaton, IL. Admis-
sion is $6. Show hours are 9:30 AM - 3 PM. To get on the mailing list or get more information, call (708)974-3123. See http://www.giantcomputershow.com

Computer Country Expo is Lake County's largest computer expo. The event is held on designated Saturdays from 9:30 AM to 3:00 PM. This show features computers, supplies, games, parts, software, accessories, CD-ROM, monitors, diskettes, printers, keyboards, modems, disk drives, cables, expansion boards, services, etc. Lake County Fairgrounds, Route 120 (Belvidere Rd.) & Route 45, in Main Exhibit Hall Building #1=9720,000 sq. feet. For a show map, exhibitor info, and discount coupon, visit the web site at http://www.ccxpo.com.

From: rfrench99@bigfoot.com
Message-ID: <87hf3hxl7t.fsf@fulcrum.mignet.yi.org>
Source record: 96571

Hey thanks for the reply...

Actually, I must not have explained that well enough. My idea was not for the DDS to be computer-generated... the DDS was sort of a separate issue from the IQ channel front-end. The DDS was simply for frequency-synthesis of the LO. It would be constructed externally (using one of the high-speed DDS chips), but would have a serial interface so that it could be controlled by the computer (ie, the computer would just be setting the values in the DDS chip, not actually synthesizing the frequencies).

The IQ channel front-end would mix the LO signal (whether from a DDS or any other source like a VFO or VXO or whatever) with the incoming radio signal (well, twice, one for I, one for Q, with appropriate phase shifts). -Then- these two baseband signals would be fed into the soundcard (or eventually D/A converter and DSP processor) for demodulation. These would be audio-range signals.

Actually, I've found a web page that talks about almost the same thing. It takes the R2 receiver that was written about in QST and the Handbooks (it's a single-signal direct-conversion receiver that uses the phasing method to eliminate the opposite sideband) and replaces the analog phasing stuff with a DSP (using a DSP evaluation board). The author describes demodulators for AM, CW, SSB, and ISB (maybe others). The page is at:

http://www.wwc.edu/~frohro/R2_DSP/Motorola_DSP_Receiver.html

Thanks again for the input. I'm learning a lot as I start re-exploring ham radio again after a few years being out of it. Looks like the time is ripe for me to merge my computer knowledge with my radio interests!

> coupled, as well.

I don't remember which model it was (that was years ago). It was the standard short wheelbase, two seat (rear fold down bench), Army jeep. As for the trailer, I only used them a couple of times. In fact, I think we only had two or three trailers on the whole base, so they were seldon used by anybody.

> But I never lost my love for Jeeps because of

Of course we do. I've got a Ford Exployer Sport sitting in the driveway right now, and I just can't resist those dirt roads, especially after a good rain. The truck is only two years old (38k miles), and I'm already on my second set of tires (chewed the other set up).

155. Rob Carlson, KC2AEI, to Take Over Elmers Directory

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-03 13:15:19 UTC
From: pschleck@novia.net
Message-ID: <3a532552$0$90511$45beb828@newscene.com>
Source record: 96584

Effective January 2, 2001, the new maintainer of the Amateur Radio
Elmers Resource Directory is Rob Carlson, KC2AEI.

Rob will have announcements regarding specific addresses when they are
ready for use, and I will redirect visitors to his Web pages at that
time. In the meantime, any questions or comments about this transition,
or about the Amateur Radio Elmers Resource Directory in general, may be
directed to elmers-request@novia.net, and will be automatically
forwarded to Rob as well.

>for someone in my less-than-ideal situation ? Doesn't seem like the
>best use of my time. :)
>
Steve,

Some questions:

- What time of day and day of week are you operating? Although open practically round-the-clock, 40 is best for ragchewing in the evening and early morning.
- What antenna are you using?
- What frequency(s) are you trying?
- Have you tried answering others' CQs?
- What sort of rig are you running?

I have a 100 watt output transceiver and a trap inverted V at 35 feet. On 40 meters in the evening, a ""3x3" CQ will get me an answer a minimum of 90% of the time. Usual haunt is 7000-7060.

7058 is the FISTS frequency. Good meeting place.

73 de Jim, N2EY

morning.
Between 5 and 9-10pm, two days earlier this week. The one contact was
actually
at 5pm (CST).

> - What antenna are you using?
folded multi-leg dipole (for 20/40/80 meters) up in the attic.

> - What frequency(s) are you trying?
I'm limited to 7100-7150khz due to my license class. However i'm counting
the
days until the next VE session, to upgrade to General. Usually 7100-7110
and
7140-7150 have the least amount of "other" interference, at least when i'm
listening.

> - Have you tried answering others' CQs?
Yep. Strong and weak alike. The strong ones usually get 2-3 other answers
at the same time which drown out my little signal. My best RST has been a
measly 239. Its a far cry from 599. :)

> - What sort of rig are you running?
Heathkit HW-9

The problem with this is that the violence of the incidents increases. Ruby Ridge and Waco were essentially operations to sieze guns and the government simply escalated the level to the point that people on both sides got exterminated. The solution here is to kick out all the string-pullers that are forcing all this so we can all live with a measure of security.

As soon as they take the guns, radios will be next...

I have no way of knowing about your military record, only by what you say. And I have no reason to doubt it. Your knowledge of AF Communications is extensive. Over the period of time you and I were friendly we discussed it a bit.

Another thing of note....anyone who has been in the military can easly recognize another member or ex member. We talk in a certain way, and phrase things in a certain way. Even some words will stand out.

Lllllooooyyyyyddd has none of the above.

I believe you are refering to what is called a LDE (Long Delayed Echo).
Years ago it was theorized that it was a signal reflecting off of the
moon, the Van Allen belt, a rock in space...whatever. To my knowledge
it has not been proved as to what it is.

That will solve your problem. Most CW ragchewing takes place in the General portions of the bands. If you want to do DX however, go for the Extra.

>Heathkit HW-9 [4 watts QRP]

You will probably want to use more power with your attic antenna than what your HW-9 will give you. A low attic antenna will waste much of your power in loss and high angle radiation. (Although QRP is fun and can be done with a poor antenna. My friend uses 1 1/2 watts to a Hamstick while CW mobile and I can usually copy him from 600+ miles away on 40, but it's often difficult copy.) I use 100 watts into 2 sets of Hamsticks in a dipole configuration on 40 and 20 (each antenna is 14' long and 12' high in my attic) and I have lots of great QSOs. My regulars did notice a difference in my signal strength after I moved from my old house where I had a 40' vertical, but they have reported little change in my readability...

The SWBC noise is usually less in the early morning. Good luck in the
General - hope the VE session is not too far off.

http://www.qrz.com

has simulated practice tests to help gauge your readiness.

Don't stop at General - take the Extra test while you're there. All it
costs is your time.

The problem is the antenna. I'm not sure what you mean by a "folded multi-leg dipole" but I think you mean there are three wires ("legs") on each side of the center insulator/feedpoint - one for 20 (about 16 feet), one for 40(about 32 feet) and one for 80 (about 64 feet) on each side. Some or all of the "legs" of the dipole are folded back on themselves because the attic isn't 132 feet long.

The folding results in cancellation and loss of efficiency. It also lowers the feedpoint impedance and raises the SWR, further reducing efficiency. End result is very little of your power is actually radiated.

What sort of feedline? 50 ohm coax, I'll bet.

Have you been able to check the SWR?

Depending on the size and shape of your attic, a simple 40 meter dipole may be a much better bet. It will also work fairly well on 15 meters.

> > - What sort of rig are you running?
> Heathkit HW-9

A decent little set, but it wants to see a 50 ohm resistive antenna. Anything else and it reduces power.
>

Sure!

FISTS (it's not an acronym of anything) is an international society of CW operators. See

http://www.fists.org

(make sure it's ".ORG"!! Got a shock when I tried something else!)

for more info.

One of the main purposes of the organization is to help newcomers. 7158 is the FISTS frequency in the 40 meter segment you are licensed for.
>

> Thanks!

You're welcome! Keep trying and keep the questions coming. I will listen up there when I'm on the air. (On-air time here is dictated by when the little ones are in bed and the honeydew jar is sufficiently empty).

The main problem is that antenna. A good antenna is always important, but with low power it's essential. You don't have any watts to waste.

You'll need a better argument than that, lamb.

Before any type of gun control, the United States Government and the
Austrailian Government (just for examples) each rounded up and slaughtered
millions of their respective native people.

Gun control has nothing to do with it.

I'm sure stair is trying to get more SW time.
I'm not excited about it though as he's a cult leader.
He claims to be the end time prophet of God. That ruins all
his credibility right there as he's just a dumb hick with a mobile
home cult of brainless scrambled defective smegma as his followers.
If anything, someone needs to find stair, douse him with gasoline and
send the demon back to hell where he crawled out from.

169. Help - FT900 messed up band boundaries

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-03 20:02:27 UTC
From: Kenny Gillen <kenny.gillen@libertysurf.co.uk>
Message-ID: <978552158.21215.0.nnrp-07.d4e56f18@news.demon.co.uk>
Source record: 96348

Hi, All.

My FT-900AT has developed a strange problem. It used to let me
transmit in the range 3.5MHz - 3.8MHz (the UK 80m band) but
recently it has changed to not allow me to transmit between 3.5-3.75MHz.
The behaviour is the same as if I tried to transmit out of HAM band, ie.
the TX light goes red, but there is no power output, and a press of
the tuner button doesn't do anything.

The entire range 3.5 - 3.8 MHz is valid in the UK.

Have you seen this, or would you have any idea about how to
reset the bandplan data to the UK bandplan?

Any help would be greatly appreciated.

- Kenny MM0CXB.

173. request repair info re: ft-470 yeasue handheld

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-03 22:15:01 UTC
From: Eric Oyen <n7zzt@home.com>
Message-ID: <3A53A3BC.6165E118@home.com>
Source record: 96352

I recently ran into a problem with my yeasue ft-470 handheld radio.

According to several others, the display is fried (total blank) and as a result,
the radio has been made useless. I need info on where to obtain parts
for repair of the radio....

also, I would be helpful if I could also obtain the complete tech manual

on the device (the radio) as well.

I have tried yeasue, USA without much success (the radio is a discontinued
model and all info pertaining to it is also discontinued).

please repond by e-mail as I don't check here all that often

thanks.

And don't forget boys and girls, Savage Beasts is a term used in the bible though I'm not certain it pertains to those of african blood. I know one thing, God was not talking about us
normal white people. Teheheh. I don't like Pakistani's, Iraqis, most Arabs and Iranians also
as they are violent, barbaric spear chunkers also except they are not black skinned. See, its
not the skin color I hate, its who as a group who wears the skin and their barbaric ways as a rule
and lifestyle.

This happens every day in South Africa. I've been there.
It is very common for blacks to simply grab a white girl, take them
off over a hill or out into the country, rape them and kill them just like
gorillas do. I think they are the missing link between man and gorilla.
Not exactly man, allot of gorilla.

For thirty years or more from when? Radio has been regulated since 1912 with the Radio Act of 1912 - Public Law No. 264, August 13, 1912, 62nd Congress. An Act to regulate radio communication.

Pat Hines wrote:

> Just where in the constitution do you find a grant of power to the

That type of radio already exists, it is called the cb band, a perfect example of non-regulated communications.

Jerry Oxendine wrote:

Thanks -- its a little over 2 weeks away and now that you mention it,
i might as well do a little studying and attempt the extra class exam
while i'm there. I'll ace the general test... at least that's been the
result
with the sample tests at eham.net. With a little cramming and a little
luck hopefully i'll manage >= 74% on the Extra!

> The problem is the antenna. I'm not sure what you mean by a "folded
> multi-leg dipole" but I think you mean there are three wires ("legs")
> <snip>

Yes -- the 20m is in the shape of a V, the 40m is a W and the 80m is
in the shape of two back-to-back Z's. Would a 40m dipole in the
shape of a U (about 50 feet long and the "legs" of the U would be
about 7 feet each) be any better?

> What sort of feedline? 50 ohm coax, I'll bet.
> Have you been able to check the SWR?

Yep - 50ohm. I hookd up a SWR meter and it's showing 1.75 - 2.25
depending on the frequency and band.

> http://www.fists.org
> One of the main purposes of the organization is to help newcomers. 7158
> is the FISTS frequency in the 40 meter segment you are licensed for.

Well -- "will" be licensed for, you mean. :)

Thanks for the info!

On the contrary, CB is regulated. The frequencies, power level, and content are subject to regulation. I admit content is rarely enforced, however frequency and power most certainly are.

Well of course if Lloyd recommends a site, automatically one knows it's dedicated to hating non-whites, immigrants, Jews , homosexuals, lesbians and other assorted creations of God which do not fit into Lloyd's "Weltanschauung."
It's interesting to note the latest news from Yahoo!. Here's just a snippet.

Yahoo! to Forbid Auctioning of Nazi Artifacts
Wednesday, January 3, 2001
ï¿½ï¿½ NEW YORK ï¿½ Yahoo! Inc. plans to ban the auctioning of Nazi artifacts online ï¿½ along with other hate-related materials ï¿½ after several users complained such items promote violence and hate.

In article <kaN46.4104$wz3.134991@news2.atl>, "Lloyd Davies" <n0vfp@bellsouth.net> wrote:

> http://www.halturnershow.com/

> I like that idea because Nazis are trash anyway so anything pertaining to those scumbags should be trashed as well. Or all the Nazi paraphernalia could be brought to the national landfill, Athens Alabama.
Regarding Lloyd's HEADLINES about "SAVAGE NEGRO BEASTS"....if the black fellows are found guilty, then they're no more guilty as whites who commit heinous acts but yet I doubt if we'll see headlines screaming, "SAVAGE WHITE BEASTS..." Crime is crime and law and order must prevail and capital punishment MUST be carried out when there's no doubt whatsoever about the guilt of a person, black or white, of a capital crime. So what's Lloyd getting so uptight about?

So are you saying that the two men who robbed five people, raped two of them in front of the other three, then shot all five - killing four - shouldn't;t be called Savage Beasts?

Is it wrong to refer to brutal criminals in such a manner? Is it not alright to utterly hate what they did?

Or is your blind obedience to the politically-correct prohibition against being judgmental interfering with your ability to see harsh truth? Please, let us know.

I love jewish people but hate is not a crime, only violence is.
Its my right to hate if I want. Its not my right to be violent though.
I completely am against the sale of Nazi artifacts but its because of the horror
those bastards did against the jews, not because of bleeding liberal agenda
that people should not be allowed to hate.

No, antigay is the topic and the shock value is the perversions which are
being presented as normal, to everyone's children. The object is to get at the
children young so they will accept perverted and think its cute and maybe
even join in to try it out. To me, it seems like just another way for gays to get young
people to give them more gay sex.

Apparently their actions are ok, as long as the ones who commit the actions are black.
To liberals, blacks can do no wrong and they turn their backs on the crimes that happen because they have passion for them and understand why they are the way they are.
I say bullpoop. Doesn't matter why they are the way they are, they are still savage beasts and should be brought under control and pay dearly for even considering doing such things.

this is a dynamic ip. theres a better chance of your flood hitting a
totally innocent 13 year old girl chatting on aol than being able to
actually hit the guy that sent you the email.

Well said Mr. Snot, sir

It's thier behavior, not the color of the skin. I am thankful i am white.
A black person will have to work alot harder in life, because of all the
immorality in his genes. Back in the Bible, around the time of Noah's Ark,
Ham, the one of the sons of Noah, look upon his father naked. Noah then
said "curesd be Cannan" Guess who is the decendants of Cannan? Blacks and
other negroid races.

>What exactly is a "hamstick" ?
>Is that a brand or just a generic

Hamstick is a brand name of a popular mobile antenna. It is slim and light and very easy to mount on a vehicle, which is probably why it is so popular. The downside is that it is considerably less efficient on the lower bands than the standard full size center loaded mobile whip.

You can also take 2 Hamsticks and put them back to back in a dipole configuration. The advantage is that you have a small antenna for small attics, or for easy portable operation. They do work, but again the shorter and more loaded the antenna, the less efficient it becomes. I think the wire antennas that you describe in your attic would likely outperform any Hamstick dipole, so I would not advise that you consider changing...

See www.hamstick.com

Any man who commits murder and is found to be guilty MUST PAY FOR IT. ALL MURDER IS HEINOUS regardless of the race, religion, nationality and sexual preference of the offender. It is perfectly alright to hate the crime, hate the perpetrator but perfectly wrong to hate the color of the perpetrator as is in this case and of course in Davies's constant blatherings. It is anti-American to discriminate or didn't you know that? Do you live in a private United States or are you with the rest of us? Do you have your own Constitution or live by your own precious documents? It has nothing to do with things "politically correct" but rather with one's upbringing and sense of right and wrong. But then again you know about what I write but ignore it due to your own private agenda. You have a mission, right? To denegrate! The term SAVAGE NEGRO BEASTS is more of a condemnation of the Negro race than of the perpetrators. This is unacceptable as would be the term SAVAGE WHITE BEASTS. Get the message?If not then think of it this way: if you needed a transfusion and a black person matched your blood type, would you be willing to attach "savage" to anything about him or her? Happy New Year,Turner.

This is horrendous.

I received my first amateur license about a decade ago. I enjoyed the hobby immensely and pursued it on a daily basis. The last few years I've been inactive. Recently I decided to get back in to it so I came to this news group (rec.radio.amateur.misc) to ask some questions and discuss some things.

Yet at least half the posts on this news group seem to be hate mongerings and political agendas. I thought amateur radio was supposed to be a hobby of intelligent, technically oriented hobbyists. What is the problem here? My re-entry to amateur radio is not leaving me impressed. So if I get on the air, do I get to speak with rascists and hate mongers too, get an earful instead of an eyeful?

Of course you have your freedom of speech. But with freedom comes responsibility. A responsibility to act and speak intelligently, a responsibility to hold yourself to a reasonable level of decency. I would not have expected it to be so difficult for a group of intelligent people to exercise this responsibility.

-Rob French, KC4UPR

We are in agreement so far.

It is perfectly alright to hate the crime, hate
> the perpetrator but perfectly wrong to hate the color of the perpetrator

We're still in agreement, but you seem to feel that the mere mention
of the perpetrators race amounts to hate. In that regard, you are
incorrect.
The mention of the race was done so as to point out it was inter-racial
in nature, was as much a "hate-Crime" as the dragging death of a black man
in Jasper, TX, yet no one is referring to _this_ crime as a "hate crime."
It seems when it comes to "hate crimes" the race of the victim only
counts one-way: if the victim is black and the perp is white. Hence,
my intentional mention of the perp's race.

There was no discrimination in my article or post. The whole paragraph
above
has no application to the issue at hand.

But then again you know about what I write but ignore it
> due to your own private agenda. You have a mission, right? To denegrate!

Yes. I wish to denegrate the men who committed the robbery, rape and
murder.
Absolutely. I want to denegrate them, shame them, embarass them and incite
anger toward them. No doubt about it. And do you know what? It's
perfectly
appropriate to do so given the crimes they committed.

> The term SAVAGE NEGRO BEASTS is more of a condemnation of the Negro race
> than of the perpetrators.

Maybe in your mind, but that would speak to the way you think as opposed to me.
People can only think the way they-themselves, are.
Perhaps your sensitivity in this area comes from your own views about blacks. A little
self-examination on your part is obviously in order.

This is unacceptable as would be the term SAVAGE
> WHITE BEASTS. Get the message?If not then think of it this way: if you
> needed a transfusion and a black person matched your blood type, would you
> be willing to attach "savage" to anything about him or her? Happy New
> Year,Turner.

Your view is wrong, again. The term savage Negro Beast is perfectly alright as would be the term savage white beast had the same crime been committed by a white against four blacks. Describing a person as a savage when they act
like a savage is the right thing to do. Mentioning their race has become important
because the way things are in the US today, crimes perpetrated by members of one race against members of another race are no longer treated equally under the law. Crimes by whites against blacks are now "hate crimes" whereas crimes
by blacks against whites are not. This violates the very concept of equal treatment under the law - a guarantee spelled out in the Constitution.

Happy New Year to you as well.

Yes but remember that this newsgroup is NOT ham radio......please reconsider
the hobby cannot afford to lose dedicated people like yourself

Not completely :-)
I build up a web site which offers information for newcomers in an easy to
find way. Works for ham radio as well as for SWLs.
On http://www.radio-portal.org/elmer.html
you will find a search engine offering 380 FAQs, sorted within 34
categories. You may even select the language.

If you're trying to learn about any hobby on Usenet, remember that flames and rude behavior are the norm. I've seen rude behavior rec.aviation.*, rec.kites, and of course rec.radio.amateur.* on a regular basis over the last several years.

Amateur Radio (or any other interest, for that matter) is not a newsgroup. Newsgroups do not represent this or any other hobby. Do not be discouraged. In fact, the rude behavior here probably is a good thing. While these creeps are busy flaming others, they're not on the air wreaking havoc.

Things are not as bad as they seem...

236. "The Red Panties Man" on CB-38 LSB. Did he lose his ham ticket?

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-04 16:18:26 UTC
From: toomanyradios@aol.com
Message-ID: <20010104111826.23201.00001150@nso-mi.aol.com>
Source record: 96314

I've been hearing this perennial pest quite often lately. Not on 14.313, but down "slumming" on the lower side of CB Channel 38. Signal is always very strong...probably the result of a high-powered amateur station being used illegally on 11-meters.

What's the deal here? Did the FCC finally pop him for his 20 & 75m antics? If so, someone needs to tell Riley that he has not ceased operations, but simply migrated down to the CB band.

Don't worry about it. There are enough in Dixie to do the deed. And
not to mention that most of the military armories and arms are in the
south.

When the crap hits the spinning blade, come on down and get some.

Rob,

Unfortunatly ham radio has changed. But it is not as bad as the
internet forums about ham radio. Get on and give it a try. I'd
recommend staying away from 75 phone and 20 phone. CW and digital are
excellent modes. And most idiots cant do either, so your safe.

All in the same attic? That's trouble.

>Would a 40m dipole in the
>shape of a U (about 50 feet long and the "legs" of the U would be
>about 7 feet each) be any better?

Much, much better! I don't know how hard it is to work up in the attic, but if
it were me I'd go with the U configiguration for 40 only and see how that does.
Any bend less than 90 degrees is a real problem.

I presume the attic is 50 feet long and maybe 10-20 feet wide. If so, the wide
flat U configuration is a good use. Another good one is an inverted V, run
diagonally. But it all depends on what the attic is like. Hopefully there
aren't lots of wires, ducts and foil-faced insulation up there.

That may or may not be good - you may have a lossy bit of coax, too.

Good luck! Any possibility of an outside antenna? Stealth wires can be very
effective.

The Clinton administration has left the U.S. unable to defend itself against tactical nuclear weapons, as is just now starting to be realized. This is not just a matter of misguided policy; it is a matter of the government not discharging its most fundamental duty to protect its citizens. History may well judge the leaders who knowingly allowed this to happen to be traitors. You who reelected Clinton have aided and abetted those who ultimately sold your country out. Here's a quote:

"In the area of tactical nuclear weaponry, Russia has a large superiority, making it the dominant nuclear power in the world today.

According to French intelligence estimates cited by Reuters, the Russian military maintains a tactical nuclear arsenal of anywhere between 20,000 and 40,000 weapons.

During the past eight years under the Clinton-Gore administration, most of the U.S.'s tactical nuclear arsenal has been destroyed."

246. Solar Energy DC/DC Converter? OFF The GRID

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-04 19:07:07 UTC
From: John Feist <aa6qn@pacbell.net>
Message-ID: <3A54C9DB.AFA379F8@pacbell.net>
Source record: 96325
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

I have built a 24vdc wind and solar alternative energy system in hopes of being grid independent here in San Diego. With the deregulation and the rising cost of electricity this has become primary goal for me.

Thinking that I could tap off the 24vdc battery bank for the 12vdc power needed to run my radios, tnc's and antenna controllers I was met with erratic charge controller problems, current loops through the rf cables and now have a separate 12vdc battery bank.

My current challenge is to charge the 12vdc battery bank from the 24vdc system. Taking this in mind I did search the web and found a DC Source Battery Charger on Majorpower.com site, BCD300-32-12 for $390. I did find some other various DC/DC converters as well but the cost are a little high also.

Does anyone else out there have a in-expensive solution to this design problem? I would like here from you.

Happy New Year, 73, John AA6QN

Robert, I think the only way to find out is from your own experience, but on the air you'll seldom find anything like is on this newsgroups, at least in my on the air experience.

Also, you might want to check out some of the other newsgroups and mailing lists devoted to amateur radio, for most of them stay close to the subject of their name. ;))

So...what tells the relay to turn on and off now? It's hard to tell from your posting, but I suppose something from the relay circuit is getting back into the electronics (?) that drive the relay coil. My suspicion is that it could be noise from the current interrupted by the contacts opening. You might try putting a snubber network across the relay contacts; it's likely to make the relay contacts last longer anyway. As a wild guess, for mechanical contacts, you might try 100 ohms in series with 0.1uF or 0.05uF. STRONGLY recommend you use caps rated for AC service, assuming you're controlling power line levels to the fans. If that doesn't solve it, there are for sure other options...for example, a "non-retrigger" circuit in the relay coil drive electronics that definitely holds off the relay coil drive for a second or two when the turn-off occurs. Might be good to know also if the coil as it stands now is allowed to "fly back" to a high enough voltage to rapidly de-energize, or if there's a diode across it (assuming it's DC excitation) that might be slowing the release enough to increase contact arcing. Another option: use an opto-isolated triac (or a "solid-state relay") to control the fans instead of a relay.

Cheers,
Tom

I assume you are using some sort of transistor circuit
to switch current to the relay, and that the relay is a
DC relay.

The fluttering is caused because the current is being
reduced gradually rather than shut off "hard". In other
words, your circuit is operating more like a DC amplifier
than like a switch. You probably need to bias the transistor
in such a fashion that the crossover from "on" to "off" is
more abrupt.

> aren't lots of wires, ducts and foil-faced insulation up there.

Well i have two separate attic sections. One, smaller and lower
to the ground is what i'm using now. Its obstacle-free. The other,
slightly higher and longer, has many more obstacles (pipes, ductwork,
and low clearances (due to valuted ceilings). An inverted V at an
angle in the "open" attic wouldn't fit. its about 20'x20' with maybe
8 feet to the peak (in center). If i need ~33 feet per leg.... its
not gonna cut it. I've been up in the other attic once before, and
after a quick evaluation i decided i wouldn't set foot up there
again. (low clearances + tall guy = bad idea).

> Good luck! Any possibility of an outside antenna?

Thanks. Hmm... subdivision restrictions prohibit anything even
looking like an antenna. If it were truly stealth, then i'd be up
for it but i'm not sure how to get a feedline outside. Inside the
house is onething... getting outside is another. Any tips?

thanks --steve, n9xbj

Nice troll! Did you have to turn on your transmitter or put up an antenna to contact this group? Of course not, this is an Internet newsgroup. If you think that this is amateur radio, you need to review your study manual.

But if you were on Amateur Radio and you listened to a discussion you did not agree with,you would simply slide on down the dial. Here, you can QSY to another newsgroup. To come in a newsgroup and start to preach to the inhabitants is rude, crude, and obnoxious.

I agree with Hans. Another simple approach would be to put the output
of the electronics to a flip flop gate. If the ic can't handle the
current of the relay, put in a small relay to control the larger or use
a high current transistor circuit controlled by the ic. Just some
thoughts.

Bill, you show your total lack of knowledge of nuclear weapons.

Tactical nukes can not hit US soil unless fired from Canada, Mexico or Cuba. None of which are storing Russian nukes.

If you are going to make an ass out of yourself, please have your facts right before-hand.

> need?

Here's what's REALLY happening:

The switch/sensor circuit is essntially a sort of nonlinear DC amplifier, meant to turn on when the resistance of the temperature sensor changes enough. The trouble with the circuit used is that it is also somewhat sensitive to changes in supply voltage.

You probably have both the fans and the sensor circuit running off the same 12 volt supply. (Stop me if I'm off on this). If so, when the fans are running, they load down the 12 volt supply slightly. Not a big deal. But when the device cools off and the circuit deenergizes the relay, the load of the fans goes away and the supply voltage rises slightly. That rise is enough to change operating conditions in the temperature sensor circuit so that it reenergizes the relay for a moment. Then the supply voltage drops, and the relay deenergizes...you get the picture.

One solution is better regulation of the supply voltage. Another, simpler method is to put a diode or large capacitor in parallel with the relay coil to slow it down. Note polarity - the diode should have its cathode (the line part) going to the positive and its anode (the arrow part) going to the negative. In other words, the diode is installed "backwards" so that it doesn't conduct when the switching

transistor is turned on. If you use an electrolytic capacitor instead, it's plus to plus, minus to minus. I'd try whatever electrolytics I had lying around, as long as they had at least a 15 volt rating.

Hi group.

I'm going to be taking my general test later this month and despise my
current callsign. I've found a few that I like that are available.

My question is:
What license level must you have to obtain a 2X2 or 2X3 call?
(excluding "vanity" calls)

Please advise?

You of course are using the correct definition of "Tactical Nukes", I think Bill is using it in the sense that ANY missile is a tactical weapon. His terminology is incorrect, however his concerns are correct when applying his definition.

I built a simple circuit to control some fans. When the temperature goes up the fans come on. However when circuit is about to switch the fans off (by de-energizing a 200 Ohm relay), the relay flutters on and off quickly for a second, sometimes longer. Its very loud and annoying.

How can I stop the relay from "fluttering" like this? Do I just need to add the right value capacitor in series with the relay coil or something simple like that? If I am right, what sort of capacitor / value do I need?

Thanks in advance.

Scott.

Me and many others have been saying this for years. The outgoing
regime is nothing but a bunch of Communist supporters. The record
speaks for itself. Now lets see how the Chinks do with our guidence
systems.

And BTW did you notice how suddenly accurate the North Korean missle
got? Amazing eh?

Clinton will indeed go down in history. He will go down as the Nero of
America.

Hi there,

has anyone of you ever tried to get a video/audio signal from a CCD camera module via a radio link onto his computer? Do you have any ideas on how this could be accomplished? I'm not a radio amateur yet (probably by Easter), but this something I'd like to do later.

73,
Oliver

277. Re: SAVAGE NEGRO BEASTS Rob, rape then murder four whites

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-04 23:15:58 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <9333kk$i7o$1@nntp9.atl.mindspring.net>
Source record: 96208
Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc,rec.radio.shortwave

I just took a look at the Hal Turner Program website and read this
disclaimer:

"As a talk radio Host, Hal Turner is considered a "public Figure" under the
Law.ï¿½ This means that Mr. Turner is subject to public criticism, commentary
and being talked about;ï¿½ over which Mr. Turner has no legal control and no
legal recourse.ï¿½ One such situation involves Mr. Turner being mentioned on
Web Sites owned by others.ï¿½
It has come to the attention of Mr. Turner, his radio show staff, The Omega
Radio Network and radio station WBCQ that "The Hal Turner Radio Show" is
being actively mentioned and even promoted on web sites operated by a number
of groups.ï¿½ These groups espouse virulent views.ï¿½
Despite repeated requests to have mention of Mr. Turner deleted from these
web sites, the site operators have refused. They have responded that Mr.
Turner is a "public figure" and as such, they are free to speak about him.ï¿½
This being the case, Mr. Turner feels it necessary to- and hereby does -ï¿½
publicly DISCLAIM AND REPUDIATE any connection to, affiliation with or
support of such groups. Their mention of Mr. Turner and his radio program on
their web sites is being done without permission and despite repeated
requests for removal.ï¿½
The Hal Turner Radio Show is - and will continue to be - a forum for people
to freely express their opinions on a variety of topics.ï¿½ It is important to
understand that allowing the free expression of ideas and opinions does NOT
constitute actual or even tacit approval of such views by Hal Turner, his
radio show, The Omega Radio Network or radio station WBCQ.ï¿½ï¿½ï¿½ Thank you."

The interesting part of it is that Turner doesn't want to be associated with
websites espousing virulent views which of course means HATE, yet how else
can one size up the Turner Program as anything but hateful when his own
website uses the term "SAVAGE NEGRO BEASTS?" Is that not the pot calling the
kettle black? And is it not unreasonable to assume that the main reason why
N0VFP is pushing it is because of its antisocial and narrowminded venue?
Would anyone really expect N0VFP to push any other type of radio show?
I would suggest to Hal Turner that he no longer tries to appear like Shirley
Temple one minute and David Duke the next. And to further understand that if
N0VFP is on here praising it, it MUST be racist.
I myself refuse to buy the Tiny Tenna because of Lloyd's association with
Bill Lauterbach. If anyone says that's untrue, the last time I viewed
Lloyd's website I saw Tiny Tennas all over the place; why it's nothing more
than a constant advertisement for it therefore it stands to reason that
there is definite linkage between Lauterbach and Davies. For that exact
reason I refuse to listen to Hal Turner's Show.

N0VFP has a way of offending everyone BUT racists; I've been offended by his unending anti-Semitic statements and anything to which he becomes associated is therefore antagonistic to me. If anyone disagrees with my reasoning, my mailbox is open. You can't do better than write that letter.

In fact it has, with the passing of a bill outlined in QST's January issue.
Local authorities, stopping someone for another violation, can take action
against illegal CB equipment. I don't know the exact rules, but its in the
magazine (I haven't read the article completely yet.)

281. DDS-driven PLL?

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-05 00:50:24 UTC
From: rfrench99@bigfoot.com
Message-ID: <87ae96ddq0.fsf@fulcrum.mignet.yi.org>

Hello,

I'm working on a synthesizer that will have a wide range (~30-50 MHz frequency range). Obviously I can't use a DDS to simply generate the whole thing. Now, the DDS's that are available can generate pretty small steps... so if I generate a low frequency range, I should be able to multiply up to the higher, wider range with a PLL, right?

Two main alternatives I'm looking at. I want to cover the range 80 to 110 MHz. I can use the DDS to generate 0.8 to 1.1 MHz, then use this as the reference for the PLL with a fixed division ratio of 100... so my final output range is 80 to 110 MHz. Or, I can use a much smaller range in the DDS, say 0.995 to 1.05 MHz, and use a variable division range in the PLL. A microprocessor would be used to compute exactly what DDS frequency and PLL division ratio to use for a given output frequency. I saw something along the lines of this in an article by Ulrich Rohde about modern receiver design in QST several years ago (which I seem to have lost unfortunately).

Is one better than the other, and if so, why? The first method, on the one hand, seems simplest to implement, since I only need to program one device (the DDS) to get a given frequency.

However, the first method uses the DDS to generate a wider range of frequencies. Will this be harder to filter to provide a good reference to the PLL? With the second method it would be possible to filter the DDS output with a fairly tight BP filter to minimize spurs, whereas with the first method, the second harmonic of the lowest frequency (0.8) is 1.6 MHz, which is only 500 KHz above the upper frequency (1.1) that the filter would have to pass.

Any thoughts? I appreciate any input. Thanks.

I'm no electronic genius. I am learning little by little by playing around though, on my own. The flip flop gate, does this just detect a rising or falling current and close/open another circuit based on the edge? The temperature sensor circuit is 100ma.

Scott.

It certainly is wired to the same 12 volt source. The wires coming into the
circuit also feed the fans (.5 amps).

I can see you require remedial education in word definitions and reading comprehension. I give it a try:

The headline you seem to have a problem with reads "Savage Negro Beasts rob rape then murder four whites"

Let's parse (break this down) in a methodical way:

1) Were any of the crimes savage?
(REMINDER: the crimes were: armed robbery, rape, murder by gunshots to the heads)

2) Were the perps savage in the way they carried out any of the crimes?

3) If "yes" to #1, #2 or both, then isn't the word "savage" an accurate, truthful description? Why or Why not?

Let's move on to the next word: NEGRO

1) Were the perps Negroes?

2) If yes, isn't the word Negro an accurate, truthful description? Why or why not?

Let's continue to the next word: BEASTS

1) Given the crimes committed and the manner in which they were committed, were the perps Beasts? (please look-up the definitions before you answer)

2) If yes, isn't the word Beast an accurate, truthful description? Why or why not?

Let's increase the skill level and try more than one word at a time. The next few words seem self-explanatory: . . . . .Rob, rape then murder. . . . .

1) Did the men rob from the victims?

2) Did the men rape two women victims?

3) Did the men murder four victims?

4) If yes to the above, isn't the headline accurate and truthful? Why or Why not?

Now we arrive at the last word in the headline: "WHITES"

1) Were the victims of the crimes white?

2) If so, isn't using the word "white" an accurate and truthful description? Why or why not?

It seems to me that every word of the headline, whether taken individually or collectively, is accurate and truthful. What more do you want than 100% accuracy and truth?

Riley has been made aware of the man behind the red panties issue. This would be Motorcycle Mike of Oklahoma City. He is a Ham and CBer. I can assume Riley is to busy and could care less about this issue.

I'm sure you know what a balistic missle is, but I will play your game.

A balistic missle is one which is guided only by basic balistics as
opposed to active guiding like those fired from attack aircraft.
Basically you set a trajectory and fire away. If all your
calucalations were correct and the equipment performs as expected,
you "lob" the warhead on your target.

Now that I have played your game, please answer the original question.
Thanks.

Good point! Although subs carry intercontental balistic missles.
Ships do carry cruise missles with nuclear capabilities, but I am not
sure a Russian war ship would be allowed close enough to US soil to
fire it. It has a very limited range compaired to the afore mentioned
missles.

No, they cannot.

You're spreading garbage and BS. Local enforcement at
this time CANNOT do ONE DAMN THING MORE than
they could BEFORE this law was passed.

PERIOD!!

Please read the law before you spread stuff like this. This
is TOTALLY UNTRUE!

What the 'new' law does is ALLOW local governments to
ENACT their OWN laws that can be enforced. The locals
STILL cannot enforce the federal law.

This 'new' law limits what the locals can enact to a SUBSET
of the federal laws, and places further restrictions on the
applicability of local lawmakers.

It does NOT give carte blanche to local enforcement.

It does NOT give carte blanche to local politicians.

If your magazine has said anything different, it's full
of bs.

The theory was called MAD, however the number of submarines that were capable of firing ballistic missiles have been significantly reduced. As an Ex chief Fire Control Technician and later a missile officer, I have more than a passing understanding of ballistic missiles. Once we reduced the number of retaliatory strike warheads, the whole theory of mutually assured destruction went out the window. The threat today is more likely to come from rogue nations or terrorists that yearn to die in a jihad. What we need now is a system that will prevent incoming missiles from reaching population centers. If the left chooses not to support such systems, I no longer personally care. I have removed myself and my family from proximity to any large population center and am adequately armed, sheltered, and provisioned to stay the course in any eventuality.

>
> My question is:
> What license level must you have to obtain a 2X2 or 2X3 call?
> (excluding "vanity" calls)

Unless it's changed within the last year:

Group A callsigns (1x2, 2x1, 2x2 beginning with "AA") Extra Class
Group B callsigns (all other 2x2) Advanced Class
Group C callsigns (1x3) Technician/General
Group D callsigns (2x3) Novice

Those are the systematic assignments. Whenever all callsigns from a particular group are exhausted, callsigns from the next lower group will be assigned.

For example, 1x2 callsigns have long been gone for Extras, so 2x1s have been issued in their place. However 2x1s have been gone from the 4th area and others for some time as well, consequently AA 2x2 calls are being assigned there.

1x3 calls for new licensees have been exhausted in most call areas, consequently 2x3 calls are being assigned for new Technicians in those areas.

It has long been a feature that you could request a systematically assigned (not vanity) callsign from any group for which you were eligible. In other words, you could turn in your call now and get another 2x3 call out of the hat. If you were an Extra you could turn in your call for a 1x3, for example (I did that many years ago; went from a 2x3 to a 1x3).

Hope this helps.

Hey John
Auto Zone has some 300VA inverters that run off of 12-24VDC and put out
120VAC. cost $60.00. 500VA is also available but the price jumps .
Of course that rating is into a resistive load. So the VA rating would
go down on most electronics unless they use a choke filter input.
I've run off of a 60AH gel cell at 12 volts but had to charge it
in the car while going to work. It's hot in the summer without a fan.
Good luck

From: Anonymous <anonymous@anonymous.anonymous>
Message-ID: <3a555022_2@anonymous>
Source record: 96233

Someday, when I grow out of my thirty-year puberty stage, I want to be just like my hero, Suzy DaPig! I want to owe money to everybody in the county, I want to have my cell phones shut off for non-payment, I want to sit on my butt in my hovel and look out the window at the passing semi's and smell the sweet fumes of the diesel exhaust wafting in through my leaky windows.
I want to be the bane of the Ham and CB community and just like Suzy, I want to make and keep enemies faster than I can count them. I want to get on channel 38 and cuss better than my wife can, I want to jam Hams and I want to be just as psychotic as Suzy is.
Then, when I get older, I want to go into the news groups and cancel posts I don't like and when that fails I am gonna call all the abuse.coms I can find and lie that I am an attorney and will sue them if they don't shut off users that make me mad. I won't tell them that I am a liar and am impersonating.
Heck, I might even go nuts and send magazine subscriptions to everybody, or I might get on line and spam all my emenies with email ads. Then there is also the possibility that I can do like Suzy and send anonymous letters to your neighbors and tell them that you are dangerous, but I only will do that to every other neighbor on your block so I can save postage stamps.
Heck, I might even find out who you work for and call your employers from a pay phone and I will accuse you of all sorts of dire things so you get in trouble with your fellow employees. I won't tell em' that I am not employed and that I don't have a savings or checking account. I won't tell em' that I am suffering from deep-rooted mental problems. After all, I want to be just like Suzy! otherwise commonly known as.....Dimmy O'Brainless!

>again. (low clearances + tall guy = bad idea).

You might be wise to wait before going up in the attic again.

When you upgrade, you may find many more people to talk to in the General portion of the CW area of the bands. When there are few people to talk to as there are these days in the Novice bands, it's hard to find a contact even if you have a good antenna...

Also if you increase your power, you will greatly increase your chances of having successful contacts over using a poor antenna *and* QRP. I would suggest 100 watts since most of the rigs these days run that power, but I wouldn't go much over that for safety reasons. In fact on the higher bands you may want to run less power depending on the proximity of family members to your antenna...

As I said before, I run an attic antenna that is likely inferior to the one you describe, and yet I get out just fine. You may want to wait until you make the above changes and see then how see how well your present antenna gets out. It may just save you another trip into the attic... :-)

You have it pretty much nailed. Narrower DDS operating ranges are
generally better because they can be filtered more easily.

You could also use a varactor-based tracking filter driven by an 8-bit
DAC to filter the DDS output with a broader frequency range, of course.

> fundamental duty to protect its citizens.

Look, as much as I don't like Clinton, I dislike misinformation even more. First of all, there is no way to protect American citizens from nuclear weapons. At the very best, under the proposed anti-ballistic missile defense system, we might be able to partially defend a few missile launch sites, a few command and control centers, and possibly the White House. The rest of the country will remain just a vulnerable as it is today.

Second, the defense of these sites serves no real purpose. Proponents suggest that even a partial defense might give pause to any country that might attack us, since they would know that at least some of our weapons will survive any attack. Of course, we already have that insurance with our submarine-based nuclear weapons, which are much cheaper than the proposed anti-ballistic missile defense system.

Third, any space-based defense of these sites can be defeated by the use of tactical nuclear weapons launched from submarines. Of course, the proposed anti-ballistic missile defense system includes the use of ground-based systems to shoot down incoming missiles, however we have had little success with this. Remember, it is one thing to shoot down a simple 35 year old SCUD missile (and our success with that was only lukewarm), and quite another thing to shoot down a modern guided missile programmed to defend itself against attack.

And finally, the proposed anti-ballistic missile defense system is going to be hugely expensive (the most expensive weapons system this country has ever financed). When you consider that this system is going to offer only very limited defense, with only limited success, and will offer no more insurance than our existing submarine-based systems already offer, the cost of the proposed anti-ballistic missile defense system simply cannot be justified.

Of course, there are many within the defense industry that are salivating over the prospect of all this money being spent (why do you think they are pushing it). The proposed anti-ballistic missile defense

system will make a lot of rich men in the defense industry a lot richer, and the taxpayers will be screwed again.

> "In the area of tactical nuclear weaponry,

Nonsense.

> According to French intelligence estimates
> cited by Reuters, the Russian military
> maintains a tactical nuclear arsenal of
> anywhere between 20,000 and 40,000 weapons.

And, if you include strategic, tactical, and battlefield, nuclear weapons, our nuclear arsonal is about the same size (give or take a little overkill).

> During the past eight years under the
> Clinton-Gore administration, most of
> the U.S.'s tactical nuclear arsenal
> has been destroyed."

Nonsense. Actually, the number of tactical and battlefield nuclear weapons have increased dramatically over the last ten years (continuing an expansion that has lasted for more than 25 years). Only aging strategic weapons, that serve little purpose today, have been destroyed.

Greetings...

I have up for trade an Icom IC-726 HF plus 6 meter all mode rig. Why buy an all mode 6 meter rig for Big Bucks when you can buy the Full Package for less?!?! This rig is truly beatiful! I think you'd be hard pressed to find a mark or blemish anywhere! This rig has been modified by the previous owner for MARS/CAP operation. I've never received anything but WONDERFUL audio reports from this rig!!! Comes complete with stock microphone, manual, and original box and packaging. Looking to trade for a bit 'beefier' HF rig. 6 Meters is not important, as my 'primary rig' is a Yaesu FT-920. What do you have for trade? Any and all offers considered!

73, es gud dx de N9LXX~~~

Apparently, Clinton ran out of conventional cruise missiles during the
janitor bombings and FY, so nuclear cruise missiles were converted to
conventional warheads.

Just put about a 330mf electrolytic across the relay coil. That should
fix the flutter
problem.

SENSATION ART BELL RETURNS IN RADIO SHAKEUP

Exclusive

Radio sensation Art Bell is planing to stage a dramatic return to the nation's airwaves, the DRUDGE REPORT first revealed Thursday afternoon, reclaiming his overnight slot with an expected 400+ station lineup.

MORE

With legal dramas behind him [Bell sued a broadcaster for libel in a case that ended in settlement] and personal family concerns on the mend [his son was sexually assaulted by a school teacher that was carrying HIV], Bell inked a deal last week to return to the waves, according to sources.

"He's rested. He's ready," says a source close to Bell, who will once again broadcast to millions from his home in the Nevada desert.

Bell is expected to continue his trailblazing reporting -- 2001-style -- on science, earth changes and assorted religious themes.

Bell has drawn strong criticism for airing predictions of imminent massive earthquakes in South California and was at the forefront of the Y2K computer madness

Bell continues his relationship with syndicator PREMIERE -- with several key affiliate switches in play as this transmits.

Bell will jump stations in the nation's #2 market, Los Angeles [darting from KABC to KFI, which is owned by PREMIERE's mothership CLEAR CHANNEL]; and it was not clear if Bell will return to WABC in New York, the nation's top talk outlet.

One top ABC source cautions Bell's return to WABC is up in the air.

"He's quit twice, and come back three times. In two years?" the executive questioned late Thursday. "He could do a first hand testimonial on time travel."

Developing...

They go through the list once. If a call becomes available, they don't go back
and reissue it systematically.

According to the "Curtis and Kuby Show" this morning on WABC, Bell will be working for that station much to the chagrin of Republican Curtis Sliwa. Why wouldn't he work for something as big as it? It's the number one station heard on the Internet and according to the station manager, receives QSLs from New Zealand. Being New York based, it's the BEST..THE BEST...EH...EH...EH...HEH..HEH...HEH...QUEENIE...QUEENIE...PITTSBURGH..... AF2Y

You've never heard of Art Bell? You must live in a cave.

It does belong in this newsgroup because Bell is an active
ham radio, shortwave radio and scanner fan.

If i'm upgrading to Extra in the near future, what would compel
me to change my callsign from a 1x3 callsign? Is it just a
"status" thing? I mean, i have my current callsign (of 6 years)
memorized already. :)

But my AOR "DC to Daylight" AR-8200 Mk-II covers
the frequency that Bell "transmits" upon, and it's a scanner.
What am I missing here ? :)

Cool link to this FANTASTIC scanner-->http://www.durhamradio.com/ar8200.htm

I would assume that KC8JBO had an excellent military record even though I've seen no history of it however I certainly can testify to the fact that Dan had an OUTSTANDING military record in both the Air Force and Army because I have a copy of it.
I never served in Viet Nam. Ran away. Hid under Tolassi's bed for three years in Barre Vermont. The house was empty because he ran away to Canada. Actually it wasn't empty-cockroaches. I had to battle them for every morsel. Finally it go so bad I had to eat them to survive. Mixed 'em with bedbugs for flavor and it wasn't half bad.
Just kidding folks. I was too old, too married, too much a father for Nam but my roommate in college was killed there in a mortar barrage. I think it was in Khe Sanh but can't recall exact details now.
We should never have gotten into that war-ask Dan. Or if we had to the least we could have done was to have been allowed to wipe out the enemy as Goldwater wanted to do. I voted for him-I was the only one in America who did.

Yep - pretty much of a status thing. However, a few benefits are:

1. A 1x2 or 2x1 has a possible advantage during contests as its perhaps easier to pick them out of the howling masses.

2. An oddball US prefix like NI6x will get a lot of attention during the WPX contest or while DXing -- from prefix hunters.

3. Easier to remember (maybe) no one cud seem to remember WA6WTO (despite the fact I was William Tell Overture!) when I had it -- but AC6V seems to be easier to remember.

4. A 1x2 or 2x1 is less fatiguing to send in a CW contest, if you don't use a memo keyer. Nice on straight key night!

5. It sez u know or knew CW -- for those who care (and believe me old timers do, biased as that may be)

6. You are less likely to be considered "new kid on the block" if that bothers you.

Lots of extras keep their old calls -- so its difficult to tell license class from the callsign these days.
What's in a name???

I've seen commercial radios that use a DDS followed by a
PLL multiplier. The designers examined the DDS output for
spurious levels, picked the frequency range they wanted,
then followed it by the right multiplier.

I could tell you more, but then I'd have to kill you. :-)

Never a dull moment!

My only opposition to Art was his constant use of hyperbole and his shameless hucksterism. His wacky callers and even wackier ideologies kept things quite interesting at night. One fear I've always had of Bell is his ability to mobilize the nutcases.

73s,

Steve

I'd suggest that you get involved in any Latin-American Nets on 20 meters that may exist and talk directly with Hams there. Remember: you do not need to be a Ham to post messages to the internet! Feedback here is usually useless.

;-)

Some callsigns are easier to use than others. I used to be WA3IYC - six characters to get across, and two of them rhyme. N2EY is much shorter and none of the characters rhyme. Big advantage under tough conditions.

anyone has
> N1EY yet ;-)

It's correct insofar as the systematic assignment is concerned. After the first callsign lottery in '76 through '78, the Extra calls were all systematically assigned from the 2x1 pool (and then the "AA" 2x2 pool). None were assigned from the 1x2 pool. Holders of Group A 1x2 calls that moved from one district to another *might* have gotten a 1x2, but it wasn't consistent.

After the great callsign lottery of 1996, the 4th area was down at one time to only 12 available calls. I haven't tracked it for a while (I have a perfectly okay one) but whatever it might be now, it isn't many. But, yes, there are 1x2 calls around, however, they aren't being systematically assigned, and haven't been for over 20 years.

> >1x3 calls for new licensees have been exhausted in most call areas,
> >consequently 2x3 calls are being assigned for new Technicians in
those
> >areas.
>
> They go through the list once. If a call becomes available, they don't
go back
> and reissue it systematically.

Actually, they haven't always been consistent in that either. Back in the '60s when they finished the one run through the "WA4s" they went right to the "WB4s". In the 2nd call area, they went through the "WA2s" and then went through them again. I know, because I got WA2FLD as a secondary call in 1976 or '77 long after the first run of "WA2s" should have been done, and they hadn't started the "WB2s" yet.

Hello again,

Only have time for a quick post. Will reply in more detail later.

I've added "rec.radio.amateur.antennas" to the post list because some
folks read that who don't read "misc".

Surf over to:

http://www.nerc.com/~jdegood/coaxtrap

for one guy's solution. You might not want to do all bands, though.

73 till later

Good luck on the ticket Oliver...I like to hear a technical
interest...just off the top of my head you would need to transmit the
video from the camera. You can legally do that with extremely low
power on commercially available equipment now.

However if your talking about some 'real' distance then ham radio is a
good choice. You would need a transmitter at the camera. A suitable
receiver, and then a means to digitize the received signal. This would
be sent to the computer.

I do not claim to be an expert on this digitizing technology..just some
thoughts.

Interesting metaphor, Jimmy!

I'd say he's the Jerry Springer of radio, minus the polish. That's one of the things that makes Bell so believable: The underproduced sound, the lack of glamor. He's good at what he does, don't get me wrong. He just gets way carried off with the "what ifs?"

73s,

Steve

Although most of the 1x2 and 2x1 are "used up" you can get a "recycled one"
under the vanity call system. For availability -- See URL:
http://www.carroll-usa.com/vanity/

For original sequential issues, many of the US States are issuing 2x2 AX#XX
calls now. For example, new California extra calls are 2x2 e.g., AC6HZ.
True of many other states also -- see URL:
http://www.wm7d.net/fcc_uls/call_report1.html
This is WM7D's site which gives the latest issued calls. Check it for a few
days will reveal the current 2x2 AX#XX issues for your district.

Having been a "Bell boy" for years, I hafta agree with this statement.
What I like about him is that he's not afraid to take on so-called
authorities; I've heard him criticize everybody from Rush Limbaugh to the
Montana State Legislature. As fierce as he can be about individualism (most
of the time), I'd like to see him take on Eddie Fritts! Meanwhile, I hope
there's less Gordon Scallion stuff.

Thanks for the tip. I checked the site and found these two
recently issued callsigns in the "9" land:

AA9AC and AG9G

Both are extra class. I suppose the 2x1 could have been
via a vanity request? Maybe a few more days data will
make that trend apparent.

At least there will be SOMETHING interesting to listen to on NYC radio. We are facing the possible loss of listener-supported WBAI because of a power grab from the Pacifica national board, who wants to either sell the station outright, or turn it into a bland, inoffensive corporate-friendly NPR clone. Last year, they tried to do the same at KPFA. Join the fight against the destruction of this historic network and wonderful resource for social justice!

> power on commercially available equipment now.

I know. But (here in Germany) the ones I'm aware of only have about 300 meters range horizontally. Transmitting from a model airplane or rocket would most probably yield a higher range, but if you're getting close to 1000 meters or more, the quality of the signal won't be that good anymore.

> However if your talking about some 'real' distance then ham radio is a
> good choice. You would need a transmitter at the camera. A suitable
> receiver, and then a means to digitize the received signal. This would
> be sent to the computer.

Yeah. I was wondering whether anybody could give me an input on how difficult it is to have a signal with a high bandwidth and frequency from the CCD (which has a normal PAL TV output, I think) "on air" without disturbances and with range. Also, which frequency bands would be useful for this (I guess close to the normal VHF/UHF TV bands). Whether radio amateurs are allowed to use it here, I'll have to look it up. The other problem is to have the signal recorded on the computer, but I think, since it is a TV signal, one could send it into a TV card and record it, or as an alternative, to a VCR.

Every response is welcome, I have no clue yet and am open for everything.

Oliver

Your posting is pathetic! Stick to "disturbing unwanted comments to,
and about sailing vessels!" You remember 58ft sloop Slow Dance-circ.
mid november 1999, the ongoing comms between qualified support
amateurs, members of the sloop, and their families at home. You did
everything possible to agitate and deliberately impede comms.
Repeatedly, you were ask to refrain, but carried on with your pathetic
annoying unwanted and unwarranted disruptive attack. What is the
reason for your present posting? You blammed the sloop incident on
your VOX On/VOX OFF
switch malfunctioning, and your emotionalism due to your deep southern
European roots. Cram that root. Grow up!

Like usual you miss the point Bruce. I didn't say anything
about "believing" in Art Bell you idiot, I simply said the post
is relevent and belongs here.. But nooooo, you have to blow
it all out of shape because you're obviously too stupid to
follow the conversation.

So why don't you go piss on a power line, it might wake
your smartass punk brain up.

To borrow from history, "that depends on what the definition of is IS!"
I expressed my opinion regards what I thought the value of the pathetic
KE4TEW posting was. Being dumber than dirt, I am not capable of
identifying, recognizing, or comprhending shrinking brains.
The tattle-tale posting regarding an Amateur op's legitimacy remains a
pathetic posting!

I've always wondered if it might make sense to cascade multiple DDSs,
each clocking the next in turn, allowing for numerous combinations of
division factors at each chip. The driver software would theoretically
be able to pick a set of division factors for any desired output
frequency that would minimize spurs.

Of course, achieving any improvement might be mathematically impossible;
i.e., you simply couldn't do any better than the
single-chip/single-clock case. Haven't really thought it through.

Source record: 96090

Well,

This is just my own opinion, but I doubt I will ever have a 1X2 or 2X2. Has to do with long held impressions from childhood. In my teens, I badly wanted to get my ticket (1960s), but we lived far from an FCC office and hams were few and far between in that area. The hams I heard on my shortwave receiver or knew personally were all K4XXX, W4XXX, or WA4XXX. Consequently, when I got my first call (KC4KWH), I was hoping to get a 1x3 someday. I could've gotten an N4XXX, but due to my earlier experiences it didn't sound "ham" to me. And the AA, AC, AD didn't either. I wanted a K or a W. Meanwhile, people often referred to me phonetically as Kilo Watt Hours, and one Duke Power guy said that if I ever gave up KWH, he wanted it. When the vanity call program came along I sent in a list of calls I wanted (not researching it, or buying CDs to see what was available). One of them was K4KWH. There is only one other call I want--and it's taken--so I may have this one til I die. I never really have cared about the "class" of license or whether anyone recognizes me as Advanced or not or if they think I,m a Tech. KWH rolls off a key easily and doesn't rhyme, so I'm satisfied. Unless that other call should become available, I'm quite happy with what I have. Makes me seem "older" than I really am! LOL!

> via a vanity request? Maybe a few more days data will
> make that trend apparent.

I'm positive that AG9G was a vanity request (I know AG9A personally, and he's had that systematically assigned call for at least 10 years), and I'm almost positive that AA9AC was, too. In fact, I just checked the chart at http://www.wr6wr.com and find that as of 18 September, AB9AC was the most recent 2x2 Extra call issued.

I lived in 9 land for 26 years, leaving just a year ago, and being involved in the VE program for more than 10 years, was well acquainted with the callsign distribution. I also recall that the 2x2 Extra calls went slow as molasses when they started issuing them (actually, so did the other 2x2 calls). For example, AA9AB was issued in Jan, 1994, so 7 years to go through approximately 676 systematic Extra callsigns.

He probably sells more scanners for companies like CCrane than any other talk show host, and has had programs directly on the topic of scanners and has guests like the editor of Popular Communications on the show all the time.

Instead of being such an asshole and always nitpicking on what is not on topic, why don't you just not click on the posts that are not of your interest? Posting a statement that something is not related to the newsgroup (even when it is, as in this case) is REALLY off topic!!! Practice what you preach!!

JERK!!

Yippeee! Today was pay day at the White Trash Maid Service. Been
a cleanin' those rich folks toilets all week and now we git paid. Got
a battery for one of the junkers and tags for the other junker. Yup,
ahhh might even let Elly May get that there Super Duper 40-channel
CB freeband radio. She shore do clean toilets real good and keeps me
in beer money. There a gonna be HIGH times at the Suzy DA Pig rental
shanty tonight! and I do mean HIGH! Paid off the beeper bill too.
Can't afford cell phones, gotta use the auto-patch on Billy Jack's
220 repeater. Even gonna hit the grocery store tomorrow and gets
lots high-fat high-cholesterol junk food to stuff my fat gut.
Thank god for Elly May's White Trash Maid Service check. yup,
pay day to pay day we live and pray in between that the beer holds
out till next pay day. Have a nice radio day, SUZYdapig.

I think that you're asking for serious phase noise problems if you do
that. Even using a DDS output as the reference for a PLL has the
potential problem Laura alluded to: be careful about spurs in the DDS
output. And those spurs will in general be different for each and every
possible divisor...perhaps those who look for them know how to reduce
the search, but you wouldn't want to assume the DDS to be good in a band
just because it was good at one or two frequencies in that band.

DDS's are getting better...I believe you'll find ones that easily cover
the range the original poster is interested in. OTOH, in the 100kHz
region, you can use a 20-bit or even better DAC and get pretty darn
clean signals...to use for PLL multiplication.

There are some examples of really clean, fairly wide range LO
systems...the ones I'm aware of (in spectrum analyzers, for example) do
NOT use DDS anywhere. -100dBc @ 1Hz offset?? :-)

Cheers,
Tom

Lets remember who created a majority of all the items and methods of
production in the world. It was white people, what have the blacks produced.
Did they invent computers, did the invent television, did they invent radio.
No. George Washington Carver is about the only black inventor you will ever
hear about. Otherwise, go to Africa and see what happens when the whites are
not there. Africa is a good example of a continent in chaos. We have war in
the Congo, civil strife in Zimbabwe and South Africa, and most of the
countries are ruled by quasi military dictatorships. A few small democracies
exist but most will eventually collapse.

Im not to racial extermination nor subjugation at all, either way, but some historical facts need to be pointed out to those who think that the white race is totally evil.

Hi All,
Well i am reading all kind of things about AO-40 lately.
It is a LADA ,IT cost too much,It doesnot work well....will never do!!!!!
But i wonder what is THE Radio Amateur in her first means,
Experiment ,communication in all conditions, speak around the world all
friends.

I dont like what i read on the NEWSGROOPS AND ON PACKET/RF ,when i think
about some Ham Radio operator that are $$$$$ for some equipments , and AO-40
could join the different CLASS of Operator around the world too talk to each
other some would think about it and most WHY the join this great
Hobby!!!!!!!

I am not a graet station,during sumer i go on mountain ,install the long
wire talk to friends not so far but for the FUN...

AO-40 is not the one too have problem,and other will come, we are too much
use to perfection !!!!!!!!!!

What is the problem with David Tolassi? Why does he stutter so much and why does his speech sound so effeminate?
I can't wait to hear him and Preacher John go on for hours about religion every weekend. It makes me feel like putting my hand on the radio while rolling my eyes back in my head and asking for "forgiveness" for my mortal ways.
John, it would seem, has a self-proclaimed inside track to God and he lets everybody know, and know, and know.....he must be going through a set of store-bought teeth every month.
John and David are great diet aids! After listening to them for a few minutes I don't feel like eating for the rest of the day. Nothing like a self-righteous religious nutcase to mess up the day, not to mention the band, for everybody else.
May the Lord be with you.

Depending on how good your throwing arm is, you could try this:
taking your antenna wire, tie a weight (like a rollof duct tape or
other cheap expendable object) to the end of the wire. Toss
as far as you can into the otherwise uncrawlable space the
wight and it should string the wire along. It will make a randomish
length of wire antenna. I did this and it worked pretty well.

A snubber (flyback) diode across the relay will protect the driving transistor from the reverse voltage spike (back-EMF) when the field of the relay inductor collapses. Although I am not an expert in this area - I don't think this will necessarily stop the chattering.

Relays normally chatter anyway to some extent (if you look at the manufacturer specs you will see they give guidelines) although for most purposes this would only be for a very short time span and unlikely to be noticable during usage.

The most likely cause I can think of is that there is insufficient decoupling between the transistor driving circuit and the line that energizes the relay inductor (in other words - when the relay coil switches off this reduces the loading, changes the operating conditions which switches the relay on again, and so on).

One way you could try to fix this is with a large decoupling capacitor between the supply lines. This might smooth out changes in operating conditions sufficiently to give the circuit more stability.

Since you mention you are interested in studying more about electronics, you might also consider the effects of the return current from the relay inductor on the voltage potential of the transmitter emitter terminal. Although we tend to think of the 'wiring' in circuits as equipotential (for example, all points connected to ground will be 0v) - this is actually an oversimplification. Wiring will have a small resistance.... and (from ohms law) any current through the wire will set up a voltage potential across the wire.

Look carefully at exactly how you have soldered the emitter and relay grounds to the power source ground with this in mind.

When the relay is energized a relatively large current will be flowing from the relay to ground and setting up a voltage difference across that path or trace.

If the emitter terminal grounding is connected mid-stream on the above path then the relay switching on/off is also creating a small but significant change in the voltage level at the emitter. This might be another cause of the problem.

This effect can be minimized to some extent by keeping the 2 ground lines separate to a point as close as conveniently possible to the battery terminal.

Hope this helps.

Best regards, Roy G0WMF / 7J1AUA

Nope, simply run the relay from a zener diode set at 12 volts. Now when you unload the supply from the fans shutting off, the rise in voltage won't cause the relay to pickup again. The snubber diode should be there in any case to remove the back emf.

Suzy DaPing is pretty popular near as we can tell. Suzy is much chased
for bills that remain umpaid and creditors all over the state are looking
for a way to get their money.
For instance, Suzy took out a Cell Phone account, could not pay it and
it was shut off for non- payment. Suzy and the Pig have no checking account,
and no, they have no savings account either.
Suzy has but one credit reference in the whole state, that being the
local liquor store where Suzy squanders his/her money.
Gee...life is hard, ain't it, Suzy?

Good news. There is a great ham store about one hour away in the High Point area. They have lots of transceivers and accessories, plenty of batteries, and replacement handheld antennas of all kinds.

IRI Amateur Electronics
116-B East Main Street
Jamestown, NC 27282
Phone: 336-454-2012
www.iriamateurelectronics.com

Hours: 10 Am to 6 PM Monday thru Friday.
Saturday: 10 AM to 2PM, depending upon hamfests. Call during the week to confirm Saturday availability.

His name is Gervais, he is from Canada (Quebec). if one believes the message headers.

Don't you suppose his primary language is French, and he is bravely posting in English for heavens sake?

He sounds like an enthusiastic ham with a good attitude. It seems less and less frequent that someone uses the word "fun" in describing our service/hobby.

In my best (babelfish) French:

Les meilleurs voeux Gervais. J'espï¿½re que nous pouvons parler bientï¿½t.
Respects, Don

My problem was I was not "regular". In fact I hadn't pinched
a good loaf in over 3 days. Probably caused by that CRAP
they call pizza that you get from a "hut" So I hear Bro. John
and Daveed kibitzing on the channel. I says, what have I
got to loose? I waits till Bro. John starts prayin his spheele
and lay my hands on the radio in agreement. Just 10 minutes
later I felt a rumbling like the Hoover Dam in my lower G.I.
I rush to the porcelain goddess and no sooner do I get my
pants and BVD's around my ankles than a torrent of fermented
fecal matter (and what had to be 10 cubic feet of gas) comes out
of my arse at 90 PSI ! I felt "instant relief"
just because I laid my hands on my IC-781 and agreed with Bro. John
and David and my constipation brought on by a bad batch of cheese
from Pizza Sput was GONE! (! Hallelujah Chorus SFX here !)

You could hook up the flip/flop and set the following stage to flip or
flop on the edge or not. But the gate is basically a on/off switch.
It turns 5v on or 5v off. If properly set-up there should be no 'in
between'. Its either on or off.

Take the output of the gate. To the following stage transistor or
relay. Simple as that.

Dan/W4NTI

Exactly, they don't want people focusing on the carnage and problems in
Africa. They just want to HATE WHITEY. Besides, Didn't Mr. David Horowitz of
1960's liberalism fame have a book called HATING WHITEY.

As far as your focus on being a child molester. As much as you like to talk
about it would indicate you have some serious sexual dysfunctions. You know
Roger, it would be good for you to get a woman instead of keep talking about
these various sexual problems that you have a fixation with. Perhaps the
West Virginia state mental institutions could help you with your obvious
sexual fixations

423. Vintage Radio Broadcasts

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-07 00:33:38 UTC
From: Adora Shumway <phoesho@home.com>
Message-ID: <3A57B8A3.3CDE9B2@home.com>
Source record: 96246

This message is for those of you who enjoy old time radio broadcasts. From Jack Benny to Fred Allen. From Lights Out to The Shadow. From Lux Radio Theater to The Campbell Playhouse. If you remember Old Time Radio fondly, then you may enjoy the broadcasts that we do via the net. If you'd like to learn more about our station, here is our url :

http://www.titanicstreams.com

We have an internet stream on The Sonicbox Network, as well as The iM_Tuner. If you'd like to listen to this station, as well as many others, here is where you can find the tuner.

http://www.sonicbox.com

Our Station, Classic Stars Radio, is channel V 8 on this network.

Happy Listening!

Adora Shumway

424. REQ: Dayton lodging for this year's show

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-07 00:51:17 UTC
From: Peter Dougherty <pjd@panix.com>
Message-ID: <c5af5tcbo6tsacgvet4fhou05t81es2hh0@4ax.com>
Source record: 96252

Hey folks,

Well, I hate to admit it, but last year I had to miss Dayton due to a wedding, and reserving lodging for 2001 just slipped my mind until it was too late.

I've spent over 4 hours on the phone this week trying, with no luck thus far, to find something reasonably close-by the airport (WX permitting, I will be flying a Cessna in from NY for the show).

If any of you kind souls know that you won't be able to make the Hamvention this year, or have a spare reservation, I would be extremely grateful if I could take it over for my wife and myself. I'm not looking for anything fancy, and will take pretty much anything, however closeness to the international airport is kind of important.

Sincere thanks and 73 to all.

Cheers, |The Second Edition of my book
Peter Dougherty |"Tracks of the New York City Subway"
|is now available and shipping. Please visit

Forget it Pete. We lucked up on a Fairfield in on the south side of town for $75 a night.

If all else fails, Cincinnati is only 40 or so miles away. If it comes to it, get something on the NE side of Cincy and it shouldn't be terrible.

There was a Comfort Inn 3 miles from Hara that had rooms for $105.00 and a 3 night minimum.

Moral of the story - Book 'em before Christmas or there ain't a lot left to choose from.

LW

436. Auto Battery FAQ

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-07 03:02:58 UTC
From: Crane <mfranken@aol.com>
Message-ID: <C%Q56.10198$zH4.495217@newsread1.prod.itd.earthlink.net>
Source record: 96260
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.scanner,rec.radio.shortwave

Found this post in another NG. As hams we often operate Transmitters which could draw 8-15 amps (or more..) under intermittent duty cycles. This faq (see links at end) are an excellent resource on the proper care of auto and truck batteries and charging systems.

------------ cut ------------

The latest revision, 3.0 dated January 1, 2001, of the Car Battery FAQ has just been posted. It covers the following questions:

1. WHAT IS THE BOTTOM LINE?
2. WHY BOTHER?
3. HOW DO I PERFORM PREVENTATIVE MAINTENANCE?
4. HOW DO I TEST A BATTERY?
5. HOW DO I KNOW IF THE CHARGING SYSTEM IS OK?
6. HOW DO I JUMP START MY CAR?
7. WHAT DO I LOOK FOR IN BUYING A NEW BATTERY?
8. HOW DO I INSTALL A NEW BATTERY?
9. HOW DO I RECHARGE MY BATTERY?
10. WHAT IS PARASITIC LOAD?
11. HOW CAN I INCREASE THE LIFE OF MY BATTERY?
12. WHAT ARE THE MOST COMMON CAUSES OF PREMATURE BATTERY FAILURES?
13. HOW CAN I STORE BATTERIES?
14. WHAT ARE THE MYTHS ABOUT BATTERIES?
15. WHERE CAN I FIND MORE INFO ON BATTERIES?

If you would like a free copy of the Car Battery FAQ, you can find it at http://nyquist.ee.ualberta.ca/~schmaus/batfaq.html

If you would like the latest Deep Cycle Battery FAQ, it is posted at http://nyquist.ee.ualberta.ca/~schmaus/dcbat.html

437. Re: Clinton admin (STAR WARS)

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-07 03:05:02 UTC
From: Alan <amtilley@students.latrobe.edu.au>
Message-ID: <3A57DCDD.595B331D@students.latrobe.edu.au>
Source record: 96263
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

This is one of the more sane post I have read in this group. The nuclear umbrella that is proposed also impacts life down under. It has the potential to fuel a nuclear arms race where there was none before. This is because one method of countering the defense umbrella is simply to build more weapons. Which is then countered by every other hick country. Creating a new arms race and further instability (and lining the pockets of arms dealers).

It also falsely assumes that delivery of nuclear weapons would be via missiles. Miniaturization of nuclear weapons means that can be delivered via a variety of methods, and not just by the traditional military methods. Some methods are a lot cheaper for example, delivery by truck by man pack, or by simply overnight freight. If you can't keep drugs out of a country how do you propose to guarantee sealed borders against modern nuclear weapons?

You also have to remember the reasons the Mutually Assured Destruction (MAD) concept worked (and in nearly didn't) both countries equally had a lot to loose. The new world is very unequal and becoming more so. Many countries (or terrorist groups) would simply consider the consequence of nuclear exchange the justifiable price of achieving their goals.

The only practical way to provide nuclear protection is a the establishment of a world agreement not to have nuclear weapons. This is a time that should be seen as an opportunity while most of the world does not have nukes to bring about this sort of agreement. It may not be as financially rewarding to the arms industry but I think it is the only a realistic way to securing the future.

And it was written by a conservative Republican, no less. :-)

This is one area where I strongly disagree with many in the Republican Party. The proposed anti-ballistic missile defense system (dubed "Star Wars" in the press) is a serious mistake. It does not increase our national defense and it is a huge waste of money. And most, who truly understand our national defense and are not going to benefit from the money spent, agree with this view.

Dwight Stewart (W5NET)

Lets see, now, seems that was about the argument that Neville
Chamberlain pursued when he had a simsiliar discussion with a fella
named Hitler....

When ARE you pie-in-the-sky types gonna learn that any "agreement" is
as worthless as the most worthless participant? Do you really believe
that the Saddam Husseins of the world would hold themselves to any such
agreement any better than Hitler did?

It may not be as financially rewarding

nd8vmike wrote:

<is bob sherin w4asx gay?

Here I am, questioning the relevance of the query. Is it a smear? Who should care anyway? Is it driven by someone with an agenda?

To strictly deny the allegation is to bolster the homophobic cause. As a proponent of minority rights, I do not exclude gay rights.

In the real world, I've been married since 1966 to no fewer than three wives. While I wish I could report one marriage, I do have two children and two grandchildren. Way back back when, I was designated, in the yearbook, the high school lover of the year. (Most likely to succeed would have been preferable.)

To bring my heterosexual history up to date, I invite inquiring minds into this lofty issue to check out the Web Site below.

Bob Sherin, W4ASX

I think that you need to have some reality check. Maybe first thing is for you to get some sort of gainful employment. Secondly, perhaps getting a decent woman would help you overcome your sexual fixations. Perhaps a trip to church would help that filthy low class mouth of yours. Oh, but that would be very high class for trash like yourself. Much more high class than your low IQ would ever allow.

Hey Roger, could you please tell us all why you got into trouble with Mr. Riley Hollingsworth of the Federal Communications Commission. Could you please tell us why you get letters from Mr. Hollingsworth concerning various rules violations on amateur radio. Can you tell us why you were warned to cease and desist from your behavior. Do you talk to you mother in the way you talk on this newsgroup. Why do you have such a fixation on homosexuality plus knowing so much about the various acts. Obviously to anyone with a brain, they can all see that you are a degenerate of the lowest caliber. As far as AIDS go, I don't have any plus do not take of the same sickening pleasures that you get self gratification from. You need to go back to the trailer park and put a door on where you tore it off. Plus, do a little bit productive with your life rather than blathering obscenities on ham radio and the internet. Guess that is why you dont have a woman nor a job nor much of a social life either.

I think that Mr. Hollingsworth needs to continue his investigation of your
on air activities in amateur radio. With your foul mouth, it would be best
for him to pull your license. Plus, a nice trip to the West Virginia State
Psychiatric Hospital would be very appropriate. Perhaps they could help you
with the fact that you are a SEX PERVERT especially with all the postings
you make regarding sex.

Source record: 96281

GLENDALE, WV: The FCC requested July 11, 2000, that Roger L. Wiseman, KC8JBO, retake the General examination elements under the supervision of an ARRL-VEC volunteer examiner team. Wiseman must appear for retesting by September 11, 2000, or his license will be canceled. Applicants appearing for re-examination are granted an Amateur Radio license consistent with the elements passed. The FCC had written Wiseman on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" between Wiseman and another licensee that included allegations of interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two licensees to contact him to discuss the matter. Additionally, the FCC had sent Wiseman a Warning Notice last November in response to allegations of deliberate and malicious interference on 20 meters.

November 9, 1999

CERTIFIED MAIL RETURN RECEIPT REQUESTED

Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

Subject: Warning Notice: Amateur Radio License: KC8JBO

Dear Mr. Wiseman:

The Commission has monitoring evidence that you have been deliberately and maliciously interfering with the radio operations of other licensed Amateurs on the 14 MHz Amateur band. This interference has occurred at various times in the last several months and includes broadcasting music and other unidentified transmissions.

The Commission generally relies upon the Amateur Radio Service to be self-policing. Operation of the type described above is contrary to the basis and purpose of Amateur Radio and degrades the service for legitimate users. This serves as a Warning Notice that such operation will not be tolerated. Additional incidents of operation of the type described above will result in a monetary fine being levied against you and in revocation proceedings before an Administrative Law Judge.

You are requested to contact me at 717-338-2502 to discuss this matter.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio Service

Enforcement Bureau

SUZY LOVE POEM

Collards is green,
my dog's name is Blue
and I'm so lucky to have
a fat thang like you.

Yore hair is like cornsilk a-flapping in the breeze.
Softer than Blue's and without all them fleas.
You move like the bass, which excite me in May.
You ain't got no scales but I luv you anyway.

Yo're as satisfy'n as okry jist a-fry'n in the pan.
Yo're as fragrant as "pot" right out of the can.
You have some'a yore teeth, for which I am proud;
I hold my head low when we're in a crowd.

On special occasions, when you shave under yore arms,
Well, I'm in hawg heaven, and awed by yore charms.
Still them fellers at work, they all want to know,
What I did to deserve such a purdy, old doe.

Like a good roll of duct tape yo're there fer yore man,
To patch up life's troubles and fix what you can.
Yo're as cute as a junebug a-buzzin' overhead.
You ain't mean like those far ants I found in our bed.

Cut from the best cloth like a plaid flannel shirt,
You spark up my life more than a fresh load of dirt.
When you hold me real tight like a padded gunrack,
My life is complete; Ain't nuttin' I lack.

Yore complexion, it's perfection, like the best vinyl sidin'.
Despite all the years, yore age, it keeps hidin'.
Me 'n' you's like a Moon Pie with a RC cold drank,
We go together like a skunk goes with stank.

Some men, they buy chocolate for Valentine's Day;
They git it at Wal-Mart, it's romantic that way.
Some men git roses on that special day
From the cooler at Kroger. "That's impressive," I say.

Some men buy fine diamonds from a flea market booth.
"Diamonds are forever," they explain, suave and couth.
But for this man, honey, these won't do.
Cause yor'e too special, you ugly thang you.

I akt real brave and
I act real tuff
But I'm really a pussy
Cause I can't get no muff...

I got you a gift, without taste nor odor,
More useful than diamonds..... IT'S
A NEW TROLL'N MOTOR!!

Gay Jimmy goes into the doctor's office and has some tests run.
The doctor comes back and says "Jimmy, I am not going to beat
around the bush. You have AIDS."
Jimmy is devastated. "Doc, what can I do?"
The doctor says "I want you to go home and eat 5
pounds of spicy sausage, a head of cabbage, 20 un-peeled carrots
drenched in hot sauce, 10 Jalapeno peppers, 40 walnuts and 40
peanuts, a box of Grape nuts cereal, and top it off with a gallon of
cheap beer."
Jimmy asks, "Will that cure me, Doc?"
The doctor replied, "No, but it should leave you with a better
understanding of what your ass is for."

Dear Mr. Wiseman:

The Commission has monitoring evidence that you have been deliberately and maliciously interfering with the radio operations of other licensed Amateurs on the 14 MHz Amateur band. This interference has occurred at various times in the last several months and includes broadcasting music and other unidentified transmissions.

"Sounds to me as if Mr. Wiseman is not so wise after all. What kind of dummy does this take? Rog...get with the program or get out of the hobby. Maybe you and Dimmy can commiserate on the outlaw portions of the 11 mtr bands. Keep it up and you can join your "bud" in that you will also get an NAL from the FCC."
Misery loves company.....

It sounds to me like this "Anonymous" poster hasn't got any balls, except the ones bouncing upon his three chins.

> What kind of dummy
> does this take? Rog...get with the program or get out of the hobby.

Quit operating with your WIDE signal.

>Maybe
> you and Dimmy can commiserate on the outlaw portions of the 11 mtr bands.

Maybe you can get hired at the FCC and get FIRED AGAIN.

> Keep it up and you can join your "bud" in that you will also get an NAL from
> the FCC."

Jimmy's not my "bud," ASSHOLE. We just have a non-agression pact.

> Misery loves company.....

You should know, George.....Obsess on W4AMP some more, LOSER.
Of course, you don't get much company in your parent's basement.

464. Re: DX403, MY BITCH Was: (**PITBULL the SELF FLAGELLATOR**)

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-07 15:08:07 UTC
From: KC8JBO <roger_kc8jbo@my-deja.com>
Message-ID: <93a0oljrh1@nnrp1.deja.com>
Source record: 96043

In article <9392cn$9h9$1@dagobah.blueriver.net>,
MY BITCH "DX403" <lightnin9@hotmail.com> slobbered:
> Hey Roger, could you please tell us all why you got into trouble with
Mr.
> Riley Hollingsworth of the Federal Communications Commission. Could
you
> please tell us why you get letters from Mr. Hollingsworth concerning
various
> rules violations on amateur radio. Can you tell us why you were
warned to
> cease and desist from your behavior.

Let's use the LRod analysis method to look at your allegations:
Here's the letters you refer to....
Exhibit 1 > Letter of 9 Nov 1999 0letters/wisemanwarn.html
Exhibit 2 > Retest letter of 11 Jul 2000 0letters/wisemanretest.htm
Exhibit 3 > Repeat of 11 Jul 2000 letter enforcement_logs/2000/0719
Exhibit 4 > Joint letter of 29 Mar 2000 enforcement_logs/2000/0410.html
Exhibit 5 > Joint letter of 29 Mar 2000 enforcement_logs/2000/0503.html
Exhibit 6 > Letter of 9 Nov 1999 enforcement_logs/1999/1119.html

So let me see if I have this straight. You're presenting six exhibits
that purport to prove someone as guilty of some offense. Six exhibits
apparently being your idea of overwhelming evidence.

Let's examine your work:

Exhibits One and Six are clearly the same information.
Exhibits Four and Five are clearly the same information.
Exhibits Two and Three are clearly the same information.

Your "overwhelming evidence" is shrunk by half.

Exhibits Two and Three are evidence of a request for re-test. What is
that proof of? I passed my retest, so it must mean I know the required
material.

Exhibits Four and Five address off-air circumstances and are merely
pre-emptive reminders not to do something that hasn't been done yet.
That's not proof of anything to do with radio.

Exhibits One and Six "may" indicate an impermissible activity ocurred,
but by its nature is neither proof of the activity, nor guarantee of the
validity of the evidence, if any.

So, just for the sake of argument, let's presume that Exhibit One (or
Six; they're the same) was some sort of indicator of wrongdoing. That

"fact" is just 16% of what you purported to be overwhelming evidence of something.

Of course, we can presume with equal validity that Exhibit One (or Six) was based on bad information and was therefore improperly presented. Then your "overwhelming evidence" has slipped to zero. Nada. Zilch. Nothing. Zippo.

So what was your purpose here? Just to tell another lie? Or to dedmonstrate what a DUMBASS you are, baby-raper?

> Do you talk to you mother in the way
> you talk on this newsgroup.

Do you always ask a question and leave off the question mark?
In fact, no. Not that it's any of your business.

> Why do you have such a fixation on homosexuality
> plus knowing so much about the various acts.

You seem ALL EXCITED at the prospect of somebody talking that way, however. You needn't get so defensive about your gay lifestyle, I hope you die from your AIDS soon.

> Obviously to anyone with a
> brain,

Which leaves YOU out.......

> they can all see that you are a degenerate of the lowest caliber.

Ah, now coming from a known convicted child molester, that's no insult.

>As far as AIDS go, I don't have any plus do not take of the same
>sickening pleasures that you get self gratification from.

Yes, but you really need to quit wacking off to your pictures of animals. You know, the ones you have sex with?

> You need to go back to the
> trailer park and put a door on where you tore it off.

Already have some, DUMBFUCK.

> Secondly, perhaps getting a
> decent woman would help you overcome your sexual fixations.

Says the guy who sucks off minors on a daily basis.....

> Perhaps a trip to church would help that filthy low class mouth of
>yours.

Oh, another christian fundie uses the "church" as his crutch for
getting through life.
He can't think for himself, so he uses the "church" to think for him.
Your "church" uses snake handling, doesn't it? I bet you go to the
church of Jim Bakkker.

>Oh, but that would be very high class for trash like yourself. Much
> more high class than your low IQ would ever allow.

From your prosaic writings, I'd say your IQ is about lower than your
size 46 pant size.
I hear you were born on a farm. Any more in the litter?

>nor your society. As far as I'm concerned, this is all my life and you are just a bunch
>of obstacles for me to overcome.

Ah.

Interesting.

The very vehemence of your reaction gives me hope. People who are secure in their beliefs tend to brush off challenges. But challenge someone who has doubts, even if very deep down, ...and they tend to lash out strongly, through the strength of their denial trying to drown out those doubts.

Maybe this isn't hopeless, after all. ^_^

But best to let you deal with this in your own way. Every teacher knows you can lead someone to knowledge, but you can't make them think. THAT has to come from within.

I do however have a question that is on-topic, not so much for radio as for these newsgroups. THIS is your life? THIS? Newgroups are like writing in blowing sand. They're useful for discussion, communication, rants and rave, cheap entertainment: But nothing permanent. Except in rare medical instances posting to one will never help a crippled child walk, never feed the hungry... and never veer the country or the newsgroup to a political agenda you prefer. Every inch you think you've gained, every obstacle you believe you've overcome, will be set back to zero in a matter of days or weeks.

It would be much better if, rather than expending so much energy HERE, you focused on your Senator, your legistators, forming your own PAC: THOSE are the means to power!

Not this.

Radio.

i think what he is refering to is that as of jan 1 the arrl has allowed VEs
to increase there testing fees to $10 up from the $6.75 or what ever it was
the last time i tested to cover there costs and stuff your NOT buying a
license at all just helping the VEs with the costs

> relay. Simple as that.
>
```

Not true. Although a digital gate or inverter might seem to have switch-like properties, the transfer function from input voltage to output voltage actually has a substantial linear range. It just seems like it's a switch because the 'gain' is so high. If you put a 'noisy' voltage into the input at just the transition point (~1/2 Vcc for CMOS), you'll get a much noisier output....therein lies the problem.

The best solution is to incorporate hysteresis. Hysteresis will turn a slow changing and/or noisy input voltage into a cleanly switched output voltage with no chatter. This can be accomplished with a pair of cascaded CMOS inverters, with positive feedback from output of the second stage to the input of the first stage. Drive the input to the first inverter with a resistor, say 10k. Put a feedback resistor from the output of the second inverter to the input of the first inverter of say 300k.

Don't waste the money. That has been done in the past - and, in many instances, it has been uncovered. The problem then is that the FCC wants all the folks who tested before those 'questionable' VEs to take the exam again - this time in front of an FCC examiner. Failure to do so results in revocation of the license (and you don't get the money back!). Should this happen in my city (Rochester, NY), that means a trip to the FCC in Buffalo - 60 miles away. In many cases, someone is going to have to travel a lot further. Not pleasant.

73 from Rochester, NY
Jim

Is this easier than using a Schmitt trigger like an 'HC14?

Alternatively, it may be more convenient to use a comparator
(like an LM311 or more modern variant) with hysteresis.

Yes the fuel pump can indeed be a problem. I used to use the Radio
Shack filter that had a large inductor and a cap. Put it on the line
to the fuel pump. As close as possible to the pump.

It could also be the computer. If thats the case, rots a ruck.

The tach dropping is probably from the RF getting into the meter
circuit. If it don't shut your vehicle down I wouldn't be concerned.

Now why would I go and PAY for a license when I got my license, AND upgrades for free.. Oh, sorry, I did have to earn them with a little studying and such.. My club offers testing free.. No money exchanges hands.. And I can now talk world-wide on the Extra bands..

Just quit tryin to cheat the system, sit down with the manuals and get studying.. And if you want to take a test for free.. First Saturday of the month, Geo-Physics Institute, UAF, Fairbanks, Alaska.

Not really, you just don't like anything that is anti-morse code, that is why you don't like him

And Art is a Ham Radio Operator himself, so he didn't have to "find" anyone, it was just that Wayne Green has some common sense ideas about Ham Radio that people need to hear.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 493
BID: $OPDX.493
January 8, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KA1GJ, NC1L & DXCC, N7NG/1, KF2TI, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, K4AVQ, N4AA & QRZ DX, WA4FFW, N5FG, WF5E, K8NA, K8YSE, KE9KD, CE6TBN, EA3BT, EI6FR, ER1LW, HP1AC, I1JQJ/IK1ADH & 425 DX News, IN3QBR, JA3MZB, JH6RTO, LA5HE, PS7AB, PY7ZY, YS1RR and ZS5BBO for the following DX information.

3D, CONWAY REEF (Update). According to Raymundo, YS1RR, the planning for the Conway Reef DXpedition is progressing on a "fast track". Operators YT1AD, YU1RL, YU1NR, YU1FW, YU7AV, YU6AO (YZ7AA), YS1RR, Z32AU and Z32ZM are expected to operate from here (refer to OPDX.482/488) from February 19-28th. Their callsign will be announced on February 18th. They have announced the following suggested modes and frequencies:
CW - 1825, 3505, 7003, 10104, 14020, 18020, 21020, 24896, 28020, 50105
SSB - 1835, 3795, 7075, 14195, 18145, 21295, 24945, 28495, 50125
Digital - 1835, 3575, 7035, 14075, 21075, 28075
SSTV - 3723, 7035, 14230, 21340, 28680 kHz
* ADDED NOTE: Receiving frequencies will be 5 to 30 kHz higher than transmitting frequencies. Additional information will be given during operation time. QSL via YT1AD: Hrane Milosevic, 36206 Vitanovac, Yugoslavia. Raymundo reports that as in all DXpeditions, they are short of funds and your donations will be very helpful to make this operation a great success and any small or big donations are welcome. Donations can be sent to YS1RR: Raymundo Rodriguez, P.O. Box 32, San Salvador, El Salvador or to VIPSAL 682, P.O. Box 02-5364, Miami, FL 33102-5364, USA. Please visit the Conway 2001 Web Page at: http://www.kragujevac.co.yu/3d2
This is under construction and will be updated frequently.

3D2, FIJI. From the Conway Reef update press release above, the operators will operate from here as 3D2AD, 3D2AU and possibly other individual callsigns after their operation on Conway between March 1-6th.

3E500, PANAMA (Attention Prefix Hunters!). Cam, HP1AC, informs OPDX that the "Radio Club de Panama" has obtained a special permit from the

Panama Government Radio Dept. Office so any amateur radio operator in Panama during the month of March 2001 will be able to use the special prefix 3E500 (Three Echo Five Zero Zero). This special prefix is to commemorate the 500th year anniversary of the Discovery of the "Isthmus of Panama" in March 1501 by Don Rodrigo de Bastidas. An example is Cam's callsign (HP1AC), he will be using 3E500AC (Three Echo Fivehundred Alfa Charlie). A special QSL will be issued to confirm all QSOs during the month of March 2001. QSL Manager will be HP1RCP, Radio Club de Panama, P.O.Box 10745, Panama 4, PANAMA.

3G, JUAN FERNANDEZ (Attention Prefix Hunters!). Look for Pat, CE1VLY, to be on the air from Juan Fernandez (SA-005) as 3G0Z the last week of January 2001. Activity will only be on 10 meters. QSL via home callsign.

3W, VIETNAM. Tom, 3W7CW, was active over the weekend on 30/20 meters CW. Check around 14006 kHz between 1530-1630z and 10103 kHz 1630-1800z. QSL via SP5JTF.

3Y, BOUVET. Chuck, 3Y0C, was heard over the weekend on 40 meters SSB for about an hour on 7052 and 7062 kHz between 0400 and 0515z. He was also heard on 20 meters SSB Saturday and Sunday, as well as 12 meters on Friday. His activity may seem short, but this is due to his work schedule which is very demanding, and on most days he can only squeeze 10 minutes in at a time during his breaks to get on the radio. So please be patient with him Chuck understands the high demand for Bouvet, and remember, he is only a one man operation. The following press release below will explain it more.
QSL Manager Mac, WA4FFW, reports that he spoke with 3Y0C on 01/06/01. Chuck has been off the air the past few days because a storm blew down antennas again. Time and weather allowed him to get the beam up 25 feet today. He has the vertical repaired, but because of a storm closing in, he will not put it up until after the storm clears. They have developed an oil leak in the generator, and attempted repairs have not been successful. They can use it but only for 2 hours a day which is sufficient to charge the batteries. He is unable to use the linear without the use of the generator. Chuck will be on as many bands as possible and explains that one of the reasons for such short runs sometimes is that he is trying to work a few stations between other duties to provide as many contacts as possible. He wants to remind the DX fraternity that he is aware of the need for Bouvet Worldwide. However, he is on an official scientific expedition, with specific duties, not a DXpedition. He is trying to give the world as many contacts as the situations there will allow. Because he is on at various times, he has been available to all parts of the world. What must be recognized is the fact that he is not on the same time each day, nor is he always on the same length of time because of his duties. Mac, WA4FFW, also announced that the QSL address for the 3Y0C QSL cards is as follows: Mark McIntyre, WA4FFW, 2903 Maple Ave., Burlington, NC. 27215 USA. Mac advises that some cards have already arrived. He asked earlier that they not be sent until "this announcement". None have been opened, but he states that he hopes those already received have sufficient postage based on the new postal rates, otherwise they will be returned

via bureau. He also would like to inform the international community that the cost to mail a QSL to a foreign country has increased as well effective January 8, 2001. Mac reports he will not have logs until Chuck returns in March, so no QSLs can go out until he has arrived back stateside. Mac said that the delay in announcing the address was to allow the implementation of the new US postal rates. This was done so everyone would have the correct return postage preventing their direct card being shipped via the bureau. He said the reason was based on the postal increase and not that he was moving. He would like to inform all that he has no plans to relocate his antenna farm by moving as he read on the internet was the reason.

7Q, MALAWI. Look for Harry, G0JMU, to be active as 7Q7HB during the month of February. His activity is planned for SSTV, PSK31 and operations on the WARC bands.

7X, ALGERIA. Mohammed, 7X4AN, has been active on 10 meters CW/SSB between 1330-1600z. Watch around 28010 kHz and between 28400 and 28500 kHz. Also, watch around 7001 kHz after 2130z. This past weekend Sadek, 7X4LS, was spotted around 28475 between 1530 and 1600z.

A2, BOTSWANA. Barry/ZS1FJ and Gerald/ZS1GRM are planning to be active from here starting around 1800z, Sunday, January 14th and continuing until late Saturday the 20th. They have requested the callsign A24DX, however, they are having difficulties with the authorities who want them to use the callsign A24/homecall. Activity will be on all bands, mostly SSB on frequencies which will not interfere with the 3Y0C operation. Therefore, suggested frequencies are 28450, 21270 and 14270 kHz at the appropriate times for propagation. On 40 meters they will transmit at 7080 kHz and receive split between 0300-0400z, listening to stateside stations for advice on what frequency to use to suits them. The same will be applied to 80 meters. Barry states that if there should be a demand, they will be active on the WARC bands (18145 and 24950 kHz). They will use an A3S and G5RV antenna with the max power output. They plan to be on from 0300z until, probably, 2200z. QSLs to ZS1FJ.

A5, BHUTAN. Very few QSNs were reported on the Johnson family over the past weekend. Activity by Glenn/A52GJ and son Mark/A52MJ was almost nill. However, Glenn's daughter Melissa/N0MAJ was issued the callsign A52YL and was spotted in the RTTY contest. QSNs report very few takers. According to "The Daily DX" Melissa (16 yrs. old) is the very first YL license from Bhutan. Glenn's wife, Vivien, also has a license, A52VJ, and his other son Paul is A52PJ.

D6, COMOROS (Update). Josep/EA3BT and Nuria/EA3WL have informed OPDX they have only a few days left before they travel to here to be active as D68BT and D68WL (Please refer to OPDX.486). Activity is expected to be between Janaury 13-28th. They state the following: ".... we are really working hard packaging everything and trying not to leave anything. Due to the great demand in 50 MHz, Santa has brought us an antenna for 6 meters. You can see it in the Picture album at our web page (http://www.qsl.net/ea3bt), where you'll be able to find some more pictures of the preparation. Before

leaving, we'll send a new E-mail with all the operating frequencies, and about the pilot to whom you'll be able to send all requests and information interesting for us. If nothing wrong happens, the logs will be also available daily at our page....."

DXCC NEWS........
DXCC is pleased to announce the addition of a 17 Meter Single Band DXCC award. Applications for this award will be accepted beginning January 2, 2001. 17 Meter DXCC certificates will be dated but not numbered. 17 meter credits will also count toward the DeSoto Cup competition for the year 2001. If you do not know what credits you have on 17 meters, you may contact DXCC for an update prior to applying. This will help avoid duplicates and additional costs. If you have web access and can handle ADOBE (.pdf) files, contact DXCC at dxcc@arrl.org for a copy of your record. If you do not have web access, please send a note to DXCC along with 1.50 USD for postage or an SASE with 1.50 USD in postage. For further information, please contact DXCC at: dxcc@arrl.org

MACAO (XX9). Last week we reported that a petition was filed for the possible removal of this DXCC entity. OPDX has learned that plans are on their way to prevent the Macao removal situation. Reports indicate that the national Amateur Radio Society on Macao is applying to Region III for IARU membership status. For this reason, DXCC will continue the grace period for Macao until a firm direction is established, either an ITU resolution of the prefix problem, or the likelihood IARU membership. Theoretically, if the DXCC were to remove Macao and then add it again to the list, everyone would have to work it again. STAY TUNED!

DX-CENTRAL (New Look!). Kelly, KE9KD, reports that after a long overdue redesign, he has finally managed to get the new DX-Central Website online. You will find some of the same features as the old site with improved functionality, and you will find some new features as well. He still has several enhancements to put in place, it's just a matter of finding a little time. For those of you that have links, software or other things that used pieces of the DX-Central website, you will want to update your code. If you have not been to the site in a while, feel free to drop in. The address is: http://www.dx-central.com

IOTA NEWS.......
AS-056. Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island) between Janaury 8-14th. This is not a DXpedition and he will be active in his spare time. His planned operating schedule is as follows:
January 8th - 0100-0800z and 1000-1100z
January 9th - 1000-1400z
January 11th - 1000-1100z
Janaury 12th - 1000-1400z
January 13th - 0100-0230z
January 14th - 0100-0800z
Suggested frequencies are: 14260 or 21260 (both +/- 10 kHz).
QSL via only the Bureau.

NA-213. (CORRECTION). Last week it was reported that the "Magnolia DX Association" was going to be active from Dauphin Island in late February. We states that Dauphin Island was in Alaska, this is incorrect. It is a part of Alabama.

JW, SVALBARD. Rag, LA5HE, informs OPDX that he will once again be active as JW5HE in early February. Look for him to be active on the lower bands and the WARC bands. QSL via CBA.

P4, ARUBA. Start looking for Alan, K4AVQ, next weekend as P40AV. He will be there Janaury 13-21st. He states that he will start on 10 meters, if open, and then work the lower bands. Suggested frequencies are: 28500, 28495, 21300, 14155, 14205, 14255, 7150, 3535-45 and 1825. Alan will also try to accommodate special requests for CW and Phone on any band needed when the traffic is low. He will also listen for QRP and Mobile stations. QSL via: Alan B Caplan, 14020 140th Court, Apple Valley, MN 55124-9422 USA.

PY0S, ST. PETER AND ST. PAUL ROCKS. "QRZ DX" reports that a group of Brazilian DXers from Recife, have received permission to operate from here beginning February 7th and operate until approximately February 15th. The dates may vary due to the long voyage. Operators will be Jim/PY7XC (team leader), Fred/PY7ZZ and Cicero/PY7ZY. The team of operators are providing their own transportation, and there will be no limitations on their operating times. Activity will be on 160-10 meters CW, SSB and with the possiblity of RTTY and 6 meters. The callsign and QSL Manager will be announced later along with further details. The team is looking for donations from clubs and individuals. Contributions can be sent to: Bill Smith W9VA, 1345 Linden Ave., Deerfield, IL 60015, USA. Bill is the acting coordinater for this operation on behalf of the Recife DX Group and can be contacted via E-mail at: w9va@aol.com
In event the operation is cancelled, all contributions will be returned.

QSL INFO AND NEWS.....
Declan, EI6FR, reports that those awaiting QSLs for the Westnet/Saltee Dogs Groups EJ7NET operation from Inis Meain (Aran Islands EU-006), which took place in June 2000, is glad to say all QSL cards for all stations appearing in the log have been dispatched to the bureau. QSL cards for those stations in countries without bureaus have been mailed directly to the callbook address where available. All direct requests have also been answered. He apologizes for the delay and is looking forward to working you again from another EI/GI island this coming summer.

Slawa, ER1LW, active as ER2000L during the period of December 1-31st (2000), requests0 to have QSL cards sent to the following address: Lysy Wiacheslav, P.O.Box 112, Chisinau, MD-2012, Moldova.

Claudio, ET3VSC (IV3VSC, ex-DJ0PN), reports that he has confirmed all QSLs for all QSOs through October 21st (2000). All have been sent via the different QSL Bureaus (Most through DARC or the USA Bureaus).

Seiji, JH6RTO, informs OPDX that, for all operations performed by him in 2000, the log search Web page is now available at:
http://www.bekkoame.ne.jp/~m.mats/mj5aja_input.htm
This includes his MJ5AJA (Jersey) and M0RAA(/TF/PJ7/VP9) operations. Go directly to this page because its top is written in Japanese, unfortunately. According to his QSL/Web manager, Masanori/JH6VLF, all the direct QSLs have been replied to. Seiji will return to Japan this February to restart his operations in Japan and in Marianas as JH6RTO and AH0R, respectively.

Ciro, PY7ZY, reports that all direct QSLs received for his operations on Itamarac Island (PY7ZY/7 - SA-046), Itaparica Island (PY7ZY/6 - SA-023) and Tinhare Island (PY7ZY/6 - SA-080) were sent. If by chance you sent a direct QSL and didn't receive a card, it is because Ciro didn't receive your QSL. He states it is OK to send an E-mail with the details of QSO, for a log check to: py7zy@qsl.net

S2, BANGLADESH. Stig, S21YJ, was heard this past weekend on 14190 kHz around and after 0200z. QSL via SM4AIO.

SPECIAL DFH ACTIVITY.....
Look for ZV3F and ZW3F to be active from Fort Dom Pedro II (DFH RS-03) January 20-21st and from Fort Duque de Caxias (DFH RS-01) March 24-25th. Both are valid for the "Historical Fortifications Award" (DFH). Activity from both will be on all HF bands, SSB and CW. QSL Manager is PY3UR.

Look for ZX7R and ZX7CW to be active from Reis Magos Fort (Natal/RN), January 26-28th. Activity will be on 160-6 meters, SSB/CW/RTTY. QSL via PS7HF: Fabio Hoelz, Rua Serra Formosa NR 8054-E, Natal/RN, 59068-140, Brazil.

SPECIAL MILLENIUM CALLSIGNS. Be looking for the special Spanish callsigns EF2XXI and ED2XXI to be active to celebrate the new 21st century. Activity is expected to last until January 15th and will be on all bands and modes. QSL to EA2RCF via the bureau or direct. QSL only RTTY/PSK31 QSOs via direct to EC2ADR: Roberto Garcia, P.O. Box 647, C.P. 01080, Vitoria-Alava, Spain.

SU, EGYPT. SU3AM was heard this past weekend on 12 meters on 24950 kHz between 1300 and 1400z. QSL via DL1FCM. Said, SU1SK, was active on 21280 kHz from about 1345z to 1520z.

TD0, GUATEMALA. "The 599 DX Report" reports to look for the special event station TD0G to be active January 26-28th, from the ancient Maya town of Yasha. Activity will be on 80-15 meters. There was no QSL route given.

V7, MARSHALL ISLANDS. Jeff, KA1GJ, will be operating from here as V73GJ, Janaury 16-26th. He states that he will be on business, so operations will be limited to a few hours per day. He plans to be active mostly on CW. QSL via his home callsign, KA1GJ.

XW, LAOS. Mauro, IN3QBR, informed your editor that he and Fabry, IN3ZNR, continue to be active as XW3QBR and XW3ZNR until January 12th. Last Monday he wrote that they are active for more than 15 hours at day on all bands

(exl. 160m). He also states that they have had a some contact with U.S. East Coast stations on 80 meters. Their goal is to make more than 15000 QSOs, however, he does state that their time is limited during the evening hours. Over the past weekend a lot of time seemed to be spent on 10 meters CW/SSB and 80 meters.

Does anyone know when the Yeasu 1000 MP came out.
I'm wondering if it was before the Kenwood 870. Witch was in 1996.

Thanks
W5UDX

The particular one I'm thinking of is in the HP-3588 (and 3589, too, I'm sure). I picked one up at an employee auction. Somehow though we made them where I work, I'd never used one for anything other than a casual measurement. So...I hosed a good reference oscillator into it (HP-10811) to see how good its resolution was. The whole system of the reference osc and the analyzer showed -100dBc at 1Hz offset. I was surprised...but on talking with a couple of the designers who had worked on that instrument, I was assured that my measurement was "real." AFAIK, it is a two-loop system, designed by a pretty darn sharp guy.

I suppose we have some signal generators that are similarly clean. I haven't measured it (with an independent analyzer) but suppose the source output of the 3588 is also clean. But I also expect that it doesn't go terribly much further down that 100dB since that's the range of the analyzer, nominally.

Cheers,
Tom

Being a ham radio operator doesn't mean squat. And Art was that guy who
tried to panic the public with imaginary Y2K scenarios that absolutely
never happened.

The National Enquirer has far more crediblity than Art Bell ever had,
and the Enquirer is a damned rag! Art Bell is beneath contempt. He's
suckering you.

One might ask the father of the young lad shot by pirates if being a ham means squat. Would you think it meant squat if it saved the life of one of your family members?

There are too many anonymous posters in this newsgroup. There must be a lot of fear out there. Ham radio is supposed to be friendly hobby so what are we all afraid of????
Losing our jobs?
physical harm to ourselves or families?
Damage to property? Destruction of reputation?
How can these be justified a rational fears in a service intended to foster good relationships. I also believe these fears may be rational. Let's talk about it.

This message did not originate from the Sender address above.

The TS-2000 reports are looking good - heck - I'd even say JUICY! I just GOTTA get me one of those!! Some people say it's ugly, but I don't care what it looks like as long as it works.

It don't matter what she looks like, only what she cooks like...

Richard - You have STILL not presented proof of my having identified myself as "The infamous KS0F". What you did present was me identifying as "The infamous KSOF" which is different from your question which was "Have you, John Mackey, ever identified yourself using the phrase "The Infamous KS0F"". NOTICE, the difference here, you asked if I had identified using a "0" (zero) in my call, but when using a similar, but distinctly
different phrase, I always used a "O" (the alphetic letter).

You have only proven YOURSELF to be either a liar or grossly ingorant of the facts. Which is it?

Do you need to be counseled on the difference between the "0" (zero) & the "O" aphabetic character?

Jim, I don't know where you are getting your information from, but I think
your information is not correct. The number of re-tests is usually very
limited and focused on a specific exam session in question. They usually
ask you to test at a different VEC, not necessarily an FCC office.

Some delusions keep people with low self esteem satisfied that they have accomplished something, I am a no code HAM, I do not need my Master's degree or my income to justify my existance, I enjoy am and am very active in ARES. Guess that does not meet your standards. Try to ELMER, teach CW to no code techs, don't be jealous that they have vhf+ privaleged when you had to take CW.

Neat. Someone actually thought of not charging. Of course, my first licenses cost nothing - it was just the 60 mile (one way) drive to Buffalo that cost a bit of time and money (gas, thruway tolls, parking, etc.). The cost is actually minimal anywhere. I think I paid $5.90 when I decided to get back into amateur radio and tested out in 1993 (after letting my tickets expire over 10 years earlier). Whats the cost today?

Of course not. But he didn't have to "look far to FIND one for his show"

> And Art was that guy who
> tried to panic the public with imaginary Y2K scenarios that absolutely
> never happened.

Absolutely! That's why I can't imagine how he could possibly face that same audience after that, other than he knows they are so gullible, or that they have already forgotten about it. (not likely with all that canned food and water still in their basements)

But I knew he would do this, considering he has that studio in his house he had to look at everyday, and that satellite dish in the back yard all ready and no place to broadcast. Only a fool gives up a work-at-home dream job like that.

> The National Enquirer has far more crediblity than Art Bell ever had.

I would not be able to put one above the other. Both are science fiction, and who is to say what science fiction is more "credible"?

Don't be silly and change everything around. If a child molester saved the life of one of your family members, it would be great too. Being a Ham Radio Operator does not mean they can save your family member's life any more than anyone else could in the same situation.

I am a Ham Radio Operator too, as are probably most people here, and my wife too, big deal. Anyone who can memorize the answers to the book with all the answers you can buy at Radio Shack can be a licensed Ham Radio Operator. And to be a Commercial Radio Operator, which is much more impressive, you don't even need any license or permit any more.

Some people just have their own limited view of life that they
can't see the whole picture.

I'm a 'coded' ham, and my Swan downstairs has NEVER had
a mic plugged into it since 1981. Ok, it hasn't been run since
1988 either, but that's just because my tastes have changed.

As to the original poster with that perverted view of hamdom,
I guess he feels that the only thing in life he's good at is flicking
his wrist. And I'll just bet there's another activity with flicking
his wrist he does a lot if the only joys he gets in life is trolling
the newsgroups.

We have begun our RTTY broadcast service to the hearing impaired,and
our web page (www.wwfv.net and www.wwfv.org) has been updated with the RTTY
broadcast schedule. It can be found under the Program Guide, and reflects
our current RTTY transmission times and frequencies. Anyone who sends us a
reception report and a copy of the received text, will receive a certificate
of reception (not an ordinary QSL card). We use the ordinary Amateur Radio
RTTY standard, so reception should not be a problem. As this service grows,
we will add interesting and informative SWL, Amateur Radio,
political, and other broadcasts.

Regards,
Peter Taggart
General Manager, Radio Station WWFV

Hehhe! I disagree with the subject, however. Hams that don't have to
know code doesn't make them any less of a ham, just because they don't
know code.
There are exceptions...like Lllllllloyd Davies.

Haha, that is quite funny ;-) but also ironic.
It has been stated well in this thread, there are too many
nut cases. That shouldn't be taken casually. Example:
For the mere act of attempting to share the use of a well known
75 meter frequency (not 3950 or 3901)and giving my callsign, they
gave me a

Nuclear weapons policies that involve agreements to remove all forms of nuclear weapons from the planet are doomed to fail for the same reasons that gun control measures have not been overly effective - the rogue nations and sub-groups that feel they have little to lose will simply continue on in defiance of any treaty.

I recently bought a Heathkit HD-1410 keyer.

Now I need the component layout and maintenance/troubleshooting sections
of the manual.

Can anyone out there make a copy and send it to me either by e-mail
or by snail mail. I'd be glad to pay for any expenses incurred.

Thank you.

I've been saying it for years, and yesterday proved it beyond any doubt.

Riley H. K4ZDH called in on 14.275, I reply, then a jammer comes on and
blows him off the band.

Yep....ya just cain't fix stupid.

Everything's there to sow discontent against our government. Everything's there to convince the gullible of the "monstrous wrongs" being committed by our government.. Just a bunch of bulls--- to mislead, corrupt, defile, defame and demonize. You know-right up Bother Lloyd's alley. Somehow I thought that once Clinton left, these people would so satisfied with GW that they'd lighten up but they still suffer from paranoia. It would have made no difference to them had it been GW or Gore, these journalistic jackass pant loads seek a revolution against our democratic institutions but as long as the FBI, ATF and Aunt Janet's successor know about it, SO WHAT? All they'll wind up getting is one gigantic ass kicking instead of a swastika fluttering above the Capitol Building.

> different phrase, I always used a "O" (the alphetic letter).

ROTFLMAO!

Toilet Boy, you are such a moron, still easy to bait, and gullible as
ever. It's becoming less and less of a challenge to prove you a liar.
While you've been whining about the difference between O and 0 (a trap
I deftly set for you), you've admitted using the term "infamous" to
describe yourself. The definition of infamous is having an evil
reputation brought about by something grossly criminal and disgraceful.
That's somebody, like you Toilet Boy, who is a liar, fraud, and who
illegally sells Amateur Extra Class Licenses to Novices.

You're STILL a liar and a fraud, Toilet Boy, and you keep proving it
day after day after day.

535. Yaesu FT747GX problem

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-09 01:13:39 UTC
From: dslosty@pipeline.com
Message-ID: <3a5a64bd.19222155@news.pipeline.com>
Source record: 96012
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

Hi,
I'm wondering if any other owners of the FT747GX have experienced the
following or a similar problem:

The transmitter seems to go into oscillation, and the
power output indicator on the S-meter pegs. However, Vcc
current actually falls and output on an external wattmeter
drops to 10 watts or less.

This condition probably blew the low level RF driver transistor
Q32 on the main PCB. I've replaced that and operation is normal
most of the time. However, occasionally the symptoms reoccur.
One clue that it is starting is that the keying time increases
dramatically, i.e. if the transmitter is keyed, the power gradually
rises to 100 watts over a period of about 4 seconds. If the
transmitter is kept key down for 30 seconds or more, oscillations
begin and the power drops off. These spurious oscillations
can be heard on external receivers.

I don't think the problem is in the final amplifier assembly.
If RF drive to the final is disconnected and a 'scope put onto
the RF output of the main board, the delay in rise time can clearly
be seen when symptoms start. Thus the final amp (unless there is
some strange feedback in the ALC/SWR sensing circuit) isn't causing
the problem.

Anyone have any thoughts or suggestions?

Yaesu hasn't been too helpful.
Plus, their current waiting time for factory service is something like
8 to 12 weeks. With an intermittent problem like this, I could end up
sending it to them a couple of times. In any case, I like to do my
own servicing.

73,
Doug/WA1TUT

This is going to sound dumb, but here goes anyway. Are the radials supposed to be connected to the base of a vertical antenna, or do they just radiate out from around the base, but are not actually physically connected? Its hard to tell from a schematic diagram. Sometimes it looks as if they are actually connected to the base of the antenna. If the radial system were to be connected to the base of the vertical, and if one were to make a homebrew vertical antenna fed with coax, would one solder the shield to the radial system, and the center connector to the vertical portion of the antenna? That seems like a short to me. Thanks

I dunno, I got a Radar/Laser detector cheaper than the mail order prices in one of these stores in San Fran. The Guy did not look very pleased but I just said, "Nope I can get it cheaper mail order" and started to walk out. In the end I got him to just below the mail order price (and about 1/5th of the super high price they put on the box).

I probably got lucky but it shows you can get them down but I can see how people who have not seen a price mail order or on the net could be easily ripped off.

Not if you consider its 450mA consumption spec
during RX. This means your alkalines will be
empty after 2-3 hours of reception.
Let's hope the spec is a worst-case value. Any
experiences available from FT-817 owners?

Tery,
The IC-746 is definitely NOT beefy enough to handle the
switching of an SB-220. Use the ARB-702i.
'Doc

Check the low value resistors on the base of the final transistors. I think
they are 47 ohms. On a production run they seem to have got the colors
wrong. Take them out of circuit and you may see that they are in fact 470
ohm resistors. Replace with 47 ohm and all should be well.
Good Luck.

Can anyone explain why the most detailed information is always anonymously? If you have something to say that reflects on a person, who ever they are, have the gonads to post it under your name or don't post. This is post is as valid as the writing on the bathroom walls.

I have no idea who Suzy is or what she may or may not have done, however if you are the holder of some great insight, why are you afraid to reveal yourself? Could it be because of libel laws?

Good Morning. I am searching for manuals and/or schematics for the CES Repeatermaker (not plus) and for the CES 640 and 630 DTMF Microphones. They do not seem to have information on them at the factory. Will gladly pay any costs for copying, postage, etc. Please respond by email. Thanks and 73's Don Smith KB6GQA

560. EOSS-46 Flight Announcement

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-09 20:03:49 UTC
From: Rick von Glahn <rickvg@iex.net>
Message-ID: <I21bOtI8SOSP0Jzpz7EotjDydtxG@4ax.com>
Source record: 95839

Flight Announcement - EOSS #46

This Edge of Space Sciences (EOSS) flight was originally scheduled for
December 16 and was delayed due to the velocity of the high altitude winds.

FLIGHT SYNOPSIS: EOSS #46

- LAUNCH DATE: January 13, 2001, Rain date is January 14, 2001
- LAUNCH TIME: 16:00 UTC - 09:00 MST
- LAUNCH SITE: Windsor, Colorado, Gene Fatton's Ranch

BULLETIN: QSL Cards!

The RMRL Cross-band Repeater will fly up to 20 miles high, so get your
dual-band HTs ready! QSL cards will be sent to stations making contacts
through the RMRL repeater with a SASE to Nick Hanks, KC0HVF. Thanks to Mark
Patton (Kï¿½YG) for making the cards. Listen for the beacon on 147.555 and look
for ATV on 426.25 MHz. The flight should reach 100,000 ft. and the beacons
should be heard in a 400 mile radius. Read more for the details.

DIRECTIONS: http://www.eoss.org/pics/windsor.htm
Leave Denver, Colorado on I-25 north bound. Proceed to the Windsor exit (Exit
Number 262). Proceed East on State Road 392 approximately 1.3 miles to county
road 3. Take county road 3 south a few hundred yards. The launch site will be
on the east side of the road. Numerous vehicles with antennae will undoubtedly
mark the spot.

The beautiful control room (AKA sunroom) will once again provide a fabulous
mission support facility. EOSS asks visitors to this room to remove their
shoes so we do not wear out or soil our welcome.

LAUNCH SITE COORDINATES:
40.4744 Degrees N. Latitude
-104.9628 Degrees W. Longitude

EXPECTED TRACK: See Prediction Page for Details:
http://www.eoss.org/flight/prediction.htm
Between 80 degrees and 145 degrees azimuth.

NET AND OPERATION FREQUENCIES:

- Preflight Foxhunter Net: 147.225 MHz Colorado Repeater Association,
8:00PM the preceding night

- Launch Site Operations: Simplex 146.550 MHz

- Tracking Team Operations: 449.450 MHz Rocky Mountain Radio League (RMRL),
146.58 MHz Simplex Field Frequency

- HF Net: 7.235 MHz, net control pending

SPACECRAFT FREQUENCIES:

- Beacon: 144.340 MHz FM (350 milliwatts output). CW beacon and cut down system

- Cross-Band Repeater: Input 445.975 MHz, Output 147.555 MHz

- APRS Output: 147.555 MHz, Output of Cross-band Repeater

- ATV: 426.250 MHz, 1 Watt

PRIMARY INTEGRATOR:

Pioneer Astronautics, Dr. Robert Zubrin, Dean Spieth, "Mars Micro Balloon Probe".

PRIMARY EXPERIMENT(S):

This is the fourth of many planned EOSS flights for the "Mars Micro Balloon Probe" which will place a series of balloons in the Martian atmosphere. The overall objectives of these flights are to test and develop inflatable gases from compounds that are normally liquids at Standard Temperature and Pressure (STP). The Mars surface pressure is simulated at 100,000 feet above sea level, thus the experiment on an EOSS balloon. This experiment will attempt to inflate balloons using various compounds. This will also permit another test of the deployment canisters required on Mars.

For this flight, EOSS #46, the objective will be to deploy a micro balloon on decent as well as to minimize "Post-Burst Chaos" on decent using a 600 gram balloon ("grape") as a stabilizer.

The objectives for the micro balloon is to test methanol vapor inflation of a 1 x 3m Montgolfier balloon during the expected 30 m/sec descent rate. Inflation during 5 m/sec ascent was successfully demonstrated on EOSS-42 last summer.

This fight will use two large helium balloons. The main lift balloon will be a 3000 gram balloon and will be cut away at 100,000+ feet. The second balloon or "grape" will be a lightly-inflated, 600 gram drag balloon used to slow the decent rate to the expected 30 m/sec which will simulate the deployment conditions expected when entering the Martian atmosphere. Additionally the balloon will stabilize the payload during decent. It will be cut away after the Mars micro balloon is deployed.

CROSS BAND REPEATER: http://www.eoss.org/hardware/crossband.htm
The RMRL cross-band repeater will be deployed. QSL cards will be issued for successful contacts through the repeater. Are you within 400 miles of Denver? If so, you can contact anyone else within the footprint with nothing more than a dual band HT with a rubber duck antenna. This footprint is calculated for an altitude of 90,000 feet. 90% plus of our launches reach or surpass this altitude. For operation guidelines see the cross band repeater page.

APRS: The packet callsign will be - W0WYX

SCHEDULE YOUR BALLOON CONTACTS IN ADVANCE

There is a new eGroup dedicated to scheduling contacts (IN ADVANCE) for any balloon flights from any group. People can go there and "register" and perhaps find other folks with whom they can plan contact schedules for the flight. This should be especially helpful for folks out on the fringe of the footprint as they will have extremely limited time windows to make contacts. This scheduling is optional and is not required to contact others through the cross-band repeater.

Here are the email and URLs to that group:

Post message: Balloon_Sked@egroups.com
Subscribe: Balloon_Sked-subscribe@egroups.com
Unsubscribe: Balloon_Sked-unsubscribe@egroups.com
List owner: Balloon_Sked-owner@egroups.com
URL page: http://www.egroups.com/group/Balloon_Sked

There is also a signup box for this group on the following page (lower):

http://www.eoss.org/hardware/crossband.htm

AUTOMATIC POSITION AND REPORTING SYSTEM (APRS)

Please disable your beacons on the EOSS packet frequencies, as that will minimize interference to other stations in your area trying to copy telemetry.

TRACKING AND RECOVERY TEAM INFO

Friday night, January 12, 2001 Marty, WA0GEH will conduct the tracking and recovery net on 147.225, 8:00 MST. Logistics for the tracking and recovery operation will be discussed. Please plan to listen in or, if you are interested, joining the effort.

The Tracking and Recovery net will be on 449.450 MHz Saturday, January 13. Starting about 7:00 am logistic traffic will start to flow. This will be become a DIRECTED net, all traffic for the recovery effort will be directed through Marty, WA0GEH.

Perhaps it has something to do with "Render unto Caesar what is Caesar's... "
or perhaps its something as plain as the fact that few Catholics seem inclined
to take political marching orders from Rome. Last time I checked, Ted Kennedy
was still Catholic, and still pretty much opposing the Vatican's agenda.
Likewise for Cuomo and others.

Catholics in national office sometimes stick closer to party line politics.
Even
so, their elections aren't conducted in the dark. When candidates' religious
views tend to conflict with their party lines, people notice. Here in
Pennsylvania,
the late Bob Casey, a Catholic Democrat, was elected governor running as a
pro-life
liberal candidate. When as governor he opposed abortion-friendly legislation
and
signed informed consent and waiting period laws, nobody was surprised.

> Is the Pope the de facto ruler of America?

No he's too busy trying to find out what a bear does in the woods.

--Thos

PS. I have NO idea why this has been posted to rec.radio. newsgroups. Unless
you folks in those groups know of a good reason to continue there, please
confine followups to alt.conspiracy.

Perhaps it has something to do with "Render unto Caesar what is Caesar's... "
or perhaps its something as plain as the fact that few Catholics seem inclined
to take political marching orders from Rome. Last time I checked, Ted Kennedy
was still Catholic, and still pretty much opposing the Vatican's agenda.
Likewise for Cuomo and others.

Catholics in national office sometimes stick closer to party line politics.
Even so, their elections aren't conducted in the dark. When candidates'
religious views tend to conflict with their party lines, people notice.
Here in Pennsylvania, the late Bob Casey, a Catholic Democrat, was elected
governor running as a pro-life, liberal candidate. When as governor he
opposed abortion-friendly legislation and signed informed consent and waiting
period laws, nobody was surprised.

> Is the Pope the de facto ruler of America?

No he's too busy trying to find out what a bear does in the woods.

--Thos

PS. I have NO idea why this has been posted to rec.radio. newsgroups. Unless
you folks in those groups know of a good reason to continue there, please
confine followups to alt.conspiracy.

Probably because nobody else is crazy enough to think these people
place the Pope above their own President.

>Is the Pope the de facto ruler of America?

No.

By the way, what does any of this have to do with amateur radio?

When you would hear alot of people on 14.313. Today, I cranked up my
Dx-302
and tuned in to hear just a faint echo of what 313 was. No "radio-war"
going on. There was some UNID clown whistling, but that was it. I did
hear
a few of old timers, like JYZ and W6URA? It seems like yesterday to
hear
heroes like KT4TR and W4FQF in there, fighting AF2Y and WB2OTKand thier
minions. It's just not 313, but 3950 too. You used to be able to
tune
up and down 75m and find at least 2 or 3 "hot spots" some were 3853,
3865,
3901, 3945, etc. I would get lots of laughs out of these fools. Some
"legends" of 75m were K5BLB, W9ART, WA9KJI, etc. And lets not forget
W2YEE, good ol' Walter. He would have too much to drink and start
playing
his German marching music on 3950 during the Liberty Net. 75m Ham
band is
boring now, with silly QSO's about hair loss and radios, etc. I
enjoyed
the "fun" what about you?

I don't think anybody, including Alan, thinks elimination of nuclear weapons is anything more than the ultimate goal to strive for, not a realistic possibility in the immediate future.

However, note that we have had great success in limiting the spread of nuclear weapons (with some noticable failures), so there is some ability to monitor rogue nations and sub-groups. And, with the political will to use military force, it is possible to stop at least some of these rogue nations and sub-groups before such weapons are completed.

Whatever the case, an anti-ballistic missile defense system adds little to our national defense, against the superpower or even against these rogue nations.

Lloyd, your statement makes about as much sense as hearing a resident of a
formerly crime-ridden neighborhood (that has since been cleaned up) say:

"Gee, this place is really boring - nice homes, friendly people, safe
streets... I really preferred how it was back in the 'good old days'; when
every other house was a crack den, prostitutes on every street corner, junk
cars in every front yard and two or three drive-by shootings every night. Yep,
things were soooo much better then."

It's a strange attitude coming from someone who belongs to an organization
which (allegedly) promotes "better" amateur radio.

I have two modded FT-50's, had good audio reports everywhere. Works fine with the kid's FRS radios, get good signal reports on local repeaters. Maybe just something wrong with that unit....as far as power output goes, I assume it's pretty close to in-band, as it seems to have comparable transmit capability to my commercial HT's.

Take it over to the CB use group, I'm sure those idiots can help you butcher the FT-50! The FT-50 was not designed for FRS, so it doesn't surprize me that the output is low...BOOO HOOOOO!

Steve,
The 'RVSSN' is the initials of the name of the net. To
check in, when the net control station (NCS) asks for them,
just send your call sign and wait till your acknowledged.

Steve,
Just guessing its probably a Rec Vehicle group. I am the Net Control of the Alabama Section Net, a CW Net that meets twice a night, 24/7. I am NCS on one evening a week.

This is a traffic net. Meaning we send third party messages to various parts of the state of Alabama and the world.

Proceedures are universal in the NTS (National Traffic System). If you take QST, look up your Section Manager and drop him a line. I'm sure he will be happy to fill you in on the where and when. The NTS also does phone and digital networks.

You don't need to be a ARRL member to operate in the traffic nets. If you want more info drop me a line at my e-mail on QRZ.

> You used to hear a similar echo even tuning between AM stations that were carrying the same network feeds. I seem to recall that it was WWL/WCBS that I could easily hear the echo cuz they both had similar strength at my location. That difference was certainly attributable to the difference in delay on their network feed circuits since the stations were equidistant for me in NC.
> One type of echo, which has never been totally explained, is the 7-second echo. A Prof. O. Villard? at Stanford did alot of investigation of this phenonomena. I heard one of these once, and corresponded with him regarding the occurence. Has anyone else ever experienced this?

Don't broadcast stations use a 7-second delay to prevent broadcasting obscenities or the like? What if they had a cross-connect that allowed both the original audio and the delayed audio to go out at once?

Really???? And just how do you know that? Did Saddam Hussein answer
you inquiry in the negative? How about Osama ben Laden? You think no
other nation has capabilities they aren't talking about? Where are all
the missing nukes from the late grate USSR? Tell us again how well
agreements work. I would have thought that the last people on earth to
forget that would be the British, after the way their great agreements
of the late thirties turned out.

If you aren't very careful such wishful thinking can easily turn into
the sort of moves that CLinton has so often played.

This must be one of the most persistent urban legends in the history of
radio broadcasting. None of this has ever existed in the stations which
I have known or worked for.

Is there anyone who has really ever seen this implemented anywhere?

I have seen this posted before and I know Chevy has a fix for it. I have narrowed down a bad RFI problem I am having with a new 2001 Chevy Tahoe. After isolating the power, antenna, checking all grounds with no results. I pulled the relay for the fuel pump and the RFI disappeared. (of course the engine quit after 10 seconds) That pretty much isolated where the RFI was coming from.

Now my problem is my local Chevy dealer. They have no idea what I am talking about nor can they find any bulletins from Chevy. I know Chevy is aware of this and has a fix as I have seen it before.

If anyone out there knows the part # or the Chevy Service Bulletin #, I would appreciate it.

Thanks
N4DIA

WLS, WGN, KMOX, WUSN, KWKH, KROK, WDZ, WDZQ, WROK, KFH,
WSCR,....How many do you want?

Most network talkshows also run their own delays, including the
talkshows on Premiere which include Rush, Dr. Laura, Coast to Coast,
run the list.

It's not all radio stations, but stations where there are a lot of
phone calls put on the air live. Music stations generally do not,
but tape contest winners prior to air, and not all talk stations
operate in delay on the local level. But the bulk of talk shows are
in delay, at some point in the transmission chain...and Eventide has
made millions providing the hardware for this 'enduring urban
legend.'

I hear it all the time on both of the two nearby 'call-in'
stations when the listener has his radio turned up. If it squeals
with feedback, it is normally not delayed. It varies with the
host whether or not he uses it.

Maybe but more likely someone was messing with you or you were getting multipath delay or something.

Tim,
Oh, your going to have a lot of fun with this! It takes
a form 605 for renewal, but you have to register your call
sign now (not the correct way to say it but it's close). I
think it would be easiest if you go to the ARRL or W5YI web
site and get all the information about it. It's different
than it used to be...

Henceforth, you shall be not known as "pitbull" and I christen thee "MY BITCH." Your need to get your nose up my rectum and desire to swallow my choad is flattering, but you'll have to stick to your usual friends, the winos and crack-heads.

Here's some COMMANDS I COMMAND you to follow, MY BITCH....

1) Be sure to followup on EVERY post of mine.
2) LIE and project your sordid, useless little life onto my successful one.
3) HIDE behind that anonymous posting, ye of no gonads.
4) Get some TALENT when you try to compose a flame.

I think MY BITCH is really Lllllllllllllllloyd..who ELSE would care what I write about Lllllllllllllloyd BUT Llllllllllllloyd???
So, MY BITCH, make up all the lies about FL you can...the truth is, I NEVER had a DWI, DUI, or anything like that. Too bad for you, my flat-craniumed obese hermorphodite.
Now, get to it, MY BITCH!!!

YOUR MASTER,
Roger, KC8JBO.

Yeah, John, I see you've noticed MY BITCH (his new pet name), my little (if you consider 250 lbs little) pet really has it bad for me. I gave him some new ORDERS in another post. I wonder if all he can manage these days is to play "simon says..." I guess that shows something of his mental level. Well, it's nice that even retarded folks like MY BITCH can have the opportunity to post to the internet. Now if they can just get him not to drool so much on the keyboard. Damn near costing them more trouble than he's worth....

Never worked at GMAC...though MY BITCH gets those food stamps, don't
you?

> > Yaesu FT-920 |Inverted Vee @ 40 ft.
> > Yaesu FT-90R Rice Box Radios

Poor MY BITCH, he has to have those second to fourth hand junk radios
he scrounges at flea markets...he couldn't AFFORD to spend his COCAINE
money on a REAL RADIO.

>
> Does MOMMY like to watch Ric Flair ALSO, hohohoho!!!!!!

> or something.

Nope, none of the above. I randomly shifted frequencies
suspecting that, and the echo followed me. It had a very
fluttery, auroral sound, and no normal multipath delay could
account for 7 seconds. It started during a QSO with a guy and I
didn't hear it on his signal, but he heard the echo also. It
pretty well obliterated the conversation, needless to say.
I learned about Dr. Villars' work and submitted a report to him.
I guess he never figured out a good answer. Apparently its not
all that rare, but its the only time it has ever happened to me.

Regards,
Bill

When I was younger and living in New England, WBZ-AM 1030 in Boston used a 7 or so second delay on it's call-in shows. I distinctly remember the nighttime radio guy (Larry Glick, for those of you who are wondering) talk about the delay and playfully scold the caller for being a potty-mouth. I seem to recall some others as well that would occasionally blank out callers when they let something naughty slip; the modulation would die abruptly, or some station ID jingle would play, and then when the signal came back a few seconds later, you'd hear the radio personality and the caller chuckling about the dirty joke that was just told :-)

Also, on the rare occasions when I called such a program, and I left the radio on low, I could hear my voice come across the airwaves about 7 to 11 seconds later than when I said the words. Now, it is *possible* that something other than a delay was involved to achieve this neat effect, but I am at a loss as to what it could be.

Guess I'll buy this one. Come to think of it, wasn't (or maybe even
still is) there even an FCC regulation against broadcasting profanity?
Could this be the reason they resorted to this kind of system in order
to keep themselves from getting into trouble?

Somewhat like the bursts of 1000 Hz tone in your police documentaries?

Never heard of anything like this being used in Europe. Certainly not in
Germany. Then again, if they'd pay me a dollar for each time someone
yelled "Scheisse" in any kind of film or play on German TV, I'd be able
to retire to a comfortable life of pure SWL'ing in front of a stack of
1st class receivers. ;)

Used by the BBC and commercial stations in the very early days of live
phone-ins. not used now IIRC.

We Americans tend to be somewhat fond of profanity but go nuts
trying to restrict it so that the kids will have to learn it
somewhere else.
Its ok to have JCVanDamme on TV mowing down people with an
automatic weapon as long as he doesn't cuss them.

Yep, with the front end on the DX-302, you could probably hear all those
frequencies at one time ..LOL !!!!!

I would get lots of laughs out of these fools, namely KV4FZ, KT4TR,
W4FQF, W4LLI, K4OKA and old drunken Jim Overfelt, the Little Richard
disc jockey of 14.313. But, the one who was the sorriest, whiniest,
was/is N4FZ John Da Blabtist.

> Where are all the missing nukes from the
> late grate USSR?

Calm down, Dick. I said there is "SOME" ability to monitor, not that it is 100% foolproof. But, lets not be stupid about this either. The U.S. (and I'm sure other nations) has made considerable effort to develop technologies to detect and monitor nuclear materal around the world (however it is used). So there is at least "SOME" ability to monitor the nuclear activity of rogue nations.

Likewise, as I said before (that you so carefully deleted), it is possible to stop "AT LEAST SOME" of these rogue nations before such weapons are completed (some nations, not all). And, like I suggested before, nuclear weapons reduction and retarding the spread of such of weapons has a better chance of stopping rogue nations than the proposed anti-ballistic missile defense system (which is what the topic was about).

> Tell us again how well agreements work.

I never told you any such thing in the first place, so why would I tell you that again? In fact, I clearly stated that the "political will to use military force" was the primary way to stop rogue nations (agreements were not even mentioned - a rogue nation has went beyond agreements).

Also, you may find this interesting:
The Eventide profanity delay units also incorporate pitch shifting.
After the operator hits and holds the "dump" button for the duration of the
offense, the unit picks up at the point where the profanity ended
and then, using pitch shifting, swiftly builds up the delay back to
the desired duration. Therefore, a minimum quantity of program is lost,
and is noticed least by the listener.

Ah, now we're getting somewhere. Any URL for the manufacturer?

Still not quite clear how this should work in practice. I'm wondering
how one would monitor the audio while this is actually used.

Obviously, right after the occurence of something undesirable, the
operator would have to monitor the device's output in order to know when
to push the button and do so at exactly the right moment.

Meanwhile, he wouldn't be listening to the input and hence had no idea
about what might be happening, ahead of the device.

Yes, you're right, I *am* confused... :)

Anyone able to shed some light on the operation in a real-life
situation.

Funny though, in my days as an audio engineer I have never had listeners
say such things on the air but only our most honorable journalists and
newsreaders.

So, in order to give you something to laugh about in those sad days on
r.r.s., here's two of the best:

The newsreader at a famous German station heard on AM and longwave all
across Europe had fallen asleep in the studio, during a particularly
uneventful nightshift. I hadn't quite noticed it, and when I opened his
mic on the hour, all I heard was "Shit!!! I haven't got the news!".

The other was a most distinguished female presenter at BFBS* Cologne
who, after the third attempt to read the same announcement on the air
had again ended with her tongue in knots, banged her fist on the table
and yelled: "Oh, sugar!! F...ing hell!".

Yes, if a wacko wanted to, they could find your callsign as posted and then take it to QRZ.com. Then they could find out your home address and then proceed to stalk you or harm your family members.

Absolutely, WGST in Atlanta is one I personally am familiar with. I use to listen to the radio and keep my 706 tuned to the helicopter IFB. When they bleeped someone on the call in shows I would turn up the uncensored IFB and here what was bleeped. At times I use to call in to Shun Hannitty when he had the morning show, I listened on the radio and what was on the line was some number of seconds ahead of the radio. In fact I could hang up and listen to the last few seconds of myself on the radio.

No, but they should be on any search engine. Eventide is not the
only one, but certainly the best known.
>
> Still not quite clear how this should work in practice. I'm wondering
> how one would monitor the audio while this is actually used.

The talent monitors off the program buss in real time. The the
composite program feed goes to delay, which then goes to the
transmitter. Producers monitor program feed, and the Dump button is
big and easily hit by the producers, or the talent in the event of
profanity, or libelous content. In two stations I worked, the Dump
buttons were parallelled in both the talent booth and the producer's
booth, so either one could catch the profanity if the other missed
it.

>
> Obviously, right after the occurence of something undesirable, the

No, the operator monitors the input. And dumps when the profanity
occurs. The seven second memory is dumped. Very little effort is
made to catch only the offending word or words. In most cases the
delay and memory are dumped and so is the caller.

It is possible to switch to air in the operator's headphones to
catch an inobtrusive moment to dump, but since things happen pretty
fast in the booth, that's often an electronic version of Russian
Roulette with one's career.

As a talent, I hit my own dump button monitoring pre delay. As a
producer I dumped at once, because there were so many things to keep
track of simultaneously, that trying to keep track of a
conversational stream in order to catch a single word or phrase, was
often futile.

I produced a live show in a bar in downtown Chicago on a Saturday
Night, with the host not on teh stage, but in the crowd. Now, you'd
think if there were going to be a profanity problem, it would be
there. But after 5 years, not a single incident where a person
before the mike uttered a profane word.

Although I sure as hell did.

Eventide makes special effects mainly for electronic musicians.
They have been around since the 70's and the person who made them
so popular and got their sound known was an electronic music composer
named Isao Tomita. Most of his Albums list the old eventide harmonizer
and he used it very often in his compositions.
Eventide has recently released the Eventide UltraHarmonizer 5000 in their long
series of the harmonizer family. For those who don't know what harmonizers are,
its a process of pitch shifting a signal and mixing it back in, making the effect of
multiple
people saying the same thing except with different pitch. Add a little delay to each
harmony,
some slight formant shifting done by LPC coding and a little pitch modulation by an LFO and
you get the effect of a group of different people singing the same thing but their voices
sounding
different from each other and not perfectly, roboticly synced together, making for a very
realistic
choir effect coming from a single voice.
Most studio's don't have a dedicated delay line but in reality are using the delay line of
a multiple
effects unit like the Eventide family of units.
Another interesting thing is that when you see a message before a movie is about to be
played on
TV reading "This movie has been time expanded (or time compressed) to fit the standard
allotted time
for television." This means that the movie has had it's speed sped up or slowed down and
it's audio
sped up, buts its framerate reduced back down to 30 FPS and audio back to normal pitch.
Yes you guessed it, the most popular and most precise and professional pitch shifting
device used
for this is the Eventide Harmonizer series or older Lexicon pitch shift units.

You can't say:

sh!t
p!ss
f*ck
c*nt
mother f*cker
b!tch
c%ck

(replace i for !, u for *, a for @, o for %)

My email works. It is no worse then your my-deja.com address.

You should have remained quiet. Now everybody knows who posted
the original post in this thread.

Thats exactly the reason.....any listener of talk radio in america is
famiiar with the dump button, but some shows never seem to use it because
the screen thier calls well.....The Howard Stern show is unique because they
have a management guy in an office with a dump button in case he feels
Howard said something he shouldn't have....His show has actually been fined
by the FCC for indecency or whatever. His company has shelled out millions
of dollars in fines so I guess they feel its cheaper to have a guy censoring
him in-house. The funny thing is, listeners call Howard and tell him that
his show has been cut(he can't tell when its happening) and he gets all
pissed off and yells at the guy on the air! Broadcast brilliance!

The current issue of Modern Maturity has a cartoon showing grandma scolding her grandson, saying, "Only use profanity for emphasis, dear. Otherwise you cheapen it."

I get on the bands on a daily basis. If you'd try to operate (and in
your case I'm being liberal about your operations), you'd find a whole
new world out there. When are you going to get on 14.313 and
say "Goddamn it, I'm not a fag." again????? Tell us about how YOU
aren't a fag, but your first wife was driven into lesbianism.
When are you going to INTERFERE with EMERGENCY Maritime communications
again? When are you going to cause another ship Captain's wife more
grief with your DUMBASS comments? Are you going to have to retest and
LOSE some more privleges, when you couldn't pass the ADVANCED? Hey, at
least you might make Technician, and it would help the HF bands. And
quit playing those "digital recordings" again, they'll pop you AGAIN.
Fuckwit.

>Yes, if a wacko wanted to, they could find your callsign as posted
>and then take it to QRZ.com. Then they could find out your home address and
>then proceed to stalk you or harm your family members.

Which brings up another suggestion: Do NOT give your home address on your license application!

If you read Part 97 closely, you will find that there is no requirement for your physical address to be given. The FCC only requires that you keep "an address where you can receive mail from the Commission" on file with them.

In today's junk society, you're only asking for trouble if you allow your address to be publicly available via QRZ.COM or similar means. Use a work address, post office box, ANYTHING besides your home address.

Ditto for the address you give the DMV. In many states, anyone can get a license plate number and easilly find out the address of the owner. It's considered "public information" and thus available to anyone who asks. Since "road rage" is now a common occurance in most U.S. cities, do you really want this information available to the guy who you flipped off in traffic? I didn't think so.

652. Need info on final pack for Icom IC207H

I need the part number for the 2m final pack in the Icom IC207H
radio. I would like to know the number stamped on the plastic case,
but the part ID from the parts list would be OK. If you have the
schematic for this radio and could look up this info for me, I would
greatly appreciate it! Thanks and 73...

It would be real nice if they would put the uncut Jerry Springer
audio on one of the subcarriers. They run about 20 beeps a minute.

Actually, the audio on Jerry Springer is a continuous tone. They
just interrupt it occasionally with audio.

I don't believe bitch is one of the seven words.
one can here it used with some regularity in day time soap operas.

Guess I will have to put on the old George Carlin album where he outlines
them in detail.

Correction to the list. It was just getting early when I posted that.
<g> BTW, the George Carlin album was Occupation: Foole back in 1973.
Things have changed a bit since then.

Corrected order: (from less tired memory)

sh!t
p!ss
f*ck
c*nt
c%ck s*cker
mother f*cker
t!t

He also added the addendum:

f@rt
t*rd
tw@t
b!tch
p*ssy

There may have been others but I'm not dragging out the turntable!
My spell checker does a good job figuring out the right words!!!

Does this include those of us who learned code just for testing and upgrade purposes as well? I learned it. I hate it. I chose not to use it. In fact, it's been so long since I had to use it, although a general since 1990, I can't copy well enough to get the CW ID's on 2m repeaters. Am I any less a ham? While I am in favor of 5 wpm for entry level, that's gone, so we should do all we can to help new hams, regardless of their no code status, in any way we can...maybe by example of what good, polite and courteous operators should sound like? By the way...where are all those dreaded CBer-type ops so many were fearful of prior to no-code becoming a reality? It seems to me, the glut of bad ops some expected just never materalized. Most of the no coders I've spoken to were like any new ops...trying like hell to do a good job, trying to have conversations with people they've just met, sounding a little nervous...but we all did. So what's wrong with being new? Where are the bad, impolite and discourteous operators? Most I've heard are on HF, have old call and have been generals or higher since long before the no code rule change...jamming certain nets, using words on the air that even my foul mouth and long-since virgin ears would not say to anyone in public or in front of mine or anyone elses kids or spouses. Hey...anti no coders...the bad ops have been here for years, and as society changes the level of what's supposed to be acceptable, they will spread. What a great time to be a ham... potentially lots more people to talk to who have more to say than a signal report and a lengthy brag-strip of all their cool stuff. Many more people within our ranks who are new and looking for on-air experience. More than just the same ol-same ol'. More people to occupy our bands so maybe we can prevent more loss of spectrum. There will be bad ops amongst the no coders. Hopefully, they will lose interest and go away...the bad ops who have been here for years don't seem to, but, perchance to dream. For the anti-no coders...get a grip. It has not been all that bad, and to say that all the no coders are not "true" hams is just plain silly. To trash an entire cross-section of the radio-enthusiastic community is just plain stupid. There are plenty of good, solid hams out there who never learned Morse code. Most have a longtime love for radio, and an appreciation for the hobby. One thing that has always been constant with the hobby is change. These no code newcomers just happened to step in sh*t. They got lucky, and came aboard as a change was happening and they took advantage of it. Boo hoo hoo to all the complainers and old farts who simply can't accept change. For those who like code, go nuts and use it. For those who don't like it, don't use it. For those who didn't have to learn it, good for you...if CW sounds like fun to you, by all means, if you desire to, learn it and have fun...that's what it's all about. I am a real ham...I have a few thousand dollars worth of crap on a desk in my house and

screwed to my dashboard... I have a collection of different size metal tubing on my roof and long lenghts of wire all around...some antennas spin, some just point straight to the sky...I have neighbors who look at me funny, and friends who come right out and say they think I'm nuts for having a desire to blast an RF signal randomly into the heavens just to see who else might be out there...I have a higher-than-average electric bill and a wall full of postcards from other RF wave heads.
I don't jam repeaters and if I come across someone I just don't like, I just don't talk to them again...I try to help newcomers and enjoy almost all the hobby has to offer. Because I don't like or use code somehow makes me a non-ham, well...so be it. "Can't please everyone, so I'm gonna please myself" and play radio anyway I have fun with it.

If I had followed this advice, I would still be riding on my
original tires and would have avoided a near miss on the highway
due to a nail inserted >backwards< into the sidewall of my rear
tire. That was a warning; next time they could insert the nail
into my front tire and cause a fatality.

Exactly. And Lllllllllloyd's so dim he would need an ALPHA or an AL-
1500 just to get into the milliwatt output range for his "bulb."

I guess Lllllllloyd's never heard the song "Squeeze Box."

Preach it brother!

I've been a general-class for almost ten years now (something like that, I can't remember). I heavily enjoyed code, used it more than voice (to me, it was more fun to say the standard stuff in code than in voice... stretched the contacts out too :-)). I believe that hams (and members of any community) should know about the history of their hobby/activity, so certainly an education in "the early days" is useful. And code can be useful, too, such as in emergencies.

BUT, I think the technical aspect of amateur radio is far more important than any nostalgic memories and techniques. I've been absent from amateur radio for a long time, and am just starting to tiptoe back in... but what's bringing me back in is an interest in the technical aspects, not a desire to see how many contacts I can make in some time period or how many different countries I can see. The vast realm of digital techniques and applications has sparked my computer-science-masters-degree-self into interest.

And that's the key... I think it would be a shame to deny excited, technically-oriented newcomers entry just because they don't know an old communications mode. Tougher tests, perhaps. Coverage of CW, just as SSB and packet are covered... after all, it's simply another mode. The fun of CW notwithstanding, do you expect a newcomer who is used to tens-of-thousands of words-per-minute on a computer to be particularly enthralled by 5 wpm (or even 50 for that matter)?

Anyway, that's my two cents.

Rob French, KC4UPR

Good post.

Just kinda wish more Hams thought like you do. I "was" persuing my code and studying everything under the sun up to General last summer before the ARRL qualification change. The attitudes of a few Hams around my parts and judging by the attitudes of Hams elsewhere (from rec.radio.cb and amateur.equipment forums), I stopped. Cutting down CBers who want to join the Amateur Fraternity with the "holier than thou" attitudes discouraged me from doing so. Don't get me wrong, there are a few who volunteered to Elemer myself and few others around my town with code and Amateur rules, regs, policies and radio knowledge. But the percentage that frown upon us when we motored on down to the town library with mobile "CB" antennas mounted made me say "...oh the hell with this crap!" and left.

Hams are not "holier than thou" nor will they ever be. I've met CBers who knew more about Radio than most Hams do. And these certain individuals aren't Hams which provided me with excellent info and theories of Radio within the 11 meter band. Can anyone ask for anything more? HELL NO. Don't need a license to talk to people 152 miles away during some good groundwave conditions... don't need no license to meet people (good and bad) via radio. I like my hobby. And I'll keep on talking without paying seven bucks to test to talk on it.

Perhaps I might test in the future. Then again maybe not. But until then, if and when attitudes change, I might just have to stick to CB.

Just my couple of pennies...

If you have a need for an SMA-TO-BNC antenna adapter that is custom made to fit and protect your H.T. or scanner radio, I have the solution.

Adapter allows you to:
Quickly change antennas to base,mobile or different style use.
Use the more popular and wider selection available of BNC antennas.
Prevent chassis connector wear or from coming loose due to antenna changes.

Adapter features:
Gold plated contacts with a teflon insulator.
A low profile design with a rubber covering for a factory antenna look.
The rubber base seals to the top of the radio with no spacers needed for moisture and dirt protection.
The base also provides an excellent support for any length of antenna or application.
No need to remove adapter once installed to make a quick and safe antenna change.

Sizes to fit radio models:
Yaesu: VX-5,VX-1,FT-50-R,VX-10,VX-150,VX-110,VXA-120
Icom: IC-T8A,IC-T81A,IC-Q7A,IC-R2
Kenwood: TH-D7,TH-G71
Alinco: DJ-V5
Radio Shack: HTX-200,HTX-400,HTX-245
Aor: AR-16

Previewed in the May 2000 Issue of CQ Magazine, and the Nov. 2000 Issue of QST Magazine.

$11.95 + $1.50 S+H(One to unlimited)
(Check or money order only in U.S.Funds)
(Specify radio model when ordering)

STEPHEN G. GULYAS
706 LALOR ST.
TRENTON, N.J. 08610

Kevin,

The deviation of the FT-50 is wider than FRS uses, so it would have a tendency to be hard to understand. Also, unless you use 12.5 step rate, the FT-50 will not tune to the FRS channels. Even when the proper frequency is displayed, I would check with a counter to be sure. Last, but not least, it is not type accepted for FRS use.

FWIW,

David
KD4NUE

To All who emailed me with ideas - Thanks!

I have found the root of the problem. Anyone with a 2001 Chevy truck with a gas tank of 30 gal or more might run into this RFI. The tank is made of PVC or other plastic composite. It is not metal. The fuel pump is mounted on the TOP of the tank. (yes, you have to drop the tank to get to it)

By working my hands as close to the pump as I could and pulling the leads out of the wire loom and snapping on ferrite beads, I have removed 75% of the noise. I will be at a friends auto body shop in a week or so and we are going to pull the tank, build a shielded cage for the pump and ground it. That should take care of the other 25%.

It took me making a list of things different about the 1999 Tahoe and 2000 Tahoe to figure this out. The 1999 had the same pump, but it was mounted on a metal tank.

You see what I mean?

Never said anything about changing CRAP to suite my needs. Just lack of interest because of "upstanding" "I've talked to BFE, Turkey today! Wow, what a great contact!" Extra Class Ham operator like yourself. But you can't even talk to your neighbor... am I right Brucey? Is Doug Adair (N8WWM) a relative?

"One of the only Real Hams left, most of the new ones are CBplussers..." man talk about being picked on when you were a CBer, huh? "Holier THAN THOU... Brucey!" You must be related to some of the "knuckleheaded" Extra VEC's here in town, aren't you Bruce? What an eggheaded treehuggin' hippie... its a shame.

Been there, done that, got the T-shirt. I got the rudest hit of
all at a field day event. Hamguy would get the ones on top of a
pile-up, and I was pulling calls out three and four deep.
After a few minutes, the hamguy asked my for my call. I told him
xxx-69. As soon as he figured out I was a CB'er, he wouldn't even
look my way. The members of our sideband club were invited by our
net control guy, a licensed ham. (A decent dual operator, not a SS)

> Just kinda wish more Hams thought like you do.

Aren't you really saying that you wish more hams thought like YOU do?
A little unrealistic to expect the entire ham radio community to have
the same opinions you have, isn't it?

> [snip] The attitudes of a few Hams around my
> parts and judging by the attitudes of Hams
> elsewhere (from rec.radio.cb and amateur
> equipment forums), I stopped. Cutting down
> CBers who want to join the Amateur Fraternity
> with the "holier than thou" attitudes
> discouraged me from doing so. [snip]

If you allow the attitudes of others to discourage you from doing
anything, then you're a darn fool. Ham radio is a diverse hobby, made
up of all types of people. Don't judge ham radio by what you think of
the people you don't like. Otherwise, you're no different than the ham
operators you complain about (complete with the "holier than thou"
attitude). Instead, ham radio should be judged by what it offers you.

> [snip] I've met CBers who knew more about
> Radio than most Hams do. [snip]

Where are these people? I've been involved with CB off and on for
over twenty years, in all parts of the country, and I've never met the
radio geniuses that CB'ers keep talking about.

Ignoring those ham operators who use CB, the spectrum of radio
knowledge levels are always higher in the ham radio community than in
the CB community - beginning ham operators are always more knowledgable
than beginning CB'ers, and advanced ham operators are always more
knowledgable than advanced CB'ers.

Now, there may be some rare exceptions to this assessment, but those
exceptions are darn rare. Too rare to justify this endless claim by CB'ers.

> [snip] Don't need a license to talk to
> people 152 miles away during some good
> groundwave conditions... don't need no
> license to meet people (good and bad)
> via radio. I like my hobby. And I'll
> keep on talking without paying seven
> bucks to test to talk on it. [snip]

Well, I could point out that you don't have to give up "your hobby" (CB radio) to become a ham, but I assume you're smart enough to already know that. However, with that in mind, the paragraph above doesn't make sense - you can become a ham and still do all that with your CB.

Of course, I could see how seven dollars could be a significant barrier to the financially challenged. Have you tried to borrow the money?

> Perhaps I might test in the future. Then
> again maybe not. But until then, if and
> when attitudes change, I might just have
> to stick to CB.

Well, don't hold your breath waiting for attitudes to change into something you find more acceptable. I know this may surprise you, but, to be perfectly honest, most in the ham radio community don't really care what you think about their attitudes. Therefore, most are not going to change their attitudes just to make you happy. And, again, only a fool would allow that to discourage him.

Nobody is going to sit here and beg you to become a ham operator. If you're happy with the limits of CB, then by all means stick with it. Or, if you want to advance into a more technically challenging radio environment, then get a ham radio license.

But, whatever the case, its your decision (and nobody in the ham radio community is going to loose any sleep over it - whatever you decide).

> Just my couple of pennies...

And that was my two cents worth.

This Monday will commemorate the 15th Anniversary of Martin Luther King, Jr. Day.

How do you plan to pay tribute and honor on this momentous and important occasion?

(choose all that apply)

1. By goin' to da KFC and eatin' some mo' dat frihhhd shickun'.

2. By goin' to da white subuhbs to shoplif' an steel da cahhhs.

3. By smokin' some mo' dat crack cocaine.

4. By riotin' wid' Jesse Jacksunn and burnin' da town cuz Geoooge Bush wuz eleckked da prezident.

5. By axein' why I don't get mo' welfare money cuz' I be habin' 8 kids and no idea who dey fadduhs be.

6. By complainin' about how Whitey is da reason fo' all muh' problemmz an I can't get nuthin' wid out dat Affirmative Action.

7. All of dem dere mo fo reasons dat you sedd.

Bullshit! The R390 had triple conversion when it was introduced about
45 years ago!

There are any number of radios available today with quad conversion.

Good luck with this one now!

701. AA9PW Exam practice pages have moved

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-12 17:39:25 UTC
From: Simon Twigger <simont@mcw.edu>
Message-ID: <3A5F414D.C8B3DB7C@mcw.edu>
Source record: 95930

Hi there,

Just a quick post to inform the group that the AA9PW Amateur Exam Practice pages have moved location to a new site:

www.aa9pw.com

Please change any links you may have from the old URL (used to be: www.biochwm.mcw.edu/Postdocs/Simon/radio/exam.html) to the new one: www.aa9pw.com

The old server was struggling under the load and the old URL was a little unwieldy so hopefully the new site will perform better. The move was a little sudden as the old machine died on us so there are still some features that havent been moved or updated.

The site still offers practice for the FCC Amateur and Commercial radio exams, however, the Morse practice is offline at the moment, I need to talk to the ISP about a few things before I can bring that online.

I will be revamping the site and building a database in behind the scenes to improve the features I can offer, this should appear once I can get to grips with MySQL and have enough time to move things over. Im also working on the FAA knowledge tests as well, these should appear over the next few months as I work through the question pools and deal with the figures.

Thanks for your support and good luck with your upgrades!

Simon, AA9PW

That's one euphemistic way to put it. Brutally murdered is the real
name for it, however. Just the same, the shot that killed him did
not have the desired effect - instead of quelling the outrage and cries
for freedom, they made MLK a martyr and galvanized the whole movement.
In large part, it is the defining seminal event that has brought this
society to where it stands today WET race relations.

For blacks who, despite the Civil War and Emancipation Proclamation and
Consitituional amendments were still subject to obnoxious treatment
under the law, it was the shot heard round the world.

How can a non-animate object commemorate anything? You know,
like 'Traffalger Square'(excuse the spelling), or all those non-
animate statues? I find fault with your logic.

His FBI file was an interesting read!
He was not the "saint" he has been made out to be in the press.....trust me one this one!
NOT one of J. Edgar's favorite people.
HE DID have a valuable message for the people of his time but it is best left that he did more good than bad for race relations.

It would seem this argument was settled when JFK assumed the presidency.
Catholicism is not the religion that one needs to worry about in the US.

China or any other nuclear armed nation isn't going to drop paratroopers into US cities until after they've cobalt bombed us...that way, the invaders will only have to police up the rotting bodies and our guns that we never had a chance to use.

If you get a chance, read "China Doll - Clinton, Gore and the Selling of the U.S. Presidency" by Roger, Dr. Canfield, et al and the compromise of the W-88 warhead design information.

And as politically incorrect as it sounds, I remember him as a whore hopping preacher who was involved as a tool of the communists.

I marched with him once in Alabama, trying to do my part for equality and was privy to some of the private conversations that went on. I heard remarks from he and his people directed towards the local blacks that well could have come from the local KKK.

I departed both disillusioned and disgusted, sadly I wondered how a Black had a chance for equality when their "leaders" cared more about money than them.

He serves the black community far better in death than he ever did in life.

My XYL received her technician license back in the good-old-days of the 5 WPM code test and the General written. We've been searching, but so far have not been able to find her old license to show the VEC so she can upgrade to General under the new system. I have heard that there is a webpage either at the FCC or ARRL that you can get proof of licensure prior to the cutoff date.

Anyone know where I can find this?

Tnx & 73,
Keith

735. Log Book Spreadsheet

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-13 02:02:52 UTC
From: Ken Anderson <longrange2@home.com>
Message-ID: <3A5FB5E7.CACE20A1@home.com>
Source record: 95814

does anyone have a decent spreadsheet or table in word or xcel for logging in QSOs? I don't want any kind of fancy automatic logging program, just a spreadsheet or something else easy that I can manually log in contacts with and organize my log book. thanks, Ken KC0INZ

736. MY BITCH pitbull's claims examined

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-13 02:19:35 UTC
From: KC8JBO <roger_kc8jbo@my-deja.com>
Message-ID: <93odviiuf1@nnrp1.deja.com>
Source record: 95816
Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc

Let's look at your verbose and psychotic claims, shall we?
You can talk the talk but you can't walk the walk, can you, draft-dodger? I'm borrowing from your obvious favorite tv show pro wrestling.
You in fact still claim it is REAL, don't you?
The big, badass "war-hero" who's got a yellow streak a mile wide down his hunchbacked body posts using the Hennepin county <MN> library system and an ALIAS.
First you claim:

Message-ID: <87khki$5ca$1@nnrp1.deja.com>
"I- K-N-O-W Y-O-U-R C-R-E-D-I-T H-I-S-T-O-R-Y"
"I will then scan ALL of the credit reports I have onto homestead.com!!!"

Then nothing. Nothing forthcoming..no credit history posted, nothing
...KC8JBO 1, "MY BITCH" 0.

Since you can't outdo me, even if you somehow completed high school and then went on to college, your newest shtick is:

Message-ID: <93i4dg$23j$1@nnrp1.deja.com>
"I have some FLORIDA info on you people will find VERY "funny" when posted."

Riiiiiight...like YOU, a NOBODY, can get FLDLE records.
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!
I have NO RECORDS in Florida.....too bad, LOSER. Now, what about the OTHER states I've lived in? Can you use that pea-sized little brain stem to figure out where ELSE I've lived?????
MWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!
That why you're such a war hero, coward????? I bet you ran away at the first firefight. Is that why you have that DISHONORABLE DISCHARGE, then you spent YEARS afterwards in mental institutions there in Minnesota, isn't that true, drooling boy? Now go take your Lithium....
KC8JBO 2, "MY BITCH" still 0.

So the PATHETIC limp-wristed sissy-draft-dodger wrote:
"Look for a FEW MORE MAGAZINES heading your way next week"

Haven't received anything......talking out of your LARDASS again, eh?
So let's get this straight, you childishly send magazines to people that you can't get the best of? That how the big, bad "war hero" works it, huh?
USENET is NOT real life, but you take your defeats onto real life.
KC8JBO 3, "MY BITCH" again, nada, zip, 0 just like his uneventful life.

The HIGH SCHOOL DROPOUT then wheezed out of his limited bag of LAMES:

Message-ID: <93nt29$4h2$1@nnrp1.deja.com>
"Keep on telling yourself you did NOT get a DWI driving back from that
Comedy Club in Florida & you just MIGHT begin to BELIEVE IT, hohohoho."

No, you're babbling about KT4TR again. Try NOT posting when you smoke
crack cocaine, malingerer. It's bad enough that you take VA benefits
away from those that truely need them, but do you have to prove your
ineptitude in EVERY post?
KC8JBO, 4, "MY BITCH the LOSER" as always, 0.

Now if you still want to deny that your records from St. Louis say you
wet the bed in BASIC and was sent home with a DISHONORABLE discharge,
just so you can "play soldier" with the big boys, go right ahead.

Yes, he was murdered, and most likely by powerful forces within the establishment. Here the King family and I agree.

> Just the same, the shot that killed him did
> not have the desired effect - instead of quelling the outrage and cries
> for freedom, they made MLK a martyr and galvanized the whole movement
[...]

The movement described was more against freedom than for it; see

http://www.revilo-oliver.com/Kevin-Strom-personal/Beast_as_Saint.html

and making King a martyr may have been one of the motivations for the killing.

With all good wishes,

But that would not be true - the nation does not commemorate MLK. The nation commemorates a false, glorified, media-created, image of MLK (and a media-created, negative, image of whites).

In reality, Monday is just another day to trash whites with hate-filled, politically correct, rhetoric (a prelude to the white trashing orgy of February's Black History Month).

If you are going to the inauguration, take a scanner with you. Strong Signals http://www.strongsignals.net> had the Capital Hill Monitor newsletter on their web page. How about 23 pages of frequencies by any and all agencies in the DC area. If the protesters are as much fun as they were in Seattle at the WTO then having a scanner might be more fun than the actual events.

Capital Hill Monitor:
http://henney.com/chm/1200/

I expect the protesters (left wing extremists) to get violent. There may even be a violent reaction by supporters of GWB.

Hi,

I want to buy a PSION REVO or REVO PLUS
If there exists a way to have packet radio working on this palmtop, please
send me any information on :

- how to install software
- where to find software
- how to hook up a TNC
- witch tnc's will work
- what is possible

I've heard about psion and Packet, maybe the REVO is not right and I need
another model
So all info is welcome

Thanks a million !
Phil, ON4BAW

Suzy lives in a world of delusion . Suzy is more often than not deluded and
under the influence of etlhyl alcohol....a condition akin to Alcoholism.
Suzy is renowned for the "twisties" that he and she are so fond of using and
they often "smoke" a pay check into oblivion. Suzy is also known to call in
fictitious stolen property complaints (as in cell phones) so as to negate
any bills owed.
What can one expect from an unemployed, lazy mooch?

Life is fun when you own nothing.
Life is fun when you are nothing.
Life is fun when you have no savings account.
Life is fun when you have no credit.

Life is fun when you have no income
Life is fun when you get a free ride
Life is fun when you cannot pay
Life is fun when others pay....

and life is fun when you
drink for free!
Life is fun when you live like me
Whiskey Four A M P!

Heck...so it dont' rhyme....who cares.

"I'm gonna sue!" "Your gonna get a letter from the Judge." "I talked to
the Prosecutor and he's gonna git you." "You will get a notice from my
attorney ."
Or..."I met with the Judge today...he's gonna get you." And then there is,
"I am gonna call your ISP and and lie like a rug...gonna tell them that I am
an attorney."
Or..."I have emails I'm gonna send to your provider."
Last, but not the least, "I am a pathetic loser living on minimum wage."
Go figure.....

Don't know about fun and fast but one tip I can give you is to learn
to copy by hand writting rather than printing. Before I became a ham
I heard one ham tell another he wished he had learned by using hand
writing as he found printing took too long especially at faster
speeds. I used that tip and never regretted it.

764. The Election & the Commission on Civil Rights

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-13 12:31:10 UTC
From: Dwight Stewart <stewartx@sccoast.net>
Message-ID: <3A604A8A.CA8EDA1A@sccoast.net>
Source record: 95743
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

Since we haven't had much discussion about the election recently, I decided it was probably time to revisit the topic. After all, anything has to be better than the endless no-code debate. Besides, this has it all - the election, Katherine Harris, Mary Berry, Nazi Germany, racism, civil rights, Democrats, Republicans, Bush, the new Congress, and so on. I'm sure there is something in here to interest almost anyone.

Anyway, I watched C-SPAN today as Mary Frances Berry, Christopher Edley, and several other members of the U.S. Commission on Civil Rights, trashed Florida's Secretary of State Katherine Harris during a hearing about "Allegations of Florida Voting Irregularities."

Following almost an hour of often rude questions from the various members, including a request that Ms. Harris read quotes about Nazi Germany from a book, Chairman Berry called Ms. Harris's testimony "laughable."

During Ms. Harris's testimony, Berry seemed particularly bothered whenever Ms. Harris referred questions to Clay Roberts, director of the Secretary of State's elections division, instead of answering the question herself. Ms. Harris repeatedly explained, whenever challenged on this, that it was far better that Mr. Roberts answer the question himself to insure that information given was accurate and complete.

Since Mr. Roberts was sitting right next the Ms. Harris, this logic seemed perfectly reasonable, but that did not satisfy Berry, who made several sarcastic comments, both during and after the testimony, about it.

Following the hearing, Berry said that another hearing will take place soon and that she intends to call Ms. Harris to testify again. Berry also said that she intends to subpoena Governor Jeb Bush once again (he appeared Thursday), concluding that, "I have the power to subpoena anybody and I'm going to use that power."

In spite of several days of testimony, and weeks of gathering information, the commission has yet to find any evidence of illegal activity on the part of Florida voting officials, or a single instance of intentional civil rights violation.

The Commission has been widely criticized in recent years. The appointment of chairman Mary Frances Berry caused a fire storm when it was discovered that she had once claimed that, "civil rights laws were not passed to protect the rights of white men and do not apply to them." [Civil Rights Under Reagan, San Francisco, ICS Press, 1991, p. 141.]

The commission has also been widely criticized for its political makeup. The law says that no more than four members shall be of the

same political party. And, while the commission currently consists of four Democrats, three independents, and one Republican, critics charge that the three independents, which includes Berry, have a long record of supporting Democrat party issues and candidates, and are therefore nothing more than Democrats who call themselves independents.

I certainly hope President Bush, and the new Congress, uses better judgement when selecting members for future commissions. They can start by selecting members who are more racially and politically representative of all Americans, and by avoiding extremists like Mary Frances Berry.

Actually, I think he was using a computer at home. The message was sent from the "cts.com" server, not from a military ".mil" server. He only filled in the organization block of his email program with "COMNAVSURFPAC," which I doubt would interest the commander.

: Wow...I hope it doesn't get too messy as we expect EMS will be busy most
of
: the day helping George W. Bush supporters (right wing extremists) pull
their
: heads from their asses.
:
Actually we expect a huge amount of violence from the left
wing, to include terrorism. The real question is whether those
on the right will finally stand up to the left and have counter
demonstrations.

But expect the left to try to kill republicans, especially the president.

I thought it interesting that they didn't produce a single witness
who was denied his/her right to vote. All the witnesses voted! The
worst complaint was that there was a delay or something made someone
nervous. Jesse Jackson was conspicuous by his absence.

Don,
you are correct to say that the Clinton Administration
has sold the United States out to China.People used to say we have
nothing to fear from them, however they are a REAL contender that we
will have to deal with in order to maintain peace, but until then I'll
be ready to defend my area by any means necessary, hope all the folks
who sold our secrets to china in exchange for cash in there pocket can
sleep well at night. In days past you were shot or hung for treason.
Wake Up America!

C the reason Jesse Jackson wasn't there is because folks sent him
some money for his cause, now that he has some spending money
he will be quite for a while, last seen at a KFC near you.

: >I've had some experience with observing the legal system in action,
:
: QRM responds: It's now clear where you are getting your "lock 'em up and
throw
: away the key" mentality.
:
: My experience is on the other end of the system, where there is
considerable
: success in getting someone back into society and keeping them clean for
ten+
: years.
:
: It's interesting to me that when a car breaks down or a lawn mower won't
start,
: fellows crowd around trying to help. "Try this," they say. But when a
person
: breaks, society simply wants to throw them away. What's wrong with this
: picture?
:
: You and I never will agree because you're looking at a different end of
the
: pipe. You (and all those impressive folks you mentioned) feel that people
like
: me are "soft" on criminals. Far from it. Many in my group have been
crime
: victims. We want offenders caught and punished. But we don't stop there.
: That's where you and I differ.
:
If a person loses their gun rights then they should also lose their
right to vote, to hold a professional license (teacher, doctor, lawyer
or CPA) or work for government. Do we want those who are not
trusted to own guns because they are felons or court declared mentally
ill to be the teachers of our children, to be our doctors or lawyers? Do
we want them to handle sensitive government documents? And they
should not be able to chose who runs our government.

The drivers license should be our primary means to register to vote.
And the license should show whether you are a ful citizen, limited citizen
(under age, and our licenses do show that now), a restricted citizen
(a felon, court declared mentally ill) or resident alien. And everyone
should
be forced to update their licenses once they move so that the police can
easily find them. With new digital photos, every cop can have your picture
downloaded to their cars. We also have the ability to have your finger

prints
on the license as well.

If you are concerned about redemption of felons then there has to be
method to do so. But with the liberals wanting to ban gun ownership
for life over misdomeanors then there has to be high price that effects
liberals as well.

: >
:
: I sentence you to a one-year subscription of Guideposts, Jeff. You'll
find
: instances where parents or grandparents have forgiven the murderer of a
child.

That is their choice. Many others do not ever forgive.

: I'm so glad God's forgiveness doesn't work on your principle--that any
: victim(s) first must be made whole. We'd all be in deep Doo-Doo for
eternity.

There are requirements for God's forgiveness. For one thing you must
declare
Jesus is Lord (has the right to rule you) and that he was raised from the
dead
(Rom. 10:9,10). And if you sin after salvation (being made whole) then you
must regret what you have done.

Most felons do not regret their sins (crimes). They take pride in them.
And if you live outside the grace of God then you are under the law of
God. Sins often are punished by death under the Law of Moses.

: > What's mistaken for forgiveness these days is pardon, usually with
: > the admonition, 'we must temper justice with mercy.'
: >
: > What we forget is that before we can temper justice with mercy,
: > there must first be justice.
:
: Again, no one has said a thing about a release from punishment. What I
: advocate is a simple recognition that punishment has been served, the debt
: paid, and some time after the completion of punishment and evidence of
: reform civil rights are restored. Forgiving sin is God's domain and he
: can have it.
:
: All I advocate is some recognition that the debt is paid and civil rights
: restored by earning them. This was once common practice in virtually all
: states without an interest in keeping blacks from voting

But being a felon is not about paying a debt. A felon has lost the
trust of his fellow citizens. He must regain that trust. Too often
the punishment phase does not turn them around.

The only people who have paid their debt to society are those of us
who have served in the military, in law enforcment (to include prison
guards) or fire fighters. That is why we are superior to the typical
selfish American.

They keep talking about witnesses and evidence, and everyone keep asking for witnesses and evidence. But, so far, I have not seen a thing other than talk.

> The worst complaint was that there was a
> delay or something made someone nervous.

Good point. Shortly after the election, there were complaints about police at some of the voting booths (it made some minority voters nervious). Of course, in some of the voting districts in the Miami area, I would nervious if there were not any police around. However, I don't hear much about that complaint anymore. Perhaps someone else pointed out what I just said, or I simply missed it. Did you hear it during the commission's hearing?

> Jesse Jackson was conspicuous by his absence.

Ah, Jesse. He does seem to be keeping a lower profile lately (perhaps the Republican demonstrators in Florida were more effective than they thought).

It doesn't bother me being the way I am. I don't care if I make anyone mad as others can get away if they don't like me. On the other hand, I can't get away from myself and might as well accept myself for the way I am and someday if I want to be as broadminded as you, I reserve that option. Until then, get off my back monkey.

And they try to tell us that the gay community is not
a bunch of little rich boys. The Gay community is the
largest financial backers of gun control and of many
other liberal causes.

Gay publications battle for attention of affluent audience

Tracy Baim (Tribune photo by Bonnie Trafelet)

By Tim Jones
Tribune Media Writer
January 14, 2001

The front pages in the current issues of the Chicago Free Press and the Windy City Times report the surprise departure of Frank Oldham Jr., who resigned earlier this month as the AIDS administrator at the Chicago Department of Public Health.

Oldham, who has agreed to run a gay and lesbian center in Los Angeles, "will leave behind a legacy as a bridge-builder and a coalition starter," wrote the Windy City Times, one of two rival free weeklies aimed at the Chicago area's gay and lesbian communities. Oldham "brought the city's bitterly factional AIDS service providers together in a spirit of unprecedented cooperation," reported the other, the Free Press, in a 900-word story.

There wasn't a word about Oldham's departure in the Chicago Tribune or the Chicago Sun-Times.

That's one reason why the gay and lesbian press exists. Over the past two decades, filling a void in the mainstream media has created a growing publishing business-about 240 gay and lesbian publications in the United States and Canada, according to Rivendell Marketing, a media placement firm that serves the gay community. That's up almost tenfold since 1979 and more than 25 percent since 1998.

That growth comes from opportunity-and has spawned fierce competition. As the market has grown, publications have, in the past year, folded in St. Louis, Philadelphia, Minneapolis and other competitive markets. Chicago has experienced its own upheavals, and the two weeklies that emerged from unusual turmoil are battling it out in an ad market that has gone decidedly soft.

"A lot of the clumsier or amateurish publications don't survive in this kind of market," observed Louis Weisberg, editor in chief at the Free Press, the city's largest gay weekly, with a circulation of 26,000. "It's not just

doing it in your basement anymore."

As a group, so-called niche publications, be they entertainment-oriented alternatives, ethnic papers or gay and lesbian weeklies, have thrived in recent years. Although their audience is smaller, it can be very attractive, and advertisers can reach it cheaply. The publications are less expensive to operate than large dailies.

The gay press, overall, attracts a largely affluent audience, and in the absence of gay-oriented broadcasting and cable channels, the publications are the best way to reach that audience. Advertising revenue for gay publications jumped 20 percent in 1998, more than twice the growth rate of mainstream newspapers. All of this helps explain why the competition is increasing.

The brief history of the Free Press/Times competition is worthy of the Chicago newspaper wars of a century ago.

In 1999, most of the staff at the Windy City Times, which was one of the best-known gay newspapers in the country, quit in a dispute to form the Free Press. The Times accused the Free Press of conspiring to drive the paper out of business and dragged the Free Press owners into court.

The Times subsequently folded last year, only to be resurrected by Tracy Baim, who for 13 years competed against the Times with her own publication, Outlines, a more community-oriented weekly. The Times now has a circulation of about 20,000. (Baim also publishes several other gay publications, including those targeted at blacks and Latinos.)

For now, both tabloids are standing-and fighting-for the attention of a Chicago-area gay community estimated to number 300,000.

"There's room for both of us," Baim said. "But you gotta do the right thing or you don't last."

The papers are privately held and, like the rest of the gay press, have resisted the trend toward chain consolidation that has swept through other alternative newspapers. Both attract blue-chip advertisers and differ in their editorial approach.

The Free Press has a harder edge, choosing issues more often than entertainment. Its Jan. 10 issue features the resignation of Oldham; a gay rights fight in Miami-Dade County, Fla.; and a story on civil rights activists mobilizing against the nomination of former U.S. Sen. John Ashcroft of Missouri to be attorney general.

"I don't think people pick up the Windy City Times and the Free Press with the same expectations," Weisberg said.

Perhaps not. The Times has a two-story front page in this week's issue, featuring Oldham below the fold and a television review at the top headlined "Leaping Lesbians."

"I think Chicago is probably a lot more work-oriented than New York and the West Coast," Baim said. "We have to treat this as a comprehensive market with an understanding that some gays party and some gays work."

Rick Garcia, political director of Equality Illinois, a gay rights advocacy group, said there "is a role for both kinds of papers" in Chicago.

The immediate future for gay publications may not be as worrisome as, say, the one facing so-called mainstream media. Gay publications target a specific market that tends to be affluent and frequently spends large amounts of disposable income.

"Our best growth years were in the recession in the early '90s," said Todd Evans, president and chief executive of Rivendell, based in Westfield, N.J. "Broad-based ads are out and niche-based ads are in."

The average household income of the Free Press and Times reader ranges from $70,000 to $80,000. Those income levels attract an increasing number of national advertisers-beer and liquor companies, vacation resorts, automakers, cable television and drug companies.

Much of that is reflected in ads that appear in the Free Press and the Times. Both carry full-page pharmaceutical ads promoting HIV drugs, as do most major gay publications.

"Our customers are willing to spend a considerable amount of money, and pharmaceuticals for HIV are practically recession-proof," said Bill Neff, general manager at the Free Press. "We may actually benefit from a slowdown, because we are a small paper with a targeted and affluent audience with a lot of disposable income."

"The pharmaceutical business is going to be steady for the next couple of years, with new HIV drugs coming out. That's been a big plus," Evans said. "But there's a whole new advertising diversity developing-casinos, soft drinks, some diet drinks."

The Free Press recently landed an ad contract with the Chicago Cubs, which will run about 10 full-page ads, starting this month. The deal marks the paper's first major deal with professional sports, Neff said.

Blue-chip advertising, by itself, is no guarantee of financial success, because the bulk of the advertising revenue comes from local sources-real estate, auto dealers, restaurants and other local services. Last year's failure record of gay publications-seven failed and three were born, with a typical year having 10 of each-may say more about how troubled those individual papers were, businesswise.

"There's not a lack of a market for them. Look at what the mainstream media is doing-there's a lot more coverage of gay and lesbian issues," Evans said.

That's a two-edged sword, though.

"Ten years ago, you'd see a couple of stories every six months in the mainstream press. Now hardly a day goes by that you don't see stories of interest to the gay community," Garcia said. "That has forced gay

publications to change their function."

Joe Landry, the publisher of the nationally circulated Advocate and Out magazines, is guardedly optimistic about the future. "We're just waiting to see what happens with the economy, because the ads are the first to go," Landry said, adding that pharmaceutical spending may dip this year.

"But that's not a reflection of weakness for the industry," Landry said. "Our business has never been better. The competition has made us sharper."

I think it is a real possibility. Security was lax around President Reagan during the early part of his term in office partly because of the leftover Secret Service agents from the pre-Reagan years. Following the shooting incident, in spite of some heroic efforts to protect the president during the shooting, agents were grilled about their political views and if they felt they were fully able to protect the president in spite of those views. However, its been some time since all that occured, and one has to wonder if the Secret Service, a good number entering service during the Clinton years, will be as aggressive when it comes to defending Bush.

ETHICS PROBE CITES DALEY PAL FOR LOBBYING
D'ANGELO COULD HAVE MADE $1 MILLION FOR WORK,
REPORT SUGGESTS

By Laurie Cohen and Andrew Martin
Tribune Staff Writers
January 13, 2001

A city investigation last year found evidence that a longtime friend of Mayor Richard Daley's improperly lobbied Chicago officials on behalf of an airport contractor and was paid a contingency fee, a practice prohibited by city ethics law, according to a confidential report obtained by the Tribune.

Under a compensation agreement with the contractor, Taylor Street activist and businessman Oscar D'Angelo could have received more than $1 million for his efforts, which included pushing for a contract extension for the client, airport planning consultant Landrum & Brown.

The allegations against D'Angelo are contained in a report approved by the city's Board of Ethics in October but never publicly released. The report highlights evidence that D'Angelo violated city ethics rules by failing to register as a lobbyist and by accepting a contingency fee. But the board did not interview him during its investigation, documents show.

D'Angelo was not the target of the Ethics Board investigation, though he figured prominently in it. The probe was commissioned by the Daley administration last March following the resignation of Terry Teele, a top aide to the mayor, who admitted arranging for $10,500 in loans from D'Angelo for himself and relatives to pay legal bills and other expenses.

The primary beneficiary of the D'Angelo loan money was Teele's brother, John, an $89,000-a-year deputy aviation commissioner since 1998. The investigation sought to determine whether John Teele had violated city ethics laws by taking loans but not reporting them.

In October, John Teele was finally cleared of wrongdoing in a terse public statement.

The board has not publicly revealed any reason for its finding, but the confidential report says Teele wasn't bound by ethics rules at the time he received the loans because they were tendered a few months before he went on the city payroll.

The report also concluded that Teele, once on the payroll, did not have to reveal his ties to D'Angelo because D'Angelo wasn't himself a city vendor.

Under city law, investigations and recommendations by the Ethics Board are confidential.

D'Angelo, a disbarred attorney who has played a key role in the development of the Near West Side, denied through a spokeswoman that he had accepted a contingency fee from Landrum & Brown. The spokeswoman said D'Angelo instead worked on "retainer," meaning he got paid regardless of whether he got results.

D'Angelo stopped working for Landrum & Brown shortly before the allegations of the Teele loan were made public last March, the spokeswoman said.

Under city ethics laws, City Hall lobbyists are required to register with the ethics panel and provide limited detail about activities on behalf of clients. Lobbyists also are prohibited from accepting contingency fees, payments that are tied to actions by city officials.

Similarly, the laws ban companies from hiring lobbyists under such payment schemes and allow the city to cancel contracts for companies in violation.

Jim Howard, executive director of the watchdog group Illinois Common Cause, said contingency fees for lobbyists are dangerous because public officials could increase payments to vendors simply to bolster payouts to friends and political allies.

"We're publicly funding friends," Howard said.

Darryl DePriest, chairman of the Ethics Board, declined to comment on why D'Angelo wasn't interviewed as part of the John Teele investigation. DePriest also declined to say whether the board undertook a separate probe of D'Angelo.

"There was an extensive review of Mr. D'Angelo's relationship with Mr. Teele and the city to resolve questions related to Mr. Teele," DePriest said. The board was "not asked to do any investigation of Mr. D'Angelo," DePriest said, though he added that the panel "wouldn't turn a blind eye" to violations uncovered in an investigation.

DePriest noted that there was little the board could do about D'Angelo's conduct, even if it had come to light years earlier. That's because until recently there was no penalty on lobbyists who failed to register with the city.

Prompted by news stories about D'Angelo's lobbying, the Daley administration toughened the ordinance in May by broadening the definition of lobbyist and imposing a fine of at least $500 for not registering. In addition, a company that employs a lobbyist who fails to register could be fined $2,000 a day.

The Ethics Board's report contains never-before-published details of D'Angelo's relationship with Landrum & Brown, a Cincinnati-based consultant that has worked at O'Hare for about four decades.

According to the report, Landrum & Brown hired D'Angelo in March 1990, 11 months after Daley took office as mayor. The panel received a copy of D'Angelo's agreement with Landrum & Brown from the city's Aviation

Department.

Under the five-year pact, Landrum & Brown would pay D'Angelo about 1.7 percent of the amount it received each year from the city, according to the report. During those years, the firm took in about $41 million from the city, according to city records, suggesting payments to D'Angelo of about $700,000.

Evidence uncovered by the ethics panel showed that D'Angelo was still working for Landrum & Brown in 1999. In an interview with Ethics Board staffers, former Aviation Commissioner Mary Rose Loney said D'Angelo met with her in the summer of 1999 to push for a four-year extension of Landrum & Brown's contract.

Based on Landrum & Brown's payments from the city from 1996 to 1999, D'Angelo's agreement with the firm could have resulted in him being paid an additional $450,000.

In a statement to the Ethics Board, Landrum & Brown denied that D'Angelo provided consulting services to the firm in connection with any of its city contracts.

But the Landrum & Brown statement conflicted with Loney's testimony, the report said. "Such conduct would also appear to constitute lobbying within the meaning" of the ethics act and would have required D'Angelo to register if his annual lobbying income exceeded $1,000, the report said.

In addition, if D'Angelo was lobbying under an extension of his 1990 consulting agreement with Landrum & Brown, "the agreement may give rise to a violation of the [ethics law's] prohibition against contingency-fee agreements with lobbyists," according to the report.

Officials at Landrum & Brown didn't return phone calls. Doug Goldberg, a vice president of the firm, said in an interview last spring that D'Angelo's duties did not include lobbying.

Cecil,
Do you think the N.A.A.C.P. Should Boycott KFC?
they are really raising hell here in S.C. about the flag issue.
they even went after a Columbia,S.C. business man because he flies
the confedrate flag at his restaurants.
Anyway next time you look at a KFC commercial look very closely and
think! I remember KFC commercials with the colonel standing with a
family having a picnic behind him talking about good food and family
tradition, today you see a commercial with the colonel ''Moon
Walking'', High Fiving, Shucking and Jiving and Rapping.
Wheres Jesse and the N.A.A.C.P. on this slap in the face?
just a thought.
Donnie

Another point is to write (or print) small. It takes less time to
write small letters and by writing 2 lines in the paper space allotted
for one line, I've found that I can increase my hand copy speed
substantially...

The first message is good advice for those just starting to learn morse...
if you can learn it AND do all your copy by writing in script V.S. printing,
you'll find that copy at higher speeds (as you reach those speeds) will be
easier.

> On Sat, 16 Dec 2000 22:33:15 GMT, "@!@" <ezypezy@ureach.com> wrote:

In answer to the second message....
Time-wise, if you spend 20 minutes, 2 - 3 times daily, EVERYDAY (note the
emphasis!) you should be able to pass a 5wpm code exam in a lil' over 2
weeks, maybe 3. (Seems to be about the norm for what I've seen as a VE).
I've heard the excuses before about 'not having the time'... but I doubt
there's many folks who can't find 20 minutes, twice a day, to devote to code
for a few weeks (breaks @ work, get to work a few minutes early, park, and
practice in the car, get up a lil' earlier & practice before leaving for
work/school, skip a TV program, etc, etc....) If you WANT HF privileges,
you'll FIND the time, if not, you won't.

As for "fun".... I and many others I've helped reach 5wpm have all used the
Gordon West 5wpm learning tapes. He's kinda' corny on the tapes, but some
of the corny jokes and puns help the lessons stick in your head longer.

It shouldn't require too much political sophistication to understand
that people tend to be sympathetic towards actions taken by those
whose viewpoints they agree with.

Nevetheless, most of the lethal violence--Oklahoma City, gyno-clinic
bombings, assassinations, Ruby Ridge--have been perpetrated by the
right, not the left.

The charge today can be up to $10 per fcc regulations.
The limit is $10 though. It was $6 when I got mine 7 years ago roughly,
course that VEC didn't charge the full rate, I think the max they could
charge was $7 or something.

Texas is way out on the fringes of the Old South and I see black
guys on Harleys wearing Confederate battle flags on their heads
and jackets. In Texas, the Confederate battle flag is not a symbol
of slavery but is instead a symbol of rebellion, akin to the
"Don't Tread On Me" flag of yesteryear. Here in Texas, it says,
"I'm still a rebel".

ATF, US Marshalls (Bush Administration) vs. Randy Weaver & family?

No leftists in that situation.

>Which assassinations are you talking about?

By assassinations, I referred to Dr Bart Slepian, and the other Ob/Gyn
who was murdered along with his bodyguard by right-to-lifers. The Alan
Berg killing took place around '79/'80 as I recall, so that's more
than two decades.

People on the right are more likely to serve in the military out of a sense of duty than the left is. So it would follow that the right is better armed and trained and more capable of wreaking havoc than the left is. Kazenski(sp?) did a pretty fair job of killing and injuring, and as an example of left wing tolerance, he nullified the lefts claim to be more peaceful.

I am perplexed as to why you would consider Ruby Ridge as an example of right wing violence. Seems to me that the violence in this case was started by a government that felt that the right of Randy to feel secure in his home didn't apply to his curtilages ... if the gilley suited Marshall's hadn't shot the dog and triggered the firefight ON THE WEAVERS PROPERTY, Vicky, Randy's son and Degan would all be alive today. If the government had an issue with Weaver, there was a county Sheriff who was quite capable of delivering the warrant. The ATF and USMarshalls clearly overstepped their mandate in this case

And the same for Ruby Ridge. The Waco Sheriff was the proper person to have delivered any warrants the Feds may have had. Had they followed that grand old American tradition of an elected peace officer being the contact between the government and its citizens, "the children" would be alive, Koresh would have been tried, convicted and imprisoned, and the ATF wouldn't become the most despised branch of the ever expanding FedGovCo's army.

I fear the left and it's attempt to educate (read indoctrinate) people far more than I do the right and its firepower. Yeah, the right is dangerous, but not because of its guns or patriotism. It is dangerous because it stands on the ramparts against the left's groupthink dogma.

Message to the left: Do all the social engineering you want with the sheep under your pervue, but touch me, my church, my friends or my family, and you die. We don't need your steeenkeeen feelossofy!!

True ... I was taking a little liberty here. The charge of child abuse was not a Federal statute, nor was any real hearing done to prove or disprove the allegation. Also, the supposed converted rifles were never examined by an outside investigator, so we don't know the truth there either.

The point that I was trying to make, was that the proper mechanism would have been for the Sheriff to knock on the front door, and serve any warrants that were issued if there was a charge by either the Federal or State courts. There was no reason for the ATF to conduct the raid, Koresh's problems were with the State of Texas and the County.

The excessive penalties levied on the survivors by the courts is another sore spot with me.

There are violent extremists on both sides, certainly. But at present
we Unibomber (even agreeing that he was leftist, and not an example of
far right anarchy): 2 [deaths]; Oklahoma City (plus deaths from
various abortion clinic bombings: 170+.

The left isn't necessarily more peaceful; it just hasn't wracked up
the same body count as the right. And I thought it worthwhile to
remind Greg of that, because he tends, as some conservatives do, to
see left-wing malfeasance with a clarity that doesn't cross over to
rightist mischief.

See my reply to Doug for RR.

No .. you have dogma, I have doctrine. :)

As far as the Unibomber being left or right, the old terms are meaningless today ... Ted was associated with left wing causes, ergo et sum, he was from the radical left. The traditional terms are not relevant anymore and I would prefer to use the more relevant terms anti-federalist = left and federalist = right, but most people don't understand those terms, so liberal/conservative, left/right, extreme left/extreme right - religious right and the other terms will have to do.

I am personally a strict constructionist and feel that the Anti-Federalists have had too long of a run and if we don't get back to that system that recognizes human greed, we are all gonna die.

And I prefer to go out shootin'.

Aaron R. Kulkis
Unix Systems Engineer
DNRC Minister of all I survey
ICQ # 3056642

H: "Having found not one single carbon monoxide leak on the entire
premises, it is my belief, and Willard concurs, that the reason
you folks feel listless and disoriented is simply because
you are lazy, stupid people"

I: Loren Petrich's 2-week stubborn refusal to respond to the
challenge to describe even one philosophical difference
between himself and the communists demonstrates that, in fact,

Loren Petrich is a COMMUNIST ***hole

J: Other knee_jerk reactionaries: billh, david casey, redc1c4,
The retarded sisters: Raunchy (rauni) and Anencephielle (Enielle),
also known as old hags who've hit the wall....

A: The wise man is mocked by fools.

B: Jet Silverman plays the fool and spews out nonsense as a
method of sidetracking discussions which are headed in a
direction that she doesn't like.

C: Jet Silverman claims to have killfiled me.

D: Jet Silverman now follows me from newgroup to newsgroup
...despite (C) above.

E: Jet is not worthy of the time to compose a response until
her behavior improves.

F: Unit_4's "Kook hunt" reminds me of "Jimmy Baker's" harangues against
adultery while concurrently committing adultery with Tammy Hahn.

G: Knackos...you're a retard.

Now, THERE'S a reason to deny Gays their civil rights. They work harder, go to school longer, read more books, travel more, attend more concerts, theater and opera.

We also choose, for the most part, to vote for those who are least likely to pass/enforce laws which would oppress us and deny us civil and human rights.

Sounds VERY MUCH the American Way.

Absurd! I monitored and transcribed the !complete! QSO.
ex OTK identified that the control op was present (W4JPM).
Every transmission made from the W4JPM station was IAW
with existing code, rules, regulations, and proper operating
procedures. No racism occured! No pot stirring occured until your
message was posted. Freedom thrives. Yours, and ex OTK.

830. Expired Extra has Newbie Questions

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-13 21:50:43 UTC
From: Exham@nospam.com
Message-ID: <3a60c73b.1747335@news.accessnv.com>
Source record: 95710

I received my Extra class as a teenager 20 years ago but later became inactive and let my license lapse beyond the grace period. I was surfing the web the other day and came across a ham site and found that now there are only 3 classes of license and the morse code requirement, even for Extra, is only 5 wpm. Further more all the questions and answers for all the tests are published (is that true?).

Seems if this is the case it wouldn't be too hard to re-test and get an Extra class. I tryed some code, and although I am rusty with some of the chracters, I was surprised at how much I had retained. Also took some sample exams and passed both the Tech and General but failed the Extra sample exam. Anyway, I am seriously thinking of getting back into ham radio and have a few questions of which the answers seem to evade me on some of the sites. Answers to any or all would be welcome. Thanks.

1. Is there a fee for a ham license these days? They stopped that when I was licensed before.

2. Is there a fee to take the exams, which it appears are administered by VEs these days rather than the FCC?
I read something about $6.50 for code only, but not sure if it meant that code is the only test that there is a fee for, or that there is a fee for code only if no written exam is taken along with the code test. Which is it?

3. Can all the elements be taken at one test time as long as the previous is passed before the next one is taken?

4. If you fail an exam, how long must you wait before re-testing?

5. I am sure there have been many rule changes and additions since I was active and wonder is there is a complete Part 97 somewhere on the internet?

6. I read that the questions and answers are available to the public before taking the test? If that is true how big is the question pool? I imagine the tests are made up of a question pool of hundreds or questions and not just the 35 or 50 required for the tests. Is that correct?

7. I read something about new tests coming out but haven't been able to determine the tests are new for this year or if they were new last year. Someone here suggested getting "Ham University" and when I went to a web site to get it they said the 2001 edition would be available in March. Does that mean there are new questions for 2001 on the exams?

8. Do I need to send away for a Form before taking a test or are they available at the test location? I did check on the ARRL site and found there are tests being given locally in Feb so that is good.

Thanks again.

I've taken the liberty of trimming the newsgroups way back to something reasonable. Since the preceeding was not a reasonable post for a ham radio news group, I have chosen not to respond.

Cheers.

832. FS:TS-850SAT, RS-202

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-13 21:52:10 UTC
From: Patrick Wilson <k4ow@arrl.net>
Message-ID: <93qiii$3du$1@slb3.atl.mindspring.net>
Source record: 95709
Cross-posted to: rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.misc

The 850SAT is in excellent condition and comes from the shack of a silent key from two years ago. It has no filters and is serial number 60M plus. I tested it and it works perfectly and is in mint cosmetic condition. I have the manuals, mic and power cord, but not box (they can't find it or haven't yet, so if it's located, it will be in there).

The price is 850 plus shipping and insurance (if you desire).

Also have a Radio Shack 202 HT with charger, extra antenna and cig adapter and manual for 75 bucks plus shipping and insurance (if desired).

These will be going to the Richmond Frostfest on Jan 21, so if you are interested, you must purchase before then. Price will go up at the Fest.

There is also a Hammarlund HQ-110 receiver with speaker and manual,
a WRL Globe Scout and manual,
HeathKit VFO and Heathkit Q Muliplier and manuals and a
Hallicrafter Sky Buddy. There are power xformers and cables too. Would like to sell this all as a group.

Thanks and all proceeds go to the widow of the ham.

Pat
w4pw

This web page with the same applet works better on my machine.

http://homepage.mac.com/k6mam/MorsePractice/MorsePractice.html

Better yet follow the directions and download the .jar file to your machine and pick up a copy of the SUN java runtime environment and use it locally. It allows you to save your place and not have to highlight all the characters every time you start. Using this applet I was able to pass my element 1 after two weeks. This is a very fine tool and has everything you need including instructions on the Koch method. The price is right as well! Thanks to Martin Minow for the development.

Nope. Quit reading further than whats posted Dwight. You have the tendency
to do that too often. Sometimes you sound like a "twit" whenever you post
such garbled non-sense.

>
Gee, Dwight, am I a fool to become a Ham and have "diots" like yourself
around here who would jam me or cause H&D while I try to make long distance
QSO's because these Hams here know I am a CBer/Ham? Have you ever listened
to these assholes here in town on 2 and 75 meters? You would be astounded
and probably agree with me. I judge Ham radio by the hobby in General. Ham
Operators are held to the highest expectations set forth by the ARRL. And
if Hammers will act like CBers on Ham frequencies, what is the use of
getting my ticket when I can save my pennies and listen to the same shit on
CB. Now you tell me... who's the "darn fool."

"Holier than thou"... I think you missed the point. What you are doing now,
with your moot arguments against my post, and Bruce's " STAY ON CB BUUBBAA"
is what I call "holier than thou." Nobody's better than Hams... Hams are
the technological enhancers of radio. That is holier than thou. In order

to be an Extra Class license holder, you have to pass 13wpm code or you're nothing than CBplusser. That is holier than thou. Get my point or do I have to spell it out for you, again?

I don't really give a flying rats-ass what any of those ham radio community thoughts towards mine or anyone elses feelings towards Ham radio. Never said I did. All I need is just the Hams here in town to let off the frowning and accept my seven bux and lemme take my test, without the attitude that is. Just give me 15 minutes per test and about 3 minutes for

the code and I'm outta there (that's at 13wpm). A little less than an hour.

I've never stood by to have some Extra or General beg me to test. I've had those hams tell me not to take it. Interesting now come to think of it...

You're right. I'm sticking to CB. That's where my roots are at. Technically challenging? I highly doubt it. Most of your Ham newer rigs were built in Singapore and Taiwan. The only challenge to it is to modify it for Ham use (frequency expansion, channel rejection, etc.) I can probably say that some of the radio techniques used for Space Shuttle use or Special Intelligence gathering for the government were designed by Hams, but some were not.

Like I said, I don't give a damn about what they think. Its the attitude. I've been into radio for quite sometime now. And judging by your non-elmering attitude, I could give a rats-ass even more.

: >under your pervue, but touch me, my church, my friends or my family, and
you
: >die. We don't need your steeenkeeen feelossofy!!
:
: Again, that works, or should work, both ways.

The problem is that most left wingers see themselves as the only ones who are rightous. They are very arrogantly self rightous, to the point that any means are justified by their goals. The only thing that saves us is that most left wingers will not dirty their hands by taking up arms. In the '60s left wingers did do a great deal of violence. BTW, OK City may have had a huge amount of dead but it is only one act. And, while I disagree with the thought process, it was done in revenge for Waco. How many on the left did terrorism in revenge for some act? Look at all the Red Brigades in Europe. Or the Weathermen here in the US.

A dangerous assumption. If anything, it is uniting
the right as much as the left. With everyone not
expecting much from GWB, he only has to do a
little bit to be wildy successful.

: Go W.
:
: PS - I'm a Libertarian.

I expect that much of the Gore support
was from people like you. Clinton did
a great job of demonizing the republicans.
In two years I will think that you will find
that the republicans did not do half the
things that Clinton and Gore said they
would (fear tactics). Watch for a number
of folks with your views to drift back to the
republican camp.

I've never taken multiple exams. Go here:
http://www.remote.arrl.org/arrlvec/examsearch.phtml
You'll find the contact # for the VE and/or club nearest you. My
experience is these guys are very helpful. Call 'em and ask #3 and 4
too.

Haven't they hurt enough people already? They've made generations of Americans dependant upon them, they wave the racism flag while making every American declare their color on government forms, they embrace socialism and want to abandon the greatest form of government that has ever graced the earth.

I "heard" from a bed-wetting liberal that police "roadblocks" (probably traffic control near the polling locations) were scaring away minority voters. No reason to be scared unless they didn't have a green card or had a warrant out for them.

Besides, most cops I see are minorities. I just don't get it.

Your #8 would be the source for your info. You may get some incorrect info via this format-contact the local VE - should be listed with the ARRL. Also, seek out nearest Amateur Radio club. Frequently, the VE will attend the meeting and is responsible to provide the correct info Rejoin-lots of old and new technology that still makes it a great hobby.

Good luck to you, and come on in-water is FB!

First you need not even worry about the code, if you have a copy of your old license or are listed in an old call book the code portion is wavered. Next all the answers are not only published, but their are a number of web sites with practice tests. If you once held an extra, I suspect a day or two of study and a trip to the local ham club will get you extra back. You might check on QRZ.com and see if your old call is still available, and with the vanity call program you can even get it back if available and desired.

Not too long before the ATF attack, several ATF agents went
shooting with Koresh. If he was such a dangerous kook, why
didn't they arrest him then? Why would they even go
shooting with him? Is this standard ATF procedure? There
needs to be a trial of the ATF and FBI agents the same as
there was of the police officers who shot Diallo. It is
usually standard procedure in similar cases, except for the
federales since Reno took over at the DOJ. Why is that?
LZ

Wrong. Although the ARRL and other VEC's may charge $10, there is NO REGULATORY LIMIT, having been removed by a 1996 law change that was previously overlooked.

There is still a general requirement that organizations not PROFIT from amateur radio operations, so any fee charged must be relatively close to or equal cost. The ARRL computed this as $10 to cover its costs, which includes $4 that the VE team may retain for their share of the expenses. The part where fees may be charged for testing costs (or code practice) are still in the regulations.

I know there are examples of left-wing violence from the past two
decades, but it's the right that has racked up the highest body
counts.

If you want to roll some numbers and examples on by, that would be
fine, however.

Yep - all of it.

FCC stopped doing tests in 1983 or so and turned the job over to Volunteer
Examiners (VEs). The written exams are made up of questions drawn from a large
pool of publicly-available ones.
>
>Seems if this is the case it wouldn't be too hard to re-test and get

>the Extra sample exam.

Probably because the rules are quite different today. It's not hard to get back
up to speed.

> Anyway, I am seriously thinking of getting
>back into ham radio and have a few questions of which the answers seem
>to evade me on some of the sites. Answers to any or all would be
>welcome. Thanks.

Glad to help.
>
>1. Is there a fee for a ham license these days? They stopped that
>when I was licensed before.

There is no fee for the license itself. However, there's a fee to take the
test, in order to reimburse the VEs for the expenses of running them
(duplication, postage, facility rental, etc.) Fee is now a maximum of $10

There are four test elements:

Element 1 - 5 wpm code

Element 2 - Technician written - 35 multiple choice questions

Element 3 - General written - 35 multiple choice questions

Element 4 - Extra written - 50 multiple choice questions.

A Technician license requires Element 2. General requires Elements 1, 2 and 3.
Extra requires Elements 1, 2, 3 and 4.
>
>2. Is there a fee to take the exams, which it appears are

>I read something about $6.50 for code only, but not sure if it meant
>that code is the only test that there is a fee for, or that there is a
>fee for code only if no written exam is taken along with the code
>test. Which is it?

See above. One fee entitles you to take any and all test elements one time. If
you flunk any, you can pay another fee and try again.
>
>3. Can all the elements be taken at one test time as long as the
>previous is passed before the next one is taken?

Yes - in fact, they can be taken in any order.
>
>4. If you fail an exam, how long must you wait before re-testing?

No time at all. Failed elements can be retaken immediately by paying another
fee.
>
>5. I am sure there have been many rule changes and additions since I
>was active and wonder is there is a complete Part 97 somewhere on the
>internet?

You can download it from the FCC website, I think.

http://ww.fcc.gov

but that's hardly necessary to pass the tests.

>6. I read that the questions and answers are available to the public
>before taking the test?

Yep. Because the actual tests are compiled by the VEs, it has to be that way.

> If that is true how big is the question pool?

About ten times the number of questions in any one test.

>I imagine the tests are made up of a question pool of hundreds or
>questions and not just the 35 or 50 required for the tests. Is that
>correct?

Yep. Plus it increases all the time. You can download the entire Q&A pool if
you are so inclined.
>
>7. I read something about new tests coming out but haven't been able
>to determine the tests are new for this year or if they were new last
>year. Someone here suggested getting "Ham University" and when I

>went to a web site to get it they said the 2001 edition would be
>available in March. Does that mean there are new questions for 2001
>on the exams?
>
New questions are constantly being added to the pools. Don't worry about it.
Ham University and Morse University are good study tools and are freeware.

>8. Do I need to send away for a Form before taking a test or are
>they available at the test location? I did check on the ARRL site and
>found there are tests being given locally in Feb so that is good.

Form 605 replaces the old Form 610 that you may remember. Form 605 is
downloadable in PDF format from the FCC website. Form 605 is used for a variety
of services and it takes some reading of the instructions to find the part for
hams.

Good luck.

Any more questions, feel free to email.

$10 or less, depending on which VEC.

> 2. Is there a fee to take the exams, which it appears are
> administered by VEs these days rather than the FCC?
> I read something about $6.50 for code only, but not sure if it meant

All elements, plus if you fail an element and retake (if alternate versions of
the test are available), you may be charged the fee again.

> 3. Can all the elements be taken at one test time as long as the
> previous is passed before the next one is taken?

Yes. In fact, at the session in December, we had a candidate, previously
licensed but expired beyond the grace, take and pass ALL 4 ELEMENTS. He
couldn't find his old license documents to prove any grandfathered credits.

> 4. If you fail an exam, how long must you wait before re-testing?

No wait if alternate versions are available.

> 5. I am sure there have been many rule changes and additions since I
> was active and wonder is there is a complete Part 97 somewhere on the

In many places. Use a search engine.

> 6. I read that the questions and answers are available to the public
> before taking the test? If that is true how big is the question pool?
> I imagine the tests are made up of a question pool of hundreds or
> questions and not just the 35 or 50 required for the tests. Is that

The pool is 10x the number of questions to be actually asked.

> 7. I read something about new tests coming out but haven't been able

There might be.

> 8. Do I need to send away for a Form before taking a test or are
> they available at the test location? I did check on the ARRL site and
> found there are tests being given locally in Feb so that is good.

All at the test site. However, bring your old, expired license - you might
have grandfathered credits, and thus only have to take elements 2 & 4.

Careful. Note that the version of the form 605 on the FCC's web site is for
renewals, address changes, etc., and not for TESTING.

The ARRL uses a form called NCVEC-605. I don't know what W5YI-VEC is using.
GLAARG VE's use their own form.

A copy of the NCVEC 605 form with fill-in fields present is available at
http://k6bde.home.att.net/forms/ncvec605.pdf

> Hams here know I am a CBer/Ham? [snip]

I don't buy it, One. First of all, how would these ham operators know that you're a CB'er if you didn't make an issue out of it (just like nobody in this newsgroup would have known you're a CB'er if you hadn't made an issue out of it)?

And second, its you attitude, not CB, that is your problem. In my last message, I mentioned that "I've been involved with CB off and on for over twenty years," and nobody told me to "STAY ON CB BUUBBAA." Obviously, if you're going to come into the ham radio community with an attitude, expect a response in kind.

> Have you ever listened to these assholes
> here in town on 2 and 75 meters? [snip]

Who cares? Ham radio is not about those people. And you're not going to convince me, even for a moment, that those individuals are anything but a small minority in your town - the overwhelming majority are decent, friendly, people just trying to enjoy a hobby. If you really feel you must judge ham radio, try using the latter group as a guage instead of the first group.

> And if Hammers will act like CBers on Ham
> frequencies, what is the use of getting my
> ticket when I can save my pennies and
> listen to the same shit on CB. [snip]

And if that is your true opinion, than Bruce probably gave you good advice - stay on CB.

> > Ignoring those ham operators who use
> > CB, the spectrum of radio knowledge levels
> > are always higher in the ham radio
> > community than in the CB community -

> > knowledgable than beginning CB'ers, and
> > advanced ham operators are always more
> > knowledgable than advanced CB'ers.
>
> You see? "Holier than thou..." Need I
> explain myself any further? [snip]

That's not an "holier than thou" attitude, One. That is opinion, based on, as I said before, years of experience with CB, ham radio, and electronics (and personal experience with many of these so-called "CB radio experts").

> All I need is just the Hams here in town to
> let off the frowning and accept my seven bux
> and lemme take my test, without the attitude
> that is. [snip]

Again, I just don't buy it. I've never seen anybody ask, if a person has ever used a CB radio, before that person is allowed to take the test. And if nobody asks, than the only way anyone at that exam session could know about your CB experience is if you made an issue of it.

> Like I said, I don't give a damn about what
> they think. Its the attitude. I've been into
> radio for quite sometime now. And judging by
> your non-elmering attitude, I could give a
> rats-ass even more.

You're right, it is attitude. And your attitude is the problem. Lets set the record straight. Ham radio is not welfare, so I'm not obligated to elmer (help) you. A ham operator helps another person because that ham operator likes that person, so he is willing to take time out of his life to help that person.

Now, why should I like you, or take time out of my life to help you, when you sit there trashing my hobby, the people in my hobby, and hold me responsible for everything negative any ham operator has ever said or done to you?

If the ham operators in your town know about your attitudes towards them, I can certainly see why they encourage you to stay in CB, and would frown if you showed up to take a ham exam. Nobody likes to associate with a person who has such a negative attitude.

Bruce was right, One. You should probably continue with CB. Since you obviously dislike ham radio operators so much, you're never going to be happy.

Yeah when I think about MLK the first thing that comes to mind is ham radio. This is a useless topic that has nothing to do with ham radio much like most of the crap being posted in here. There are good and bad people of all colors, races, and religions that we meet in life. I let God worry about the bad people and try to treat everyone with the same dignity and respect that I would want to be treated with. In a way, that is what the ham radio hobby is all about as well, and why I got into it in the first place. Oh, I am a white, college-educated 26 year old man who loves the Lord too. Whenever I hear someone calling CQ on the air, I try to answer them. I don't care if they are in Iran, Iraq, Libya, Syria, or any number of other countries the U.S. has had problems with in the past, if they are ham operators, we are all international friends in my opinion. I have met both good and bad black people and good and bad white people in life. Not all blacks rob, rape and murder. There is too much off-topic crap being posted in here that doesn't have a thing to do with ham radio much like I hear on 3.950 and 14.313. I hope Mr. Hollingsworth busts every last one of them too, they are an absolute disgrace to ham radio and a disgrace to this country sice they are international frequencies. Are they not aware that there are FCC monitoring stations out there?

> not within the charter of this newsgroup.

The recent election was widely discussed in these two ham radio newsgroups, as was politics of all types in the years prior the election, so political topics are certainly not abnormal in either of these newsgroups.

Furthermore, as you should know TooMany, many of the long time members of these newsgroups have formed online friendships with many of the other members, and we have a tendency to use these newsgroups to discuss all topics, not just those relating to ham radio.

Of course, this should present no real problem for you, since nobody is forcing you to read anything in the newsgroups you don't want to read. If you see a message with a subject title that does not interest you, you're perfectly free to skip over that message and go on to other messages that do interest you.

I hope you find this a sufficient answer to your comment. If not, I'm sure others will elaborate further. Take care.

Since you have a DX-302 Receiver, how in the wworld would you know,
there must haave been dozens of stations trying to contact Rich. With
that "Wannabe Receiver ", you wouldn';t have heard " Nuttin' Honey".

Riley was listening Lloyd, call him and ask.

Lets report the facts fully and accurately. The complaint against this restaurant owner was not just that he flew a confedrate flag in front of his restaurants, but also that he also used displays of the civil war as part of the restaurant's decor (this is SC that we're talking about). Furthermore, the NAACP complained that his bookstore (a rack of books in one corner of the restaurant) contained "racist" books that glorified the civil war and slavery.

Less troubling then the boycott of the restaurants, was the boycott by local grocery stores of the popular barbeque sauce produced by the owner of the restaurants. Winn-Dixie, Krogers, Piggly Wiggly, Harris-Teeter, Bi-Lo, and Food Lion, all joined in the boycott by dropping the barbeque sauce. No local grocery store joined in the boycott, and two of the six stores above have restocked the barbeque sauce following complaints by customers.

Now, whatever your feelings are about the civil war, slavery, or the confedrate flag, it is clear that this boycott by the NAACP is nothing more than an attempt to censor the views of this businessman. And censorship, no matter who is doing it, is not that this country is supposed to be about.

The confederate battle flag is not a "symbol of slavery" to anyone displaying that flag. I have not heard a single person, who displays the flag, advocating a return to slavery. Instead, the battle flag is a symbol of State's rights to most southerners (resistance to big government), and a flip of the middle finger at those who criticize the confederate states (especially those who insist the civil war was about slavery).

I saw an article, with similar sentiments, a couple of years ago,
written by the black editor of the military's Stars & Stripes newspaper
following his return from an extended tour in Africa. In the article,
he said that his trip to Africa changed his entire views about race
relations in the United States (he then went on to criticize those
blacks in American who fail to appreciate the opportunities they have).

And do you think Republicans are just going to be sitting on their
hands during the 2002 elections? They are just as fired up as the
Democrats, so don't be too surprised if your "landslide" doesn't happen.

Andy, what about the LA riots (and other riots around the country)? And what about the deaths of whites each day at the hands of blacks (numbers far greater than the deaths of blacks by whites)? As for Ruby Ridge, that was a minor weapons violation (sawed-off shotgun) that escalated into a firefight after police officers killed a minor child in his backyard (hardly a threat to anyone).

Another is short-hand.. ;)
I learned "note-hand" (an abbreviated version taught for easier note-taking in class) which makes it much easier to keep up. I admit I still have a hard time deciphering what it was that I wrote down, but.. getting it wrote down's easier.. ;)

Bullshit.

The government wanting to make an example was the primary cause. If they have no respect for a mans property, they should have had the common sense to know that the dogs would be a problem and if they opened up on that property, Weaver would probably shoot back. You open up on my dog and I am going to be returning fire, and I think that most of the people who live in my community feel the same way.

As it turned out, the courts agreed that the Marshall's pulled a dumb stunt. And that asinine stunt is what predicated the shooting. Had the Marshall's come up the road, wearing their uniforms and badges, driving a marked car, Vicky would not have been assassinated, the son and dogs would still be alive and a family would not have been destroyed.

Weaver was under no obligation to presume that the gilly clad Marshall's were anything other than thugs who were intent on killing him. I think that Lon Horiuchi committed murder and should still be in prison. The 3.1 Million dollar settlement the government paid the family is proof in my eyes that the government was wrong and to have the citizens pay that damage award to protect Government butts is a double insult.

As far as Waco ... I guess that you believe that oopsies count. They didn't have a no-knock warrant, so they did a no knock raid and called it a "dynamic entry". They lied on the warrant about what they wanted to seize. They lied to the military to get military equipment and commando training. They lied to Koresh. They lied to congress. Yet the bastards walked. Not one Fed was prosecuted for perjury. And innocents died because of that swaggering arrogance of theirs.

You can cite all the legal technicalities that you want ... the government was clearly wrong in both instances and deserves no mercy. And no citizen should ever be required to obey an illegal order.

You're roving pretty far afield there, buddy. Th Red Brigades do
not operate in this country, and members of the Weathermen and
similar groups are now either dead, in prison, or no longer politically
active, so you're flogging a dead horse there. Remember, if you
go blaming currently active liberals for those acts from past radicals,
you open the door to all sorts of things, like legitimizing blacks
blaming currently living whites for the actions of white slaveowners
150 years ago. Don't want to go there, now do you?

You know, for some odd reason I mostly agree with you here, except for
the fact that, when the illegal orders are given to whites sheltering themselves

under "religion" or "conservative values", there's all this sympathy for them,
but when it's blacks or poor people (as in Philadelphia's immolation of the
MOVE headquarters) then they're evil monsters that deserve to be shot
down like dogs. As far as I'm concerned, David Koresh was a cop killer, and

so is Mumia Abu-Jamal. If you're for exonerating one, you've got to be for exonerating both in my book. Otherwise you're just reserving the right to pick and choose which cops get killed -- and that makes you a cop-killer supporter.

That's odd. I must have missed the articles about cops who were beat up or raped in their squad car by their patrol partner. Surely there must be some such incidents, since you aver quite confidently that police work is worse than being in prison. Come to think of it, if this is so, and all cops know it, then why do they ever hire defense lawyers when they are the subject of prosecution? Seems they ought to be seeking to get convicted, since they *know* how much better prisoners are treated than they are.

First off, I don't consider the Feds "police" and if a Fed gets killed, it isn't a cop getting killed. A cop in my book exists only at the State level on down. Having said that, I don't condone killing Feds either.

I am not for exonerating Koresh. Had the Feds bowed out and left the investigation to the locals, Koresh's activities would have been investigated, and if he was doing anything illegal, he would have been tried an convicted. As it stands, we have only the un cross examined testimony of Kerry Jewel as to his sexual abuse of a minor. Which, may I add, as abhorrent as the crime is, it is not a Federal matter.

I have little knowledge of the MOVE issue, so you have me at a disadvantage, but it seems to me the one major difference in the two events was that MOVE didn't have a rogue Federal agency lying about the circumstances to make sure they got the warrant they wanted. It was the local Phillly police and mayor who bungled the MOVE fiasco. And I understand that police were refused entry into the building to serve the warrant to Mumia Abu-Jamal, and that is when MOVE began barricading the compound.

And the only time that I would support killing a cop is when that cop is acting illegally. As much as I believe that the Feds had no rightful interest in Mt. Carmel, had the ATF had simply drove up to the front door of the compound with the *legal* warrant in had, knocked on the door and had been met by a hail of bullets, I would have been hard pressed to defend Koresh. But as it was, I saw a bunch of ninja clad warrior wannabes performing a thinly disguised, no knock entry on a peaceful church commune. And the curiously missing front door only adds fuel to my belief that it is likely the Feds fired first. I think that had the bullet holes been coming out of the door, that door would have been found and been enshrined in an acrylic vault for the world to see.

Wow that's cool about the code test. I did not know about being
wavered. Yes I do have my old Extra license so looks like that takes
care of the code. I did check for my old call sign and it was taken.
Thank you.

That's odd. I must have missed the articles about cops who were
beat up or raped in their squad car by their patrol partner.

Come now...did Dan Rather do an expose on this non-existant problem? Please
cite just one example if you can. Scenarios like this just DO NOT happen.
Liberals seem to enjoy stretching third party tales they get...especially
when a badge is concerned.

Surely
there must be some such incidents, since you aver quite confidently
that police work is worse than being in prison.

Come to think of it, if
this is so, and all cops know it, then why do they ever hire defense
lawyers when they are the subject of prosecution? Seems they ought
to be seeking to get convicted, since they *know* how much better
prisoners are treated than they are.

Cops are treated badly by the Brass, the public they protect, and the
politicians who pull the strings. Do a good job and they nail you...do a bad
job and they nail you again. Cops go home after a shift and wonder, "Why the
Hell am I doing this?" It sure ain't for the money!
Anybody ever wonder why cops are so cynical?
Don't bother to answer this post. I won't believe you anyway.

Plubius
"In God we trust...all others checked through NCIC."

904. Dimmy and Martin Luther King

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-14 10:17:38 UTC
From: Buzzsaw <"Catch Me."@edu.com>
Message-ID: <93ruaopkd0@pita.alt.net>
Source record: 95682

The descendants of Martin Luther King want to take the time to wish a happy holiday to Dimmy Dimwit for his efforts in furthering race relations worldwide.
Dimmy has, as a holder of not one, but two honorable discharges, upheld the honor of black Naval Retirees the world over. Were it not for the untiring efforts of Dimmy Dimwit many black sailors would have gone unheralded. Dimmy set a precedent when he scribbled racial epithets on the deck of the ship on which he served, thereby helping to coalesce the "sailors of color" who took umbrage and were understandably outraged. Dimmy claimed the epithets were put there by a black sailor who was "trying to set me up". Dimmy threatened to call the Judge Advocate General attorneys into the fray, but he declined when the piece of chalk used to scribble the epithets was found in his locker.
Dimmy has two prominently displayed Honorable Discharges in his home. This is most likely attributed to a good quality printer.
Naval authorities would not comment.

905. Kenwood TS-520S Any Good?

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-14 11:12:55 UTC
From: Exham@nospam.com
Message-ID: <3a618910.7143292@news.accessnv.com>
Source record: 95683

As I mentioned in another thread I have an expired Extra and want to get back into ham radio. I have a Kenwood TS-520S packed away and wonder if it would still be a good radio to use. I know it doesn't have the WARC frequencies or notch and other filters that were coming out before I went inactive. Have band conditions become so crowded as to make special filtering a necessity?

906. Re: RACIST OTK STIRRED THE POT AGAIN!!!!

I demand an apology. I've known WB2OTK for eleven years and never once have
I ever used racial slurs and vulgarities. Regarding Rich, he DID use
vulgarity to which many reacted negatively including me and I'll bet he
steers clear of it now. Also he used to think that the term "nigger", to
which I strongly objected, related to certain types of whites as well as
blacks. I think he now knows it's a highly perjorative term relating ONLY to
Negroes; a term greatly out of keeping with the political correctness that's
inherent in today's America.
I strongly object to your using the terms KKK and Nazi Party in relation to
anyone who befriended him and your posting was made with only one purpose:
to cause a breakdown in the bettering relations between him and Riley
Hollingsworth. And to take into consideration that you are an anonymous
coward to boot, a yellow mealy-mouthed tick of a human remnant of cow
excrement, I suggest you hit the road and don't look back.

And how is THAT accomplished or recognized? No matter how upright and productive a citizen he/she becomes, they don't have their rights restored. So please get off your "holier than thou and you can't be one of us" soapbox. Thank you.

>That is why we are superior to the typical
>selfish American.
>

I don't deny the high calling of being in the military, law enforcement, or fireman. But did you ever hear the story about the parts of the body arguing about which was greatest? The eyes claimed this honor because they could see. The arms pointed out their strength. And so it went.

Finally, the asshole had heard enough and decided to stop performing his function. It was not long before everything was in chaos. The eyes were buggy and blurred. The arms were weak, etc.

The moral to the story is: The assholes who serve you may be of greater importance than you think.

You and the anti-Christ are going to get along very well. So you want to
further slam people by putting their status on a document used for
identification every time they write a check in a local store? I'll have to
fight you on that proposal.

> And everyone
>should
>be forced to update their licenses once they move so that the police can
>easily find them.

What a novel idea! How DO you come up with this stuff? Is there anyplace where
this is not the law already? Where I live, you've got 30 days to change
license plates from the old state (if applicable) and to modify your license.

If you want to tackle this problem in a more creative manner, lobby to make
address changes to the drivers' license FREE (instead of paying $10 to $25).
If you want people to do what you want, make it easy for them.

>It seems to not have much power on 440 out of
>> band! Please help. Kevin- h175a@multipro.com

I hate to bear bad news, Kevin. Amateur gear specifications are valid only for the ham bands. And what you are experiencing is very typical.

But in trying to move a radio designed for 440 up to FRS, you've got two other problems which are worse than the reduced power output and the over modulation.

(1) The receive sensistivity is lousy when out of band and the radio will be very prone to intermod.

(2) If you have an amateur license, it can be revoked for using non-type accepted equipment on frequencies where such acceptance is required. It surprises most hams to learn they can loose their license for non-ham activities.

Finally, keep in mind that FRS is not a "hobby" radio service. The majority of users do not welcome "random contacts". They prefer to talk with members of their own group. They utilize privacy codes and they scramble their transmissions (legally) to prevent interuptions.

There are legal ways to run up to 5 watts on FRS channels 1-7. But before you spend a lot of time and money getting to this point, make certain that your expectations are realistic. If you're getting on FRS to call CQ, I recommend you rethink this project.

That comment is WAY out of line, and insensitive. If someone you know is raped, PLEASE don't tell her she "deserved it" or that she "encouraged it".

Especially if the victim is a child.

>
>"... reality is a frame of mind..."

Don't tell the victim THAT, either (if she's still alive). She might ask you to explain how the blood, the STD, and the possible pregnancy are a just a "frame of mind".

Get it out of mothballs, clean off the mouse turds, and set it up to
listen and you will find out real quickly. There are a lot of 520s in use
every day. Good rig in its day and not a bad one now. You will hear a
fair number in use every day. Besides, Extras have to run obsolete gear
to keep up our image; only outlaw CBers can afford new gear. :-)

You guys seem to be having problems stirring up emotions in the ng's lately! I expect soon you'll be responding to your own posts.

Oh yeah, don't believe everything RUSH and Ollie tell you, they seem to have trouble speaking if it's not reciting the republican line (not like the left is any better). The republican party has more mantras than Jesse and Jonny Cochran combined!

Anyway, now we see the true colors of the parties. Eight years ago the Democrats (what a joke) were crying the Republicans were sabotaging the presidency before it even started. The Republicans spent 8 years and MILLIONS of our tax dollars trying to nail Willy saying all along it was to protect the morals of our country (didn't work). Now the tide has turned and it's starting all over again, only the names have changed.

Have fun!
Jay

You WILL........HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!
And quit getting on 20 meters and jamming Riley.......you'll lose
that "Eternal Technician" ticket.

the law.

and exactly what legal violation was Mr Weaver ever convicted of????

You say he was ignoring the law, so exactly what law was he ignoring?

How exactly does his ignoring the law justify the BATF to also ignoring the
law?

> The Government wanting to make an example of him was the 2nd direct cause.

BINGO. They wanted him to do something, he didn't want to do it, they
attempted to force him, he refused.....then they murdered his family.

I still fail to see any justification for the government's violation of the
law.

On the contrary, killing a cop who is illegally threatening you is not a
crime. Either legal or moral.

: > D'ANGELO COULD HAVE MADE $1 MILLION FOR WORK,
: > REPORT SUGGESTS
: >
:
: This has nothing to do with the democratic party. We're talking about the
: Daley machine here. The Daley's are a party unto themselves.
: Democrats and Republicans alike kiss Richy's ass if they want to work in
: Chicago, it's been this way since his daddy was in office.

It was Daley's brother who ran Gore's campaign. Bill Clinton just
went back to Chicago this last week to thank them for the support
he received over the years. Chicago democrats are at the heart of
the what it is to be a democrat.

Heheh, he demands an apology. :)
This is 2001 if you didn't know, not 1912.
People don't demand apologies anymore
nor do be "strongly objected" and insist that people stop on the grounds
that you shelter yourself and thus are not savvy or tough to things which
the rest of society is fairly immune to.
How dysfunctional, idealistic but dated your beliefs are.
I could say, "I wish there were more like you" but I wouldn't
wish that on anyone as I'm sure you stay in a perpetual state of being
offended and run around trying to make everyone stop being people.
Toughen up as you are not going to be able to change anything except
your attitude and outlook. Everyone will remain static and you aren't responsible
for anyone but yourself.

: > I expect a Democrat landslide in 2002.
:
:
: And do you think Republicans are just going to be sitting on their
: hands during the 2002 elections? They are just as fired up as the
: Democrats, so don't be too surprised if your "landslide" doesn't happen.

We are in a long term campaign. Think of it as a never
ending election. The campaigning never stops. Liberals
are already using the nominations of GWB as the basis
for the 2002 election cycle and campaign slogans. Remember
the Left needs enemies in order to define themselves. It
was the same tactics that Hitler used, which they have studied
over and over.

We need to defeat them now. Think about it, 30 states voted
in favor of GWB therefore those states' senators have strong
reasons to support GWB's nominations. Email your state's
senators and let them know that you support GWB's choices.
The Left already has it machine working (if anyone finds the
web page where they are coordinating that attack, please post
it).

You can only say that Koresh and crew wanted an inferno if you accept the FBI version. I don't. I have spoken with some of the Davidian's, including one who was there, and they say that they didn't want an inferno, nor were they expecting the raid. Add to that the litany of lies told to get the warrants and military training, the missing door and other abuses, and I can only conclude that the Government did not raid the commune, they illegally assaulted it and reaped the reward of that miscalculation. They did then scramble to cover their butts, and did, IMHO cause the unwarranted deaths of innocents, and doctored the evidence they presented to investigators.

HAMFEST/COMPUTERFEST CALENDAR 2001 - ILLINOIS
last updated January 3, 2001 |

o Please report additions or changes to Bob Parnass, AJ9S, office phone: (630)979-5414, electronic mail: parnass@bell-labs.com. Thanks to Dennis Dale, Rick D. Wilson, John Wass KA9QJX, Tom Harker, and ARRL for providing some of the information.

JANUARY 2001

Jan 7 (Sun): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Jan 14 (Sun): Tinley Park, IL - Giant Computer Show & Sale (see below). Tinley Park Convention Center, 185th St. & Harlem Ave. 9:30 AM - 3 PM. Adults $6, children $2.

Jan 28 (Sun): Cicero, IL - WCRA Mid-winter hamfest 2001. Hawthorn Park on S. Laramie Avenue, Cicero, Illinois Note change of venue 2 blocks south of 2000 hamfest! The new location, Hawthorn Race Park, is much nicer than the Odeum. Cleaner, brighter, better food. Tickets $5.00 in advance with 4 stubs. Parking is free. Advance tickets from Kurt F. Rubin, kb9rto@arrl.net and John E. Wiley, K9FID, johnwiley@lucent.com

FEBRUARY 2001

Feb 4 (Sun): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Feb 11 (Sun): Tinley Park, IL - Giant Computer Show & Sale (see below). Tinley Park Convention Center, 185th St. & Harlem Ave. 9:30 AM - 3 PM. Adults $6, children $2.

Feb 18 (Sun): Tinley Park, IL - Giant Computer Show & Sale (see below). Tinley Park Convention Center, 185th St. & Harlem Ave. 9:30 AM - 3 PM. Adults $6, children $2.

MARCH 2001

Mar 4 (Sun): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Man-

chester Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Mar 11 (Sun): Tinley Park, IL - Giant Computer Show & Sale (see below). Tinley Park Convention Center, 185th St. & Harlem Ave. 9:30 AM - 3 PM. Adults $6, children $2.

APRIL 2001

Apr 1 (Sun): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Apr 29 (Sun): Arthur, IL - Moultrie ARK. 8AM - 1PM. Info: | Ralph Zancha, WC9V, PO Box 55, Lovington, IL 61937. Daytime | phone 217-543-2178 evening 217-873-5287. Email: | rzancha@one-eleven.net Or write to M.A.R.K., P.O. Box 91, | Lovington, Illinois, 61937.

COMPUTER SHOW NOTES |

Computer Central computer shows are held at the College of DuPage, Main Arena of the Physical Education Building Park Blvd & College Road, Glen Ellyn, Il. 847-940-7547. $5 admission with card, normal admission $6.00. Opens 9:30 am - 3:00 pm. See http://www.computercentralshows.com web site.

Giant Computer shows are held by Micro Media, Inc. Shows are usually held at the Tinley Park Civic Center, 185th St. & Harlem Ave., Tinley Park, IL or at the DuPage County Fairgrounds, County Farm & Manchester Rds., Wheaton, IL. Admission is $6. Show hours are 9:30 AM - 3 PM. To get on the mailing list or get more information, call (708)974-3123. See http://www.giantcomputershow.com

Computer Country Expo is Lake County's largest computer expo. The event is held on designated Saturdays from 9:30 AM to 3:00 PM. This show features computers, supplies, games, parts, software, accessories, CD-ROM, monitors, diskettes, printers, keyboards, modems, disk drives, cables, expansion boards, services, etc. Lake County Fairgrounds, Route 120 (Belvidere Rd.) & Route 45, in Main Exhibit Hall Building #1=9720,000 sq. feet. For a show map, exhibitor info, and discount coupon, visit the web site at http://www.ccxpo.com.

Any order that Degan or his partner may have issued Harris or Randy's son.
Apparently, the courts agree with me, since they awarded Weaver over three
million dollars because of the marshal's actions

What color is the sky on your planet?
Political correctness breeds more disfunctionalism and
mental illness than just saying what you feel and if people are
offended they can tough it.
Political correctness is outdated by eight years now.
It was another yuppie fad. Now people are back to normal where
they can have an opinion, a mind of their own. Hey, life and everything
in it isn't politics and I'm not running for mayor or anything so to hell with correctness,
it makes me sick inside and mentally ill. The concept come out of the 50's which was the
silent
generation, where heroin abuse was sky high and the city and state mental hospitals were
springing
up everywhere and filled up with more insane people than in history because people were not
allowed
to be people, instead they were more like idealistic floor models. Image isn't everything.

: > BTW, OK City may have had a huge amount of dead but it is only
: > one act. And, while I disagree with the thought process, it was done
: > in revenge for Waco. How many on the left did terrorism in revenge
: > for some act? Look at all the Red Brigades in Europe. Or the
: > Weathermen here in the US.
:
: You're roving pretty far afield there, buddy. Th Red Brigades do
: not operate in this country, and members of the Weathermen and
: similar groups are now either dead, in prison, or no longer politically
: active, so you're flogging a dead horse there. Remember, if you
: go blaming currently active liberals for those acts from past radicals,
: you open the door to all sorts of things, like legitimizing blacks
: blaming currently living whites for the actions of white slaveowners
: 150 years ago. Don't want to go there, now do you?

Actually we do have to settle up scores for blacks. While slavery
is not as much of the root cause of current problems within the black
community, Jim Crow laws are more to the basis of what is harming
and holding back blacks. And that is within my generation's
responsibilities.

How we help blacks make the full adjustment to mainstream society is a
big question. Affirmative Action seems to have ran its course. Something
better is needed, something that solves the early childhood problems within
the black community. It is hard to make up for the lack of early childhood
training and education with a quota system for adults.

We now have many, many successful blacks in our society. We recognize
the hard work that backed the genius of people like Louis Armstrong or
Michael Jackson (god, would he have made a great general). Blacks are
coming into leadership posts everywhere. Mixed marriages are common,
especially within the military. We need a final push to heal the divisions
that
many blacks feel.

So, yes, I do accept the burden of white racism, as many other conservatives
do. I also see that within the black community a great many who share my
views on social conservativism. The black community is more religious than

the white community. They have stronger families in many cases. Blacks believe in spanking, in strong discipline of children. In many cases they are
tougher on their kids than whites are.

And remember, John Ashcroft belongs to a church that was founded by a black man. And is the most racially unitified church in America. It is called the Assemblies of God.

You might try making yourself some letterhead, and requesting engineering samples for evaluation for your new product. If the chip seems meets your needs, you _might_ need 20,000 or so for the production run.

john

>TL can look it up in the book of Proverbs
>it goes like this " The FOOL hath said in
>his heart, there is no God"
>
The quote is correct .. but it's in the Psalms rather than the Proverbs.

Accorting to Quick-Verse 7 DeLuxe, it appears at ..
Psalm 14:1 ..
and ..
Psalm 53:1.

Careful now .. I don'r remember Bro. Roger saying "there is no God". Maybe
he's questioned identities and belief systems, but has he outright said ..
"there is no God"? Careful now.

Careful because .. calling one a "fool" withouth correct basis renders one
worthy of ... ________ ??
A. Hell Fire
B. A scolding from profit Stair.
C. A ride in the black helicopter.

Now .. about that A+ .. today would be a good day to knock out another chapter.

Speaker to Animals <Dante'@inferno.net> wrote ...
:
: NPR is running a series this month on "prison life".
: Todays heart wrenching story concerend a young man who got busted for
armed
: robbery and is serving a 7 year term. He freely admited to robbing 75 or
80
: people at gun point. Told how he pulled the robberies off. And how bad and
sad
: prison life is. Tried to act like he has "learned his leason" but when
talking
: about his robberies he did not sound reformed to me.

The thing that most people seem to want to forget is
that prison does not reform or redeem people. Just
serving a sentence is no guarentee that they will adjust
or conform to the normal world. That is why we need
to strip felons of their rights until they prove that they
are conforming to the norms of society.

: They may have the story on line as a real media file.
: IT behooves anyone who thinks about survival to listen to this young man
and
: realise just how different criminal are from the rest of us.
: The funniest line regarded his comments on his fellow inmates.
: Something to the effect that they were all stupid.

If you have every taken a Criminal Justice course then you
would have been taught that 20% of prisoners are mentally
ill and 60% have used drugs or alcohol to self medicate for
emotional illness. And the 70% of those in prison have been
in foster homes. Of course society wants to neither deal with
prisoners (the left has pushed the idea that others can be bribed
into caring for the losers in society) or with early childhood
problems due to single parent moms or divorce. This is not
saying that if you are the offspring of a single mom or a divorced
home that you will be a criminal. Rather that most of the criminals
have this in their backgrounds. It a common factor. America
has to come grips that we have a huge number of emotionally
hurting people out there.

: Too bad he can not see why he belongs in their with the rest of the
animals.
: Based on his touching story, and how inhumane prison is, I think we ought

to
: light up (IE EXECUTE) anyone who commits crimes of that nature.
: IE armed robbery, rape.

A rapist sees himself as a victim of women. His crime
is that he shifts his hurt onto othes by victimizing others.

: And I owuld like to expand the list to get the white collar crooks who
"only
: steal money", and never threaten anyone.
: Light'um up. reduce prison over crowding.
: Stop the inmates from hurting.
: Like, does anyone have any doubts that this goon will hit the streets
: with the same lack of job skills and attitude that "Caused" him to embrace
a
: life of crime?

Everyone has problems. About 3%, the number in prison, deal with
them poorly. Look at any 100 kids and remember that 3 of them will
cause 80% of the crime in the future.

:

: >with the same lack of job skills and attitude that "Caused" him to
embrace a
: >life of crime?
:
: Good post Dante,
:
: What I -think- makes criminals different from the rest of us, and is
: only my *theory* as one of my hobbies is studying True Crime, is that
: criminals have no feelings. No real remorse. No conscience. No
: sense of Right and Wrong, or if they know right from wrong, it doesn't
: MEAN anything to them.
:
: They (criminals) can go around killing -humans- with less regret

: than you would feel stepping on an ant. And I don't think
: *rehabilitation* can remedy that. It seems to me (as an amateur
: forensic student) that this psychological remorselessness is
: interminable. There forever. This is true for the *habitual*
: offender.
:
: In the case of a crime of passion, the profile may be different, but
: the psychotic has no feelings and will pathologically LIE , CHEAT,
: STEAL, KILL without a single twitch.
:
: And these monsters are for real, not imaginary bogeys men hiding under
: the bed !

Both of you have great posts. Too bad that more people do not
take a Criminal Justice course will at university.

: Law enforcement is the citizens' duty.
:
: Too many lazy shitstains have delegated this authority to mercenaries
: because it was inconvenient, uncomfortable or scary.
:
: The end result is plain to anyone with eyes.

I have tried to point out the same. The Left Wing of American politics has pushed the idea that taxes equals caring. Therefore they want to "bribe" others into being the mercenaries (cops and soldiers) so that they do not have to dirty their hands. They expect others to raise the children (teachers), to care for the poor (the left is no longer to be found in the ranks of lower government) or take care of their aging parents who are no a pain in the ass.

The draft might be able to do this. However, within the ranks of 2nd amendment supporters, the draft is a feared idea as it seems that many fear a government that can order them to do things. They do not seem to understand that the more people who are involved then the less government can do. Government is most powerful when few have a hand in it.

But your point that we all are the enforcers of the law, as we all are the military. The militia concept was orginally that we all would serve, on a "volunteer" basis. One huge reserve force that was the police, the fire brigade and the military.

Somehow we need to get back to that concept. Training everyone while in school how to fight fires, to EMT work, simple work, simple military duties, how to use firearms would be a start. Social pressure, not law, that every male has a responsibility to protect his community and his nation would help as well.

>(any of these would suffice) :

Do you need a divide by 64/256 switchable or would one or the other do?
Also, are these for home projects? Novatech has a pile of old (now
obsolete) equivalent to the SAB1165. The actual part is the U264B from
Telefunken and is /64.

These are spec'd only to 1GHz, but they can be pushed. I am sure I
have a few-- maybe ten or so of faster /64.

Hi, I'd like to have a spare pair of true Eimac 3-500z tubes, they don't need to be electrically matched. They don't even have to be new as long as the output is full and normal. What have you got?

Yes, I know I can get them and other brands from the RF Parts, etc, but they are a bit out of my budget.

Thanks!

Neil, K1VY
(603) 465-2788
(800) 962-2949

P.S. Also, while I have your attention, I'm still looking for a noise blanker for my Drake TR-5 and TR-7 (NB-5 and NB-7/7a respectively). All leads gratefully accepted.

948. N9PGE, Mick Slater, comes from a family of convicted child molestors

I would not have a problem with using my dual-band HT with MURS . It's been modded for out-of-band. Same goes for a 440Ht to use on FRS too.
All you need to do is get the shortest antenna possible and use the lowest
power, and noone will even notice.
<..>
----------------end post----------------------

REMEMBER now, DUMBASS???????? A copy was sent to Riley.

I'd say I have YOU described to a "T".....Nutsack slurper.
WHY does things of a SEXUAL nature frighten you so??? Is it true that
you were abused by your REAL father? No WONDER you're still a
VIRGIN.....and will probably DIE
one....HAHAHAHAHAHAHAHAHAHAHA!!!!!!!!

> You have some mental problems

So says the FAT FUCK with TITS who obsesses about older MEN. This same
LOSER posts his fucking UGLY mug on a webpage that ham operators and
older men frequent for laughs.
Now, where's that Psychology "degree" you have from?????????????
Freud would say you were sexually deviant. Gestalt would say you are
trying to make a bigger, larger picture out of the shards of your
broken-homed life.

>

The 14.313 shows that melon-shaped BALD head of yours. Prove that I
have an elongated head, Lardass!! (I'm still consulting somebody on
possible legal action which make YOU and your butt-buddy co-
defendants.) See, the photo on the Goodfellows page proved I don't have
an elongated head, so your lies just don't hold water!!!! However, your
LARDASS obviously holds a LOT of water and LARD. Even W4AMP told me I
looked quite normal. Too bad, nutsack slurper.
I noticed you AVOIDED addressing my invitation up here to shut me
up...duly noted.

> God made us all in his image.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!
Prove it! Prove God made us in his own image. I say jesus was the first
recorded artificial insemination. God must be a melon-headed OBESE SLOB
in YOUR case then!
You have a blank, helpless sort of face, rather like a rose just before
you drench it with DDT.
You are a mental midget with the IQ of a fence post.

I love jewish people but why does this not make me hateful towards Lloyd?
I guess because I know Jewish people are going to be ok, Lloyd or not.
I don't have an extreme reaction to Lloyd like others have towards him.
I guess the way I see it, Lloyd can't really help that he doesn't know better
and I highly doubt there are many jews in Alabama for him to know anything
else from what he has been told and concinced of.
If anything, Jews are tighter in family, have higher moral values than anyone else
in our society, have the lowest crime rate and I wish I could get that from today's
average white or black or mixed blood mutt.

The prison culture/society fosters a very different set of values than what we generally think of as "normal" society. It is true that most imprisoned people are deficient either genetically, environmentally, socially, or a combination of all three. It is not true that they are all sociopathic; only a small percentage is sociopathic (psychopathic). And, that percentage is about he same as in the general community among people that have never been arrested. Check it out the next time a salesman, politician, auto mechanic, lawyer, or doctor tries to get more money from you than his product or services is worth. Check it out the next time someone in the community lies to you in order to increase his benefit at your expense. How we as a society approach the problem of crime is largely based upon our moral and ethical view of human beings. Although it is important to protect members of society from violence and other criminality, it is also important that society not sink to the level of dehumanizing other human beings for any reason.

then you have a lot to learn.
take a good long look at the numbers pal!
more than 40% of new hams start out no-code
(amd a fair percentage of those upgrade).

your stance is unfair (to say the least) and I
am glad that your opinion is the minority here.

so, keep right on ranting... meanwhile, the no-coders will
still have access to the vast majority of spectrum above
6 meters... Why should we worry about the 2 or 3 MEGAHERTZ of
allocated spectrum in the HF bands (well, given the recent
earthquake, etc, I guess we should).

so, you just keep up your troublmakin ways.. I'll be toasting to my good
health
when you (and your kind) have gone the way of the dodo bird.

Well, your "book" and what you "consider" don't happen to be the law of the land. Federal law says they are police and I know that a specific provision of the Texas Code also recognizes federal agents as LEOs as well. I'm sure the other states have similar provisions.

If you don't like the law, work to get it changed. But you as a citizen don't have the right to decide laws are invalid because they don't agree with your "book". If that were the case, anybody could nullify any law by saying "I don't consider x, y or z to be true or valid".

Miami-Dade ballot recount

By Clay Lambert and Bill Douthat, Palm Beach Post Staff Writers
Sunday, January 14, 2001

MIAMI -- George W. Bush would have gained six votes more than Al Gore if all the dimples and hanging chads on 10,600 previously uncounted ballots in Miami-Dade County had been included in the totals, according to a review by The Palm Beach Post.

That result would have been a hard blow to Al Gore's hopes of claiming the presidency in a recount. Before the vice president conceded last month, the Gore camp had expected to pick up as many as 600 votes from a Miami-Dade recount -- barely enough to overtake Bush's razor-thin Florida lead. Instead, The Post's review indicates Gore would have lost ground.

If everything were counted -- from the faintest dimple to chads barely hanging on ballots -- 251 additional votes would have gone to Bush and 245 more would have gone to Gore, The Post review showed.

The review, concluded last week, also showed that the vast majority of ballots rejected as under-votes (meaning there was no clear punch for any candidate) when counted by machine appeared, in fact, to cast no vote for president. About 7,600 under-votes had no mark at all on the presidential column, or in rare cases included multiple votes that defied judgment. Most of the voters who did not indicate a vote for president did punch choices in other races.

JANUARY 13, 16:45 EST

State Officials Mull Voting Reform

By LEIGH STROPE
Associated Press Writer

WASHINGTON (AP) - Pumping gas, buying groceries and using an ATM to pull money from the bank shouldn't be easier than voting. But they are.

``We do billions of transactions every day with high degrees of accuracy. There's no reason the election system can't do that,'' said Maryland Secretary of State John T. Willis, one of a dozen elections officials from various states who met Saturday to talk about reform.

About 20 different plans aimed at preventing another Florida fiasco have popped up in Congress and more are coming, said National Association of Secretaries of State President Sharon Priest, Arkansas' secretary of state.

Priest heads the group's voting reform task force, which is meeting this weekend to make sure that the folks who actually run the elections have a say in the national dialogue. They're discussing uniform polling hours, voting methods, technology, standardized ballots, poll staffing, voter education and election-night media coverage. The task force will make recommendations to the association when it meets next month to consider and possibly endorse a plan.

``The recent election and subsequent civics lesson illustrate the kinds of things we've been dealing with for years,'' Priest said.

Asked what is most needed to fix the system, Priest said: ``We probably can answer that with one word.''

``Money,'' the elections officials said in a chorus.

But Congress doesn't often dole out money without tacking on instructions for how it should be spent. That's a fear among the elections officials, who say each state has its own needs.

``There's no one-size-fits-all solution,'' said Donetta Davidson, Colorado's secretary of state.

Money for voter education programs was high on the list for New Mexico, said Secretary of State Rebecca Vigil-Giron. In Iowa, a priority is technology and improving voting systems, particularly for about 10 small and rural counties that lack financing for upgrades, said Secretary of State Chet

Culver.

The officials generally opposed the idea of a uniform national ballot. But California, which has long complained that early election-night calls in eastern states can dampen turnout in the west, would like to consider the idea of setting uniform poll hours.

The elections officials also said that difficulty in finding poll workers is reaching crisis levels in some states, and that better training is needed.

California has started using students in civics classes - who aren't even voting age - to work polls, Secretary of State Bill Jones said. Kentucky is looking at drawing poll workers from jury lists, said Secretary of State John Brown.

Election Reform:

Uniform polling hours so that every state
opens and closes at the same time.

Uniform election machines: the optical scanner
is the fairest and produces a paper ballot which
the computers do not (ATM style). These machines
can check to see if you left any spot unfilled or double
marked a choice and will force you to either correct it
or verfy that is what you want. About 41% of all counties
are using optical scanners.

Change the constitution so that we can move the election
day to the first Sunday in May with the primay on the
first Sunday in March.

Work with state legislatures to have the electorial votes
be counted on a congressional district level rather than
a statewide basis. Two states already do so. The two
votes which represent the senate seats would go to the
person with the highest vote count statewide.

Register everyone via their drivers license. Mandate that
everyone, 16 and older, be forced to have either a license
or a BMV issued ID. Have the BMV track, on the license,
your citizenship status, like we do now for alcohol IDs.
This would include full citizens, limited citizens (under age
and mentally retarded), restricted citizens (felons, court declared
mentally ill) and resident aliens.

Voting Problems Targeted in Florida

By ROBERT TANNER
Associated Press Writer

The fallout from Florida's election mess continues, with pressure building in the courts, in state legislatures and in Congress to address the problems and pitfalls exposed during the presidential race.

Lawsuits are multiplying rapidly, demanding improvements from state voting machines, alleging civil rights violations of black voters, even targeting the companies who make and service punch-card voting machines.

State and national task forces are working to find ways to fix what many say is broken. And governors, legislatures and members of Congress are taking aim at every imaginable facet of elections - from machines to training to recount rules.

One thing to remember, this is a nationwide problem.

``It unfortunately was going to take a Florida and the situation that happened there to really focus in and find solutions to the problems,'' said Tom Wilkey, New York's elections director.

Wilkey spent the week in Washington meeting with different commissions all trying to make recommendations for improvement. On Saturday, he joins a task force of secretaries of state for a weekend-long meeting.

Earlier this week, he met with two groups of state, county and local officials. All want to give guidance to Congress, where at least a dozen bills are in various stages of preparation aimed at improving elections - whether granting money for new machines, examining the effects of broadcasting exit poll information, or tightening voter registration.

State lawmakers aren't sitting by, either. Some 300 bills already have been filed so far, according to the National Conference of State Legislatures. With most legislatures just getting started, the numbers will surely grow in the months to come.

The latest proposals hit every question raised during the election, and then some: military ballots, recount standards, voting machines, the rights of felons to vote.

A Kentucky measure would lengthen polling hours. Illinois and California proposals would change the way those states divide their electoral college votes. A Maine legislator wants to more tightly restrict exit pollsters.

We need to go to congressional district
selection of the electorial college like Maine
does.

If there were any chance the nation's legislators might neglect the issue, the arguments brought to the courts won't.

Civil rights worries are driving lawsuits in Florida, Georgia and Illinois, and an inquiry this week by the U.S. Commission on Civil Rights that put Florida's Gov. Jeb Bush and Secretary of State Katherine Harris on the stand.

All three of the lawsuits question the use of the punch-card voting machines that left thousands of votes uncounted, alleging they disproportionately damaged black efforts to cast votes.

A class-action suit in Illinois brought by voters in 28 states targets the Votomatic machine itself, naming as defendants companies that make, sell and service the punch-card machines blamed for the infamous chads.

``They've known about these problems for at least 15 or 20 years,'' said Stanley M. Chesley, an attorney working on the suit. ``It's all coming out.''

Illinois has worst problems with blocking of
black voters, especially in by counties control
democrats.

State election officials, who long have urged Congress and legislatures to help modernize the voting systems, say they welcome the attention. But they also want to ensure state authority over elections.

``We don't have federal elections, we have state elections for federal office,'' Wilkey said. ``That responsiblity was given to the states when this country was founded.''

And secretaries of state and election officials worry that federal efforts might be too narrowly focused.

Simply buying new machines won't prevent all future problems, said Gary McIntosh, elections director in Washington state. Look at the chad problems in Florida when the punch-card machines weren't cleaned, he said.

``People operate these systems, they don't operate themselves,'' McIntosh said. ``If you've got 80,000 things going on in your office, and only two people helping you out ... sometimes cleaning out the machine falls kind of low on the priority list.''

While it may be four years until the next vote for president, the problems so glaringly apparent in November are just as damaging right now.

``That's one thing about elections - there are always more,'' McIntosh said. ``We've got school measures coming up next month.''

If she was licensed prior to 1987 she can automatically qualify for the
general upgrade.

If you contact the QCWA they can look it up for you in the old call
books they keep.

I had them do this for my son.

> on it, and the problem would have been solved quickly and easily, and his
Wife
> and Son would still be alive.

Sorry, but no one is obligated to respond to non-offical rumors of legal
actions.

> But in THAT case, he wouldn't have been a martyr
> and hero to a warped group of people.

I see, so in your opinion, his failure to report to court because of RUMORS
there was a warrent issued for him, is justification for the government
agents to kill his wife in cold blood?

Don't you consider that response just a little extreme given the extent of his "offense".

> >How exactly does his ignoring the law justify the BATF to also ignoring the
> >law?
>
> I never said it did.
>
> BOTH sides were wrong. But few people on either side want to admit that.

Maybe, but I haven't seen where his actions have ever been shown to be in violation of any law. He was at least tried for those things which people claim he did wrong.

The government however, the issue, has NOT been charged or tried for their offenses.

> >> No, the Feds deliver their own warrants, and this was a contempt of Court
> >>case made worse by a bureaucratic screwup.
> >
> >"bureaucratic screwup"? I thought it was an illegal raid?
>
> Nope, the warrant service was legal, if it had been conducted within the guidelines
> set for it. The claim by the Government of possible resistance was so much crap.

Excessive use of force, is illegal.

> But you HAVE to win by beating the Government at it's own game, and getting
> someone in your family killed is NOT winning in any sense of the word.

So I should obtain a warrant on falsified information, then kill that person's family for being in the area?

Sorry, but no one is obligated to confirm with illegal actions being taken against them. Playing the game of "who can ignore the law the most" is a losing battle. Nor should someone have to sink to violating the law to protect themselves from this. However, they don't have to. His defense of himself WAS legal, just as the offense by the agents was ILLEGAL.

967. Re: HA HA HA Bush would have won anyway.

You're missing the point. Bubba Bush would NOT have won if popular
votes were used. I think Gore's lead was at least 250,000. That Bush
could NOT have over come.
Now, we have an ass hole (Ashcroft) for attorney general.
And a land raper for department of the interior and of all things an
ex-milary guy for Sec. of State.
This already appears to return us to the days of Bubble gum Reagonomics
and James Watt et-al.

You misquoted me ... the quote in context is:

"First off, I don't consider the Feds "police" and if a Fed gets killed, it isn't a cop getting killed. A cop in my book exists only at the State level on down. Having said that, I don't condone killing Feds either."

Did you not read the last sentence?

I don't care what the Feds consider themselves ... cops or revenooers ... the point is that *I* don't consider them cops. Cops are on call to me 24/7 to protect my person and property ... the Feds are merely enforcement agents. But once again, just in case you missed that last sentence again, the fact that they are not cops doesn't mean that one should "kill" them, any more than one should "kill" a building inspector, of whose job the Feds are more analogous to than cops.

SB DX @ WW < KB8NW $OPDX.494
Ohio/Penn DX Bulletin No. 494

The Ohio/Penn DX PacketCluster
DX Bulletin No. 494
BID: $OPDX.494
January 15, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1VV, KF2TI, W2DEC, WB2YQH/ WB2RAJ & The 59(9) DX Report, W3LEO, W3UR & The Daily DX, N4AA & QRZ DX, WB4PVT, WD4NGB, AC6V, K6IPV, K8YSE, KU9C, 9V1YC, CE6TBN, DL5EBE, DL7AFS, EA3AJI, EA5KB, G3XTT, JQ1SUO, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, SM0AGD, UU6JM, VE3EXY, VK3TZ, YS1RR and Arja Laine for the following DX information.

IMPORTANT NOTICE (Time for you to write to MSN.COM). Your editor was informed this week by our ISP provider that MSN.COM E-mails are being banned and will no longer be accepted on the "NSHORE.ORG" system. This is due to the large amount of "spam e-mail" that comes to "nshore.org" every day. This has grown to the extent of no longer being just an annoyance, but actually dangerous to the ISP systems. After much thought and discussion with other system administrators, that, because the ad-ministrators of "msn.com" are obviously unwilling to even talk (i.e., to even respond) to inquiries, to "nshore.org", my ISP is going to join several other ISPs from permitting any E-mail address that contains the domain name "msn.com" in it from coming onto his system. In other words, until such time as "msn.com" can guarantee them that significant measures are taken to prohibit the originating/mailing/relaying of this "spam email" from that corporation, users interested in any of the services provided by "nshore.org" are going to be required to acquire mailboxes on other systems (e.g., "hotmail.com" or "juno.com", etc.) What this means for subscribers and individuals who send info for the OPDX is that if your E-mail address ends in "msn.com", you will no longer be able to send email _to_ "nshore.org", but you will continue to receive email _from_ "nshore.org", such as the OPDX Bulletin. It is HIGHLY recommend if you need to send me any DX info from "msn.com", PLEASE send it to: kb8nw@arrl.net (until a change takes place). If you want to unsubscribe from the OPDX, you can send an unsubscribe message (with your msn address after the word unsubscribe) from another system or send me a message to the "ARRL.NET" address, and I will do

it manually..... 73 de Tedd KB8NW

3C1, EQUATORIAL GUINEA. Erik, SM0AGD, reports that he will be visiting Malabo, Equatorial Guinea, from January 23rd through February 5th. This will be on Bioco Island, IOTA AF-010. Eril was active from the same location in 1975 and 1989. His amateur radio licence has been granted and will be issued after his arrival. So, currently his callsign is not yet known. Erik is calling this an old-fashioned, small-scale DX-operation: Just one operator, low power and no directional antennas. He will be active on all HF bands, 160-10 meters using CW, SSB and RTTY, running only 100 watts into a vertical and wire antennas. High power is not allowed, but the location is good and should help somewhat. His QTH will be at the same old Hotel Bahia where he was staying in 1975 with a free view of the northern hemisphere over The Gulf of Guinea. Erik intends to spend some time in the CQWW 160m Contest on January 26-28th, and also in the BARTG RTTY Contest the same weekend. His friend Jan, SM5DJZ, has agreed to act as a pilot and will be able to QSP information in both directions. Jan's E-mail address is: djz@swipnet.se
This operation is sponsored by Northern California Dx Foundation. QSLs go to his home callsign SM0AGD.

3C0, BOUVET. Chuck, 3Y0C, was heard over the weekend mainly on 20 meters on 14260 kHz between 2345 and 0030z. However, there were a few on 75 meters on 3772 kHz around 0245z. During the past week, he was also heard on 17/15/12/10 meters. An update from the WD4NGB Web page states the following from the island: "Murphy has struck again at Bouvet. They had a avalanche there this week along with the other bad weather, that killed a lot of the seals. That put their already very busy schedule on overload. The other news is they have been informed that the ship will be back to pick them up earlier than planned. They were given the date of March 2nd as the latest pickup date, but it could be as much as 2 weeks earlier than this." For up-to-date info and a new set of pictures from the island, check out the Web page: http://www.qsl.net/wd4ngb/3y0.htm

3D, CONWAY REEF (Update). According to Raymundo, YS1RR, the planning for the Conway Reef DXpedition continues, and you can see the Conway Reef 2001 Licensee Authorization from the Government of Fiji on the Web Page at: http://www.kragujevac.co.yu/3d2/licence/licence.htm
He also mentions donations/contributions are NOT coming in for this operation. So far only 150 USD have been sent (from Korea only), none from Europe/Japan/USA.
Nenad, VE3EXY, reports that once the team including Raymundo, YS1RR, are on their way to Conway, the only contact will be by the radio, and the source of info will be at the following Web site:
http://www.magma.ca/~ve3exy
Currently the web page just repeats the info, and provides the link to YU site. This site will be more interesting during the DX operation.

4U, ITU HQ. Plently of activity from this one over the past week. There were operations on 80/30/20/17/15/12/10 meters CW/SSB. Keep an eye on the clusters for spots. QSL via CBA or the bureau.

4W, EAST TIMOR. 4W1CW and 4W1UN were heard active this past week. 4W1CW was heard on 24907 kHz and 4W1UN was heard on 10106 kHz, both between 0200-0230z.

9M6, EAST MALAYSIA (Also possibly V8). From a press release, Don/K6IPV and Dave/W6AQ, will operate from the Hillview Gardens Resort Club radio station, 9M6AAC, between February 10-22nd. Their personal callsigns will be 9M6IPT and 9M6AQT, respectively. This time frame covers the ARRL DX CW Contest. The duo will not know whether they will be blessed with a special contest callsign or not, but they will announce the callsign to be used before the contest. Also, since they have missed out on Spratley (9M0) for this trip, they are hoping that they may be able to get over to Brunei (V8) for two or three days maybe for contest operations from there instead of Hillview Gardens. QSL route/s are to be announced in due course. (The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.)

A5, BHUTAN. The whole Johnson family, Glenn/A52GJ, wife Vivien/A52VJ, son Mark/A52MJ, son Paul A52PJ and daughter Melissa/A52YL, was heard active this past week. Glen was heard active on 80/40/30/20 meters, mostly CW, but some SSB on 20 meters. Mark was active on 80/20/10 meters mostly SSB, but with some 80 meters CW. Paul was heard mainly on 20/10 meters SSB. Vivien and Melissa were active on 20 meters SSB.

A52A VIDEO IS HERE! James, 9V1YC, informs OPDX that the A52A Bhutan video is now ready! If you've ever wondered what Bhutan is really like from the inside, or how it feels to be behind an opening day pileup at the #2 most-wanted, then you might be interested in this one. By request, Jim threw in lots more SSB pileups this time, but also included plenty of scenery, people, music, and background info on this absolutely beautiful country. For those that enjoyed the videos from FO0AAA and ZL9CI, this latest addition should be a treat. (And you just might hear *your* QSO in there, too). The video is 60 minutes. Available on VHS (PAL or NTSC). All digitally filmed and edited, and mastered to Digital Betacam. For more information, go to the Web page at:
http://home.pacific.net.sg/~jamesb

AX, AUSTRALIA (Attention Prefix Hunters!). Tony, VK3TZ, reports that for those of you who missed the "AX" prefix during the Olympics games, it is customary for the Australia Communications Authority (ACA) to permit all Aussie amateurs to use the "AX" prefix on Australia Day - January 26th each year. If you chase WPX prefixes and need this one, there should be quite a few VKs using the AX prefix on that date. Tony adds, "When I can confirm details I will send the exact times, sometimes its the whole weekend, sometimes (last few years) just the 26th only."

CE0X, SAN AMBROSIO ISLAND (Update). Marco, CE6TBN, Team Leader for the CE0XT DXpedition to San Ambrosio Island during the second week in February, reports that the team will use the following suggested frequencies:
CW - 1827.5, 3504/3524, 7004/7024, 10104, 14024, 18074, 21024, 24894, 28004 and 50105 kHz
SSB - 3795, 7075, 14195, 18145, 21295, 24945, 28495 and 50120 kHz
RTTY - 7030, 14080, 18055, 21080, 24920 and 28080 kHz

FM - 29400 kHz
The 6 Meters Beacon will be on 50.105 MHz. It will repeat every
30-45 seconds. The team states that "they will probably listen on the
same frequency, using the squelch of the rig to cut the noise down. When
a signal break the squelch, that is a sign to get someone onto the 6
meter rig and begin making QSOs. We probably will run the beacon at 50
watts so that the rig doesn't get hot." A new team member was added.
Mike Mraz, N6MZ, will replace Mario, CE6NE. Mike has been active from
many locations, such as: 9M6OO (Spratly group) 1999, 9M6AAC 1999, BV0DX
1999, KH9/N6MZ 1998, ZK1XXP 1997, (Expedition of the Year at Dayton 1998)
VK0IR Heard Island 1997, (Expedition of the Year at Dayton 1997) TO0R
(FR5) 1997, FT5XL 1997, VR2WO 1997 and CQWW/CW SV5/N6MZ 1993. The following
pilot stations have been chosen for the CE0XT operation:
North America - Dr. Bill, K6GNX, - E-mail: bavery@telemetry.com
Japan - Yosi, JA3AAW - E-mail: ja3aaw@sannet.ne.jp
Europe - Still has not been chosen.
DXpedition Web page for updates and info is: http://www.qsl.net/ce0xt

CQ MAGAZINE INTRODUCES "The CQ Millennium Award".....
CQ magazine is introducing a special operating award for the year 2001
to mark the start of the new millennium. "The CQ Millennium Award"
recognizes anyone who meets the minimum requirements for any of CQ's four
permanent operating awards, minus the QSL cards, during calendar year 2001.
Hams and short wave listeners may qualify for "The CQ Millennium Award"
in one of the following four ways during the calendar year 2001 (0000z,
January 1, 2001 to 2359z, December 31, 2001):
1) Work stations in 500 U.S. counties -- The basic level for the
USA-CA Award
2) Work 100 countries -- The basic criterion for the CQ DX Award
3) Work one station in each of the 40 CQ zones -- The Worked All
Zones basic qualification.
4) Work either 400 prefixes mixed-mode or 300 prefixes single mode
(CW or SSB only), as required for the CQ WPX Award.
Applications should include log extracts showing the information required
by the standard award rules, in the format required by the standard award
rules, plus a 6 USD processing fee (12 USD outside the US).
ADDED NOTE: There will be special recognition for those who qualify on
the basis of more than one award program's requirements. Full details are
published on page 15 in the January, 2001, issue of CQ magazine. For rules
and forms go to the CQ website: http://www.cq-amateur-radio.com/

D6, COMOROS. Josep/EA3BT and Nuria/EA3WL became active from here on
Saturday, around 1530z, as D68BT and D68WL. However, information from
their pilot station state that upon the duo's arrival, it was raining
cats and dogs and they only could build the 3 element beam for 10-15-20
meters and had only 1 station active running only 100 watts. By the time
you read this, they hope to build the 40-80 and 6 meters antennas and
have the second station active. Their suggested frequencies are:

CW - 10103 and 14025 kHz
RTTY - 14083 and 21083 kHz

SSB - 3795, 7052, 14195, 18145, 21195/21295, 24945, 28495 and 50110 kHz

In order to receive feedback from the DX community, the following pilot stations have been selected. You can get in touch with each pilot of your area/zone:
Europe and Central/South America:
Pere Galimany, EA3AJI - E-mail address: pilot_d68@ea3aji.com
North America:
Dr. Bill Avery, K6GNX - E-mail address: k6gnx@telemetry.com
Japan, Asia & Oceania:
Yuki Deguchi, JI6KVR - E-mail address: ji6kvr@orange.ocn.ne.jp
Periodically information will be sent through the main DX reflectors. Remember that the logs will be posted daily, along with additional information and pictures posted by Xavier, EA3BHK, at the following web page: http://www.qsl.net/ea3bt

D68C, COMOROS DXPEDITION. Don, G3XTT, from the "Five Star DXers Association", has sent out another huge press release (Bulletin #4) stating the forthcoming D68C DXpedition to the Comoros (active from about 8th to 28th February) is less than four weeks to go! This press release brings you the latest news, including some information about the technical innovations they will be using on the trip, and news of a series of awards for working D68C. So, their suggested operating frequencies:
CW - 1822, 3502, 7002, 10102, 14022, 18072, 21022, 24892, 28022, 50102
SSB - 1842, 3795, 7052, 14195, 18145, 21295, 24295, 28495, 50145
RTTY - 3570, 7035, 14085, 21085, 28075
PSK31 - 14071, 21071, 28071 kHz
Also - 28MHz FM: 29580; 6m beacon 50.090. Also remember that they will be working the main satellites. The D68C Web Page continues to be updated with the latest news. To remind everyone, the URL is:
http://www.dxbands.com/comoros
The complete press release will be sent to all OPDX InterNet Subscribers as an addtional bulletin.

DX HOLIDAY WEB SITE (The Ultimate Dxpediton Resource!). The following Web site offers a starting point for people looking for a QTH for a DXpedition, Contest Expedition, or IOTA Expedition!. The site lists Rena-a-QTH, Ham Friendly Villas, Radio Clubs, etc. There is information on places to operate from over 100 countries, with additional DXpedition resource information covering: Picking your DX destination, licensing, travel documentation and money matters, health, emergency , weather issues, announcing your DXpedition, equipment packing tips and many other topics. Check it out at: http://pages.prodigy.net/k2kw/qthlist/

EZ21, TURKMENISTAN (Attention Prefix Hunters!). Start looking for amateurs in this country to use the special prefix EZ21 to commemorate the new Millennium. EZ21BO was spotted on 10112 kHz around 2100z and EZ21A around 14242 and 14266 kHz after 0230z.

IOTA NEWS.....
AS-117. Look for JA2HMD/2, JA2JTN/2, 7N2JZT/2 and JQ1SUO/2 from Hatushima Island between February 10th and 12th. Activity

will be 160-10 meters CW/SSB. QSL via home call or CBA.

EU-180. Look for club station UU4JXM to be active from Kosa Tuzla Island during the CQWW 160 Meter CW Contest as UU7J/P. The team leader of the expedition, Andy, UU6JM, will arrive from Kerch on January 23rd and will be active as UU4JXM/P. Activity will be mostly during the evening time on 160-20 meters CW and SSB. Andy has indicated that weather conditions don't permit operations on 15-10 meters. Antennas will be a Delta Loop, GP and Beverages. Operators UU0JM, UU4JMG, UU8JK and maybe UU2JQ will join Andy/UU6JM on January 26th. The QSL Manager will be UU8JK: Alex Kotovskij, p.o.box 57, 98312 Kerch, Ukraine. Please note: UU6JF is not the QSL Manager for UU4JXM/UU7J.

J2, DJIBOUTI. "The 59(9) DX Report" reports to look for David, F5THR (ex-6W1AE, TL8CD), to be active from here as J28EX until January 2002. Activity will be on 160-10 meters. He is going to have a 4 element beam up for 6 meters. QSL via FB1BON: Patrick Brochet, P.O. Box 522, 85305 Challans CX, France.

KH9, WAKE ISLAND (also V7). Look for Bruce, AC4G, to be active as AC4G/KH9 from here February 9-27th. Activity will be on all bands with an attempt on 6 meters if he can get an antenna up in time. Reportedly, Bruce already has antennas on the island and will be using a Yaesu FT-847 for SSB and CW. He will be working on the island and will operate only during his spare time. He has plans to participate in the ARRL CW DX Contest and the CQ WW SSB 160 Contest. QSL via AC4G: Bruce Smith, 1056 Old Railroad Bed Road, Taft, TN 38488.

KH0, MARIANA ISLANDS. Look for JQ1NGT and JI1EFP to be active as KH0/JI1EFP and KH0/JQ1NGT from Saipan between February 16-19th. Activity will be on 160-6 meters on CW and SSB. The two operators plan to participate in the ARRL CW DX Contest either as Single Op or as a Multi-Single entry. QSL via JQ1NGT: Kenji Sekine, 3-4-7 Honcyo, Fukiage,369-0115 JAPAN.

OH0, ALAND ISLANDS. The Aland Islands contest station OH0Z will be active on both modes in the ARRL DX Contest as a single-op/all bands entry. Pasi, OH1MM, will operate the station on CW and Ari, OH1EH, on SSB. QSLs via OH1EH: Ari Korhonen, Kreetalank. 9 A 1, FIN29200 Harjavalta, Finland. For more info on the OH0Z station, check the Web page: http://www.qsl.net/oh0z

QSL INFO AND NEWS.....
Steve, KU9C, reports that QSL cards for the 4W/K7BV and 4W/N6FF East Timor operation are expected to be in his hands by February 1st, and will begin hitting the mail box immediately. Steve states, "I expect to have most of them out within a few weeks, and all received by the end of February should be in the mail by March 1st. If you didn't apply enough postage due to the recent US postage rate change, do not worry....I will put the required stamps on the envelope to make sure they don't get held up in the mail process. The card is a full color

one...and I hope you enjoy it.....It's a beautiful picture of the QTH at sunset......so you can see what Dick/Dennis had to look at before working you on the low bands that evening!"

A61AJ QSLs. Bernie, W3UR, DX Editor and QSL Manager, reports the following: "Recently I have had many requests as to what the situation is on the A61AJ QSL cards. I am currently waiting for Ali to order new photo QSL cards. All direct (3,098) and bureau (13, 109) requests have been entered into the computer logs. Once Ali orders the QSLs and I receive them from the printer they will be quickly sent out. Please be patient during this transition time. By the way I am unable to except e-qsls or e-qsl bureau requests. For those who have not done so already please QSL to: A61AJ, c/o Bernie McClenny, W3UR, 3025 Hobbs Road, Glenwood, MD 21738 USA. Please do not send second requests as this just slows the whole process down."

Bernd, DL2DXA, reports that he has received more then 400 direct requests for both DL2DXA/HI9 and DL2DXA/CT3. He states that he has received the QSL cards from the printer, and you should be seeing cards in the mail soon.

Pepe, EA5KB, informs OPDX that he is the QSL Manager for the following stations: TG9AAK, TG9AMD, CO8EJ, CO2FN, CO3JR and CM6QN. He has all the logs. Please QSL to him via the Bureau of Spain or direct to his CBA.

QSLs for YJ0AYL/AZG and A35YL/ZG. Babs, DL7AFS, reports to expect your direct QSLs within the next 2 weeks. More then 2500 oversea and 1500 European requests were sent and include 1 of 4 full colored QSLs. QSL cards will be answered as they come in now. Babs mentions that they have kept nearly 250 requests in a cardboard box that were without postage, or had only 1 USD return postage for oversea mail. Babs states, "Remember please, the oversea postage is 1.60 USD or 3DM or an IRC. We will be waiting 3 months or so to send these QSL cards via bureau. European postage is 1.10 DM or 1 IRC." ADDED NOTE: Babs, DL7AFS, is still QSL Manager for the following past operations: C50YL, C53HP, S79YL, S79ZG, S79FAG, EA6/DL7AFS and EA6/DJ7ZG.

R1, ANTARCTICA. Look for Nick, UA3YH, to be active as R1ANM from the Amundsen-Scott Base starting on/around January 15th through February 15th. R1ANW, Mirny: the operator after Wally's departure will be Slava Vasilkov. Slava worked as RX1OX/FJL from Franz-Joseph-Land before. He is a good CW operator. QSL should be via DL6YET.

SPECIAL EVENT. Bob "Whitey" Doherty, K1VV, President of the Marconi Radio Club, W1AA, informs OPDX that the Marconi Radio Club will celebrate the 98th Anniversary of Guglielmo Marconi's First Transatlantic Radio Trans-mission between Cape Cod Massachusetts and England. The Marconi Radio Club will operate from Cape Cod using the call sign W1AA/CC. "CC" was Marconi's first call sign for his transatlantic Cape Cod Station long before the existence of the FCC and issuing of call signs. The Marconi Radio Club will operate two High Frequency amateur radio stations on CW and Phone

and one on 2 meter FM. Hours of planned operation are from 1200z through 2200z, January 18, 2001 on the 20 through 10 meter bands. DX stations QSL via the W1 Bureau and W/K stations to the W1AA Callbook address with an S.A.S.E. Operation will be from a former Coast Guard Life Boat Station close to the original 1903 Marconi Transatlantic Radio Station site within the National Sea Shore Park, as almost all of the original 1903 Marconi station site has been carried away by beach erosion. Look at the W1AA web page for photos of the site and additional information at:
http://personal.tmlp.com/k1vv/w1aa/event2001.html

SPECIAL EVENT. Look for special event station "W3I" to be active from Mount Airy, MD (30 miles North of Washington, DC), on January 20, 2001 (1400-2400z). Activity is to celebrate the 54th U.S. Presidential Inauguration. Suggested frequencies are [+/-]: 7.240, 14.240, 21.320, 28.420, 50.140 and 144.140 MHz. For QSL card, send your QSL and SASE to: MADRAS, P.O. Box 2468, Wheaton, MD 20902 or via bureau to W3LEO.

SPECIAL EVENT. Be looking for the "Challenger Middle School ARC", KI6YG, in San Diego, CA, to be active January 28th, from 1430-2400z. This activity is to commemorating the 15th anniversary of the Space Shuttle Challenger Tragedy. Suggested frequencies are: 14.250, 21.350, 28.350, 146.52 MHz. QSL to: Challenger Middle School ARC, 10810 Parkdale Ave, San Diego, CA, 92126.

V7, MARSHALL ISLAND. Bruce, AC4G, will be active from Kwajalein Island as V73CW before going to Wake Island (see KH9 above). This will be during the last week of January. Activity should be on all bands. QSL via AC4G: Bruce Smith, 1056 Old Railroad Bed Road, Taft, TN 38488.

VU, INDIA. According to Jose, VU2JOS, the VU stations can operate on 30 meters until 1830z January 31, 2001. OPDX found the following stations active on 30 meters:
VU2BGS - 10105 kHz at 1245z and after 0200z.
VU2JOS - between 10105-10110 kHz as early as 2200z and as late as 0200z.
VU2TS - 10104 kHz at 1230z.

YV, VENEZUELA. Rick, W0IS, will be going on a mini-DXpedition here at the end of the month. Look for activity from Caracas beginning late Friday evening, January 26th. He will travel on Saturday for one day and expects to be active for one night from Los Roques (SA-035). Look for him to be on the air Sunday, January 28th, probably around 0400-1000z. Activity will probably be somewhere near 7040 CW or 7075 SSB. Feel free to call him on CW even if he is on SSB, and he states that he will be glad to switch over to CW to give you a report. He will just be using a dipole. He believes his callsign will be YV5/W0IS, although he is not positive on the number. Please QSL to his home address or via the W0 bureau.

I assume you mean "military" (milary??). I, for one, will sleep better
knowing there IS a military guy in that position. Likely less giving
away of vital defense secrets to China on the Republicans' watch.

1) Attempting to eat at a fast-food restaurant. You are likely to find them extremely short-staffed, since most black employees will take the day off. They will do this regardless of whether or not the employer has approved their absence. If a business owner should DARE object, he would immediately be branded as a "racist", "evil white slave driver", or worse.

2) Attempting to eat at a sit-down restaurant. While some black employees will not show up for work, others will. The ones who are working that day will spend the day harboring anger for whites. This hostility is likely to lead to actions judged undesirable to customers...like spitting in your food, for example. The great civil rights leader Jesse Jackson has admitted doing this and has encouraged his minions to follow his example. Just to get back at Whitey, of course.

3) Attempting to drive anywhere in the vicinity of a MLK Day parade. Your passage is likely to be blocked by the "festivities." If you dare object to the inconvenience, the black hordes are likely to turn on you with acts of violence. Contact Reginald Denny in Los Angeles for further clarification.

4) Running out of the following items, if you happen to own or operate a convenience store: 40-ounce bottles of malt liquor, Newport cigarettes, Magnum condoms, and deli take-out packages of fried chicken.

Voting Problems Targeted in Florida

+ HA!.
+ According to the Dayton Daily News, Jan 14, 2001,
+ "Recountwould have hurt Gore."
+ "Newspaper says Bush gained votes in Miami-Dade"
+ By Clay Lambert and Bill Douthat, Cox News Service....

+Miami -- George W Bush would have gaine six more voyes if
all the dimples and hanging chads on 10,600 previously "uncounted"
ballots in Miami-Dade County had been included in the totals,
according to a review by The Palm Beach Post....
+ That recount would have been a hard blow to Al Gore's hopes
of claiming the presidency in a recount......
+ If everything were counted -- from the faintest dimple to chads
barely hanging on ballots -- The Post Review showed 251 additional
votes for GW Bush and 245 more for Gore....

You will excuse me, your messages just got cross posted recently. I guess you were only cross posting to 10 or so conferences before.

Your basic assertions are incorrect, and to limit the amount of time I spend on nonsense, I was hoping you had a recent example that I may comment on. The only ones I noted seem to rather vague references. Let's see right wing:

Oklahoma bomber - nah offset by the unibomber

Eric Rudolph bombing abortion clinics - Nah offset by the many unborn saved, and the left continues extermination of the unborn that dare inconvenience a woman who has neither morals or responsibility. But then again she will be qualified for a genital herpes commercial on TV.

If we were to stick only with the abortion issue, the left makes Ghengis Kahn, Hitler,and several other luminaries look like school yard bullies. The left have killed more people in the name of freedom of choice that all the right wingers combined.

Your turn Sir!

The only election 'problem' in Florida is the problem of
politicians not being able to stand on their 'hind' legs
and following the 'rules' (law). All the so called problems
were contrived 'problems'. The cure for ignorance is education,
if you don't understand 'how' to vote, ASK. Unfortunately,
there's no 'cure' for stupid, but they sure like to blame it
on someone else...
'Doc

No...you are missing the point. The discussion was alleged not counted
votes in Florida...NOT the electorial college.

All I can recommend for you is to either change the constitution or get
more reprobates to vote Democrat next time. Your outa here, as the
umpire said to the runner.

Suzy was heard last night on the Liberty Net telling everyone that she is a Computer Science Engineer AND a Biomedical Engineer. Ahhhh, the fantasy continues. Poor Suzy, a check of the minimal educational requirments for the aforementioned professions shows a minimal education requirement of graduate degrees at the Masters and Ph.D. levels. As was pointed out to Suzy once before, these type of credentials are generally obtained at Engineering Universities and not at Sally Struthers type of 4th rate tech. schools. Spare me!

These laws are most prevalent in the South.

Ever wonder why?

Ever look at when the first of these laws was passed?

When the majority were passed?

You might find the information instructive.

While I am sorry that some kids sure look like they are condemed to becoem criminals because no one cares. Life is not fair.
Never has been and never will be. I still think we should give them fari trilas, dis allow any excussed for upbringing and execute those that can not cut it. Period. This "kid" will not be reformed. He has learned to not leave witnesses around. We should exterminate him like the rabid animal he has become. My lsit of "your out of here" crimes would include(but not be limited to)
Rape, murder, attempted murder, armed or strong arm robbery, any form of sexual abuse of a minor (or by anyone in a clear positon of authority..to inculde any supersivors and supervised, doctor with patient, professor with student, minister(et al)with church goer et), theft of an amount over say $1000. OR multiple thefts adding up to $1000 in any one calender year. Crooked cops, laywers. juges, DAs. Anyone who takes a bribe. Blackmail or extortion (I would like to see killing a black mailer/extrotionist given legal protection as self defense) The 2 or 3rd drunk driving offense. (you can not cure drunks and each time is letting them fire a gun into ta crowded public street) Treat any crime commited under the infulence of any sybstance as willfuyll and with malice. Stock fruad and bank fraud would be automatic death sentences. No parole. No country club jails. No college courses for inmates. Oh, and for the few prisons and prisoners that we would need under such a system, all riots will be quelled with masive fire power. No talk.
Just storm and exterminate. And kidnapping. Any kidnapping for profit is an

automatic trip to the scum zapper, and for those cases where one parent "steals" a kid, maybe then also. I know of a few cases where the kidnaping parent can make a good claim that the legal system had failed. But, if we investigated all charges of child abuse, and everyone knew the penelty for it was to be zapped, maybe the sickos would not want the kids to torture. That is the biggest problem I have. Maybe, in all divorces, the kids are removed from both parents custody and adopted out.

Well, it IS tough when you have to uphold the standards of radio and the
entire civilized world against your doc, the Illuminati, black
helicopters, blue helmets, and codeless Techs. But getting the Extra does
free you from radios on a belt and hard hats with rubber duckies. But if
you aren't running obsolete trash, how can you hold up your head at
QCWA??? :-))

Absolutely it would be a good radio to use. Those things are FUN. I
really doubt if you'll need any special filtering. Enjoy!!!

I think you're dead wrong with this post. MLK day is not Black vs.
White. It's a day to combat racism of all kinds. With a post like
this, I think we really, really need this day.

Roger definitely does attract many too the hobby. It is too bad that most of them are the white trash losers who sit at home on their fat asses while their wife works in a productive job. But then again, they have to emulate Roger and be a fat assed loser that sits at home with mommy

Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,alt.ham-radio.mods

Well it looks like its that exciting time when all the manufacturers
are coming up with new toys!
If mimicry is the best form of flattery then Icom can't pay any more
compliments to Yaesu then it has with this new little toy.
Lets hear what you think of it. 6m,2m and 70 cm, 0.495-1319.995MHz RX.
Lithium Ion battery and it's small.!!
Even looks like a VX-5.
I've just got to get one!! and see what it compares like. Wish I could
read
Japanese
http://www.icom.co.jp/index.html

Come over and join the new e-group at
http://www.egroups.com/group/IC-T82R

It would be really good if people could get some people from Japan onto
the mailing list so that we can get more first hand info, every one
please help!
I'll try and get more photos and translate the spec sheet so stay tuned
to the files section.
See you there cheers
Eric.

When I clicked that link, it took me to some incidents from November 1999--over a year old.

There's much more recent stuff available at other sites. But thanks for trying.....

Federal code is not "the law of the land". In fact, little of
it is law at all. These are regulations that fall within the purview
of contract law such as effect FFLs and not non-participating
citizens. And these agents are not police. No federal agent has
carte blanche license to approach any state citizen. The BATF was
wrong at WACO and Ruby Ridge and a dozen other "raids" just in the
year 2000 alone.

You may like the idea of a pseudo-militaristic "snapto" authoritarian
state but I reckon there to be many out here that don't.

> If you don't like the law, work to get it changed. But you as a citizen don't
> have the right to decide laws are invalid because they don't agree with your
> "book". If that were the case, anybody could nullify any law by saying "I don't
> consider x, y or z to be true or valid".

Well, I think you're exactly right, in speaking for yourself. You
"work to get it changed" and make sure you get it right because
as conditions worsen, those that support continued harassment,
vilification and attacks on the citizenry are going to be the ones
held to blame.

Again, you are making bery unfounded statements. Please prove that I get
food stamps, get welfare, and live in a HUD apartment. If you cannot/ or
refuse to post the proof using documented sources or refuse to answer, then
the Newsgroup will assume you are making lies.

STRIKE 1

Source record: 95493

>It seems to not have much power on 440 out of
>band!

I ran an Alinco DJ-580 into a dummy load through a UHF power meter. There was very little output on FRS/GMRS frequencies. I then inserted a well-respected VHF/UHF amplifier in the line. We managed to get the power up to almost 4 watts.

There is not much advantage is raising the power. The real advantage comes from using an external antenna, especially in a vehicle. A pair of the new Radio Shack Mobiles with the antennas on the roof will talk twice as far as two handhelds inside the vehicle.

As others point out, amateur equipment is not legal for FRS. You (Kevin) are a regular in the CB newsgroup. If you think FRS is another 11-meter band, you are going to be disappointed. If you are expecting clear, reliable short-range communictions, you will be satisfied with FRS.

Yrac

:
: If by "JW" you mean Jehovah's Witness, you've got the wrong black ex-star.

Michael Jackson the singer, is a JW. I wrote his name
when I meant Michael Jordon the basketball player.
Jordon is a skilled, highly disciplined individual who
would have made a great general.
```

Hope so. Wonder if he was listening earlier also?

At around 9:15 AM Central on 14.313 on 14 Jan 2001
two stations from a maritime "net" on 14.300 helped a maritime ham station phone
patch to an individual who openly announced on the patch
that he was not a licenced operator but would meet up with the maritime
ham regardless, on the frequency of 12.350 mHz USB.
Listened on 12.350 after their 14.313 ham "phone patch" was concluded.
They used the callsigns "sasperella" and "shooting star".
Whole activity was questionable from beginning to end.
Nice to see that 20m ham nets facilitate comms on non-ham freqs
by potentially unauthorized individuals. Makes the Service look real nice.

Did you hear this too R.H. ?

: > land. Federal law says they are police and I know that a specific provision of
: > the Texas Code also recognizes federal agents as LEOs as well. I'm sure the
: > other states have similar provisions.
:
: Federal code is not "the law of the land". In fact, little of
: it is law at all. These are regulations that fall within the purview
: of contract law such as effect FFLs and not non-participating
: citizens. And these agents are not police. No federal agent has
: carte blanche license to approach any state citizen. The BATF was
: wrong at WACO and Ruby Ridge and a dozen other "raids" just in the
: year 2000 alone.

It is agreed that congress is not doing its job when it
gives over authority to make "law" to the agencies.
And we do not need 44 law enforcement agencies at
the federal level. Three would be enough (US Marshals
merged with the FBI as its CID, the Secret Service for
financial and tax laws, and the US military for borders out).

But then we only need five cabinet positions as well.

: You may like the idea of a pseudo-militaristic "snapto" authoritarian
: state but I reckon there to be many out here that don't.

That is far worst at the local level. Around here to be a cop you
have to have served as a Marine and have been a high school jock
(jocks enforce the "code" in high school).

: > If you don't like the law, work to get it changed. But you as a citizen don't
: > have the right to decide laws are invalid because they don't agree with your
: > "book". If that were the case, anybody could nullify any law by saying "I don't

: > consider x, y or z to be true or valid".
:
: Well, I think you're exactly right, in speaking for yourself. You
: "work to get it changed" and make sure you get it right because
: as conditions worsen, those that support continued harassment,
: vilification and attacks on the citizenry are going to be the ones
: held to blame.

What are you going to do as the Left used terrorism to destablize
the Bush administration?

Cops, including Sheriff's and city Marshals were originally know as peace officers ... and their obligation to the citizens was keeping the city/county and in some States, the State in a state of peace. Law enforcement was secondary to that principle.

If I had to call 911, I certainly hope that it is a cop that shows up, not some damned Fed enforcer.

It is not my duty to enforce unjust laws. I am not going to report my neighbor for smoking pot in his back yard because I feel that he has a right to feel secure in his home. On the other hand, if he is scaring the hell out of his wife and family with a shotgun, I want a cop who will take the damn gun from him and not worry about whether my neighbors right to feel secure in his home takes precedent over his wife right to not be killed.

A peace officer is well equipped to do just that. I reiterate. Feds aren't trained to keep the peace ... just enforce the law.

Ergo et sum. Feds aren't cops.

Yep ... and the FCC is a law enforcer ... and are not cops.
The FBI is a Law Enforcement bureaucracy, and perhaps an Federal
investigative agency. But they aren't cops. They aren't driving down my
alley at night, I don't call them when I am going on vacation, and in spite
of some Congress critters desire to Federalize domestic violence (may God
forbid!), a Federal agent is not going to be the one stopping the old man
from beating the shit out of her ... it is going to be a cop.

The Federal enforcement agents are bureaucrats ... not police.

Let's all remember what Roger really is. He is a low class piece of white trash. He has the morals and courtesy of a alley cat. He lacks common courtesy in his dealings with fellow amateurs. He is nothing more than a blathering low life who makes false accusations. Mr. Wideman needs to be further investigated from Mr. Riley Hollingsworth of the Federal Communications Commission. Mr. Wideman has been sent a retest letter once and has been reprimanded many times for his on air behavior. Mr. Wideman has a foul mouth and a penchant for dirty language. He is well known for his jamming activities on 14313 and the 20 meter band. This fact was stated in a letter by Mr. Hollingsworth sent to Mr. Wideman. It can be found by visiting the Rain Report at http://www.rainreport.com. Below in the FCC letters category in green on the left side of the page you may find links to the letters sent by Special Counsel for Amateur Radio Enforcement Mr. Riley Hollingsworth, K4ZDH. You may contact Mr. Hollingsworth of the FCC at rholling@fcc.gov. You may contact Mr. Hollingsworth regarding Widemans Amateur Radio Activities. Make a difference and improve amateur radio. Get rid of the scumbags who spew their filth across the bands. Mr. Widemans name is on the list for his various nefarious activities on Amateur Radio. He also likes to make accusations referring to others as being child molestors and the like. Mr Wideman makes these accusations and slanderous comments consistently and threatens others. Really what Mr. Wideman needs to do is to get a job and do something productive rather than being white trash. It is obvious that the people of Glendale WV deserve better citizens than that piece of low life foul mouthed garbage.

As they ought to. Seems that one Utah Sheriff has successfully prohibited the Feds from serving warrants in his county, maintaining that as is his pervue. I hope that he continues to enforce that and that the idea catches on with other sheriff departments.

Our primary effort over the next two years in South Carolina will be to defeat Rep. Jim Clyburn in 2002. We feel his membership in the Congressional Black Caucus shows his intent to place the issues of African-Americans over those of the entire racial and political spectrum of voters in his district, and is therefore not consistent with the views and expectations of the people in this state.

We intend to inform the residents of South Carolina about the racist views of some members of the Congressional Black Caucus, which he fully supports with his continuing membership in that organization.

We also intend to make his voting record well know to the voters (something that is not well known now). We feel his support for various legislation has negatively affected even some of the Democrats who voted for him in past elections.

In addition to this, we are gearing up for the largest voter registration drive seen in this state in recent memory. Our intent is the double the number of registered Republican voters by the 2002 election. Moreover, our goal is educated voters who will show up at the polls on election day and vote with zeal.

We also intend to take a lesson from black leaders, and are in the process right now of organizing transportation to the voting booths on election day.

Did you hear the U.S. Marshall Service renamed their building in
Washington after the Marshall who shot Randy Weaver's dog and son? How insulting.

If I understand what you've written, the person on the telephone
said he was not a ham. That's perfectly acceptable.

>Listened on 12.350 after their 14.313 ham "phone patch" was concluded.
>They used the callsigns "sasperella" and "shooting star".

Those would probably be the names of their boats. Boat names in
lieu of callsigns are permitted on the VHF marine channels --
perhaps the FCC now permits that also on the HF marine frequencies
now.

>Whole activity was questionable from beginning to end.
>Nice to see that 20m ham nets facilitate comms on non-ham freqs

Coordinating two boats to meet up on a marine band frequency
is perfectly acceptable.

Are you unable to recognize sarcasm? Or are you denying that
prison inmates ever beat up or rape other inmates? Inquiring minds
want to know.

Regardless of whether you advocate their death or not, my point is, that what you personally "consider" isn't relevant. The law as it stands is determinative. By law (both federal and state), federal agents *are* LEOs.

Whether this is true or not, all 50 states have "ratified" the federal provisions in their state codes, recognizing federal agents as LEOs. Unless you don't consider state laws to be real laws either...

> are conforming to the norms of society.

I realise that we may, at least partially, agree with each other, but I wanted to add that it is not prison's job to reform or redeem people. Prison is a punishment for the crimes they committed. It is up to each prisoner to reform or redeem himself (that responsibility does not rest with the state or the people).

In the end, I think we need total prison sentence reform. Instead of the present fixed prison times (x number of years with mandatory release), we instead need a minimum sentence to serve as punishment, with a flexible date to be released based on the prisoner's prison record and the prisoner's own efforts to reform himself.

All prisoners should be required to obtain a high school GED, through self-study in their cell prior to release. And all should be required to take several cooorespondence courses, styled after the very low-cost military cooorespondence courses (with inexpensively produced booklets and self exams).

In addition, the release date will vary based on the prisoner's behavior. Bad behavior in prison (fights, rule violations, rudeness to guards, and so forth) will dramatically increase the date of release. And good behavior will reduce the date of release, though at a rate less than bad behavior will increase the date (this reenforces the notion that good behavior is the norm, not something to be overly rewarded for).

As the prisoner's minimum release date approaches, the prisoner appears before a panel of 12 people from the community (not as easy to fool a larger number of people) who will review the prisoner's record, appearance, attitude, and efforts to improve himself. In addition, each prisoner must had a detailed, realistic, plan for what he intends to do after release (job, living arrangements, etc).

If the prisoner needs further reform, or fails to have a plan for what to do following release, they will make recommendations about how the prisoner can do that and set a new date for the prisoner to appear

again. This process can continue indefinately until the release board feels the prisoner has reformed. Or, if they feel the prisoner has reformed, they can recommend release at any time after the minimum sentence.

Each prisoner should be required, as a condition of their release, to pay all damages relating to their crime (medical expenses, monetary losses, property losses, and so forth). Probation should remain in place until these damages are paid, and if damages are not paid within a reasonable, fixed, time, the person should be returned to prison.

Furthermore, prison life must be made much tougher. There should be little free time to associate with other prisoners, little contact with those outside prison, and little recreation opportunities in prison. Exercise should be aerobic, not strength building. Mail should be restricted to no more than one or two pieces per week. And visits from family should be limited to once per month instead of the current once per week. In other words, prison should be punishment, not a vacation.

And finally, prison guards must be given great latitude to deal with prisoners, including the use of deadly force if threatened in any manner (even if threatened in a non-lethal manner). If prisoners will not respect the guards, then they should at least fear them.

You have got to be kidding, right? Either that or you're a fool.
Racism against whites will not even be mentioned today (MLK day).
Instead, we'll have endless pictures of white police officers beating
blacks in Alabama (events from almost 50 years ago) and endless talk
shows with blacks talking about how horrible whites are.

In reality, today is just another day to trash whites with
hate-filled, politically correct, rhetoric (a prelude to the white
trashing orgy of February's Black History Month).

I actually *didn't* ask for examples of Federal cops, I merely gave one. I also haven't once used the term LEO 'til now. Hell, even BLM rangers write speeding tickets, investigate crimes and have a SWAT team. I have no quarrel with Federal Police policing their jurisdictions. I do quarrel with the Feds owning any land or property outside of DC, but that is a another matter from this one.

My point is that Feds are not policemen. They are government agents. Even health and building inspectors in my city are armed, have police "power", enforce the law and since they are chartered and sworn officers, they are considered LEO's and present themselves at conventions as such. They still aren't the police and neither are the Feds. I have never heard the FBI or ATF refer to themselves as police. They are agents and are in no way equal to a sheriff, deputy, policeman, patrolman, trooper or Texas Ranger. They are, OTH, bureaucrats.

And it is my belief that they shouldn't have been on the ground at Waco, that it was an illegal raid and that they got away with murder. I think that they DID fire first and I think that they got rid of the evidence. They didn't have a warrant in hand and had no intention of delivering one, and used a dynamic entry as opposed to a no-knock since the judge himself wouldn't issue one. And innocent adults and children died because of that arrogance. It was an illegal raid from start to finish. And they weren't, aren't and never will be police.

First off Dwight, there is no "One" everytime you start a response without a "second" in the same response.

Secondly, like I said, quit reading too far into my responses. You become disillusioned when you do so by responses like "I just don't buy it..." I have no attitude trying to come into the Amateur Hobby. Its the attitudes against me and my fellow who were trying to test. Maybe you've missed the part when I posted... "when we motored on down to the town library with mobile "CB" antennas mounted". The Ham VEC and his counterparts there gave us a hard time before the test trying to tell us what is legal and what is not. And all we were sporting were 102" whips everywhere (accept one dude who had a coil).

Anyway, I hope I didn't lose you in my postings. Its not my attitude. I "WANTED" to test. It was the attitudes of the VEC's here and the Hams on the NG Forums that discouraged me. Don't try to cover up the "holier than thou" attitude of your fellow Hams and yourself. I have some Hams here in the NG itself emailing me to continue towards my ticket... just to piss you off! I don't care, I have my own reasons. But to blatantly come out with such hositility? Eff you! Eat shit and bark at the moon!!!

Well, gee... considering that the word "cop" is a slang term that won't be found in ANY code, including the state codes that give your local PD and sheriff's department their authority, that distinction is meaningless. Local beat "cops" and FBI special agents are both considered LEOs.

But since you want examples of federal "cops" other than the Capitol Police, how about the Park Police, the Uniformed Division of the Secret Service, the uniformed officers of the Federal Protective Service, the Park Rangers of the National Park Service... and I could go on.

All of these agencies enforce and investigate the same type of offenses that local PDs do. Just a few examples.

--The Park Police runs radar for speeders on the Baltimore/Wasington Parkway.

--Park Rangers enforce and investigate the whole gamut of offenses from dmoestic violence to disturbing the peace to murder in the National Parks.

--The Secret Service Uniformed Division handles crowd control around the White House.

Satisfied now?

Well, it sounds like you're just quibbling over semantics, then. Call them what you want but federal agents and police officers are both LEOs and they both enforce laws, albeit a different set of laws. They receive the same training as police and, with limited exception, have the same authority regarding the statutes they enforce. That doesn't change regardless of the label you use to refer to them.

And, when one considers that there were over 5 million undercounted ballots across the country (of which Bush won the vast majority of states and counties), if a true and fair recount of ALL the undervotes was done, you would find that Bush easily won the popular vote as well ...

I wish more people could get this right, it would eliminate all of the debate on the Second Amendment. In the early days, and by definition of those who wrote the Constitution, the militia consisted solely of the private body of citizens who may, at their decision, orgainze to take up arms in time of need. Any army or other body created by, or consisting of, government agents was NOT the militia.

Dwight Stewarts suggestions are very constructive and actually describes the California indeterminate system of incarceration prior to 1977. The sentence for robbery for example was five years to life depending on the circumstances of the crime and the prisoner's readiness for return to free society as determined by the California Adult Authority. There were numerous vocational, psychological, and educational programs. The recidivism rate was about 50%, which was significantly lower than it is now. All of that was shitcanned and California now has a strictly determinate sentencing system which provides no efforts at all on the part of the state to rehabilitate anyone. And, 165,000 plus inmates and growing. Prison guards make well in excess of $50,000 a year, when you consider their benefits, and they have the opportunity for overtime which boosts many salaries to over a hundred thousand. Not to say that this is a bad thing. But, for the amount of money being spent, over 5 billion a year, aren't the taxpayers entitled to expect the state to try to turn inmates out who are a little better prepared to live within generally accepted community standards than they were when they were imprisoned.

That is a pretty stupid point of view. Do you really want a police state in
this country, where the cops can invade your home, drag you away without
charging you with any crinme, murder you, etc ? Cops have guidlines to
follow, and when they choose to ignore those guidlines, and people`s rights,
then they have to take what they get. Up here in Maine, you don`t see them
invading people`s homes without just cause, and a warrant in hand, and them
in uniform, or they are likely to get their ass shot off, and the courts are
not going to do anything about it, just the same as any other sonofabithch
that wants to kick my front door in. What happened to "The people have the
right to be secure in their homes" in YOUR part of the country ?

People like you want to give the cops "carte blanche", anything goes. This
harks to the Republican view, that their property is "more important" than
freedom, people`s rights, or even people`s lives. Putting the almighty
dollar ahead of human life, in my humble opinion, is just plain wrong, and
is the epitomy of greed. But, of course, greed runs deep within the
true-blue Republican. When they get into office in Washington, it begins to
show, big-time, because you see, the tax money belongs to them, and their
rich pals, and anyone that is getting a check for anything from the
government, is "ripping them off".....

They stand up there and claim to love the Vets, while they strive to close the hospitals and bases that are supposed to take care of them, knock them off their benefits, etc,etc,etc, ad nauseum.

They scream about "freedom" while they try to take everyone else`s freedom away. It makes me sick to think that so many Social Security recipients, Vets, Blacks, women,and other hapless unthinking fools are taken in by their hypocrytical jive, and fail to recognize the enemy.

1061. Fight THE RESISTANCE TO OPPOSE GOV GW BUSH

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-15 11:58:12 UTC
From: N9NWO <n9nwo@amsat.org>

For all you folks who voted for GWB, or at least were
in opposition to Clinton, here is the example of the hate
within the liberals. These guys now run campaigns all the
time.

People, the fight is not over. Until liberals are totally defeated,
crushed, we will not win.

Write your senator in support of Ashcroft and the other
nominees. Especially if your state was one of the 30 that
went for GWB.

Libguy9754 <libguy9754@aol.com> wrote ...
: Hi thinking Americans,
: Please send me your email addresses to keep in contact with "The
Resistance."
: We are angry Americans who will not accept George W. Bush as our
President. We
: believe Bush and the Republican-dominated Supreme Court stole the election
for
: Bush in Florida by not counting all the ballots. They did everything
within
: their power to keep those ballots from being counted. Plus, GORE WON THE
: POPULAR VOTE BY 500,000 VOTES!
:
: This election was rigged from the beginning. The Governor of Florida is
Bush's
: brother. The Secretary of State in Florida is a Bush campaign co-chair.
: Supreme Court justices Scalia and Thomas both have ties to the Bush
campaign,
: but refused to recuse themselves. I have a feeling this is only the tip
of the
: iceberg.
:
: Because of the uncounted ballots that are now being examined by
nonpartisan
: groups in Florida (through the Florida Sunshine Law), we have learned that
Gore
: should have gotten 130 more votes from Lake County, Florida alone. This
would
: have shrunk Bush's lead to a couple dozen votes. If Gore picks up more
valid
: votes in other counties, and becomes the real winner in Florida, Bush must

step
: down. If he does not, we as Americans must demand that he does.
:
: That's where we come in.
:
: Our mailing list of just under a thousand is up and running. We plan to
keep
: in contact via email and trade information about how to go about opposing
Bush.
:
: First thing we must do, is refer to Bush as Governor or Mr. Bush...not
: President Bush.
: If enough of us start doing this, we can reinforce the belief that many
: Americans do not consider Bush the legitimate President.
:
: Second, we must attend planned protests on inauguration day around the
country.
: We must also inundate newspapers and talk shows with our opinion. Also, I
have
: links to purchase "Hail to the Thief," "Bush Cheated," and "Don't Blame
Me, I
: Voted With The Majority" bumperstickers.
:
: Anyway, first things first. I need your email addresses to keep in touch.
Do
: not just leave your email address on this NG, as I will not be checking
back
: here. Please email your email address to me directly.
:
: Thanks, and HAIL TO THE THIEF!

: > The thing that most people seem to want to forget is
: > that prison does not reform or redeem people. Just
: > serving a sentence is no guarentee that they will adjust
: > or conform to the normal world. That is why we need
: > to strip felons of their rights until they prove that they
: > are conforming to the norms of society.
:
:
: I realise that we may, at least partially, agree with each other, but
: I wanted to add that it is not prison's job to reform or redeem people.
: Prison is a punishment for the crimes they committed. It is up to each
: prisoner to reform or redeem himself (that responsibility does not rest
: with the state or the people).

Except that prisons are not even for punishment. They are
warehouses that hold offenders in order to keep them out of
society. In reality, no cares about them. Most cops see that
sending them to prison was the end of their duty. The community
just wants them gone. But no one has the guts to just kill
them, which is what everyone wants.

: In the end, I think we need total prison sentence reform. Instead of
: the present fixed prison times (x number of years with mandatory
: release), we instead need a minimum sentence to serve as punishment,
: with a flexible date to be released based on the prisoner's prison
: record and the prisoner's own efforts to reform himself.

I agree with the idea. I have suggested a similar idea. For one thing
make misdomeanors punishable up to five years instead of one year.
A class D felony would be a minimum of 5 years, class C 10 years,
class 20 years and class A would a life sentence. The death sentence
would only be reserved for those who show no willingness to reform.
Habitual offender, three or more felony convictions, would be a class
C offence if convicted of it.

Once a person convicted of a felony then he has to be under control,
either in prison or while in society for the minimum. Once pass the
minimum,
he is given a certain amount of unrestricted freedom. But he loses all
rights such gun ownership, voting, holding a professional license (doctor,
lawyer, CPA, teacher) or being able to work for government. If he is
clean for 5 years afterwards then he can go thru citizenship classes and
take the test that naturalized citizens do. The he sworn back in as citizen
and the governor issues a certificate of redemption that wipes out his

crimes.

: All prisoners should be required to obtain a high school GED, through
: self-study in their cell prior to release. And all should be required
: to take several coorespondence courses, styled after the very low-cost
: military coorespondence courses (with inexpensively produced booklets
: and self exams).
:
: In addition, the release date will vary based on the prisoner's
: behavior. Bad behavior in prison (fights, rule violations, rudeness to
: guards, and so forth) will dramatically increase the date of release.
: And good behavior will reduce the date of release, though at a rate less
: than bad behavior will increase the date (this reenforces the notion
: that good behavior is the norm, not something to be overly rewarded for).
:
: As the prisoner's minimum release date approaches, the prisoner
: appears before a panel of 12 people from the community (not as easy to
: fool a larger number of people) who will review the prisoner's record,
: appearance, attitude, and efforts to improve himself. In addition, each
: prisoner must had a detailed, realistic, plan for what he intends to do
: after release (job, living arrangements, etc).
:
: If the prisoner needs further reform, or fails to have a plan for what
: to do following release, they will make recommendations about how the
: prisoner can do that and set a new date for the prisoner to appear
: again. This process can continue indefinately until the release board
: feels the prisoner has reformed. Or, if they feel the prisoner has
: reformed, they can recommend release at any time after the minimum
sentence.
:
: Each prisoner should be required, as a condition of their release, to
: pay all damages relating to their crime (medical expenses, monetary
: losses, property losses, and so forth). Probation should remain in
: place until these damages are paid, and if damages are not paid within a
: reasonable, fixed, time, the person should be returned to prison.

What we are trying to do in my state is to force the communities
to have work release programs for the last six months of the offenders
term. The counties are fighting due to wanting more money from the
state. Most offenders need time to re-enter society. Look, it takes
the military about six months to adjust if they are deployed. It takes
about one month for every year in prison for an offender to adjust.

Work release would allow them time to get a drivers license, get
a job and gradually be re-introduced back into family life.

: Furthermore, prison life must be made much tougher. There should be
: little free time to associate with other prisoners, little contact with
: those outside prison, and little recreation opportunities in prison.
: Exercise should be aerobic, not strength building. Mail should be
: restricted to no more than one or two pieces per week. And visits from

: family should be limited to once per month instead of the current once
: per week. In other words, prison should be punishment, not a vacation.
:
: And finally, prison guards must be given great latitude to deal with
: prisoners, including the use of deadly force if threatened in any manner
: (even if threatened in a non-lethal manner). If prisoners will not
: respect the guards, then they should at least fear them.

The secret to a well run prison is that the guards treat the prisoners
in a fair and consistant manner. Rules need to be enforced, no favorism.
Most prison problems are do the fact that guards don't obey the rules
anymore
than the offenders do.

: > We need to defeat them now. Think about it,
: > 30 states voted in favor of GWB therefore
: > those states' senators have strong reasons
: > to support GWB's nominations. Email your
: > state's senators and let them know that
: > you support GWB's choices. The Left already
: > has it machine working (if anyone finds the
: > web page where they are coordinating that
: > attack, please post it).
:
:
: Our primary effort over the next two years in South Carolina will be
: to defeat Rep. Jim Clyburn in 2002. We feel his membership in the
: Congressional Black Caucus shows his intent to place the issues of
: African-Americans over those of the entire racial and political spectrum
: of voters in his district, and is therefore not consistent with the
: views and expectations of the people in this state.
:
: We intend to inform the residents of South Carolina about the racist
: views of some members of the Congressional Black Caucus, which he fully
: supports with his continuing membership in that organization.
:
: We also intend to make his voting record well know to the voters
: (something that is not well known now). We feel his support for various
: legislation has negatively affected even some of the Democrats who voted
: for him in past elections.
:
: In addition to this, we are gearing up for the largest voter
: registration drive seen in this state in recent memory. Our intent is
: the double the number of registered Republican voters by the 2002
: election. Moreover, our goal is educated voters who will show up at the
: polls on election day and vote with zeal.
:
: We also intend to take a lesson from black leaders, and are in the
: process right now of organizing transportation to the voting booths on
: election day.

One thing, though. Work with the black community. Help them
so that they no longer need the "black leadership". In many ways
the average American of Africian hertiage is very conservative on
social issues. They should be our allies instead of our oppositon.

: Yep ... and the FCC is a law enforcer ... and are not cops.
: The FBI is a Law Enforcement bureaucracy, and perhaps an Federal
: investigative agency. But they aren't cops. They aren't driving down my
: alley at night, I don't call them when I am going on vacation, and in
spite
: of some Congress critters desire to Federalize domestic violence (may God
: forbid!), a Federal agent is not going to be the one stopping the old man
: from beating the shit out of her ... it is going to be a cop.
:
: The Federal enforcement agents are bureaucrats ... not police.

What you are speaking of is the night watchman. That is only
part of the duties of the local police. Enforcing the laws is still
the main job of the all LEOs.

In reality it is not the police's responsibility to protect the citizens.
It is our responsibility.

: Cops, including Sheriff's and city Marshals were originally know as peace
: officers ... and their obligation to the citizens was keeping the
: city/county and in some States, the State in a state of peace. Law
: enforcement was secondary to that principle.
:
: If I had to call 911, I certainly hope that it is a cop that shows up, not
: some damned Fed enforcer.
:
: It is not my duty to enforce unjust laws. I am not going to report my
: neighbor for smoking pot in his back yard because I feel that he has a
right
: to feel secure in his home. On the other hand, if he is scaring the hell
out
: of his wife and family with a shotgun, I want a cop who will take the damn
: gun from him and not worry about whether my neighbors right to feel secure
: in his home takes precedent over his wife right to not be killed.
:
: A peace officer is well equipped to do just that. I reiterate. Feds
aren't
: trained to keep the peace ... just enforce the law.
:
: Ergo et sum. Feds aren't cops.

For one thing, why are you so dependent on the local police? Is it not
your job to enforce the law? In Germany they have far less police than
we do. Outside of the airports and train stations, you very seldom see
the police. They have a great network of old ladies who report everything.
Plus they have strong social values that restrict people's behavior via
family and friends (most people in Europe live and die within 25 miles
of where they were born).

It is your repsonsibility to set your neighbor straight. Confront them if
they are using drugs, even pot. It is not a healthy habit. Excessive
drinking is not wise either. Get involved in their lives. If they get
angry,
well that is why you own guns. But more problems need to be solved
at the family and neighbor level. We push too many things to courts
because we do not want to dirty our hands.

: > I actually *didn't* ask for examples of Federal cops, I merely gave one.
I
: > also haven't once used the term LEO 'til now. Hell, even BLM rangers
write
: > speeding tickets, investigate crimes and have a SWAT team. I have no
: > quarrel with Federal Police policing their jurisdictions. I do quarrel
with
: > the Feds owning any land or property outside of DC, but that is a
another
: > matter from this one.
: >
: > My point is that Feds are not policemen. They are government agents.
Even
: > health and building inspectors in my city are armed, have police
"power",
: > enforce the law and since they are chartered and sworn officers, they
are
: > considered LEO's and present themselves at conventions as such. They
still
: > aren't the police and neither are the Feds. I have never heard the FBI
or
: > ATF refer to themselves as police. They are agents and are in no way
equal
: > to a sheriff, deputy, policeman, patrolman, trooper or Texas Ranger.
They
: > are, OTH, bureaucrats.
:
: Well, it sounds like you're just quibbling over semantics, then. Call them
what
: you want but federal agents and police officers are both LEOs and they
both
: enforce laws, albeit a different set of laws. They receive the same
training as
: police and, with limited exception, have the same authority regarding the
: statutes they enforce. That doesn't change regardless of the label you use
to
: refer to them.

What he seems to have a beef with is the enforcement of law verses
the policing (ie patrol and intervention). It is the old fight of the crown
vs the people. He wants a police force that acts like his big brother who
stops fights and keeps the neighborhoods quiet.

What he does not seem to understand is that it is not the business of Law Enforcement to keep the peace. That is our job.

: > You know, for some odd reason I mostly agree with you here, except for
: > the fact that, when the illegal orders are given to whites sheltering
: themselves
: >
: > under "religion" or "conservative values", there's all this sympathy for
: them, but when it's blacks or poor people (as in Philadelphia's immolation
of
: the MOVE headquarters) then they're evil monsters that deserve to be shot
: > down like dogs. As far as I'm concerned, David Koresh was a cop killer,
: and so is Mumia Abu-Jamal. If you're for exonerating one, you've got to
be
: for exonerating both in my book. Otherwise you're just reserving the
right to
: > pick and choose which cops get killed -- and that makes you a cop-killer
: > supporter.
: >
: That is a pretty stupid point of view. Do you really want a police state
in
: this country, where the cops can invade your home, drag you away without
: charging you with any crinme, murder you, etc ? Cops have guidlines to
: follow, and when they choose to ignore those guidlines, and people`s
rights,
: then they have to take what they get. Up here in Maine, you don`t see them
: invading people`s homes without just cause, and a warrant in hand, and
them
: in uniform, or they are likely to get their ass shot off, and the courts
are
: not going to do anything about it, just the same as any other sonofabithch
: that wants to kick my front door in. What happened to "The people have the
: right to be secure in their homes" in YOUR part of the country ?
:
: People like you want to give the cops "carte blanche", anything goes. This
: harks to the Republican view, that their property is "more important" than
: freedom, people`s rights, or even people`s lives. Putting the almighty
: dollar ahead of human life, in my humble opinion, is just plain wrong, and
: is the epitomy of greed. But, of course, greed runs deep within the
: true-blue Republican. When they get into office in Washington, it begins
to
: show, big-time, because you see, the tax money belongs to them, and their
: rich pals, and anyone that is getting a check for anything from the
: government, is "ripping them off".....
:

: They stand up there and claim to love the Vets, while they strive to close
: the hospitals and bases that are supposed to take care of them, knock them
: off their benefits, etc,etc,etc, ad nauseum.
:
: They scream about "freedom" while they try to take everyone else`s freedom
: away. It makes me sick to think that so many Social Security recipients,
: Vets, Blacks, women,and other hapless unthinking fools are taken in by
their
: hypocrytical jive, and fail to recognize the enemy.

The Left has forgotten what it was like when the LEOs shot their way
into their homes in the '60s and '70s. Maybe they need a wake up call?

> the Newsgroup will assume you are making lies.

No, the newsgroup doesn't give a FUCK about our pissing contest. I
don't HAVE to answer, you dumb ass! usenet isn't a court of law, and no
matter how shrill your denials, the fact is YOU DO
live in a ratty, shitty, HUD apartment located near the railroad tracks
in the Slum side of
Athens, Alabama. You have to get food stamps and welfare because that
FLUNKY minimum-wage pizza delivery BOY "job" your parents got for you
just doesn't bring in the cash to
pay the rent and buy the food, etc.

> STRIKE 1

This isn't a baseball game, you IDIOT. Not that you'd know the
difference....I've been shutting you OUT for THREE years now.

Awwwwwww, POOR BABY. YOUR CHEAP-ASSED SHIT RADIOS are like everything
else in your life....CHEAP_ASS. Of course, you DO think that the Dollar
Store is the place to get your clothes.

> Making a strong statement against
> the Tiny-tenna will result in you having to buy me a new radio...

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAAHAHA!
You're FUCKING dreaming, LARDASS!!!! Your CHEAP-ASSED Antenna is a
SCAM.......
and like P.T. Barnum said, "There's a sucker born every minute." You
probably would buy swampland in Florida, and the Brooklyn Bridge as
well. You're a world-class IDIOT, Llllloyd.
You posts indicate you have the maturity of a 12-year-old gilr who's
having a hissy fit.

> STRIKE 3 - YOUR OUT!!!!!!!!!!

FUCK YOU, LARDASS!!!!!
I OWN you, FATSO.................You think about me 24/7...........

You mean,
YET.....HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!

> Did I state
> anywhere in that post that I transmitted out of band?

What part of "I would not have a problem with using my dual-band HT
with MURS . It's
been modded for out-of-band. Same goes for a 440Ht to use on FRS
too." don't you understand, FUCKHEAD? You ADMITTED that you have a
modified dual-band handi-talkie, (again CHEAPASS) as well as a 440 ht,
which are transmitters, now capable of transmitting out of the ham
bands. It's contrary to what your license grant allows.

> Get yourself a pair of glasses, fool.

Wipe the semen out of those PIG-like eyes, PORKY PIG.

> apperence, etc.
Poor baby.... what about what you've posted, anti-semetic comments
directed towards AF2Y, racial slurs directed towards, Al Stafford
(which wouldn't be a good idea, since he's well over 6 ft and weighs
220 lbs.) as well as comments made about those who don't follow your
brand of 'religion." The trashy comments which are All TRUE,
apparently, since you posted your picture for all to see, Frank Cannon
lookalike.

> N8WGM told me about your apperance, I was just going by
> what he told me.

You MINDLESS ROBOT...learn to think for yourself. Nadless8White Gay Men
is another bucktoothed CHOAD, like you, Lllllllloyd. He's an ex-CBer
using the same tactics.

> If you will kindly e-mail a pic of yourself, maybe we can
> settle this. If not, then it's more thrashy comments about you
then.

You DUMBFUCK, if I e-mail you anything, I'll be sure to
include "something extra" that will be hard to detect...but will do
irrepairable damage.

> BTW, You would not profit by any legal action.

I know, I can't get NOTHING for a LARDASS who doesn't HAVE anything
like you.

> You ass would be countersued so fast, your head would spin off your
body. Not jsut by me,
> but by everybody in this Newsgroup, for all the agony you've put them
> through.

BULLSHIT. You can't afford to countersue, you welfare recipient. You
barely make your rent NOW. Nobody in the newsgroup CARES, Lllllloyd.
Now, the multi-racial diverse jury MIGHT, especially when your posts
with the racial slurs, anti-semitism, etc, are introduced as evidence.

CHEAP is ALL YOU know, isn't it, LARDASS????? You lived in the slums there at
1601 8th Ave , Belle Plaine, IA 52208-1204. Now , you lived with your parents until they booted your lazy ass out and you live in those HUD Sandpiper apartments. Down by the railroad tracks, near all the crack houses. And let's not forget those CHEAP-ASS RADIO SHACK RADIOS you're so fond of......make you think back to the patched cum-stained sofa your drunk daddy used to sodomize you on.

> I dont worry what you can do. You do not scare me. You are just
a little kid on the
> internet who likes to talk tough, then move on.

You'd better
START......BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!!!!!!
FUCKWIT.

1072. How to support GWB and Ashcroft

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-15 13:31:30 UTC
From: N9NWO <n9nwo@amsat.org>
Message-ID: <SYC86.365$ij4.61337@dfiatx1-snr1.gtei.net>
Source record: 95402
Cross-posted to:
alt.fan.rush-limbaugh,alt.law-enforcement,alt.rush-limbaugh,misc.survivalism,rec.radio.amateur.misc,talk.politics.guns

Dear Friends,

President-elect Bush has brought together an excellent group to serve as his Cabinet. His nominees are a diverse, experienced, and strong group. They will help enact his agenda, change the tone in Washington and make us proud.

Your help is needed to get these outstanding men and women confirmed by the United States Senate. Some of President-elect Bush's nominees are being unfairly attacked by outside groups and the Senate needs to hear that from you.

One of the first Senate hearings will be Tuesday for Senator John Ashcroft, President-elect Bush's choice for Attorney General.

The hallmark of Senator Ashcroft's long history of public service has been integrity. As Attorney General, he will uphold the law and make the Department of Justice an institution all Americans can be proud of.

He brings a unique record of service to this challenge. He was twice elected Missouri's Attorney General, serving with both Republican and Democrat Governors. He was elected Governor of Missouri, an important swing state, and then reelected with 64% of the vote. John then was elected to the U.S. Senate, where he just finished a six-year term. No other Attorney General has ever had this wealth of experience.

John has a long history of strong leadership on important issues, including:

- Won widespread acclaim for his effectiveness in running the Missouri Attorney General's office by attracting strong men and women to serve his state and strictly upholding the law
- As Senator, co-Sponsored the Violence Against Women Act
- As Governor, signed Missouri's first Hate-Crimes Bill and fought to protect victims' rights
- Balanced the State Budget all eight years As Governor
- Made Education Reform a priority as Governor
- Toughened penalties for crimes committed with a Gun
- Worked To protect children at school, strengthen classroom safety
- Voted For background checks at pawn shops
- Was Endorsed By Missouri Law Enforcement Agencies
- Supported 26 of 28 African-Americans nominated to the Federal bench
- Was commended as Governor by one of the oldest Black Bar Associations for his record of appointing minorities
- Appointed many African-Americans to Missouri's courts
- Was one of the first Governors to sign a law creating a Martin Luther King

holiday
- Created an award honoring George Washington Carver's Accomplishments, saved Lincoln College, an historic Black college founded by African-American veterans of the Civil War.

Some groups are attacking Ashcroft for opposing the nomination of Judge Ronnie White to a lifetime appointment as a Federal judge. Every Republican Senator opposed White's confirmation, in part, because he urged a lower legal standard for a man convicted of first-degree murder 4 times (including the first degree murder of three police officers).

Some groups charge Ashcroft will not uphold abortion laws with which he disagrees. This is wrong and simply an attempt to undermine the new Administration. Ashcroft understands the job of the Attorney General is to carry out the letter of the law. He will restore the rule of law to the Justice Department and run a highly professional department.

Please do two things.

First, let your Senator know you strongly support a fair confirmation process for John Ashcroft.

Go to http://www.senate.gov/senators/senator_by_state.cfm to find the contact information for the Senators from your state.

Second, let the members of the Senate Judiciary Committee know you support John Ashcroft's confirmation. The committee begins its hearings Tuesday. Its members are: http://www.senate.gov/~judiciary/members.htm

D(DE) Biden Jr, Joseph, (202) 224-5042, senator@biden.senate.gov
R(OH) DeWine, Mike, (202) 224-2315,
http://www.senate.gov/~dewine/request_form.html
D(WI) Feingold, Russell, (202) 224-5323,
russell_feingold@feingold.senate.gov
D(CA) Feinstein, Dianne, (202) 224-3841, senator@feinstein.senate.gov
R(IA) Grassley, Chuck,, (202) 224-3744,
http://grassley.senate.gov/webform.htm
R(UT) Hatch, Orrin, (202) 224-5251, senator_hatch@hatch.senate.gov
D(MA) Kennedy, Edward, (202) 224-4543, senator@kennedy.senate.gov
D(WI) Kohl, Herb, (202) 224-5653, senator_kohl@kohl.senate.gov
R(AZ) Kyl, Jon, (202) 224-4521, info@kyl.senate.gov
D(VT) Leahy, Patrick, (202) 224-4242, senator_leahy@leahy.senate.gov
D(NY) Schumer, Charles, (202) 224-6542, senator@schumer.senate.gov
R(AL) Sessions, Jeff, (202) 224-4124, senator@sessions.senate.gov
R(NH) Smith, Bob, (202) 224-2841, opinion@smith.senate.gov
R(PA) Specter, Arlen, (202) 224-4254, http://specter.senate.gov/webform.htm
R(SC) Thurmond, Strom, (202) 224-5972, senator@thurmond.senate.gov
D(NJ) Torricelli, Robert, (202) 224-3224
senator_torricelli@torricelli.senate.gov

Finally, two recent comments from current United States Senators:

Senator Robert Torricelli (D-NJ) had this to say about the Ashcroft nomination:

"'I think it represents a very good choice'. . . the only things people want in an attorney general are 'good management, sound judgment and high integrity. They're not easy to find in one individual, but I think John Ashcroft has all of them.'" "I certainly assume I will be voting for him." - Sen. Robert Torricelli (D-NJ) (David Kocieniewski, "Staunch Democrat
Eases Up on Opposition," The New York Times, January 6, 2001; Audrey Hudson, "Democrats Set For Ashcroft's Confirmation," The Washington Times, January 4, 2001) (emphasis added)

Senator Kent Conrad (D-ND) Commended Ashcroft.

"I rise to pay tribute to Senator John Ashcroft as he prepares to leave the Senate. . . . Senator Ashcroft has been a man of his word who served his state and his country with distinction. I join my colleagues on both sides of the aisle in wishing him well in his future endeavors." (Congressional Record, December 15, 2000)

Thank you.

(Please forward this message to friends, family and co-workers and ask them to show their support for President-elect Bush by asking their U.S. Senators to support the confirmation of John Ashcroft)

Paid for by the Republican National Committee.

1073. Radio Crystal Buy-Sell Bulleton Board - Webmasters please link!

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-15 13:32:41 UTC
From: sabbatai_zvi@NOSPAMhotmail.com
Message-ID: <3a62fbf5.9721005@news-server>
Source record: 95401
Cross-posted to: rec.ham-radio.swap,rec.radio.amateur.misc

Hi there.

HOW ABOUT a LINK to the NEW CRYSTALS swapping BBS?

There is a NEW Crystal Exchange Message Board (free) on the
web at:

http://senac.com/boards/880/

There you can post sale & want ads and find radio crystals for sale
by others!

Sell your excess crystals there!!

The previous old message board was being ruined by Taiwanese
infiltrators that ruined it with off-topic SPAM ads. This one is
secure.

The above is all hobbyist and non-commercial. OK, the BBS has
sponsor ads, that is how we get it free.

I have concentrated all of my HAM LINKS
efforts over the past few years to editing the Open Directory
system, and I am the editor for all of the Ham Radio
BOATANCHORS links on there.

I like the robot that automatically removes any bad links for me!

We have a broad variety of specialty links to over 700 sites
(arranged by category) of interest to hams who enjoy antique rigs.

Please also link to:

http://dmoz.org/Recreation/Amateur_Radio/Boatanchors/

1076. WB2OTK Racial Slur Tape Re-surfaces!!

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-15 14:13:23 UTC
From: No User <no.user@anon.xg.nu>

How many heard ECC trying to defend OTK on 3901 last night? ECC soon was left speechless and left the frequency afer the infamous WB2OTK racial slur tape recording re-surfaced! People forget that this single incident was the catalyst for the FCC to finally take action, and hired Riley Hollingsworth to clean up the ham bands. And this was the same incident OTK was being suspended for, and the reason why OTK wouldn't accept his punishment and sent off his *I QUIT!* e-mail to Riley. And no, Dan, this opposition of Rich isn't by any Stump Jumpers. It's coming from conservative hams who are always labeled by the liberals as being racist and bigoted. We are showing who the REAL racists and bigots are---Clinton supporting jewish liberals like WB2OTK!

And your problem with this is what? The non-ham sailor picked
a maritime HF frequency; presumably his vessel carries a marine
HF license, and the two stations carried out communications
on 12.350.

New Count Shows Bush May Have Won Popular Vote
NewsMax.com
Wednesday, December 20, 2000

Despite the widely accepted claim that Al Gore won the popular vote by some 300,000 votes, a new count of state totals appears to show George Bush was the real winner by nearly 2 million votes.

According to respected news analyst Mary Mostert, a report sent to her by reader Don Boyd showed that Gore got a total of 50,753,172 votes nationwide while Bush got 52,685,804 giving him a winning margin of 1,932,632.

Wrote Mostert "While I have not checked all 50 states with the Secretary of State official returns, I have checked all the big states and a number of the smaller states. All the ones I have checked are accurate, or modified very slightly with late absentee ballots, which tilted towards George W. Bush. For those who want to personally check these figures, go to the "Original Source" which has all the election information by state. Nearly all the states now have their OFFICIAL, returns posted.

These figures were reportedly obtained from the Office of the Secretary of State from each state but haven't been confirmed. Where are Al Gore's cheer leaders known as the news media??

>in revenge for Waco.

I'm willing to see Waco as fairly neutral ideologically. The
Davidians, after all, were religious fundamentalists, the use of
military equipment enabled by the war on drugs, and what precipitated
the actual assault was a fear of child abuse.

> How many on the left did terrorism in revenge
>for some act? Look at all the Red Brigades in Europe. Or the
>Weathermen here in the US.

Well, as you point out, most of this took place in the 60s & 70s. In
the 80s & 90s (really since the killing of Alan Berg), most of the
violence has stemmed from the far right.

Just for the sake of argument, suppose I agree about this offsetting
you describe (I don't, but nevermind that for now). You're suggesting
a reciprocal relationship in these acts and that alone, by itself,
damages the basic contention--ie leftist violence in particular is to
be feared--that started this thread.

>If we were to stick only with the abortion issue, the left makes Ghengis

Abortion per se is not ideological. Abortions took place under any and
all circumstances. Access to legal abortion, on the other hand, is
ideological, sure. But driving abortion back underground isn't going
to save many, if any, lives.

I want the local police to deal with the thugs. I am to old and beat up for that role. I see nothing wrong with a local constabulary keeping the peace, sending teens home late at night, watching my property when I am gone and giving grief to drivers tearing through the neighborhood at 50 per. I am not an anarchist, I am a small l libertarian and a Constitutionalist.

You are right, I don't want to dirty my hands and want to pay for professional muscle to do it.

Gee what a novel idea. Sounds oddly familiar though, hey wait a
second! That is exactly what the right-wing push to 'get tough' on
sentencing abolished. The consequences were obvious then and are
starting to play out now. Prisoners have no incentive at all to behave
other than they won't get beaten as much. Prisons are starting to fill
up with old people who don't pose a threat to anybody but cost a
fortune to keep as they get sick a lot. The cost of housing millions
of people in prison has become a huge budgetary burden on many states,
frequently exceeding the cost of educating the same state's children.
(And there are other implications in this particular equation that are
interesting as well. Have we as a society traded investment in
education for investment in internment? Has the change in priorities
between education and internment become a feedback loop that increases
the demand for internment by neglecting education, causing ever more
resources to be diverted into internment?) We have filled our prisons
not with violent offenders, but mostly with people convicted of drug
traffic offenses, as those 'crimes' were the first to get the

mandatory sentencing 'reform', and continue to require longer
sentences than violent offenses.

On the other hand prisons employ a lot of people and supporting the
iron fist against crime gets politicians elected over and over again,
so change is not very likely.

No news here. We all know what sore losers the
liberals are. This just demonstrates the lesson Gore
gave to everyone last month; that it's more important
to get your way than it is to keep the country stable.
Undermine the administration of the winner! That's more
important than the coountry's problems. Me me me!!!

RUSH? OLLIE? Who are they? Not anyone I ever listen to. I couldn't tell you when either is on what media or where. I know what I believe. I imagine those guys are right a lot of the time, too, but I don't use my time to listen to any of it. And I turn the channel with the Big Creep comes on the tube, Big AL too. hope I don't have to develop the same outlook on Dubya. Don't think it'll ever happen. I know I won't on Cheney.

I got an email a couple days ago from a young relative in California wanting everyone to sign a petition to have The Big Creep sign the Alaskan wildlife something-or-other into a national monument so no one

can ever drill for oil there. Young feller meantime is about to find himself sitting in the dark and cold because the stumblebums that pass for government officials there don't have sense enough to know that their electric utilities can't buy high and sell low without eventual bankruptcy. Whatta buncha clowns. I guess they've already got all the Ca coastal oil locked away. Guess they can always use candles. Won't do much good for all their Silucon Valley servers though. So much for High Tech.

> (not like
> the left is any better).

If you think you're mounting a comeback, just because there is a change in administrations, I must remind you that your new FCC Chairman is also black! And I'm sure he would be VERY interested in receiving a tape of your racist comments over the air through Overnight Mail! Look, you're NOT going to skirt the law and try and get back on without punishment. We've got you figured out. Your self-imposed exile is exactly that---self-imposed! Come back to ham radio---BUT DO YOUR TIME FIRST, as it was designated to you by Riley---but you weren't man enough to accept!! We want this ON YOUR RECORD to show that, yes, JEWS CAN BE AND ARE RACISTS!!!

Strange, I didn't hear KC8JBO, just a bunch of identifieds. Riley can't do much with the unidentifieds.

He needs to be off the air like WB2OTK and some of the others.

What others?? The people who were thought to be the " Biggest " troublemakers are gone, examples: KV4FZ, KT4TR, W4FQF, W4LLI, K4OKA, K4VVV (Little Richard drunken disc jockey), gone from 14.313, but the qrm'ing continues. Rich WB2OTK wasn't/isn't the problem. The problem is the inability of the FCC (and, this isn't Riley's problem) to fund people to track them down.

It's doubtful if any " official notices will come out of this. Most of the rhetoric has been from NG's and newbies.

Is this the tape with Phil, N9GOR doing the same thing about white folks?...Or is it the doctored tape sent in before?

Since you seem to want punishment, how about getting BOTH of them this time?

Dan/W4NTI

First of all, let's get it correct asshole..it was BCC, not ECC.

trying to defend OTK on 3901 last night? ECC soon was left speechless
and left the frequency afer the infamous WB2OTK racial slur tape
recording re-surfaced!

This is the same doctored, taped over tape that was sent to the FCC in a
mass mailing by the now defunct Stumpjumpers/Barfies.

The actual conversation had Phil W9GOR talking about honkey's and making
racial slurs against white people. This was never sent to the FCC by the
holier than thou Stmpjumpers/Barfies. But Riley did get the true copy.

People forget that this single incident was the catalyst for the FCC to
finally take action, and hired Riley Hollingsworth

Hired??? Hired ??? Riley was already an employee when this took place,
get your facts straight asshole.

to clean up the ham bands. And this was the same incident OTK was being
suspended for

He was NEVER suspended the resignation letter incident happened and we (
probably not you since you seem to be ignorant of facts) know the "
rest of the story ".

, and the reason why OTK wouldn't accept his punishment and sent off his
I QUIT! e-mail to Riley. And no, Dan, this opposition of Rich isn't by
any Stump Jumpers.

Yeah right........!!!! LOL!!!!

It's coming from conservative hams

Conservative????? You sound like a rabid hate monger to me!!!!

who are always labeled by the liberals as being racist and bigoted. We
are showing who the REAL racists and bigots are---Clinton supporting
jewish liberals like WB2OTK!

Well that said it all, the Jew card........

Exactly what I, and others have said for years. Its the 3rd element,
not the 'major players'. Remember when NR5T, Douglas, was blammed for
all sorts of crap? He goes away, and still got the crap. Duuuuuuu!

As a long time member of the NRA and GOA, I admire Ashcroft's record on the 2nd Amendment and Gun Laws. However, his past performance and "Selective Application" and "Personal Interpretations" of the Laws in the area of Human Rights is a total disaster. It screams "BIGOTRY" at the top of it's lungs!

As Attorney General, Ashcroft will "Again" be in a position to decide how to "Interpret" and then "Apply" the laws of this Nation. He "Will" be imprinting those decisions with his own personal feelings just as Janet Reno did. That's what being the chief law enforcement officer is all about. He will have "Wide Latitude" when it comes to both enforcement and prosecutorial efforts, and, frankly, I can see no reason to trust the man to keep his personal feeling out of ANY decision making process that allows for even a minor bit of personal interpretation..

His agenda WILL be applied! Just as he would protect our gun rights with is position, he can also "Devastate" the Human Rights Laws. We can not afford to turn "That Man" loose with that much legal power. Nobody will come out a winner; nobody!

I have written to every Federal Level Representative, and both of my Senators, in Florida, asking them to OPPOSE the selection/confirmation of Mr. Ashcroft!

I have a lot of respect for you, Dan. But I've got both the original version of the QSO between Porky and GOR and the montage. And GOR's comments were more about the physical differences between white and black women. For instance, he stated that in white woman, you can see those ugly veins. He said that wasn't the case with dark skinned women. And it was at THAT point at which Rich jumped in and start using racial SLURS like *Porch Monkey*, *Nigger*, *Brillo Pad* and *Spear Chucker*. Rich is JUST LIKE HERBIE! No remorse, no apology and ALL ARROGANCE! Ham radio's never been better since those two assholes have been gone---

I think the poster is nothing but a pinko posing as a big
defender of everything under the sun.

Look at the list of "defender of". He must wear more
ribbons than Shirley Temple used to and I don't mean
military awards.

The great defender wasn't too keen on seeing any bullets
flying though. I remember that post.

: >record and the prisoner's own efforts to reform himself.
: >
:
:
: Gee what a novel idea. Sounds oddly familiar though, hey wait a
: second! That is exactly what the right-wing push to 'get tough' on
: sentencing abolished. The consequences were obvious then and are
: starting to play out now. Prisoners have no incentive at all to behave
: other than they won't get beaten as much. Prisons are starting to fill
: up with old people who don't pose a threat to anybody but cost a
: fortune to keep as they get sick a lot. The cost of housing millions
: of people in prison has become a huge budgetary burden on many states,
: frequently exceeding the cost of educating the same state's children.
: (And there are other implications in this particular equation that are
: interesting as well. Have we as a society traded investment in
: education for investment in internment? Has the change in priorities
: between education and internment become a feedback loop that increases
: the demand for internment by neglecting education, causing ever more
: resources to be diverted into internment?) We have filled our prisons
: not with violent offenders, but mostly with people convicted of drug
: traffic offenses, as those 'crimes' were the first to get the
: mandatory sentencing 'reform', and continue to require longer
: sentences than violent offenses.
:

: On the other hand prisons employ a lot of people and supporting the
: iron fist against crime gets politicians elected over and over again,
: so change is not very likely.

No, under this plan, if they fuck then the sentence could be
longer. Or even death if they refuse to conform to society.

: I want the local police to deal with the thugs. I am to old and beat up
for
: that role. I see nothing wrong with a local constabulary keeping the
peace,
: sending teens home late at night, watching my property when I am gone and
: giving grief to drivers tearing through the neighborhood at 50 per. I am
: not an anarchist, I am a small l libertarian and a Constitutionalist.
:
: You are right, I don't want to dirty my hands and want to pay for
: professional muscle to do it.

That is one reason that I would like the draft back. To force
people into taking up their responsibilities to defend themselves.

As it is, too many on the Left have ran from military service. There
are few liberals under the age 45 (ie since the end of Vietnam and
the draft) who have served. Yet they are the first to demand others
to go to foreign lands.

They also seem to think that they can bribe (raise the salaries of
the police and military so that we now have mercenaries instead
of a citizen force) others to protect them.

What they are getting is law enforcement and military who see
themselves as superior to the masses. After all if you kill a cop
it is an automatic death sentence. And we give cops guns and
badges so that they can tell you that they are more valuable, more
superior, than you.

And it does not stop at the police. Mayors have bodyguards,
governors have around the clock security, the president has
a small army. All to tell you that their lives are more valuable.
In other words guns are a status symbol.

(to the tune to)
THE MOST WONDERFUL TIME OF THE YEAR

It's the most wonderful time of the year
With the kids jingle belling and everyone telling you be of good cheer
It's the most wonderful time of the year.

It's the hap-happiest season of all
The Supreme Court's been meeting,
Al Gore has been pleading to recount them all,
It's the hap happiest season of all.

There'll be parties for hosting, Republicans boasting
Bush is the winner, it's clear.
But the democrat's story, straight from AL Gorey is
"wah wah wah", I'm in tears.

It's the most wonderful time of the year.
There's a party in Austin, the democrats lost one
Give Texas a cheer,
It's the most wonderful time of the year.

Soon a big yellow Ryder will load up the china
and head to the Tennessee hills
But the only thing chipper than moving the Tipper
is hauling off Hillary and Bill.

It's the most wonderful time of the year
There'll be much mistletoeing, the democrats are going
Back Home again next year,
It's the most wonderful time of the year.

> state laws to be real laws either...

Much of state law is not law but cooperative enforcement of agency regulations. Probably all states have compromised their credibility and constitutions to some degree by encouraging foreign interference and this will be reflected in state elections. Nevertheless, each citizen must discriminate where possible and resist or ignore those legal pressures that are not right.

A recent example of private property theft found its way to the SCOTUS where it was ruled that the EPA can no longer declare wetlands and use other legal razzle dazzle in order to deprive owners of property.

Most state do have well-defined constitutions and statutes that are based on state constitutions. The trick is always into get the proper court in order to ensure constitutional guarantees.

This is the long range solution. In the short run, up close, intense, private and personal intimidation of bureaucrats is the best way to keep them in line.

Another category soon to hit the fan is that of "child protective services" where the feds have promoted state bureaucrats to steal children on the basis of some BS allegation.

> And the US Marshals often deputize local sheriffs departments to
> serve Federal warrants.

And they are wrong to do that, usually from ignorance but sometimes
because they like the power.

Federal marshalls operate openly in federal territories. Within a state,
they need the cooperation of a sheriff.

In some cases, a federal warrant can be served by the feds as
long as they are accompanied by the sheriff. In other cases
the feds don't have jurisdiction and either no law was broken
or it is state purview.

The federal government is given much more credence and power
than is warranted by fact or the law. This only serves to
reinforce their rootless agents to grab more personal power.
Those of you who are gung-ho supporters of absolute government
will eventually realize that without a balance of physical

power between the citizen and the government that no one
will be safe.

> determinative. By law (both federal and state), federal agents *are* LEOs.

It is a semantic technicality, but an important one. Since
these regulations are usually not positive law, then the
agents are not "law enforcers". Secondly, most of the agency
regulators are not "officers" which refers to being an officer
of a court. Third, the notion of enforcement is not a
constitutionally authorized or protected status.

Of course that is why they are called "agents". Gee, it's even
on their ID cards.

Again, by defending the semantics you effectively support the
propaganda and are responsible for increasing the growing
trouble and misleading the citizenry. But then, if that is your
intention,...

You guys all need to get Saved ! Or at least your language does !
Or at least remember something from Sunday school- "answer not a fool according to his folly", and avoid all this worthless rhetoric on this newgroup, and adopt some decent standards of civility for the public forum.
Those of us just getting into SW and Ham need to see more "normal" posts from the salt of the Earth.

Well, someone doesn't *have* to enforce it, but assuming someone
does, then someone makes a charge. Then someone investigates. Then
someone finds the *perp*. Then someone makes an arrest. Then a
jury hears the case, and so on. There's much more to enforcement
than showing up with the hardware to be judge, jury and executioner.

Who is the chief law enforcement officer of the land? In the first place, there is no chief law enforcement officer of the land. You are probably trying to reach the AG of the federal government, not the president who is the chief executive officer. The AG jurisdiction is the territory and possessions of the federal government and by treaty and agreement with a state, certain specified constitutional laws that all states agree to.

Damn! You boys have been hanging out with Janet Reno too long. You really believe, or want to believe, that we have some sort of king or czar.

The militia was never "federal" anything. Militias always operate as a county/state unit.

Congress doesn't give local police any authority. There is no connection between the two. It is the state that gives authorization to receiving federal money and to cooperate with the feds.

Now get this straight. The Congress cannot pass a law that is not authorized by the constitution and it cannot pass law that directly effects you, unless the states agree to it.

These Titles and Acts that you find so alluring are federal regulations that effect people who contract (usually without their knowledge) with the feds.

This is as much a problem of letting the career military vote. You are so attracted to power that you'll do anything to be its slave.

Here are my comments on the petition.

--

Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, D.C. 20544

January 15, 2001

In the matter of)
)
Amendment of Part 97 of the) RM-10018
Commission's Rules to Allow)
Increased Frequency Privileges to)
Amateurs having Proficiency in)
Telegraphy in Accordance with the)
International Requirements)

To: The Commission

COMMENTS ON RM-10018

The commenter, Hans Brakob, an FCC Amateur Radio Licensee
for several decades, assigned station call K0HB, agrees
in principle with the petition of Joseph Speroni, AH0A,
and proposes an expansion of the frequencies allowed.

1. Because of attrition (no new Novices being licensed),
current Novice licensees (and Technician licensees who have
passed the 5WPM Morse code test) face a continuously
diminishing ability to engage in Morse contacts in their
current CW band segments.

2. While these segments are also available for use by other
license classes, most licensees with higher class licenses
tend to avoid the Novice sub-bands so as not to infringe
on this reserved practice territory. This well-meaning
reluctance to infringe may be misplaced, but it is real,
and has at least two undesirable consequences.

3. First, it creates a "ghetto" where Novices are isolated
from mainstream Amateur Radio and do not gain exposure
to the benefits of interacting with more experienced and
skilled operators, and...

4. Second, because of attrition, these already-underutilized
band segments will see less and less activity while other

adjacent segments become more crowded because of increasing popularity of other emerging data modes like PSK31.

5. I further propose that this concept be applied to the "General" segments of all MF/HF amateur bands, not just the 4 bands proposed in the instant petition. If Novices were allowed to participate in the full range of CW operations (CW only at reduced power of 200W) on all bands, such as traffic handling, radiosporting ("contests"), and DX'ing, they would be much more likely to gain in skills and enthusiasm, and aspire to gain the theoretical knowledge to upgrade to the increased power and mode capabilities of General or Extra license classes.

Respectfully submitted,

H. Hans Brakob, K0HB

Unfortunately it's not.

Regardless of what you think of 'export radios', I think most
HAMs think even less of the individuals who have nothing
better to do than play cop or hang out on the CB groups
antagonizing the CBers with how much 'better' HAMs are.

Hmm, then again, isn't that the same thing some HAMs are
doing to the no-coders? Maybe this is just that that scene
in Heinleins book where a monkey gets bopped on the head
so he runs and finds a smaller monkey yet to bop him on the
head!

2002 WON'T BE THE DEMOCRATS' YEAR.

Safe House
by Noam Scheiber
Post date 01.02.00 | Issue date 01.01.01

Listening to the media in recent weeks, you'd think Democrats were practically giddy at the prospect of a Bush presidency. "We know that historically the party that holds the White House loses seats in Congress in their first midterm election," instructed USA Today's Susan Page. U.S. News & World Report's David Gergen concurred: "If Bush wins, Democrats will assume they can capture the Congress in 2002 and destroy Bush by the end of his first term." CBS's Bill Plante even suggested that "[t]here are prominent Democrats who probably secretly hope that [Gore] doesn't make it.... [T]hey feel that if George W. Bush takes power, they'll have a better chance of regaining control of the Senate and House." And when you consider how ugly Bush's victory was, the GOP majority doesn't look just tenuous; it looks downright imperiled.

Or so you'd think. But a closer investigation of the likely dynamics of the 2002 battle for the House of Representatives suggests a different picture. (The Senate is another matter.) Not only will the Democrats have trouble picking up the five seats they need to regain the majority, but they face an uphill battle just to avoid losing ground.

For starters, there's reapportionment, the decade-opening ritual that adjusts each state's congressional delegation to reflect shifts in population. And the soon-to-be-released results of the 2000 census don't bode well for Democrats. Consistent with the long-term migration from the Northeast, the Rust Belt, and the Midwest to the Sun Belt--and the corresponding migration from industrial centers to suburbs--it's mostly Republican states that stand to gain seats: Arizona (two seats), Texas (two), Colorado (one), Florida (one), and Georgia (one). By contrast, the states likely to lose one seat (Illinois, Ohio, and Wisconsin) or two (New York and Pennsylvania) generally lean Democratic.

And with reapportionment comes redistricting, as states redraw congressional maps to reflect population changes. But, because it's state legislatures that do the redrawing, redistricting is not simply an exercise in cartography. As Anthony Weiner, a Democratic representative from New York, explains, "The number-one job of redistricting is to preserve incumbents [of your own party]" and, conversely, to make the opposition party's incumbents vulnerable. With Republican-controlled legislatures presiding over many key redistricting battles--particularly those in Colorado, Florida, and

Pennsylvania--expect Democrats to lose on this front, too.

Further undermining House Democrats' chances is the fact that, come 2002, some of them may not want to stick around. After small but consistent gains for the Democrats in 1996 and 1998, Minority Leader Dick Gephardt talked several older House Democrats out of retiring by assuring them that they would once again taste life in the majority. But falling short despite the party's Herculean efforts has proved a huge disappointment. In the words of one House Democrat, this year's narrow defeat has prompted "a certain amount of hard depression," making it tougher for Gephardt to keep his veterans from packing it in. Even a member of the Democratic leadership, Steering Committee Co-chair Steny Hoyer, concedes that "each time it gets more difficult, because each time the road seems longer."

Several of the Democrats thought likely to retire--Ike Skelton from Missouri, Earl Pomeroy from North Dakota, and Norman Sisisky from Virginia--represent districts that could turn Republican. And retirement isn't the only reason House Democrats may leave. With Republicans forced to defend 20 Senate seats (compared with only 14 for Democrats) and with several key governorships up for grabs, many House Democrats will probably seek higher office, including some--like Mark Udall in Colorado, John Baldacci in Maine, and Bob Etheridge in North Carolina--who now hold swing seats. While Gephardt will pressure them to stay, one House member confides that almost no one "turns down a shot at winning higher office for a chance to win the House."

Analysts who predict a Democratic landslide in 2002 cite the historical record. The standard explanation for why parties experience a midterm slump goes like this: Candidates for president make all sorts of ambitious promises on the campaign trail, promises they can't uphold in office. So, after the inevitable disappointment, voters take the first opportunity to register their disillusionment: the midterm elections.

But that's only half the story. To transform voter disappointment into significant losses for the president's party, voters must blame not just the president himself but the president's party as a whole. And for this to happen, congressional races must be nationalized--that is, the opposition party must turn 435 local races into a single referendum.

Yet if there's one generalization that can be made about the most recent election cycle--and probably about the 1998 cycle as well--it's that individual House races were fought on their own terms. Voters reelected nearly 98 percent of both parties' incumbents, even more than the 95 percent average of the last 40 years. Moreover, it was local rather than national issues that defined the most tightly contested races. During impeachment, many in the press predicted that the GOP's assault on Bill Clinton would define Election 2000. It didn't. Instead, impeachment manager Jim Rogan's fate hinged on his Armenian-American constituents, Connecticut Democrat Sam Gejdenson went down over an obscure Indian-land issue, and Republican Mark Kirk won an open seat in suburban Chicago by focusing on local environmental problems.

Today, many predict that a backlash against Bush's tainted win could sweep Democrats into office in 2002. They're probably wrong again. For one thing, voters' memories aren't that long. For another, the sophistication of today's polling technology makes it almost impossible for either side to exploit partywide advantages. As the 2000 elections neared, for example, Democrats saw polls indicating that Republicans were vulnerable because of their opposition to prescription-drug benefits and a patients' bill of rights. And the polls were right. The problem was that Republicans saw them, too. So, rather than "stand and fight like good Reaganites," as Massachusetts Democrat Barney Frank puts it, vulnerable Republicans co-opted the issues--which localized the races all over again.

hat's more, one of the traditional causes of the midterm jinx probably won't be a factor in 2002. When a president wins by a decisive majority, he tends to drag weak candidates into office along with him--what congressional analyst Stuart Rothenberg calls "political deadwood." Not surprisingly, it's this deadwood that gets washed away when public opinion turns. (This also explains why the midterm effect is generally more pronounced in a president's second term: Second-term presidents tend to win by bigger margins, dragging even more deadwood into office along with them.)

But when a president wins narrowly, the coattail effect is next to nil. And, with no coattails, his party has few weak links to protect in the midterm election. Consider 1962. Having defeated Richard Nixon in one of the closest presidential races in history, John F. Kennedy suffered a string of foreign policy blunders and domestic defeats during his first two years in office. But in the midterm elections congressional Democrats came away virtually unscathed, losing only a single seat in the House and actually gaining seats in the Senate. Needless to say, if Kennedy's coattails were short, W.'s are nonexistent.

None of which is to say the Democrats can't win back the House in 2002. If the Republicans read a mandate into their razor-thin majorities and revive "implementation of the rest of the Contract with America," as Tom DeLay henchman John Doolittle suggested earlier this month, the Democrats might be able to renationalize the 2002 election. Ditto if there's a severe recession, which can stigmatize the party in the White House.

But, short of that, House Democrats have no real cause for optimism. And, while the media may not understand that, many Democrats themselves actually do. As one Democratic member recently told me, trying to put the best spin on a difficult situation, "I don't think anyone's walking around thinking, `My God, there's never going to be a Democratic Congress in my lifetime again.'" If that's optimism, what does pessimism sound like?

Inaugural security tight Protesters claim plans overboard

By Richard Willing
USA TODAY

WASHINGTON -- People attending Saturday's inaugural parade will face unprecedented security precautions, including sidewalk checkpoints that will control access to the parade route itself.

Metropolitan police say the heightened security is necessary to prevent protesters from disrupting George W. Bush's parade down Pennsylvania Avenue to the White House, an event expected to be attended by more than 500,000 people.

But protest organizers charge that police are overstating security concerns to discourage protesters and as a pretext for dealing with them harshly.

They say ''tens of thousands'' of demonstrators advocating both voting reform or a variety of left-wing causes are expected to attend the parade.

D.C. police arrested 600 protesters who attempted to obstruct a meeting of the World Bank last April, and say many are expected to return for the Bush inaugural.

''A significant majority (in April) were peaceful, but some of the tactics they used were a cause for concern,'' says Charles Ramsey, Washington's chief of police.

''They say they are going to be peaceful, but that does not necessarily mean they'll be lawful,'' Ramsey says. ''We have to be aware of that.''

Among D.C.'s security precautions:

* At least nine security checkpoints on sidewalks near the parade route. Police will stand every 6 to 8 feet along the route. Metal detectors will not be used routinely, but police say that people passing through the checkpoints will be subject to searches.

* Beefing up the city's 3,600-member police force with reinforcements from at least four suburban departments.

* Limiting large groups of protesters to two sites on the mile-long parade route. The National Park Service has granted permits to half a dozen groups to protest along the route. There are also permits for rallies elsewhere in the city. Groups of fewer than 25 can protest without a permit.

* Banning stilts and large poles used to carry signs. Police say such items can be converted to weapons.

More than four dozen large ''protest puppets,'' some of them 15 feet high, were confiscated by police during the protests near the World Bank's Washington headquarters in April. Police considered the poles used to hold the puppets aloft to be potential weapons.

Police and protest leaders are discussing whether puppets will be permitted at the Bush inaugural.

''We're trying to be as flexible as we can,'' Ramsey says. ''But everyone has the right to enjoy the inauguration of the 43rd president.''

Protest organizers accuse police of overstating the threat.

''It's a pretext and nothing but a pretext,'' says Brian Becker, co-director of the New York-based International Action Center. ''This is not about protecting national security but preventing lawful demonstrators from acting.''

re: Bad Guy Alert : Scott D Macheichok, KG9HY , an Amateur Extra.
==========

Hi All,

Want to warn you about Scott D Macheichok, KG9HY , an Amateur Extra.

I bought a Yaesu VX-1R from him back in Mid - June, 2000. He sent me the radio after some delay and the package was missing a speaker mike and leather case. He has promised over and over and over again to send me the missing items, up till now, Jan 14, 2001, I still have not received it. Below is his last promise and I still receive nothing but lies. My follow up email
were un-answered, of course.

I thought others should know about this and be careful about dealing with this Amateur Extra, Scott D Macheichok, KG9HY . I am not an Amateur Extra but this is definitely a bad apple. I know my loss was not much at all and I thought about forgetting it. But imagine if a guy can cheat you for a lousy $40, he is likely to cheat you for more if there is a chance. BE CAREFUL.

The excuse for what precipitated was the fear of child abuse. The facts of the matter were the ATF/Fbi needed a stalking horse and a grandstand play to gather greater funding. Period. You think it was purely coincidental that that media was called etc for the initial Waco assault, just when it was funding time again? If you do, I have a bridge to sell you.

The "One" used in my message was not a prefix to a continued discussion, but used as a shortened ID for you (One37) in the absense of a available name. I would have used, "I don't buy it, Bob," but you have not provided a name like "Bob."

> But to blatantly come out with such hositility?

Take the chip off your shoulder and read those messages again, One. There is no hostility in my messages. I simply gave you the reality of the situation. I don't know you, and most ham operators don't know you, so none of us really care if you get a ham license or not. So you're wasting your time crying in this newsgroup about anti-CB sentiment in ham radio, and your threat to not become a ham because of it.

And, like I said, ham radio is not welfare, so I'm not obligated to elmer (help) you. A ham operator helps another person because that ham operator likes that person, so he is willing to take time out of his life to help that person.

Again, why should I like you, or take time out of my life to help you, when you sit there trashing my hobby, the people in my hobby, and hold me responsible for everything negative any ham operator has ever said or done to you?

As I said in those messages, the decision to become a ham should not be based on what we think, or on some negative feedback you get from other hams. The decision to become a ham is a personal one, and should be based on what ham radio offers you personally.

If you want someone to elmer you, then approach that person with a much more positive attitude than you've shown in this newsgroup. Again, he does not have to help you, so appreciate his willingness to be a friend.

And, please, if you're going to go to a ham radio fest, exam, anywhere else you associate mainly with hams, than drop the CB nonsense. It is nothing to do with the situation.

Now, I've given you good advice in the three messages I've written to you. It is up to you how you take that advice (ignore it as hostile or learn what you can from it). But, again, like I've said all along, that is entirely up to you (not me, not some ham operator that said something

negative to you, not the people in this newsgroup, and not anyone else - you).

No, we don't "know" that, Conrad. Since "most" Americans did not even vote, we have no idea what "most" Americans want. One thing is certain though, neither candadate (Gore or Bush) won the support of the majority of America's eligible voters. However, it is useless to speculate about what those non-voters want since Bush did win enough support to carry the electoral college and Gore didn't.

No, this is based on system of both rewards and punishment. Under the old liberal system, the rewards (recreation, education, job training, early release, and so on) were there without the punishment (the prisoner got out ofter a fixed number of years, no matter how he behaved, or what he did, in prison).

This system demands personal responsibility (the prisoner is expected to make attempts at reform, behave in prison, and so forth) and punishment (increased time for bad behavior, and so on). The reward part is not what the prisoner gets in prison (recreation, education, job training, family visits, and so on), but is the act of getting out of prison itself (hince the addition of making life even tougher in prison - less activities, less recreation, less family visits, etc).

The major difference in this system, as opposed to the old liberal system, is the idea of placing all the responsibility of reform directly on the prisoner, not the state or the people. My previous message describes that process, so I won't repeat it here.

It is also slightly different from the present "get tough" system, in that emphasis is placed on reform, with no release until sufficient reform is accomplished.

Well, I simply don't see how you can come to the conclusion that we're trading investment in education with investment in internment. Every state in this country has increased spending for public education dramatically over the last twenty years. In addition, every state has placed considerable emphasis on better teachers, smaller classrooms, and very expensive equipment (a single computer costs what ten movie projectors did when I went to school). And more kids are able to attend college today than ever before.

In fact, if you want to make an association between school and prisons, one could easily make the argument that all this increased spending on education was actually counter-productive - at the same time we were spending money like crazy on schools, the crime rates, both for adults and children, were climbing.

> We have filled our prisons not with violent
> offenders, but mostly with people convicted
> of drug traffic offenses, as those 'crimes'
> were the first to get the mandatory sentencing
> 'reform', and continue to require longer
> sentences than violent offenses.

We have never locked people up solely for violent crimes. Prisons are there for anyone who breaks the law, including those who violate the drug laws. In addition, when you look at overall damage to this society, one could argue that drug related crimes are at least as bad as violent crime.

Wrong. The 'traditional' system that mandatory minimums replaced was
almost exactly the system described. Prisoners earned 'time off for
good behavior' or lost it based on their behavior in prison. In all
systems except for the California indeterminate sentencing system,
prisoners eventually get out if and when they server their entire
sentence.

N9NWO wrote:
>
> Except that prisons are not even for punishment.

Oh, I agree the present system is not punishment. Heck, recruits going through Basic Training in the military have it worse than the most hardened criminals in our prisons today. That's why I went on to talk about prison reform.

> I agree with the idea. I have suggested a similar

> a class C offence if convicted of it.

Well, its a little early to get into the details. My goal was to just promote the basic idea. Once the idea becomes more widely accepted, and people have had time to think about it, then it will be time to discuss the details. However, it is nice to see that others are thinking along the same lines.

> Once a person convicted of a felony then he has to

> If he is clean for 5 years afterwards then he can
> go thru citizenship classes and take the test that
> naturalized citizens do.

Doesn't a felon already lose these (guns, voting, etc) under the present system?

The citizenship aspect is certainly new to me though. I'm not entirely sure I want to start messing around with citizenship. Some people, in the past, have advocated military service as the sole means of obtaining full citizenship as an adult. If we start stripping citizenship from anybody, it would only make such ideas more acceptable.

Furthermore, I would not like to see citizenship defined as something that can be removed so easily by government through laws. That would only further redefine the relationship between the people and government (the ideal of the people over government versus government over the people).

> What we are trying to do in my state is to force the
> communities to have work release programs for the
> last six months of the offenders term.

I have absolutely no problem with that. My goal is to change the preconditions for release, not the methods of release once those preconditions are met. In fact, I could see how many prisoners would benefit from a work release program. Anything would be better than just suddenly dumping them on the street (with expired driver's license, no place to live, and so forth).

> The secret to a well run prison is that the guards
> treat the prisoners in a fair and consistant manner.

> problems are do the fact that guards don't obey the
> rules anymore than the offenders do.

I think any major prison reform is automatically going to change the situation for the guards. My system favors less interaction between the guards and prisoners (the result of less free time outside the cell for recreation, visits, and so forth). As a result of that less interaction, the number of guards might be able to be reduced (hopefully getting rid of the worst guards).

Before you defame this guy publicly:

1. Did the deal include those items or did you ask for them later
2. Are these items considered accessories or standard pieces of the
unit

Any deal one makes sight unseen always has risk. The worst case is where
you send the money and the equipment is always being shipped tomorrow!

To some, yes. But not all. I don't think, by comparison, that the
right is nearly as monolithic on gun rights as people suppose. Didn't
Reagan eventually come out in favor of the Brady Bill? And G HW Bush
resign from the NRA after Gordon Liddy started advocating shooting
"jack-booted stormtroopers" [ie, federal agents]?

Shhhhhhhhhhh - can't let things like that out in the regular news stream. How could the Black Caucus or any other left wing extremist group have any right to complain if facts like those are brought out? This reality must be hidden and counter attacked immediately or otherwise the truth might be a popular belief, Sharpton, Jackson, and all the others will be out of a job for the next 8 years if it is revealed Bush got the popular vote... and you wouldn't want to see them on welfare would you?

I guess the sarcastic nature did not come through as I had hoped.
If God were such a boon to the liberal agenda, why are 99% of them trying to remove Him from of everything? No prayer in schools, no 10 commandments, abortion runs rampant, etc. I really don't think God wants His name attached to such blasphemous activity!

Bush Sr. is an idiot on domestic affairs. This is typical of his
mis-reading of the American people....not understanding that the
phrase "jack-booted stormtroopers" is is a reference ONLY to
cops who routinely violate the law, particularly constitutional rights
of the citizens...the same rights which they took an oath to uphold
and protect.

Any friends of G6CQF who might not yet know, please be advised that he sadly died, unexpectedly, yesterday (15/01/01).

"G6" was well known within the radio and TV broadcast industry, as well as the hi-fi, video, and consumer electronics industry and will be sadly missed for his professional attitude and general in-depth knowledge on all things electronic.

For more info, please email timom@breathemail.net

Please forgive the posting of this to various forums - G6CQF had a widespread circle of friends in the UK and abroad - some of whom would not yet be aware of his passing.

T..

> Is the Pope the de facto ruler of America?

Yes, he is. That is why this country outlaws all abortions and all contraception. That is why we have forgiven our debtors. That is why there are so many new Catholic schools and churches. That is why prayer in public schools is not only allowed but encouraged. That is why education is taught from a high moral perspective and history is interpreted as the fight between good and evil. That is why we have our ultimate political example of Catholic morality, Senator Kennedy.

Got it?

For those who get their shorts all knotted up about CB lingo on the ham bands, here is an excerpt from a book written 60 years ago by Clinton DeSoto.

"Among radio amateurs there is a genuine brotherhood and informal camaraderie. Everyone is called by his "handle" -- his first name or nickname. The president of the Chicago Stock Exchange and the mechanic in a Birmingham garage are just "Paul" and "Joe" when they meet on the air."

73, de Hans, K0HB

Yes there are. Bad law.
They do. Real law.
It is not.

> And it is every citizens duty to enforce the law.

Absolutely wrong. No citizen has any "duty" to enforce any law
and cannot be lawfully compelled as such.

A citizen may enforce any constitutional law and he may
refuse any unconstitutional law.

And a jury of citizens can nullify a law.

I hope you don't go about telling people that you are conservative.

Personally, I think that all this other stuff (callbooks, etc.) that VE's are supposed to accept as proof of a grandfathered license is wrong. However, as a VE myself, we have to take it, especially since the FCC said so.

The FCC rules do indicate that generally, ALL radio stations (amateur or not) are supposed to maintain "station records." Now, granted that at one time, that included such things a a contact log (no longer required) and other things, in my opinion, it still includes a LICENSE HISTORY. Therefore, if one threw out his/her old, expired license, tough. The licensee did NOT comply with the recordkeeping requirements.

Of course, I do make an exception for those who suffered some sort of casualty (such as fire, etc.), but not for losing the license while moving or other loss due to neglect.

"You want the upgrade? Why didn't you keep your proof (your old, grandfathered license)? Oh, you didn't. Too bad; you lose - go take the test."

I'm not saying that the FCC's decision on this wasn't bad. However, it does foster some noncompliance.

Where can I find some wide braided copper grounding wire? I have been to HRO, local electronics companies, electrical supply companies etc. and can't find any 3/4 inch or 1 inch wide stuff. I found one place that has 1/2 inch wide braided copper, but I have to buy a minimum of 200 feet. I need about 20 feet. This is for grounding a mobile HF rig to get rid of RFI and to ground a rig for my shack. Where do you buy this stuff? Ken

Ken,

I have had good luck using the copper braid from RG8/U coax. Just carefully remove the outer black insulation and then slide off the braided sheath. It works great for an RF ground.

Nice try, Hans, but no cigar.

When DeSoto wrote that, the term "handle" was common slang for "name",
usally one's familiar first name. It wasn't even radio slang.

CB radio changed that. A cb "handle" is an nickname adopted as a
disguise identifier. The practice started back when cbers were supposed
to get FCC permits and use callsigns. Handles were used instead of
callsigns to hide cbers' real identity, and to hide the fact that many
hadn't bothered to even get a callsign. Completely against the rules.
Eventually the practice became so common that the FCC gave up on
licensing cbers.

The meaning of the word has changed completely since DeSoto wrote the
quote. Lots of other words have been redefined over time. Back in
DeSoto's time, a "computer" was a person, not a machine.

Ken,
Rather than use braid as a ground strap, use a copper
strap instead. You can find copper 'flashing' at hard-
ware stores, lumber yards, etc. There are a couple of good
reasons to do so. Braid, especially if exposed to weather,
will gradually be 'eaten' up by road salts, polution, etc.
The 'flashing' will tarnish (no big deal) but seldom gets
'eaten up'. It's a better RF path to boot.
'Doc
PS - The strap doesn't cost like braid either!

Of course it was "radio slang" -- otherwise why did DeSoto (in
explaining ham radio) take pains to define the term to the lay reader.

Nice try, but no cigar. Good luck on this one now!

However, as a
> VE myself, we have to take it, especially since the FCC said so.

You can even utilize the Internet to verify the license claim directly
online. If you have access at the test site. (VE Manual, Eigth Ed.
p.40) If you don't have access you can issue two CSCE's for any
successful exams...credit only to the applicant, the second non-
seperated one to the ARRL who will hold it and varify it. (ibid.)

> The FCC rules do indicate that generally, ALL radio stations (amateur
or not)

I seem to remember you could write to the FCC and get confirmation of a
previously-held license.

Hmmm..most people don't keep good records. The IRS only says to keep
records for them for a relatively short time.

The term "troll" usually has some pretty negative implications. Do you believe that this post was intended only to goad people into arguing with each other for the amusement of the poster?

I believe that Hans posted it because it was a neat piece of information that has relevance that may just stop one tiny bit of the arguing we do here.

Hans, please find another tidbit to use to try to convince people not to argue over insignificant details like 11-meter ops using the term "handle" instead of name. :-)

Although anyone may purchase our export radios, our radios are intended for use by licensed amateur radio operators on the 10 meter band, or for use outside of the USA and Canada. It may be unlawful in your country to operate these radios within the frequencies that these units are capable of being used. Please check your local regulations. We assume no responsibilities for any unlicensed use of these units.

Well, as A liberal, more a libertarian or independent, I think you've
got it wrong. All liberals do-not bow when Al Sharpton let's a fart or
were happy about Senor Clinton's little extra marital affair.
What the issue is and YOU conservatives distort it for your own agenda,
is Christain faith, i.e. the Bible is NOT the religion of all Americans.
We have the right of worship and the right NOT TO.
I haven't seen any church closings lately or the FCC putting any of
those fire and brimstone shortwave pocket picking preachers off the air.
Quite the contrary.
As for abortion.. I'm opposed to it, but not because of a religious
doctrine. Basically I say, why is it murder to strangle an infant after
birth, but perfectly OK to crush its skull, inside the womb?
Seems bizarre doesn't it?
And why do abortions take place? Because somebody wasn't being
reponsible with sex!!
Now, I'm a liberal ? Do I sound like one ?
Well, I think Bubba Bush will be the worst president we've had in 40
years.. but I could be wrong.

You're so right! I recall hams using handle before CB was popular.
In fact that term was stolen from ham lingo.
Apparently some of the non-old timers, who were not around in the 1960s,
aren't aware Handle was in common useage.

I did hear somebody say 10-4 the other day on 40, and quite frankly
thats not from CB either.. a stolen product. The COPS have this as a
part of their 10- code.. I am told.. and have had for decades.

In 1961, when I got on the air. CB was in its infancy. Handle was in
common usage on the ham bands, it meant your first name. What the
cbers did with it...I don't give a rip.

You got it right. I'm sure your just trying to be nice. But the basic
fact is CB stole most, if not all, of their proceedures and pro-words
from either Ham, public service, or commercial service radio services.

Message-ID: <d439b14a80e5eae610525f93cbcf8a83@anon.xg.nu>
Source record: 95324

...and now the laws as they currently exist:

Selling ANY RADIO capable of transmitting below 26.965Mhz
or above 27.405Mhz is illegal if sold to a person not
holding a valid HAM license.

Selling ANY CB RADIO capable of transmitting with excessive
power over 5 watts to ANY person is illegal.

Selling ANY Amplifier capable of increasing output of any
radio signal to ANY person not holding a valid HAM license
is illegal.

Export Radios can use any disclaimer putting the burden
of illegality on the user, but the FCC does not. The FCC
puts the burden on the seller.

If bought, the burden of illegality will now fall on BOTH
parties. One for selling and the other for possession and
not using. Possession is illegal and use is assumed.

I have no problem paying a fee.... but i was suprised tonight to learn that
i had to
pay the $10 fee for EACH exam i took. I upgraded to general, and had
intentions
of attempting the extra class exam.... but when i found out it would cost me
an
additional $10 i figured i'd wait until next month when i could be
reasonably sure
that i'd pass with ease.

It was obvious at the time that the CBers got it from us. Just
as they got their mutilated "10" codes from the police community.

The "country" and "good buddy" lingo came from an individual in
the Ozarks who was on the air some 20+ hours a day in the late
60s and actually talked like that as a regular thing. We used to
hear him very plainly at the monitoring stations in California.

The VEC fee is a session fee which means you can take as many exams as you like at a single examination session for one $10 fee. If a VE is charging the $10 fee per element at the same exam session, he needs to re-read his VE manual.

I believe that it was a democratic congressman from Michigan
who first called the ATF "jack-booted thugs" because of their
tactics. The ATF and DEA are considered to be rogue agencies
by the US Marshals, FBI and Secret Service. It has been said
that individuals who can't make it into the FBI or Secret Service
often get hired by the ATF or DEA. We had our court house
bombed a few years back. FBI and ATF investigated. The FBI
agents would not talk to nor even look at the ATF agents.

What needs to happen is to merge the 44 law enforcement agencies
at the federal level into three agencies. No law enforcement agency
should make policy and no agency that makes regulations should
have law enforcement power. The Secret Service should enforce
all tax, banking and security laws. Merge the LEOs of Customs,
IRS, ATF and Postal Inspectors in the Secret Service. Merge
the FBI into the US Marshals as the CID of the Marshals service.
Then merge Capital Police, GSA police, park rangers, DEA, INS
enforcement and such into the Marshals. Put Border Partol under
the Army and let DoD have enforcement of US laws, borders out.

Sorry, Hans, that's not anywhere near good enough. Didn't you read the rest of my post?

The term used to be an innocent bit of jargon. CBers transformed it into something else. "Handle" no longer means "name" at all, but an on-air persona used to avoid compliance with FCC rules. They were specifically invented by cbers in order to flagrantly break the law and avoid getting caught. That's why hams don't like such talk. We have nothing to hide.

Those are all great reasons to use strapping, Doc, but keeping
in mind "skin effect," wouldn't we want to choose the conductor
with the greatest surface area? Braid wins that race.

If that is permissable evidently they have changed the rules. When I
ran a VE team ('85 thru '93) the rules said one fee for all tests taken
at that session. Later it was deemed permissable to charge an additional
fee for a retest of a failed element at the same session, but we never
did.

Handles (plural) were, but the name of the term was (and is) ham radio
jargon.

> That's why hams don't like such talk. We have nothing to hide.

Not even close. The only hams who don't like it are the ones that assume
"handle" came from CB. You have it backwards.

> 73 de Jim, N2EY (real name and real call, used in accordance with all
> applicable rules & regs)

Jim, when were you first licensed? I'm guessing (operative word here;
based on your age) that it was in the 70s at the earliest, and by then
the CB craze was in full swing. It was subsequent to that that some hams
came to think there was something wrong with "handle", and almost all of
them were licensed from the 70s on.

I wrote an essay on that subject when I first started hearing people
complain about handle and claim that Q signals were invented for CW.
Those attitudes are a function of when one came into the hobby. I'll be
glad to reproduce it, if you're interested.

What Hans and Dan are saying, and what I've said for a long time
(licensd 1963), is that "handle" was (and as far as I'm concerned, is)
legitimate ham jargon for name. I couldn't care less what the CBers did
with it. Never was on CB, never will be.

Now, "personal," and "all the good numbers" are a different story.

So, sorry, no cigar, and I did read all of your post(s).

Unless the ARRL has changed, it's not quite a session fee. It is insofar
as you can take one of every element for one fee. Retakes of failed
elements are subject to another fee.

The buyer could be on thin ice if they are of the typical "10-4 good buddy" types. Since the possession carries with it the presumption of use I doubt that the FCC would buy the old "I am studying for my ticket" excuse if the buyer were to get himself into trouble with them... especially if the radio and/or amp are working on 11 meters.

Source record: 95244

Actually, braided strap is not a good ground, unless it's tinned, then it's not very flexible. Copper strap is a much better ground than copper braid. One of the biggest problems with the braid is that the individual strands become oxidized and corroded, and create all sorts of problems, not to mention no conduction between the strands. When that happens, the braid does not win the race for skin effect. They do, however, make tinned braided copper for grounding purposes.

The ARRL handbook recommends copper straps and says that it can be found in hardware stores as flashing.

Hi Adam,
I have an FT767GX CAT here in the shack, but I don't use it all that
often since acquiring an FT1000MP. I haven't found any forums or
newsgroups specifically for the 767, but it does get brought up as a
topic from time to time in more widely focused ham radio groups. There
are modification files at QRZ.COM, and elsewhere, too. Is there
anything specific that you were trying to get info on for this radio?

Jeffrey Herman,
If the ground strap is used where it will be subjected
to the weather, no, the braid would not be a very good
ground strap. The progressive deterioration of the braid
would mean that you have progressively less ground. If you
really want to have some fun, try finding ~that~ when
trouble-shooting a mobile. I think I'd rather have a constant
ground, even if it's slightly less 'good' as another. Besides,
the difference in efficiency between braid and a copper strap
is negligible.
'Doc

Yeah, that does get really tiring after a while. It is always one of two things: "it was someone else's fault", or "we were wronged". I may sound condescending here, but my daughter stopped using those excuses when she was 11 after she realized it sounded... well... stupid.

Talked to a young fella on the repeater the other day who introduced himself by saying "my first personal is Jim and you're my first contact, QSL?".

He seemed like a nice sort, delighted that he had just received his shiny new call sign, and was anxious to make some new friends. Kinda sounded like I felt when I put my new call sign on the air the first time way back when, except probably brighter, cuz Jim is one of those young computer jocks. Me, I still got problems with the LL scale on my Pickett slide rule. Yep, I think Jim sounded brighter than me, quick to catch on to things.

But I don't think Jim will be back on the repeater. Before I had a chance to really get to know much about Jim, or even wrangle an invite to lunch, another station, with an impressive "senior" call sign joined the contact, flashed his shiny Radio Cop badge, and proceeded to issue Jim a "verbal speeding ticket" for improper lingo on the radio. "Radio Cop" said the term "personal" (and for that matter "handle") were unwelcome in ham radio, and that Q-signals were not to be used on VHF voice. Just generally made my newfound friend feel like an unwashed interloper. (Gosh, I've been saying "handle" since I was a conditional class. Slow to catch on, you know.)

Now I should point out that "Radio Cop" took pains to appear very well meaning. Didn't use any bad words that I noticed, was quite polite, even seemed like he was trying to be "helpful." In other words, he thought he was doing Jim a favor by pointing out his transgression from our sacred Amateur Radio way of doing things. I think Jim felt just the same way I did back in a new school in third grade when the well meaning teacher pointed out that "we don't keep our pencil behind our ear in this room." Sure enough, I looked around and none of my new classmates had pencils behind their ears. Sure was embarrassing, and at that moment I really wished I was back with my good old buddies in second grade. Now, if I'd been allowed to hang out a couple of days, I'm sure I would have learned how to properly stow my pencil. And if Jim would have hung around a couple of days on our repeater I just bet he would have noticed that his lingo, perhaps learned in another radio service, was a bit out of place, and pretty soon Jim would sound "just

like the rest of us." Like I said, he seemed pretty bright to me, quick to catch on to things.

"Radio Cop", you have kept our hobby uncorrupted. I heard Jim down around 27 Mhz this morning, and saw his ad on eBay trying to sell his barely used 2-meter HT. I'm gonna miss my new friend Jim, because I think I could have learned something from him. Maybe you could have also.

Like I said, he seemed pretty bright to me, quick to catch on to things. What do think it was that he caught on to about us from "Radio Cop".

Anyone can purchase a ham transceiver, no license or proof thereof is needed. I have never heard of anyone getting into trouble for doing so. The original post stated that the selling of ANY RADIO capable of transmitting outside of the cb band is illegal unless the buyer holds a ham license (see below). That is not true and the buyer has nothing to fear as long as he doesn't transmit until the proper license is obtained.

The term "handle" for name has long been used in ham radio, long before cb. When the cbers' picked it up, and like everything the cbers' touch make crap out of it, the hams began to abandoned the term as hams do not want to sound like a cber.

I think a paraphrase of the classic speech by Edgar Friendly is in order here.

I'm the enemy, 'cause I like to think, I like to point out the "not so obvious", I like to send "didahhhhhhhhhhdit", I like to champion the little guy, and I like to deflate the pompous and self-righteous granfalloons(*). I'm into freedom of speech and freedom of choice. I'm the kind of guy who likes to sit in a greasy spoon and wonder, "Gee! Should I have the T-bone steak or the jumbo rack of barbeque ribs with a side order of gravy fries?" I want high cholesterol. I want to eat bacon, and butter, and buckets of cheese, ok? I want to smoke a Cuban cigar the size of Cinncinnatti in the non-smoking section. Why? Because I suddenly might feel the need to, ok pal? I've seen your future, know what it is? It's a 43-year-old virtual-virgin sitting around in his beige pajamas drinking a banana-broccoli shake, singing "I'd like to be an Oscar-Mayer weiner."

73, Hans, K0HB

Sorry Hans, if he can't take some criticism then he needs to go be a
priest or something. Thats the trouble today. No one wants to pay
their way anymore. Heck when I first got on AM phone I was made to
feel 2 inches high. You know, not enough audio, your too week, give me
a call when you grow up youngun.. etc.

It didn't run me off, I just dug in and LEARNED.

The ARRL VE book, said, 1 fee for each test session, and it covered as many elements as the test taker wanted to take, or the VE have. But it is a new fee to retake a failed element. So as long as you keep passing you can do as many elements as you can pass for 1 fee. Remember though that most VE sessions have only 2 or 3 versions of a test element available and if you flunk all that they have, your done for that session.

What's interesting to me, is the "vintage" of those "outraged". With a few exceptions they are usually not "old timers" or "newbies" but rather those licensed in the 70's through about 1988 or so. These are the ones who posture about "purity of the ham race" and look down their nose at any ham who "isn't like them". They are, by and large, products of the incentive licensing system with it's fragmentation of the hobby into exclusive ghettos, reeking of "status" and "rank" and "I can beep faster than you can beep".

When you and I got into this hobby, you got no special call sign, no special status, no special band segments, the callbook didn't show your class, and nobody could poke around the QRZ.COM website to check your "status". All of us, >ALL OF US<, exuberantly played in the ether as equals, and nobody gave a rip if you were a Conditional, General, Advanced, or Extra. You were a ham - PERIOD! I think that's what makes us old-timers more accepting of those who "don't act just like us".

73, Hans, K0HB

You cannot trust ANY one to keep their feelings out of the decision
making process. Hell, look at Renos long record of failures to
enforce, failures to investigate, and the stigma of being swayed by
political party considerations. At least Ashcroft has character and
integrity.. a quality sadly lacking in most Democratic appointed AGs
over the years, from Bobby Kennedy forwards.

>
> His agenda WILL be applied! Just as he would protect our gun rights with is
>position, he can also "Devastate" the Human Rights Laws. We can not afford
>to turn "That Man" loose with that much legal power. Nobody will come out a
>winner; nobody!

Oh really? Please cite in his past record, exactly where he has a
history of devastating anything? It appears that his record on civil
rights is quite good, his appointment of minorities into government
functions is screamingly better than the current (Clinton)
administrations. I wonder where all the emotional knee jerking in the
left, is being generated? Obviously its not somewhere supported by
history or fact. I note all your "Can", but dont see any cites for
"Will". You "can" be killed by a falling airliner, but figure the
likely hood. "Will" you be? Ashcroft has enforced many laws and
policies he found personally incorrect or repugnant. No one can seem
to cite any cases where he refused to do so based on his views.

It would appear to me...that the Left is nervous as hell, because for once, an AG will be in postilion, that has demonstrated that he Will not be swayed from his duties of enforcing the Rule of Law, no matter his personal views. Damned shame we couldn't say the same about Reno et al. One can imagine the paper shredders will running day and night in Democrats offices when Ashcroft is appointed. 40 yrs of Democrat "good old boy" back scratching and looking the other way will come to a screeching halt. And long long over due.

It's been a few years, but when I made General, I took the Tech,
General, and 13 WPM code at the same time for one fee ($6.45).
At another session I took the Extra and the 20 WPM code tests
again for one fee ($6.45). At the time, I was under the impression
that this fee went directly to the ARRL, to cover the cost
of the testing materials that they supplied. That ment that the
club, which was running the VE session, was really charging
nothing for their time.

Was I correct in my reasoning? Aren't they, the club, also allowed
to charge a small fee to cover their expenses?

>
>Was I correct in my reasoning? Aren't they, the club, also allowed
>to charge a small fee to cover their expenses?

The ARRL VEC allows the VEs to retain a portion of the fee (up to $4 of
the current $10 fee, which is per session, not per exam) to cover
expenses if they wish to do so (this wasn't originally the case). The

ARRL requires that records of such expenses be kept, although the FCC no longer requires reporting. The FCC also no longer specifies the maximum amount which can be charged (there never has been a minimum). ARRL/VEC is charging $10, but others may charge more or less; the marketplace will probably decide.

From the ARRL letter, December 15, 2000:
==>FCC OPENS DOOR TO INCREASED TEST FEES FOR 2001

The FCC has suspended its regulatory limit on the reimbursement fee for Amateur Radio examinations, and the ARRL VEC says a new $10 test fee will go into effect January 1. An FCC Public Notice released December 4 explained that the Commission did not plan to announce a maximum reimbursement fee for 2001 since the requirement to do so no longer appears in the Communications Act.

For now, the FCC says, it will suspend enforcement of the fee provision, ?97.527(b), which continues to appear in the FCC rules. Some, if not all, of the nation's other Volunteer Examiner Coordinators are expected to follow suit, although at least one VEC charges no test fee whatsoever.

ARRL VEC Manager Bart Jahnke, W9JJ, says the ARRL VEC's current fee of $6.65 was based on the provision in the Communications Act, adopted in 1984, that established a $4 cap on reimbursement of out-of-pocket costs with an annual adjustment based on the Consumer Price Index. The new, higher fee reflects the fact that the ARRL VEC is doing more of the work on behalf of the FCC than was originally envisioned when the provision was included in the Communications Act. That effort includes data entry for all new and upgrade license applications once done by FCC staffers.

ARRL VEC volunteer examiners will continue to charge applicants $6.65 through the end of 2000.

Because of the perceived source. What some folks are afraid of is that the cb culture of not caring about rules violations will be imported too.
>
> What's interesting to me, is the "vintage" of those "outraged". With

Leaves me out. 1967 vintage. I'm not "outraged", just trying to explain why others don't like "handle" and "first personal" and such. Is that unacceptable in today's electropolitically correct ham radio?

> These are
> the ones who posture about "purity of the ham race" and look down

Horsefeathers, Hans. Class, status and rank have always existed.

> When you and I got into this hobby, you got no special call sign, no
> special status, no special band segments, the callbook didn't show
> your
> class, and nobody could poke around the QRZ.COM website to check
> your "status".

Not true. Novices got special callsigns that told the world we were beginners. Old timers had the coveted 1X2 calls. You could often tell a ham's "vintage" by the callsign sequence. W3YIK was a lot older vintage than WA3IYC.

> All of us, >ALL OF US<, exuberantly played in the ether
> as equals, and nobody gave a rip if you were a Conditional, General,
> Advanced, or Extra. You were a ham - PERIOD!

Tell that to "no kids, no lids, no space cadets, Class A operators only". (kids referred to young people and Novices, lids referred to Generals and Conditionals, space cadets referred to SSB ops). From what the folks who were there tell me, and what I've read, the SSB/AM battles made this code/nocode stuff look tame.

> I think that's what
> makes us old-timers more accepting of those who "don't act just like
> us".

Guess that includes me - I'm an old-timer. Old enough to know that correcting people on the air about stuff often backfires. Better to just set the example.

However, that still doesn't mean that the government (FCC) should accomodate NON-COMPLIANCE, especially just because most people are in such a state. As I said, if they didn't keep their expired licenses as part of their station records (and didn't keep it due to negligence), they shouldn't be allowed to benefit from such. I don't recall seeing the Communications Act being amended so that amateurs need keep NO records whatsoever.

With the IRS an the tax code, it's different: Time frames are suggested because there are periods of limitation on certain actions. I see nothing in 47 USC or 47 CFR with such periods (and assume that for criminal actions, the general period of 5 years fron 18 USC carries over).

At one time that was completely correct. I ran a DeVry/Great Lakes core from 1984 (before League involvement, by the way) through 1993. At first the local core didn't get anything, but eventually DeVry/Great Lakes started a core reimbursement progam. By the time they folded and we changed over to ARRL, the League was reimbursing up to $4 to the local core.

> That ment that the club, which was running the VE session, was
> really charging nothing for their time.

Also correct. That's why we are called "volunteer examiners." My club, however, covered all my costs for materials since I prepared all of our written and code exam materials and purchased or prepared other materials such as blank paper, pencils, 610s, etc.

> Was I correct in my reasoning? Aren't they, the club, also allowed
> to charge a small fee to cover their expenses?

Not at the VE Core level. Only at the VEC (coordinator) level. And when a VEC does allow expenses to be covered by a core, it's always as a rebate from the VEC (I speak from DeVry/Great Lakes and ARRL experience only).

I'm sorry you had that experience. I can't answer whether a VEC can instruct their cores to charge for each element. I can say that ARRL does not, nor did DeVry/Great Lakes when I was with them.

Who was the VEC for your exam? I have my own suspicion, and if I'm correct it's further confirmation of why I will never have anything to do with him.

Irrespective of who it is, it's an example of poor training of the VE team. That's one of the things that should have been basic in their instruction. I suggest you write a letter of complaint to the VEC.

Doesn't matter whether it is or not in the CB bands. Has nothing to do
with ham radio.

> >> "Handle" no longer means "name" at all, but an on-air persona

Handle has never been "redefined" in the ham bands. Some people's
perceptions of what it might mean in some other service have absolutely
no bearing on its legitimacy in the Amateur Service.

> >> They were specifically invented by cbers in order to flagrantly
break

meaning.

In the CB bands.

> Here's the bio:

Appreciated. And Bravo Zulu, too.

> >I wrote an essay on that subject when I first started hearing people

>
> Q signals WERE created for Morse radio operation. They date from the
early days.

No, Q signals were created for radio operation. It is an interesting
circumstance that Morse was the only mode around at the time, but why
should they not have been allowed to transition to voice along with
other procedures.

Better quit using "73" then. By your analysis, that was "created" for
landline telegraph operation.

Nope, still is.

But their objection is clearly misplaced.

> >Now, "personal," and "all the good numbers" are a different story.

> Why?

Same reason you (incorrectly) abhor "handle"; the service from which
they came (and about that, there's no dispute).

(Published 8-92)
From the Tower
by N9AKE

It's only a hobby. It's only a hobby. It's only a hobby.

As a professional communicator, I listen to some of our amateur communications and shake my head. Because I work with a handbook full of phraseology guidelines and examples, it is not too difficult to figure out how to say things. Also, in the process of learning my job, one finds out very quickly whether one is communicating effectively or not. In amateur radio, however, the only communications standards we have are common sense and convention, and we don't get much feedback.

It is interesting to note that some of the "guidelines" published periodically reflect the time period that their author entered the hobby. For example, when I came in nearly 30 years ago, "handle" was the accepted pseudonym for name. Now, with many people having come from the CB, the connotation of "handle" moves them to eschew it and prosletyze the use of "name" instead.

Similarly, in the early days of FM, many of the original users came from experience in commercial radio, and had never been on HF. They counseled heavily against "calling CQ" on FM. The convention they adopted was to announce they were listening (aren't we all?) or say "QRZ" (yuck) or "10-8" (double yuck). However, it is difficult for me to get excited over "73's" and "N9XXX for ID" as the potential downfall of amateur radio as we know it.

Why have some people decided that "Q" signals are only for CW? Wasn't it a logical extension in the early days of phone to bring traditional amateur phrases from one mode to the other? Why have some decided to change that? I may not like the sound of some of the stuff I hear, such as "QSL" at the beginning of every transmission, but I have to recognize that there is no standard, and no training school out there to turn us into professional communicators.

Moreover, do we need one? Why should we conform to "standard phraseology" just to talk to our buddy across town? Probably no reason. See the opening paragraph. But what happens when the next disaster comes along.

Next time you work a public service event, take a moment to listen and you will hear lack of understanding of net protocol, a lack of net discipline, and a lack of knowledge of efficient, effective communications. It's not that we do a bad job. It should be obvious, however, that we could improve our efficiency, and thus our effectiveness.

It strikes me that maybe importing a professional to a club meeting to discuss communications might be worthwhile. Not to harangue about whether "73's" is correct or not. But to discuss how to be effective in our communications. Not necessarily during drive time, but at public service nets and events, as that is where we train to work on emergencies. And emergencies, ladies and gentlemen, is where we pay the freight for all that we have in amateur radio.

In our club, we probably have heard enough presentations from N9AKE on diverse subjects. In fact, the club had to send him to England in May to have a meeting without some kind of announcement from him. However, I think it's time to develop a dog-and-pony show about effective communications and take it on the road. I'm going to do it. Eventually, it will include real life communications examples that will vividly illustrate what I am talking about. Let your club officers know if you want it at your club.

(N9AKE is an Air Traffic Controller, and has done extensive antenna support structure work in the area, thus he legitimately speaks "From the Tower.")

I guess it's a matter of semantics. Retests of failed elements are, for
paperwork purposes, considered separate sessions (or sittings).

The ARRL/VE Manual says "The ARRL/VEC charges $6.65 per candidate, per
session." Of course, that was published before the fee increased to $10.

The original poster said they were going to charge for each exam (element),
which is inappropriate.

Mumia Abu-Jamal, famed as either a cop-killer or a symbol of
American racial persecution, depending on which side you
believe. For more info from one of those two points of view, try:

Lots of folks have gone to prison on murder convictions because the cops accidentally killed someone while responding to the original felony call. Any death that occurs during the commission of a felony (and Koresh was certainly committing a felony) is automatically first-degree murder.

Excellent post. I agree with you 100 percent. I have been playing
the "devil's advocate" in a number of my posts, to find out just how
far the nouveau right-wingers will go in supporting white, religious
cop-killers while damning black, leftist cop-killers as "monsters" (a
term which has been applied repeatedly to Mumia Abu-Jamal). Their
doubler standard is a sight to behold.

SInce you've already posted an article in which you identify your
group by saying "we ARE the police and the military ...", may I
assume you are offering here to shoot your way into our houses?

Of course we remember the 60's and 70's. We remember incidents
like the assault on MOVE headquarters in Philadelphia. We just
wonder why you support white, religious, right-wing cop-killers while
damning non-white, left-wing cop-killers.

In article <943boh$pc1$1@news.hawaii.edu>,
jeffreyh@Hawaii.Edu (Jeffrey Herman) wrote:

> Where did "slider" originate, Dan?

Now we're getting into an area I can speak about.

As any self respecting Chicagoan (and the environs) knows, a slider is a small square hamburger with a pickle and onions that is only purchased and eaten in quantities of 5 or more. Fries and onion rings are NOT optional, they must be consumed as well for the full effect. And that effect probably is what gives them the name "sliders."

Oh, I guess their real name is White Castle. I don't think that's a pronouncable word, however. Everytime I've heard someone try, it comes out "sliders." TAKE HOME A SACKFUL is their slogan.

Anyone having to live somewhere besides Chicago (and the environs) is comforted by the fact that they are available frozen in many other areas of the country.

So do several departments in the western suburbs of Chicago
(combination of 10 sigs and Codes 1-7).

In Metro Dade County, Florida (Miami), they use Q signals.......on
voice.

Harrumph.

For some reason, while I was trying out my Heil audio system on my Radio Shack HTX-10, it did something to the audio in it and it will not send audio with the carrier. It will transmit a carrier without problem, just no audio. I bought a new one - so i'm selling the defective one *hoping* for $60, but will consider all reasonable offers.

Dear all,

This might be slightly off topic, although this was the closest newsgroup I could find so I hope you guys don't mind this. I'm trying to find out about legality of institutional use of cell phone jammer. I have been told FCC bans any device that is meant for malicious intereference with authorized communication device. I am almost certain that individuals are not allowed to operate them and I'm pretty sure schools aren't allowed either. For somereason our school have them and we can't use cellphones. If it isn't legal can someone provide me with the FCC statue regarding this? The FCC statue would be a great help in fighting against schools as if they are in violation of FCC law they'd have to stop using it, which means we can use cellphones.

I forget how many 10 codes there are/were on the "official list" but I think it's around to thirty of 'em. 40? Looney-tunes. All they do is tax memories and generate mistakes and confusion when you least needed either.

>
In the mid-70s I set up a passive CB-equipped neighborhood Townwatch security association and created a completly non-standard 10 code list of about 12 codes which still works well. Those codes don't go any farther than routine operations, mostly to avoid spilling the beans about when the patrols are or are not "on the street" or where they are, etc. All other comms are plain language per all police operations in the Philly area I've heard. I've noticed that the locals are also packing cell phones these days, that oughta cut down on problems with the scanner nuts.

The California power crisis is not due to what we have been led to
believe. Instead, it is the fault of the internet.

You who are reading this helped cause the problem, as CNN has documented
at http://www.cnn.com/2001/TECH/computing/01/17/internet.energy.idg

Shame on all of you!

I'll never forget my worst incident with a "radio cop." I had encouraged my wife to get her license. Since she knew absolutely nothing about radio before studying for that exam, and had studied for three weeks to pass the exam, that license was hard earned and she was darn proud of it.

Anyway, part way through our second conversation on the radio, the "radio cop" made his grand entrance. The previous night, my wife had problems getting her radio set up to work correctly (it was my old radio - purchased because it was loaded with features, not because it was necessarily easy to use). So our conversation was somewhat limited that night.

However, the next night, I had set the radio up to default to an easier mode (preset memory channels), so that we could concentrait more on conversation (figuring she would eventually learn the radio eventually on her own).

Anyway, that night, we tried several of the memory channels (each set to a different repeater), trying to figure out which repeater would be best for her to talk on during her trip to and from work each day (which repeater had coverage of the whole trip distance).

Finally, we settled on two memory channels - the main one and a backup (which would be set to memory channels one and two on the radio). As we were discussing this, a male voice boomed in with the words, "frequencies, not channels." Believing that someone else might want to use the repeater, I told my wife to hold on a second and invited the person to go ahead.

At that point, the "radio cop" started lecturing my wife about how we use frequencies instead of channels in ham radio and further suggested that she should also stop using CB slang (she had said "roger" earlier).

When he was finished, I explained that we were referring to the memory channels on her radio, that she was new to ham radio, that my goal was just to get her talking on the radio at this point, and that little issues like that could be corrected later.

In response, he pointed out that radio memories were nothing more than memorized frequencies, that I should refer to the frequencies memorized

instead of the memory channels, that I was failing my wife by not teaching her properly from the beginning, and then turned back to lecture my wife some more, ending with a suggestion that she find someone better than me to teach her in the future if she wants to learn how to do things correctly.

After he was finished, I thanked him for his input and tried to contact my wife again. She simply said that she was almost home (she wasn't) and that she would talk to me when she got there.

It took me almost four days to get her to talk on the radio again, and then only on a frequency that I was able to assure her was not likely monitored by anyone else. And, dispite our almost nightly conversations, it was going to be another five months before she would be confident enough to talk to someone else. In fact, to this day (almost two years later), she has only talked to two people, besides myself, on the radio. And her enthusiasm about, and pride in, radio are long gone.

In the end, the "radio cop" did a good job of defending "proper" tradition on the radio. But in doing so, he ruined my wife's enjoyment of this hobby (and, for all practical purposes, ended her hobby before it even got started). And that is why I'll never forget that "radio cop."

Jumping on the guy right outa the box wasn't cool, I agree. But if he took such offense to well meaning, polite help, I think maybe something else was going on.
>
>Like I said, he seemed pretty bright to me, quick to catch on to
>things. What do think it was that he caught on to about us from "Radio
>Cop".

I wonder how "quick" somebody is who jumps right in without listening for a while, and whose whole opinion about the ARS is based on one self-appointed "Radio Cop".

What's the message here, Hans? Should we just accept anything anybody does on the air unless it's a clear violation of FCC rules? How about bandplan and gentleman's agreement violations? How about off-color stories and jokes? Offensive ethnic/racist/sexist stuff on the air, hiding under the banner of "free speech"?

If anyone can purchase an export radio, then you are illegally selling them.
Read the law.

I think they're headquartered in Ohio somewhere.

I lived on sliders (12 cents each in those days) all the way through college. We have 3 or 4 "slider stores" here in the Mpls/St.Paul area, and about once-a-month several hams in the area get together for "gut-bomb" luncheon on the tailgate in their parking lot.

There are two kinds of people in the world.... those who like sliders and admit to it, and those who do not admit to it.

The Roof of the Universe. And in the Last Days,
when the Great Frisbee that shineth in the sky
hath gone out, then shalt the Almighty Thrower
ascend the Ladder of Life and collect the souls
of those who have flown free, and take them The
Eternal Park, where we shall sail upon the Spring
Breezes for ever and ever, and be Fetched by the
Holy Dog. Amen.

ARRL is a radio club out East, not a regulatory agency. I'm a
long time member. They make a lot of recommendations. I agree
with some, disagree with others. I double checked Part 97, and
nowhere does it oblige me to follow recommendations of radio
clubs -- how could I possibly know what every radio club recommends
anyhow? What if some other radio club has a conflicting
recommendation -- heavens-to-Betsy, you could be up all night
just figuring out whether or not to say "QRZ - Is this frequency
in use?"! QSL?

Agree. Sorry JC but you kids should have better things to do at school than yap on a cell phone, like paying attention in class, studying and actually trying to learn something maybe? More power to the school.

Does this mean that we now have to ask other hams for
"contact-confirmation postcards"?
